- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Right AIMS Module Reset
    - 2) CPM/GG(M011) in Right AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (4) Do this check of the wiring:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J410-B and J420-B (WDM 31-41-15):

#### J410-B

pin D8 ..... pin D8  
pin E3 ..... pin E3

#### J420-B

EFFECTIVITY

## 31-44 TASK 816

D633W103-ARO

Page 229  
Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (d) Do a wiring check between these pins of the IOM connectors J410-A and J420-A(WDM 31-41-15):

| J410-A | J420-A |
|--------|--------|
| pin D2 | pin D2 |

- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (5) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
- (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Right AIMS Module Reset
    - 2) CPM/GG(M011) in Right AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 817. Left AIMS (M003, M004) Program Pin Problem - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50081.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then continue.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.
- (3) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Replace the IOM(M004) in the left AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Left AIMS Module Reset
    - 2) CPM/GG(M011) in Left AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (4) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J240-B and J250-B(WDM 31-41-15):

|               |               |
|---------------|---------------|
| <b>J240-B</b> | <b>J250-B</b> |
| pin C8        | pin C8        |
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (5) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Left AIMS Module Reset
    - 2) CPM/GG(M011) in Left AIMS Module Reset

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 818. Right AIMS (M003, M004) Program Pin Problem - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50082.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then continue.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.
- (3) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the right AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Replace the IOM(M004) in the right AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
- (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
- (b) Select the reset for the appropriate module:
- 1) CPM/GG(M010) in Right AIMS Module Reset
- 2) CPM/GG(M011) in Right AIMS Module Reset

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (4) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J240-B and J250-B(WDM 31-41-15):

|                  |               |
|------------------|---------------|
| <b>J240-B</b>    | <b>J250-B</b> |
| pin D8 . . . . . | pin D8        |
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (5) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Right AIMS Module Reset
    - 2) CPM/GG(M011) in Right AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 819. Left AIMS Program Pin Configuration Problem - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-50091.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Use a maintenance access terminal (MAT) to do a cabinet reset of the left AIMS cabinet:
  - (a) Make sure that the right CMCF is in control. (The right CMCF is in control if this indication shows at the top of the fault displays: This data is from Right CMCF.)

Page 233  
Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- 1) If the left CMCF is in control, make these selections on the MAT to put the right CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO RIGHT.
- (b) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, Left AIMS Cabinet Reset.  
**NOTE:** The Left AIMS Cabinet Reset ground test must be started by the PMAT.
  - 1) If the MAT shows NOT ACTIVE for the maintenance message on the Existing Faults display (or if the message does not show), you corrected the fault.
  - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Use a maintenance access terminal (MAT) to do a check of the program pin configuration of the left AIMS cabinet:
  - (a) Make these selections on the MAT:
    - 1) ONBOARD MAINTENANCE
    - 2) LINE MAINTENANCE
    - 3) SYSTEM CONFIGURATION
    - 4) 31 AIMS - Left AIMS
    - 5) CONTINUE
  - (b) Look at the IOM Program Pins for each IOM and find those that are different from these correct values:
    - 1) IOM(M003) & (M004) in Left AIMS
      - a) BFDF-FF40-2000
    - 2) IOM(M008) & (M009) in Left AIMS
      - a) 3B7D-FFC4-8200
      - b) BB3D FF44 C200
- (3) Find the applicable wiring for the incorrect program pins and do a wiring check:
  - (a) Use the table below (Table 201to find the bit that is incorrect:
    - 1) Write the first four hex characters of the incorrect program pin value from the System Configuration display under G, H, J, and K on the "Hex is now" line.  
**NOTE:** Given the program pins in the format GHJK-LMNP-WXYZ, positions L, M, N, P, W, X, Y, and Z can be ignored for this fault isolation procedure.

**Table 201/31-44-00-993-806 Hex/Binary Values**

| POSITION         | G |   |   |   | H |   |   |   | J |   |    |    | K  |    |    |    |
|------------------|---|---|---|---|---|---|---|---|---|---|----|----|----|----|----|----|
| Hex is now       | — |   |   |   | — |   |   |   | — |   |    |    | —  |    |    |    |
| Hex should be    | — |   |   |   | — |   |   |   | — |   |    |    | —  |    |    |    |
| Binary is now    | — | — | — | — | — | — | — | — | — | — | —  | —  | —  | —  | —  | —  |
| Binary should be | — | — | — | — | — | — | — | — | — | — | —  | —  | —  | —  | —  | —  |

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Write the first four hex characters of the correct program pin value from the FIM on the "Hex should be" line.
- 3) Compare the "Hex is now" line with the "Hex should be" line and find the incorrect hex character.
- 4) Under the incorrect hex character, write the binary equivalent of the incorrect hex character on the "Binary is now" line. (Refer to the table below Table 202 for the binary equivalent of each hex character.)
- 5) Write the binary equivalent of the correct hex character on the "Binary should be" line.
- 6) Compare the binary values and find the number of the incorrect bit on the "Bit" line.

**Table 202/31-44-00-993-807 Hex to Binary Conversion**

| HEX | BINARY |
|-----|--------|
| 0   | 0000   |
| 1   | 0001   |
| 2   | 0010   |
| 3   | 0011   |
| 4   | 0100   |
| 5   | 0101   |
| 6   | 0110   |
| 7   | 0111   |
| 8   | 1000   |
| 9   | 1001   |
| A   | 1010   |
| B   | 1011   |
| C   | 1100   |
| D   | 1101   |
| E   | 1110   |
| F   | 1111   |

- (b) If IOM(M003) or IOM(M004) has incorrect program pins, find the incorrect bit in the table below (Table 203):

**Table 203/31-44-00-993-808 M003/M004 Program Pins**

| BIT | DEFINITION    | CONNECTOR | PIN | IOM(M003) | IOM(M004) |
|-----|---------------|-----------|-----|-----------|-----------|
| 1   | CABINET LEFT  | D6623     | 35  | P3B-G12   | P4B-G12   |
| 2   | CABINET RIGHT | D6623     | 40  | P3B-F12   | P4B-F12   |
| 10  | AIRFRAME 3    | D6626     | 24  | P3B-G7    | P4B-G7    |
| 11  | AIRFRAME 4    | D6626     | 26  | P3B-G8    | P4B-G8    |

- (c) If IOM(M008) or IOM(M009) has incorrect program pins, find the incorrect bit in the table below (Table 204):

- (d) Find the definition of the bit and the connectors
- (e) Remove the applicable IOM from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (f) Do a check of the program pin wiring (WDM 31-41-15).
- (g) Repair the problems that you find.
- (h) Re-install the applicable IOM in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (i) If IOM(M003) had incorrect program pins, do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
- (j) If IOM(M004) had incorrect program pins, do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
- (k) If IOM(M008) had incorrect program pins, do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
- (l) If IOM(M009) had incorrect program pins, do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
- (m) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/GG(M010) in Left AIMS Module Reset.
- (n) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/GG(M011) in Left AIMS Module Reset.
- (o) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

## 820. Right AIMS Program Pin Configuration Problem - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50092.

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 236  
Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Use a maintenance access terminal (MAT) to do a cabinet reset of the right AIMS cabinet:
  - (a) Make sure that the left CMCF is in control. (The left CMCF is in control if this indication shows at the top of the fault displays: This data is from Left CMCF.)
    - 1) If the right CMCF is in control, make these selections on the MAT to put the left CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO LEFT.
  - (b) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, Right AIMS Cabinet Reset.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message on the Existing Faults display (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Use a maintenance access terminal (MAT) to do a check of the program pin configuration of the right AIMS cabinet:
  - (a) Make these selections on the MAT:
    - 1) ONBOARD MAINTENANCE
    - 2) LINE MAINTENANCE
    - 3) SYSTEM CONFIGURATION
    - 4) 31 AIMS - Right AIMS
    - 5) CONTINUE
  - (b) Look at the IOM Program Pins for each IOM and find those that are different from these correct values:
    - 1) IOM(M003) & (M004) in Right AIMS
      - a) DFDF FF20 2000
    - 2) IOM(M008) & (M009) in Right AIMS
      - a) 5B7D FFA4 8200
      - b) DB3D FF24 C200
- (3) Find the applicable wiring for the incorrect program pins and do a wiring check:
  - (a) Use the table below (Table 205) to find the bit that is incorrect:
    - 1) Write the first four hex characters of the incorrect program pin value from the System Configuration display under G, H, J, and K on the "Hex is now" line.

**NOTE:** Given the program pins in the format GHJK-LMNP-WXYZ, positions L, M, N, P, W, X, Y, and Z can be ignored for this fault isolation procedure.

**Table 205/31-44-00-993-805 Hex/Binary Values**

## 777-200/300 FAULT ISOLATION MANUAL

**Table 205/31-44-00-993-805 Hex/Binary Values (Continued)**

|                  |         |         |           |             |
|------------------|---------|---------|-----------|-------------|
| Hex is now       | —       | —       | —         | —           |
| Hex should be    | —       | —       | —         | —           |
| Binary is now    | — — — — | — — — — | — — — —   | — — — —     |
| Binary should be | — — — — | — — — — | — — — —   | — — — —     |
| Bit              | 0 1 2 3 | 4 5 6 7 | 8 9 10 11 | 12 13 14 15 |

- 2) Write the first four hex characters of the correct program pin value from the FIM on the "Hex should be" line.
- 3) Compare the "Hex is now" line with the "Hex should be" line and find the incorrect hex character.
- 4) Under the incorrect hex character, write the binary equivalent of the incorrect hex character on the "Binary is now" line. (Refer to the table below (Table 206) for the binary equivalent of each hex character.)
- 5) Write the binary equivalent of the correct hex character on the "BINARY SHOULD BE" line.
- 6) Compare the binary values and find the number of the incorrect bit on the "BIT" line.

**Table 206/31-44-00-993-802 Hex to Binary Conversion**

| HEX | BINARY |
|-----|--------|
| 0   | 0000   |

| 3   | FLIGHT TEST   | D6710     | 44  | P8A-H17   | P9A-H17   |
| 4   | SIM/AIRPLANE  | D6710     | 45  | P8B-E2    | P9B-E2    |
| 5   | WING FOLD 1   | D6710     | 46  | P8B-E3    | P9B-E3    |
| 6   | WING FOLD 2   | D6710     | 28  | P8A-E17   | P9A-E17   |
| 7   | WING FOLD 3   | D6710     | 38  | P8A-G16   | P9A-G16   |
| 8   | AIRFRAME 1    | D6710     | 35  | P8A-G14   | P9A-G14   |
| 9   | AIRFRAME 2    | D6710     | 40  | P8A-G17   | P9A-G17   |
| 12  | ENGINE 1      | D6710     | 41  | P8A-H14   | P9A-H14   |
| 13  | ENGINE 2      | D6710     | 42  | P8A-H15   | P9A-H15   |
| 14  | ENGINE 3      | D6710     | 43  | P8A-H16   | P9A-H16   |

- (d) Find the definition of the bit and the connectors
- (e) Remove the applicable IOM from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (f) Do a check of the program pin wiring (WDM 31-41-15).
- (g) Repair the problems that you find.
- (h) Re-install the applicable IOM in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (i) If IOM(M003) had incorrect program pins, do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
- (j) If IOM(M004) had incorrect program pins, do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
- (k) If IOM(M008) had incorrect program pins, do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.

Page 239  
Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (l) If IOM(M009) had incorrect program pins, do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M009) in Right AIMS Module Reset.
- (m) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/GG(M010) in Right AIMS Module Reset.
- (n) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/GG(M011) in Right AIMS Module Reset.
- (o) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 821. AIMS-L 28V DC Hot Battery Bus Power Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50007.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P310 Standby Power Management Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31651 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31651, then do these steps (WDM 31-41-11):
    - 1) Replace this circuit breaker:

##### Standby Power Management Panel, P310

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| J          | 6          | C31651        | AIMS L      |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P310 Standby Power Management Panel.
    - (d) If there is 28V DC at terminal 2 of C31651, then continue.
  - (2) Do this repair of the wiring:
    - (a) Repair the wiring between the AIMS LRM Connector P1-C, pin A15, in the left AIMS cabinet, M31101 and the AIMS rear Connector D6631 pin 1 (SSM 31-41-10).
    - (b) If the fault is in the AIMS cabinet, replace the AIMS cabinet.

These are the tasks:  
AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,  
AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.
    - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - 1) Close the P310 Standby Power Management Panel.

## 777-200/300 FAULT ISOLATION MANUAL

- (d) If the fault continues, repair the wiring between the AIMS rear Connector D6631 pin 1 and circuit breaker C31651, terminal 2 (WDM 31-41-11).
- (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 1) Close the P310 Standby Power Management Panel.

————— **END OF TASK** —————

### 822. **AIMS-R 28V DC Hot Battery Bus Power Problems - Fault Isolation**

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-50008.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P310 Standby Power Management Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31650 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31650, then do these steps (WDM 31-41-11):
    - 1) Replace this circuit breaker:

##### **Standby Power Management Panel, P310**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| J          | 7          | C31650        | AIMS R      |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P310 Standby Power Management Panel.
    - (d) If there is 28V DC at terminal 2 of C31650, then continue.
  - (2) Do this repair of the wiring:
    - (a) Repair the wiring between the AIMS LRM Connector P1-C, pin A15, in the right AIMS cabinet, M31201 and the AIMS rear Connector D6731 pin 1 (SSM 31-41-10).
    - (b) If the fault is in the AIMS cabinet, replace the AIMS cabinet.

These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.
    - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - 1) Close the P310 Standby Power Management Panel.
    - (d) If the fault continues, repair the wiring between the AIMS rear Connector D6731 pin 1 and circuit breaker C31650, terminal 2 (WDM 31-41-11).

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Do a check for 28V DC between terminal 2 of circuit breaker C31617 and structure ground (WDM 31-41-11).
- (c) If there is not 28V DC at terminal 2 of C31617, then do these steps (WDM 31-41-11):
  - 1) Replace this circuit breaker:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 14         | C31617        | AIMS L-3    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - a) Close the P11 Overhead Circuit Breaker Panel.
  - (d) If there is 28V DC at terminal 2 of C31617, then continue.
- (2) Do this check for 28V DC at the circuit breaker:

- (a) Do a check for 28V DC between terminal 2 of circuit breaker C31619 and structure ground (WDM 31-41-11).
- (b) If there is not 28V DC at terminal 2 of C31619, then do these steps (WDM 31-41-11):
  - 1) Replace this circuit breakers

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 15         | C31619        | AIMS L-4    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - a) Close the P11 Overhead Circuit Breaker Panel.
  - (c) If there is 28V DC at terminal 2 of C31619 then continue.
- (3) Do this check of the wiring:
  - (a) Check continuity (8 ohms or less) between the AIMS LRM connector P1-C, either one of these pins G13 or H13, in the left AIMS cabinet, M31101 and the AIMS rear connector D6630 pin 3(WDM 31-41-11).
  - (b) Check continuity (8 ohms or less) between the AIMS LRM connector P2-C, either one of these pins G13 or H13, in the left AIMS cabinet, M31101 and the AIMS rear connector D6630 pin 3 (WDM 31-41-11).
  - (c) If the fault is in the AIMS cabinet, replace the AIMS cabinet.

These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.
  - (d) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 1) Close the P11 Overhead Circuit Breaker Panel.
  - (e) If the fault continues, repair the wiring between the AIMS rear Connector D6630 pin 3 and circuit breaker C31619, terminal 2 (WDM 31-41-11).
  - (f) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

D633W103-ARO

Page 245  
Sep 05/2017

777-200/300  
FAULT ISOLATION MANUAL

- 1) Close the P11 Overhead Circuit Breaker Panel.

————— END OF TASK —————

**826. AIMS-R 28V DC Right Bus Power Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-50028.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31618 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31618, then do these steps (WDM 31-41-11):
    - 1) Replace this circuit breaker:

**Overhead Circuit Breaker Panel, P11**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 14         | C31618        | AIMS R-3    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P11 Overhead Circuit Breaker Panel.
    - (d) If there is 28V DC at terminal 2 of C31618, then continue.
  - (2) Do this check for 28V DC at the circuit breaker:
    - (a) Do a check for 28V DC between terminal 2 of circuit breaker C31620 and structure ground (WDM 31-41-11).
    - (b) If there is not 28V DC at terminal 2 of C31620, then do these steps (WDM 31-41-11):
      - 1) Replace this circuit breaker:

**Overhead Circuit Breaker Panel, P11**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 15         | C31620        | AIMS R-4    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P11 Overhead Circuit Breaker Panel.
    - (c) If there is 28V DC at terminal 2 of C31620 then continue.
  - (3) Do this check of the wiring:
    - (a) Check the wiring between the AIMS LRM Connector P1-C, pin A13, in the right AIMS cabinet, M31201 and the AIMS rear Connector D6730 pin 3 (SSM 31-41-10).

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Check the wiring between the AIMS LRM Connector P2-C, pin A13, in the right AIMS cabinet, M31201 and the AIMS rear Connector D6730 pin 3 (SSM 31-41-10).
- (c) If the fault is in the AIMS cabinet, replace the AIMS cabinet.  
These are the tasks:  
AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,  
AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.
- (d) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 1) Close the P11 Overhead Circuit Breaker Panel.
- (e) If the fault continues, repair the wiring between the AIMS rear Connector D6730 pin 3 and circuit breaker C31620, terminal 2 (WDM 31-41-11).
- (f) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 1) Close the P11 Overhead Circuit Breaker Panel.

————— END OF TASK —————

### 827. Left AIMS CPM/Comm(M001) Module Internal Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51011, 31-51111, 31-51141, 31-51201.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/Comm(M001) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 828. Right AIMS CPM/Comm(M001) Module Internal Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51012, 31-51112, 31-51142, 31-51202.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/Comm(M001) in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

**FAULT ISOLATION MANUAL**

**829. Left CMCF Internal Software Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-51113.

**B. Fault Isolation Procedure**

- (1) Make these selections on the MAT to make sure the right CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.
- (a) If the display shows that the left CMCF is in control, select SWITCH TO RIGHT.
- (b) If the display shows that the right CMCF is in control, then select GO BACK.
- (2) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.
- NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.
- NOTE: The reset erases the fault history data from the left CMCF. The right CMCF will automatically send a copy of its fault history data to the left CMCF.
- (3) Stop for 5 minutes while the right CMCF sends a copy of its fault history data to the left CMCF.
- NOTE: You must stop for 5 minutes to make sure that all the fault history data goes to the left CMCF. There is no indication that tells you when to continue.
- (4) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

**830. Right CMCF Internal Software Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-51114.

**B. Fault Isolation Procedure**

- (1) Make these selections on the MAT to make sure the left CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.
- (a) If the display shows that the right CMCF is in control, select SWITCH TO LEFT.
- (b) If the display shows that the left CMCF is in control, then select GO BACK.
- (2) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
- NOTE: The reset erases the fault history data from the right CMCF. The left CMCF will automatically send a copy of its fault history data to the right CMCF.
- (3) Stop for 5 minutes while the left CMCF sends a copy of its fault history data to the right CMCF.
- NOTE: You must stop for 5 minutes to make sure that all the fault history data goes to the right CMCF. There is no indication that tells you when to continue.
- (4) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

**831. Left AIMS CPM/Comm(M001) Internal S/W Problems - Fault Isolation**

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

- (1) Make these selections on the MAT to make sure the right CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.

NOTE: You must reset the CPM/Comm from the off-side CMC.

- (a) If the display shows that the left CMCF is in control, select SWITCH TO RIGHT.
  - (b) If the display shows that the right CMCF is in control, then select GO BACK.
- (2) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.  
NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.
  - (3) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 832. Right AIMS CPM/Comm(M001) Internal S/W Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51144, 31-51204.

#### B. Fault Isolation Procedure

- (1) Make these selections on the MAT to make sure the right CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.

NOTE: You must reset the CPM/Comm from the off-side CMC.

- (a) If the display shows that the left CMCF is in control, select SWITCH TO RIGHT.
  - (b) If the display shows that the right CMCF is in control, then select GO BACK.
- (2) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
  - (3) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 833. Left AIMS CPM/ACMF(M002) or CPM/STD(002) Module Internal Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51021, 31-51341, 31-51401.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/STD(M002) in the left AIMS cabinet.  
These are the tasks:  
Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,  
Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.
- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 834. Right AIMS DCGF or FDO Internal Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51022, 31-51342, 31-51402.

**777-200/300  
FAULT ISOLATION MANUAL**

**B. Fault Isolation Procedure**

- (1) Replace the CPM/STD (M002) in the right AIMS cabinet.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**835. Left AIMS CPM/ACMF(M002) or CPM/STD(M002) Internal S/W Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51343, 31-51403.

**B. Fault Isolation Procedure**

- (1) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/STD(M002) in Left AIMS Module Reset.
- (2) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

**836. Right AIMS CPM/Basic(M002) or CPM/STD(M002) Internal S/W Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51344, 31-51404.

**B. Fault Isolation Procedure**

- (1) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/STD(M002) in Right AIMS Module Reset.
- (2) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

**837. Left AIMS CPM/GG(M010) Module Internal Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51531, 31-51601.

**B. Fault Isolation Procedure**

- (1) Replace the CPM/GG(M010) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

### 853. LRMs in AIMS-L 28V DC Hot Battery Bus Power Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51107, 31-51307, 31-51507, 31-51707, 31-52107, 31-54107, 31-56107, 31-58107.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the applicable LRM in the left AIMS cabinet.

- (a) CPM/Comm (M001).

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.

- (b) CPM/STD (M002).
  - (c) IOM (M003, M004, M008, or M009).

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (d) CPM/GG (M010, M011).

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - (f) If the MAT shows ACTIVE for the maintenance message, then continue.
  - (2) Do this check for 28V DC at the circuit breaker:
    - (a) Open the P310 Standby Power Management Panel.

EFFECTIVITY  
ARO ALL

## 31-44 TASKS 852-853

D633W103-ARO

Page 255  
Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Do a check for 28V DC between terminal 2 of circuit breaker C31651 and structure ground (WDM 31-41-11).
- (c) If there is not 28V DC at terminal 2 of C31651, then do these steps (WDM 31-41-11):
  - 1) Replace this circuit breaker:

### Standby Power Management Panel, P310

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| J          | 6          | C31651        | AIMS L      |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - a) Close the P310 Standby Power Management Panel.

### ARO 003 POST SB 777-31-0227 AND PRE SB 777-31-0263 AND PRE SB 777-31-0264 AND PRE SB 777-31-0218

- b) Enter the airplane tail number on the System Information page to establish Controller-Pilot Data Link Communications (CPDLC).
  - <1> Make these selections on the MFD to access the System Information page.
    - <a> Press COMM on the DSP to display the FDCF MAIN MENU on the MFD.
    - <b> Press MANAGER on the FDCF MAIN MENU to display the FDCF MANAGER MENU.
    - <c> Press SYSTEM INFORMATION on the FDCF MANAGER MENU to display the SYSTEM INFORMATION Sub-menu.
  - <2> Enter the airplane tail number.

**NOTE:** The tail number is lost and needs to be re-entered to re-establish CPDLC if the AIMS L or AIMS R circuit breakers are cycled, the AIMS CPM/COMM module is re-racked, new CMCF AMI software is loaded, or new COMM software is loaded. The tail number must be entered before engine start, since the field is inhibited after engine start.

### ARO ALL

- (d) If there is 28V DC at terminal 2 of C31651, then continue.
- (3) Do this repair of the wiring:
  - (a) In the list below, find the connector number and pin numbers in the left AIMS cabinet (SSM 31-41-10):

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

### 854. LRMs in AIMS-R 28V DC Hot Battery Bus Power Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51108, 31-51308, 31-51508, 31-51708, 31-52108, 31-54108, 31-56108, 31-58108.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the applicable LRM in the right AIMS cabinet:
  - (a) CPM/Comm (M001).

These are the tasks:  
Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802,  
Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.
  - (b) CPM/STD (M002).

These are the tasks:  
Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,  
Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.
  - (c) IOM (M003, M004, M008, or M009).

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (d) CPM/GG (M010, M011).

These are the tasks:  
Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,  
Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (f) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P310 Standby Power Management Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31650 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31650, then do these steps (WDM 31-41-11):

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 258  
Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- 1) Replace this circuit breaker:

### Standby Power Management Panel, P310

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| J          | 7          | C31650        | AIMS R      |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- a) Close the P310 Standby Power Management Panel.

### ARO 003 POST SB 777-31-0227 AND PRE SB 777-31-0263 AND PRE SB 777-31-0264 AND PRE SB 777-31-0218

- b) Enter the airplane tail number on the System Information page to establish Controller-Pilot Data Link Communications (CPDLC).

<1> Make these selections on the MFD to access the System Information page.

<a> Press COMM on the DSP to display the FDCF MAIN MENU on the MFD.

<b> Press MANAGER on the FDCF MAIN MENU to display the FDCF MANAGER MENU.

<c> Press SYSTEM INFORMATION on the FDCF MANAGER MENU to display the SYSTEM INFORMATION Sub-menu.

<2> Enter the airplane tail number.

NOTE: The tail number is lost and needs to be re-entered to re-establish CPDLC if the AIMS L or AIMS R circuit breakers are cycled, the AIMS CPM/COMM module is re-racked, new CMCf AMI software is loaded, or new COMM software is loaded. The tail number must be entered before engine start, since the field is inhibited after engine start.

### ARO ALL

- (d) If there is 28V DC at terminal 2 of C31650, then continue.
- (3) Do this repair of the wiring:
  - (a) In the list below, find the connector number and pin numbers in the right AIMS cabinet (SSM 31-41-10):

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

### 855. LRMs in AIMS-L 28V DC Capt Flt Inst Bus-A Power Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51117, 31-51317, 31-52117, 31-54117.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the applicable LRM in the left AIMS cabinet.
  - (a) CPM/Comm (M001).

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.
  - (b) CPM/STD (M002).

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.
  - (c) IOM (M003 or M004).

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (d) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31609 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31609, then do these steps:
    - 1) Replace this circuit breaker, C31609 (WDM 31-41-11):

Replace this circuit breaker:

| Overhead Circuit Breaker Panel, P11 |            |               |             |
|-------------------------------------|------------|---------------|-------------|
| <u>Row</u>                          | <u>Col</u> | <u>Number</u> | <u>Name</u> |
| B                                   | 12         | C31609        | AIMS L-1    |
    - 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P11 Overhead Circuit Breaker Panel.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the applicable LRM in the right AIMS cabinet:
  - (a) CPM/Comm (M001).

These are the tasks:  
Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802,  
Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.
  - (b) CPM/STD(M002).

These are the tasks:  
Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,  
Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.
  - (c) IOM (M003 or M004).

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (d) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31610 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31610, then do these steps (WDM 31-41-11):
    - 1) Replace this circuit breaker:

| Row | Col | Number | Name     |
|-----|-----|--------|----------|
| F   | 12  | C31610 | AIMS R-1 |
    - 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P11 Overhead Circuit Breaker Panel.
  - (d) If there is 28V DC at terminal 2 of C31610, then continue.
- (3) Replace the AIMS cabinet.

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 1) Close the P11 Overhead Circuit Breaker Panel.
  - (b) If the fault continues, repair the wiring between the right AIMS rear connector D6701, pin 1 and circuit breaker C31610, terminal 2 (WDM 31-41-11).

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 1) Replace this circuit breaker:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 14         | C31617        | AIMS L-3    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - a) Close the P11 Overhead Circuit Breaker Panel.
- (d) If there is 28V DC at terminal 2 of C31617, then continue.
- (3) Do this repair of the wiring:
  - (a) In the list below, find the connector number and pin numbers in the left AIMS cabinet (SSM 31-41-10):

### Left AIMS Cabinet

|                            | LRM Connector                 | Rear Connector        |
|----------------------------|-------------------------------|-----------------------|
| <b>CPM/COMM<br/>(M001)</b> | <b>P1-C</b><br>pin A13 .....  | <b>D6630</b><br>pin 1 |
| <b>IOM (M003)</b>          | <b>P3-C</b><br>pin A13 .....  | <b>D6630</b><br>pin 1 |
| <b>IOM (M008)</b>          | <b>P8-C</b><br>pin A13 .....  | <b>D6630</b><br>pin 1 |
| <b>CPM/GG<br/>(M010)</b>   | <b>P10-C</b><br>pin A13 ..... | <b>D6630</b><br>pin 1 |

- (b) If the fault is in the AIMS cabinet, replace the AIMS cabinet.

These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.
- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 1) Close the P11 Overhead Circuit Breaker Panel.
- (d) If the fault continues, repair the wiring between the left AIMS rear connector D6630, pin 1 and circuit breaker C31617, terminal 2 (WDM 31-41-11).
- (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 1) Close the P11 Overhead Circuit Breaker Panel.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the applicable LRM in the right AIMS cabinet:
  - (a) CPM/Comm (M001).

These are the tasks:  
Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802,  
Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.
  - (b) IOM (M003 or M008).

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (c) CPM/GG (M010).

These are the tasks:  
Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,  
Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.
  - (d) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31618 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31618, then do these steps (WDM 31-41-11):
    - 1) Replace this circuit breaker:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 14         | C31618        | AIMS R-3    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - a) Close the P11 Overhead Circuit Breaker Panel.
  - (d) If there is 28V DC at terminal 2 of C31618, then continue.
- (3) Do this repair of the wiring:

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.

NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.

- 1) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- 2) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Remove and re-install the CPM/Comm(M001) in the left AIMS cabinet. These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) Replace the CPM/Comm(M001) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

## 864. CPM/Comm(M001) In AIMS-R Internal Latched Fault - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51014.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do these steps:
  - (a) Make these selections on the MAT to make sure the left CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.  
NOTE: You must reset the CPM/Comm from the off-side CMCF.
    - 1) If the display shows that the right CMCF is in control, select SWITCH TO LEFT.
    - 2) If the display shows that the left CMCF is in control, then select GO BACK.
  - (b) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 1) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- 2) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Remove and re-install the CPM/Comm(M001) in the right AIMS cabinet. These are the tasks:  
Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,  
Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) Replace the CPM/Comm(M001) in the right AIMS cabinet.  
These are the tasks:  
Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,  
Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 865. CPM/ACMF(M002) or CPM/STD(M002) In AIMS-L Internal Latched Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51023.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/ACMF(M002) or CPM/STD(M002) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Remove and re-install the CPM/STD(M002) in the left AIMS cabinet.  
These are the tasks:  
Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,  
Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

## 882. AIMS Internal Fault - Fault Isolation

### A. Fault Isolation Procedure

- (1) For each LRM in the applicable AIMS cabinet, do these steps until you find the LRM that has a fault:

- (a) Do the ground test on the MAT for the applicable LRM:

- 1) 31-AIMS - Left AIMS, System Test

- a) CPM/Comm(M001) in Left AIMS
- b) CPM/STD (M002) in Left AIMS
- c) IOM(M003) in Left AIMS
- d) IOM(M004) in Left AIMS
- e) IOM(M008) in Left AIMS
- f) IOM(M009) in Left AIMS
- g) CPM/GG(M010) in Left AIMS
- h) CPM/GG(M011) in Left AIMS

- 2) 31-AIMS - Right AIMS, System Test

- a) CPM/Comm(M001) in Right AIMS
- b) CPM/STD (M002) in Right AIMS
- c) IOM(M003) in Right AIMS
- d) IOM(M004) in Right AIMS
- e) IOM(M008) in Right AIMS
- f) IOM(M009) in Right AIMS
- g) CPM/GG(M010) in Right AIMS
- h) CPM/GG(M011) in Right AIMS

- (b) If PASSED shows adjacent to TEST CONDITION on the MAT, then do the ground test for the next module.

- (c) If FAILED shows adjacent to TEST CONDITION on the MAT, then do these steps:

- 1) Replace the applicable LRM in the AIMS cabinet:

- a) IOM.

These are the tasks:

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

b) CPM/Comm.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

c) CPM/GG.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

d) CPM/STD.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- 2) If the MAT dialog box for AIMS Internal Fault does not show on the MAT, then you corrected the fault.

————— END OF TASK —————

### 883. Right AIMS CPM/Basic or CPM/ACMF or CPM/STD Internal Problems - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Replace the CPM/STD (M002) in the right AIMS cabinet.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/STD (M002) in Right AIMS Module Reset.
- (b) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 884. AIMS-L 28V DC (C31609) Left Capt Flt Inst Bus Power Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50417.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

EFFECTIVITY  
ARO ALL

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31609 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31609, then do these steps:
    - 1) Replace this circuit breaker:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P11 Overhead Circuit Breaker Panel.
    - (d) If there is 28V DC at terminal 2 of C31609, then continue.
  - (2) Do this check for 28V DC at the circuit breaker:
    - (a) Do a check for 28V DC between terminal 2 of circuit breaker C31611 and structure ground (WDM 31-41-11).
    - (b) If there is not 28V DC at terminal 2 of C31611, then do these steps:
      - 1) Replace this circuit breaker:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 13         | C31611        | AIMS L-2    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P11 Overhead Circuit Breaker Panel.
    - (c) If there is 28V DC at terminal 2 of C31611, then continue.
  - (3) Do this check of the wiring:
    - (a) Open these circuit breakers and install safety tags:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |

- (b) Check the wiring between the AIMS rear Connector D6601 pin 1 and circuit breaker C31609, terminal 2 (WDM 31-41-11).
      - (c) Check the wiring between the AIMS rear Connector D6601 pin 3 and circuit breaker C31611, terminal 2 (WDM 31-41-11).
      - (d) If you find a problem with the wiring, then do these steps:
        - 1) Repair the wiring.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |

- 3) Close the P11 Overhead Circuit Breaker Panel.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
- (4) Replace the AIMS cabinet.

These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- 1) Close the P11 Overhead Circuit Breaker Panel.

### — END OF TASK —

## 885. AIMS-R 28V DC (C31610) Bus Power Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50418.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31610 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31610, then do these steps:
    - 1) Replace this circuit breaker:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - a) Close the P11 Overhead Circuit Breaker Panel.
- (d) If there is 28V DC at terminal 2 of C31610, then continue.
- (2) Do this check for 28V DC at the circuit breaker:

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Do a check for 28V DC between terminal 2 of circuit breaker C31612 and structure ground (WDM 31-41-11).
- (b) If there is not 28V DC at terminal 2 of C31612, then do these steps:
  - 1) Replace this circuit breaker:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 13         | C31612        | AIMS R-2    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - a) Close the P11 Overhead Circuit Breaker Panel.
  - (c) If there is 28V DC at terminal 2 of C31612, then continue.
- (3) Do this check of the wiring:
  - (a) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |

- (b) Check the wiring between the AIMS rear Connector D6701 pin 1 and circuit breaker C31610, terminal 2 (WDM 31-41-11).
  - (c) Check the wiring between the AIMS rear Connector D6701 pin 3 and circuit breaker C31612, terminal 2 (WDM 31-41-11).
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |

- 3) Close the P11 Overhead Circuit Breaker Panel.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
- (4) Replace the AIMS cabinet.

These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 1) Close the P11 Overhead Circuit Breaker Panel.

## 777-200/300 FAULT ISOLATION MANUAL

### 886. AIMS-L 28V DC (C31617) Bus Power Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50427.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31617 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31617, then do these steps:

- 1) Replace this circuit breaker:

##### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 14         | C31617        | AIMS L-3    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - a) Close the P11 Overhead Circuit Breaker Panel.
  - (d) If there is 28V DC at terminal 2 of C31617, then continue.
- (2) Do this check for 28V DC at the circuit breaker:
  - (a) Do a check for 28V DC between terminal 2 of circuit breaker C31619 and structure ground (WDM 31-41-11).
  - (b) If there is not 28V DC at terminal 2 of C31619, then do these steps:
    - 1) Replace this circuit breaker:

##### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 15         | C31619        | AIMS L-4    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - a) Close the P11 Overhead Circuit Breaker Panel.
  - (c) If there is 28V DC at terminal 2 of C31619, then continue.
- (3) Do this check of the wiring:
  - (a) Open these circuit breakers and install safety tags:

##### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|

## 777-200/300 FAULT ISOLATION MANUAL

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - a) Close the P11 Overhead Circuit Breaker Panel.
- (c) If there is 28V DC at terminal 2 of C31609, then continue.
- (3) Do this check of the wiring:
  - (a) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |

- (b) Check the wiring between the AIMS rear Connector D6601 pin 1 and circuit breaker C31609, terminal 2 (WDM 31-41-11).
  - (c) Check the wiring between the AIMS rear Connector D6601 pin 3 and circuit breaker C31611, terminal 2 (WDM 31-41-11).
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Close these circuit breakers:
- ### Overhead Circuit Breaker Panel, P11
- | <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
- 3) Close the P11 Overhead Circuit Breaker Panel.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
  - (4) Replace the AIMS cabinet.

These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

    - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - 1) Close the P11 Overhead Circuit Breaker Panel.

————— **END OF TASK** —————

## 889. AIMS-R 28V DC (C31612) Bus Power Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50438.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31612 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31612, then do these steps:

- 1) Replace this circuit breaker:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 13         | C31612        | AIMS R-2    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - a) Close the P11 Overhead Circuit Breaker Panel.

- (d) If there is 28V DC at terminal 2 of C31612, then continue.

- (2) Do this check for 28V DC at the circuit breaker:
  - (a) Do a check for 28V DC between terminal 2 of circuit breaker C31610 and structure ground (WDM 31-41-11).
  - (b) If there is not 28V DC at terminal 2 of C31610, then do these steps:
    - 1) Replace this circuit breaker:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - a) Close the P11 Overhead Circuit Breaker Panel.

- (c) If there is 28V DC at terminal 2 of C31610, then continue.

- (3) Do this check of the wiring:
  - (a) Open these circuit breakers and install safety tags:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |

- (b) Check the wiring between the AIMS rear Connector D6701 pin 1 and circuit breaker C31610, terminal 2 (WDM 31-41-11).

### 891. **AIMS-R 28V DC (C31620) Bus Power Problems - Fault Isolation**

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-50448.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31620 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of C31620, then do these steps:
    - 1) Replace this circuit breaker, C31620 (WDM 31-41-11):

Replace this circuit breaker:

##### **Overhead Circuit Breaker Panel, P11**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 15         | C31620        | AIMS R-4    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P11 Overhead Circuit Breaker Panel.
    - (d) If there is 28V DC at terminal 2 of C31620, then continue.
  - (2) Do this check for 28V DC at the circuit breaker:
    - (a) Do a check for 28V DC between terminal 2 of circuit breaker C31618 and structure ground (WDM 31-41-11).
    - (b) If there is not 28V DC at terminal 2 of C31618, then do these steps:
      - 1) Replace this circuit breaker:

##### **Overhead Circuit Breaker Panel, P11**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 14         | C31618        | AIMS R-3    |

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P11 Overhead Circuit Breaker Panel.
    - (c) If there is 28V DC at terminal 2 of C31618, then continue.

## 777-200/300 FAULT ISOLATION MANUAL

(3) Do this check of the wiring:

(a) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

(b) Check the wiring between the AIMS rear Connector D6730 pin 1 and circuit breaker C31618, terminal 2 (WDM 31-41-11).

(c) Check the wiring between the AIMS rear Connector D6730 pin 3 and circuit breaker C31620, terminal 2 (WDM 31-41-11).

(d) If you find a problem with the wiring, then do these steps:

1) Repair the wiring.

2) Close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

3) Close the P11 Overhead Circuit Breaker Panel.

4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

(e) If you do not find a problem with the wiring, then continue.

(4) Replace the AIMS cabinet.

These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

(a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

1) Close the P11 Overhead Circuit Breaker Panel.

## 777-200/300 FAULT ISOLATION MANUAL

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 1) Close the P11 Overhead Circuit Breaker Panel.

————— **END OF TASK** —————

### 893. Right AIMS CPM/STD(M002) Module Internal Hardware Power Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-52026.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/STD(M002) in the right AIMS cabinet.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check for 28V DC at these circuit breakers:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31610, C31612, C31618, C31620 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of applicable circuit breaker, then do these steps:
    - 1) Replace the faulty circuit breaker. (WDM 31-41-11)
    - 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P11 Overhead Circuit Breaker Panel.
  - (d) If there is 28V DC at terminal 2 of the applicable circuit breaker, then continue.
- (3) Do this check of the wiring:
  - (a) Open these circuit breakers and install safety tags:

#### **Overhead Circuit Breaker Panel, P11**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- 3) Close the P11 Overhead Circuit Breaker Panel.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (g) If you do not find a problem with the wiring, then continue.
- (4) Replace the AIMS cabinet.  
These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 1) Close the P11 Overhead Circuit Breaker Panel.

————— **END OF TASK** —————

### 894. Left AIMS PCM(M450) Module Internal Power Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-54025.

#### B. Fault Isolation Procedure

- (1) Replace the PCM(M450) in the left AIMS cabinet.

These are the tasks:

Power conditioning Module (PCM) Removal, AMM TASK 31-41-06-000-801,

Power Conditioning Module (PCM) Installation, AMM TASK 31-41-06-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check for 28V DC at these circuit breakers:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 2 of circuit breaker C31609, C31611, C31617, C31619 and structure ground (WDM 31-41-11).
  - (c) If there is not 28V DC at terminal 2 of applicable circuit breaker, then do these steps:
    - 1) Replace the faulty circuit breaker. (WDM 31-41-11)
    - 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - a) Close the P11 Overhead Circuit Breaker Panel.
  - (d) If there is 28V DC at terminal 2 of the applicable circuit breaker, then continue.
- (4) Do this check of the wiring:
  - (a) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

- (b) Check the wiring between the AIMS rear Connector D6601 pin 1 and circuit breaker C31609, terminal 2 (WDM 31-41-11).
- (c) Check the wiring between the AIMS rear Connector D6601 pin 3 and circuit breaker C31611, terminal 2 (WDM 31-41-11).
- (d) Check the wiring between the AIMS rear Connector D6630 pin 1 and circuit breaker C31617, terminal 2 (WDM 31-41-11).
- (e) Check the wiring between the AIMS rear Connector D6630 pin 3 and circuit breaker C31619, terminal 2 (WDM 31-41-11).
- (f) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

- 3) Close the P11 Overhead Circuit Breaker Panel.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (g) If you do not find a problem with the wiring, then continue.
- (5) Replace the left AIMS cabinet.

## 777-200/300 FAULT ISOLATION MANUAL

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- 1) Close the P11 Overhead Circuit Breaker Panel.

————— **END OF TASK** —————

### 895. Right AIMS IOM(M004) Module Internal Power Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-54026.

#### **B. Fault Isolation Procedure**

- (1) Replace the PCM(M450) in the right AIMS cabinet.

These are the tasks:

Power conditioning Module (PCM) Removal, AMM TASK 31-41-06-000-801,

Power Conditioning Module (PCM) Installation, AMM TASK 31-41-06-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (2) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (3) Do this check for 28V DC at these circuit breakers:

- (a) Open the P11 Overhead Circuit Breaker Panel.

- (b) Do a check for 28V DC between terminal 2 of circuit breaker C31610, C31612, C31618, C31620 and structure ground (WDM 31-41-11).

- (c) If there is not 28V DC at terminal 2 of applicable circuit breaker, then do these steps:

- 1) Replace the faulty circuit breaker. (WDM 31-41-11)

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- a) Close the P11 Overhead Circuit Breaker Panel.

- (d) If there is 28V DC at terminal 2 of the applicable circuit breaker, then continue.

- (4) Do this check of the wiring:

- (a) Open these circuit breakers and install safety tags:

#### **Overhead Circuit Breaker Panel, P11**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |

- (1) Replace the CPM/COMM (M001) in the right AIMS cabinet. These are the tasks:  
Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802,  
Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Power Conditioning Module (PCM), M210, in the right AIMS cabinet. These are the tasks:  
Power conditioning Module (PCM) Removal, AMM TASK 31-41-06-000-801,  
Power Conditioning Module (PCM) Installation, AMM TASK 31-41-06-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the PCM (M450) in the right AIMS cabinet. These are the tasks:  
Power conditioning Module (PCM) Removal, AMM TASK 31-41-06-000-801,  
Power Conditioning Module (PCM) Installation, AMM TASK 31-41-06-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the right AIMS cabinet. These are the tasks:  
AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,  
AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 900. Left AIMS CPM/GG (M011) Module Internal Power Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50541.

#### B. Initial Evaluation

- (1) If the MAT shows NOT ACTIVE for the maintenance message (or the maintenance message does not show), then there was an intermittent fault.
- (2) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.

#### C. Fault Isolation Procedure

- (1) Replace the CPM/GG (M011) in the left AIMS cabinet. These are the tasks:  
Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Power Conditioning Module (PCM), M210, in the left AIMS cabinet. These are the tasks:  
Power conditioning Module (PCM) Removal, AMM TASK 31-41-06-000-801,  
Power Conditioning Module (PCM) Installation, AMM TASK 31-41-06-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the PCM (M450) in the left AIMS cabinet. These are the tasks:  
Power conditioning Module (PCM) Removal, AMM TASK 31-41-06-000-801,  
Power Conditioning Module (PCM) Installation, AMM TASK 31-41-06-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the left AIMS cabinet. These are the tasks:  
AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,  
AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

## 901. Right AIMS CPM/GG (M011) Module Internal Power Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50542.

### B. Initial Evaluation

- (1) If the MAT shows NOT ACTIVE for the maintenance message (or the maintenance message does not show), then there was an intermittent fault.
- (2) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.

### C. Fault Isolation Procedure

- (1) Replace the CPM/GG (M011) in the right AIMS cabinet. These are the tasks:  
Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,  
Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 910. DCGF in Left AIMS Internal Fault Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51331, 31-51541, 31-51741.

#### B. Initial Evaluation

- (1) If the MAT shows NOT ACTIVE for the maintenance message (or the maintenance message does not show), then there was an intermittent fault.
- (2) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.

#### C. Fault Isolation Procedure

- (1) Do the following steps to replace the applicable LRM:
  - (a) In the list below, find the AIMS LRM for the applicable maintenance message.

| MAINTENANCE MESSAGE | AIMS LRM       |
|---------------------|----------------|
| 31-51331            | L-AIMS<br>M002 |
| 31-51541            | L-AIMS<br>M010 |
| 31-51741            | L-AIMS<br>M011 |

- (2) Replace the CPM/STD (M002) in the left AIMS cabinet. These are the tasks:  
Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,  
Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the CPM/GG (M010 or M011) in the left AIMS cabinet. These are the tasks:  
Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,  
Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### 911. DCGF in Right AIMS Internal Fault Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51332, 31-51542, 31-51742.

#### B. Initial Evaluation

- (1) If the MAT shows NOT ACTIVE for the maintenance message (or the maintenance message does not show), then there was an intermittent fault.
- (2) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.

#### C. Fault Isolation Procedure

- (1) Do the following steps to replace the applicable LRM:
- (a) In the list below, find the AIMS LRM for the applicable maintenance message.

| MAINTENANCE MESSAGE | AIMS LRM       |
|---------------------|----------------|
| 31-51332            | R-AIMS<br>M002 |
| 31-51542            | R-AIMS<br>M010 |
| 31-51742            | R-AIMS<br>M011 |

- (2) Replace the CPM/STD (M002) in the right AIMS cabinet. These are the tasks:  
Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,  
Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the CPM/GG (M010 or M011) in the right AIMS cabinet. These are the tasks:  
Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,  
Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Do the following steps on the MAT to make sure the applicable LRM operates correctly.
  - (a) In the list below, find the AIMS LRM for the applicable maintenance message.

| MAINTENANCE MESSAGE | AIMS LRM       |
|---------------------|----------------|
| 31-51313            | L-AIMS<br>M002 |
| 31-51513            | L-AIMS<br>M010 |
| 31-51713            | L-AIMS<br>M011 |

- (2) Do the applicable ground test to make sure the CPM operates correctly.
  - (a) 31 AIMS - Left AIMS, System Test, CPM/STD in L AIMS Module Reset.
  - (b) 31 AIMS – Left AIMS, System Test, CPM/GG (M010 or M011) in Left AIMS Module Reset.
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do a check of the system configuration for this system on the MAT:  
31 AIMS -Left AIMS.
  - (a) Find the applicable line replaceable module (LRM) on the display and make sure that the software part numbers are correct:
    - 1) CPM/STD (M002) in Left AIMS
    - 2) CPM/GG (M010 or M011) in Left AIMS
- (4) If any of the part numbers are incorrect, install software in the applicable LRM in the left AIMS cabinet:
  - (a) To install software in the CPM/STD (M002), do this task:  
Core Processor Module/Standard Software Installation, AMM TASK 31-41-05-420-801.
  - (b) To install software in the CPM/GG (M010 or M011), do this task:  
Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

### 913. CMCF in Right AIMS Internal Software Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51314, 31-51514, 31-51714.

#### B. Initial Evaluation

- (1) If the MAT shows NOT ACTIVE for the maintenance message (or the maintenance message does not show), then there was an intermittent fault.
- (2) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.

### B. Description

- (1) The Maintenance Message shows when a fault is detected in the software of the Left IOM(M003).
- (2) The fault data is: CMCF in Left AIMS has an internal software fault.

### C. Possible Causes

- (1) Software

### D. Initial Evaluation

- (1) Do a check of the AIMS EXISTING FAULTS for ATA 31 AIMS - Left AIMS (How to Find Active or Latched Maintenance Messages in One ATA System, AMM TASK 45-10-00-740-818).
  - (a) If the Maintenance Message does not show, then the fault was intermittent.
    - 1) Corrective action for other Maintenance Messages shown is necessary.
  - (b) If the Maintenance Message shows, then do the Fault Isolation Procedure below.

### E. Fault Isolation Procedure

- (1) Make these selections on the MAT to make sure that the Right CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.  
NOTE: You must reset the IOM(M003) from the off-side CMCF and AIMS Interface.
  - (a) If the display shows that the Left CMCF is in control, select SWITCH TO RIGHT, YES, CONTINUE.
    - 1) On the MATA AIMS Main Menu, select Interface R\_AIMS.
    - 2) Select ONBOARD MAINTENANCE.
  - (b) If the display shows that the Right CMCF is in control, then select GO BACK.
    - 1) Select LINE MAINTENANCE, EXIT MAINTENANCE, Interface R\_AIMS.
    - 2) Select ONBOARD MAINTENANCE.
- (2) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
- (3) If the Maintenance Message does not show on the Ground Test Display, you corrected the fault.
  - (a) If the Maintenance Message still shows on the Ground Test Display, then continue.
- (4) Reinstall the software for the Left IOM(M003), do this task: (Input/Output Module (IOM) Software Installation, AMM TASK 31-41-11-420-806).
- (5) If the Maintenance Message does not show on the EXISTING FAULTS Display, you corrected the fault.

  - (a) If the Maintenance Message does not show, then the fault was intermittent.
    - 1) Corrective action for other Maintenance Messages shown is necessary.
  - (b) If the Maintenance Message shows, then do the Fault Isolation Procedure below.

**E. Fault Isolation Procedure**

- (1) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
- (2) If the Maintenance Message does not show on the Ground Test Display, you corrected the fault.
  - (a) If the Maintenance Message still shows on the Ground Test Display, then continue.
- (3) Reinstall the software for the Left IOM(M008), do this task: (Input/Output Module (IOM) Software Installation, AMM TASK 31-41-11-420-806).
- (4) If the Maintenance Message does not show on the EXISTING FAULTS Display, you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 801. DCMF in Left AIMS has no input from HF Communication Transceiver (left) on HF Datalink bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-69873.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

    - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - (b) If the MAT shows LATCHED for the maintenance message, then continue.
  - (2) Do this check of the wiring:
    - (a) Remove the IOM(M009) in the left AIMS cabinet. do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
    - (b) Disconnect connector D6605 from the left AIMS cabinet.
    - (c) Remove the left HF communication transceiver(M23101). do this task: HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801
    - (d) Do a wiring check between these pins of the IOM connector J420-A in the left AIMS cabinet and connector DM23101AB (WDM 23-11-11):

| J420-A | DM23101AB |
|--------|-----------|
| pin A2 | pin C4    |
| pin B2 | pin D4    |
  - (e) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
  - (f) Re-install the IOM(M009) in the left AIMS cabinet. do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
  - (g) Re-connect connector D6605 from the left AIMS cabinet.
  - (h) Re-install the left HF communication transceiver(M23101). do this task: HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows LATCHED for the maintenance message, then continue.
- (3) Replace the HF communication transceiver(M23101).

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 201  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

These are the tasks:

Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801,

HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 802. DCMF in Right AIMS has no input from HF Communication Transceiver (left) on HF Datalink bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-69874.

##### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M009) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M009) in the right AIMS cabinet. do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (b) Disconnect connector D6705 from the right AIMS cabinet.
  - (c) Remove the left HF communication transceiver(M23101). do this task: HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801
  - (d) Do a wiring check between these pins of the IOM connector J420-A in the right AIMS cabinet and connector DM23101AB (WDM 23-11-11):

#### J420-A

pin A2 ..... pin C4  
pin B2 ..... pin D4

#### DM23101AB

- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
- (f) Re-install the IOM(M009) in the right AIMS cabinet. do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
- (g) Re-connect connector D6705 from the right AIMS cabinet.

## 777-200/300 FAULT ISOLATION MANUAL

- (h) Re-install the left HF communication transceiver(M23101). do this task: HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801
  - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 2) If the MAT shows LATCHED for the maintenance message, then continue.
- (3) Replace the HF communication transceiver(M23101).

These are the tasks:

Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801,  
HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 803. DCMF in Left AIMS has no input from HF Communication Transceiver (right) on HF Datalink bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-69875.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M004) in the left AIMS cabinet. do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (b) Disconnect connector D6617 from the left AIMS cabinet.
  - (c) Remove the right HF communication transceiver(M23201). do this task: HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801
  - (d) Do a wiring check between these pins of the IOM connector J250-A in the left AIMS cabinet and connector DM23101AB (WDM 23-11-21):

## 777-200/300 FAULT ISOLATION MANUAL

This is the task:

Signal Interface Unit - Exchange Check, AMM TASK 24-09-00-700-801-002.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (3) Do this check of the wiring:
- (a) Open these circuit breakers and install safety tags:

### Right Power Management Panel, P210

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| E          | 23         | C31400        | FLT RCDR AC |
| L          | 12         | C31605        | FLT RCDR DC |

- (b) Remove the relay (FLT REC-AC PWR) in P210, K31002. (WDM 31-31-11)
- (c) Do a wiring check between these pins of the relay connector DK31002 and the circuit breaker C31400 (WDM 31-31-11):

| <b>DK31002</b>   | <b>C31400</b> |
|------------------|---------------|
| pin A2 . . . . . | pin 2         |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
- (e) Close these circuit breakers:

### Right Power Management Panel, P210

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| E          | 23         | C31400        | FLT RCDR AC |
| L          | 12         | C31605        | FLT RCDR DC |

- (f) Replace the relay (FLT REC-AC PWR) in P210, K31002. (WDM 31-31-11)
  - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

## 806. Power Conditioning Module(s) in Left AIMS has an Internal Fault - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-50087, 31-50097, 31-50517, 31-50527, 31-50537, 31-50547, 31-50837, 31-50937.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the applicable power conditioning module(s)(PCM), M210 or M450. These are the tasks:

Power conditioning Module (PCM) Removal, AMM TASK 31-41-06-000-801,

EFFECTIVITY  
ARO ALL

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

Power Conditioning Module (PCM) Installation, AMM TASK 31-41-06-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Replace the left AIMS cabinet, M31101.

These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 807. Power Conditioning Module(s) in Right AIMS has an Internal Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-50088, 31-50098, 31-50518, 31-50528, 31-50538, 31-50548, 31-50838, 31-50938.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the applicable power conditioning module(s)(PCM), M210 or M450.

These are the tasks:

Power conditioning Module (PCM) Removal, AMM TASK 31-41-06-000-801,

Power Conditioning Module (PCM) Installation, AMM TASK 31-41-06-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Replace the right AIMS cabinet, M31201.

These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 808. LSCF ASG-R No Input from EDIU-R Channel B on System 629 Bus-R - Fault Isolation

#### A. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### B. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right Engine Data Interface Unit (EDIU), M73203.

These are the tasks:

Engine Data Interface Unit (EDIU) Removal, AMM TASK 73-21-22-000-804-H00,

Engine Data Interface Unit (EDIU) Installation, AMM TASK 73-21-22-400-808-H00.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the right ASG card to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B73103, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects right EDIU to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-R to the coupler:
  - (a) Remove the right ASG card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31102 from the coupler B31102.

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

- (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector DB31102 at the P111 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31102</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the right ASG card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31102.
- (g) Re-install the right ASG card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the right Engine Data Interface Unit (EDIU) to the coupler:
- (a) Disconnect connector DM73203 from the EDIU, M73203.
  - (b) Disconnect connector DB73203 from the coupler B73203.
  - (c) Do a wiring check between these pins of connector DM73203AC at the EDIU and connector DB73203 at the P211 panel (SSM 23-91-11):

| <b>DM73203AC</b>  | <b>DB73203</b> |
|-------------------|----------------|
| pin 5T . . . . .  | pin 2          |
| pin 5TR . . . . . | pin 1          |
| pin 4T . . . . .  | pin 5          |
| pin 4TR . . . . . | pin 4          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM73203 and DB73203.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31209, in the P212 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the IOM(M003) to the Flt Ctrl 629 Bus-R.

- (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M003) to the coupler:
  - (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31209 from the coupler, B31209.
  - (c) Do a wiring check between these pins of the IOM connector J240-A and connector DB31209 at the P212 panel (WDM 31-41-26) (SSM 31-41-02):

| J240-A  | DB31209 |
|---------|---------|
| pin G9  | pin 5   |
| pin G10 | pin 4   |
| pin G6  | pin 2   |
| pin G7  | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
    - 2) Re-connect connector DB31209.
    - 3) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

### 810. Right AIMS IOM(M008) to AIMS Intercabinet Bus-2 Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-56114.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M008) to the IOM(M003):
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM(M008) connector J410-A in the right AIMS cabinet and IOM(M003) connector J240-A in the left AIMS cabinet(SSM 31-41-27)(WDM 31-41-27):

#### J410-A

|         |       |         |

### 811. Right AIMS IOM(M008) to Flt Ctrl 629 Bus-C Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-56104.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31310, in the P312 panel.

These are the tasks:  
ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the IOM(M008) to the Flt Ctrl 629 Bus-C.

  - (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M008) to the coupler:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31310 from the coupler, B31310.

FAULT ISOLATION MANUAL

806. L Eng Oil Quantity Sensor Out of Range (L AIMS)-Fault Isolation

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-84011.

**B. Description**

- (1) The engine oil quantity signal from the oil quantity transmitter, M79001, on the left engine to the left AIMS cabinet, M31101, is out of range.

**C. Initial Evaluation**

- (1) Look at the Extended Maintenance Existing Faults screen on the MAT for the maintenance message (AMM TASK 45-10-00-740-818).
- (a) Stop for 20 seconds.
- (2) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation procedure below.
- (3) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), then there was an intermittent fault.

NOTE: If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.

**D. Fault Isolation Procedure**

- (1) Do a check of the circuit between the left AIMS, M31101, and the oil quantity transmitter, M79001.
- (a) Remove the IOM (M008) module from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the IOM (M009) module from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Disconnect the electrical connector, DM79001, from the oil quantity transmitter, M79001.
- (d) Do a wiring check between the IO Module connectors, J410-B and J420-B, in the left AIMS cabinet and the electrical connector, DM79001, for the oil quantity transmitter (WDM 79-31-11) (SSM 31-41-04).

| G19               | ..... | 2                |  |

- (e) If you find a problem in the wire harness, repair the wire harness as it is necessary (WDM 79-31-11) (SSM 31-41-04):
- 1) Repair the applicable wire harness, as it is necessary.
  - 2) Re-connect the electrical connector, DM79001, to the oil quantity transmitter, M79001 (AMM TASK 70-00-01-400-807-H01).
  - 3) Install the IOM (M008) module to the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) Install the IOM (M009) module to the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 5) Do the Repair Confirmation procedure at the end of this task.
- (f) If you do not find problems with the wire harness, replace the oil quantity transmitter, M79001.

These are the tasks:

Oil Level Sensor Removal, AMM TASK 79-31-01-000-801-H01,

Oil Level Sensor Installation, AMM TASK 79-31-01-400-801-H01.

- (2) If the fault continues, do these steps:

- (a) Replace the IOM (M008) module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- 1) Do the Repair Confirmation procedure at the end of this task.

- (b) Replace the IOM (M009) module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- 1) Do the Repair Confirmation procedure at the end of this task.

### E. Repair Confirmation

- (1) Look at the Extended Maintenance Existing Faults screen on the MAT for the maintenance message (AMM TASK 45-10-00-740-818).
  - (a) Stop for 20 seconds.

EFFECTIVITY  
ARO ALL

Page 202  
Sep 05/2015

## 777-200/300 FAULT ISOLATION MANUAL

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then you corrected the fault.
- (3) If the MAT shows ACTIVE for the maintenance message, then continue this fault isolation procedure at the subsequent step.

————— **END OF TASK** —————

### 807. L Eng Oil Quantity Sensor Out of Range (R AIMS)-Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-84012.

#### B. Description

- (1) The engine oil quantity signal from the oil quantity transmitter, M79001, on the left engine to the right AIMS cabinet, M31201, is out of range.

#### C. Initial Evaluation

- (1) Look at the Extended Maintenance Existing Faults screen on the MAT for the maintenance message (AMM TASK 45-10-00-740-818).
  - (a) Stop for 20 seconds.
- (2) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation procedure below.
- (3) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), then there was an intermittent fault.

NOTE: If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.

#### D. Fault Isolation Procedure

- (1) Do a check of the circuit between the right AIMS, M31201, and the oil quantity transmitter, M79001, on the left engine.
  - (a) Remove the IOM (M008) module from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM (M009) module from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Disconnect the electrical connector, DM79001, from the oil quantity transmitter, M79001.
  - (d) Do a wiring check between the IO Module connectors, J410-B and J420-B, in the right AIMS cabinet and the electrical connector, DM79001, for the oil quantity transmitter (WDM 79-31-11) (SSM 31-41-07).

| C15 .....         | 2 |                  |
| C16 .....         | 2 |                  |
| G19 .....         | 2 |                  |

- (e) If you find a problem in the wire harness, repair the wire harness as it is necessary (WDM 79-31-11) (SSM 31-41-07):
- 1) Repair the applicable wire harness, as it is necessary.
  - 2) Re-connect the electrical connector, DM79001, to the oil quantity transmitter M79001, (AMM TASK 70-00-01-400-807-H01).
  - 3) Install the IOM (M008) module to the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) Install the IOM (M009) module to the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 5) Do the Repair Confirmation procedure at the end of this task.
- (f) If you do not find problems with the wire harness, replace the oil quantity transmitter, M79001.

These are the tasks:

Oil Level Sensor Removal, AMM TASK 79-31-01-000-801-H01,

Oil Level Sensor Installation, AMM TASK 79-31-01-400-801-H01.

- (2) If the fault continues, do these steps:

- (a) Replace the IOM (M008) module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- 1) Do the Repair Confirmation procedure at the end of this task.

- (b) Replace the IOM (M009) module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- 1) Do the Repair Confirmation procedure at the end of this task.

### E. Repair Confirmation

- (1) Look at the Extended Maintenance Existing Faults screen on the MAT for the maintenance message, (AMM TASK 45-10-00-740-818).
  - (a) Stop for 20 seconds.

FAULT ISOLATION MANUAL

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then you corrected the fault.
- (3) If the MAT shows ACTIVE for the maintenance message, then continue this fault isolation procedure at the subsequent step.

— END OF TASK —

808. **R Eng Oil Quantity Sensor Out of Range (L AIMS)-Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-84021.

**B. Description**

- (1) The engine oil quantity signal from the oil quantity transmitter, M79001, on the right engine to the left AIMS cabinet, M31101, is out of range.

**C. Initial Evaluation**

- (1) Look at the Extended Maintenance Existing Faults screen on the MAT for the maintenance message (AMM TASK 45-10-00-740-818).
  - (a) Stop for 20 seconds.
- (2) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation procedure below.
- (3) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), then there was an intermittent fault.

**NOTE:** If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.

**D. Fault Isolation Procedure**

- (1) Do a check of the circuit between the left AIMS cabinet, M31101, and the oil quantity transmitter, M79001, on the right engine.
  - (a) Remove the IOM (M003) module from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM (M004) module from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Disconnect the electrical connector, DM79001, from the oil quantity transmitter, M79001, on the right engine.
  - (d) Do a wiring check between the IO Module connectors, J240-B and J250-B, in the left AIMS cabinet and the electrical connector, DM79001, for the oil quantity transmitter (WDM 79-31-11) (SSM 31-41-05).

## 777-200/300 FAULT ISOLATION MANUAL

### Right Engine Oil Quantity Transmitter Wiring

|                   |                  |
|-------------------|------------------|
| -                 | -                |
| <b>IOM (M004)</b> |                  |
| <b>J250-B</b>     | <b>DM79001</b>   |
| <b>connector</b>  | <b>connector</b> |
| F18 .....         | 1                |
| D15 .....         | 1                |
| D14 .....         | 3                |
| C15 .....         | 2                |
| C16 .....         | 2                |
| G19 .....         | 2                |

- (e) If you find a problem in the wire harness, repair the wire harness as it is necessary (WDM 79-31-11) (SSM 31-41-05):

- 1) Repair the applicable wire harness.
- 2) Re-connect the electrical connector, DM79001, to the oil quantity transmitter, M79001, (AMM TASK 70-00-01-400-807-H01).
- 3) Install the IOM (M003) module to the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) Install the IOM (M004) module to the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 5) Do the Repair Confirmation procedure at the end of this task.

- (f) If you do not find problems with the wire harness, replace the oil quantity transmitter, M79001, on the right engine.

These are the tasks:

Oil Level Sensor Removal, AMM TASK 79-31-01-000-801-H01,

Oil Level Sensor Installation, AMM TASK 79-31-01-400-801-H01.

- (2) If the fault continues, do these steps:

- (a) Replace the IOM (M003) module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- 1) Do the Repair Confirmation procedure at the end of this task.

- (b) Replace the IOM (M004) module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- 1) Do the Repair Confirmation procedure at the end of this task.

### E. Repair Confirmation

- (1) Look at the Extended Maintenance Existing Faults screen on the MAT for the maintenance message, (AMM TASK 45-10-00-740-818).

- (a) Stop for 20 seconds.

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then you corrected the fault.
- (3) If the MAT shows ACTIVE for the maintenance message, then continue this fault isolation procedure at the subsequent step.

### — END OF TASK —

#### 809. R Eng Oil Quantity Sensor Out of Range (R AIMS)-Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-84022.

##### B. Description

- (1) The engine oil quantity signal from the oil quantity transmitter, M79001, on the right engine to the right AIMS cabinet, M31201, is out of range.

##### C. Initial Evaluation

- (1) Look at the Extended Maintenance Existing Faults screen on the MAT for the maintenance message, (AMM TASK 45-10-00-740-818).
  - (a) Stop for 20 seconds.
- (2) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation procedure below.
- (3) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), then there was an intermittent fault.

**NOTE:** If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.

##### D. Fault Isolation Procedure

- (1) Do a check of the circuit between the right AIMS, M31201, and the oil quantity transmitter, M79001.
  - (a) Remove the IOM (M003) module from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM (M004) module from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Disconnect the electrical connector, DM79001, from the oil quantity transmitter, M79001.
  - (d) Do a wiring check between the IO Module connectors, J240-B and J250-B, in the right AIMS cabinet and the electrical connector, DM79001, for the oil quantity transmitter (WDM 79-31-11) (SSM 31-41-08).

| G19               | ..... | 2                |

- (e) If you find a problem in the wire harness, repair the wire harness as it is necessary (WDM 79-31-11) (SSM 31-41-08):
- 1) Repair the applicable wire harness, as it is necessary.
  - 2) Re-connect the electrical connector, DM79001, to the oil quantity transmitter, M79001, (AMM TASK 70-00-01-400-807-H01).
  - 3) Install the IOM (M003) module to the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) Install the IOM (M004) module to the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 5) Do the Repair Confirmation procedure at the end of this task.
- (f) If you do not find problems with the wire harness, replace the oil quantity transmitter, M79001.

These are the tasks:

Oil Level Sensor Removal, AMM TASK 79-31-01-000-801-H01,

Oil Level Sensor Installation, AMM TASK 79-31-01-400-801-H01.

- (2) If the fault continues, do these steps:

- (a) Replace the IOM (M003) module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- 1) Do the Repair Confirmation procedure at the end of this task.

- (b) Replace the IOM (M004) module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- 1) Do the Repair Confirmation procedure at the end of this task.

### E. Repair Confirmation

- (1) Look at the Extended Maintenance Existing Faults screen on the MAT for the maintenance message (AMM TASK 45-10-00-740-818).
- (a) Stop for 20 seconds.

## 777-200/300 FAULT ISOLATION MANUAL

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then you corrected the fault.
- (3) If the MAT shows ACTIVE for the maintenance message, then continue this fault isolation procedure at the subsequent step.

————— END OF TASK —————

### 810. Electronic Engine Controls Have Incorrect Software Configuration - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-84111, 31-84112.

#### B. Description

- (1) This message is set when the left or right EEC is loaded with software that is not compatible with the 777 airplane.

#### C. Fault Isolation Procedure

- (1) Do a check of the Left and Right EEC software part number on the MAT as follows:
  - (a) Set the Left and Right EEC MAINT POWER switch on the Overhead Maintenance Panel, P61, to the TEST position.
  - (b) Make these selections on the MAT:
    - 1) LINE MAINTENANCE
    - 2) SYSTEM CONFIGURATION
    - 3) 71-80 LEFT ENGINE
  - (c) Make a record of the EEC software part number for left EEC Ch A and Ch B.
  - (d) Make these selections on the MAT:
    - 1) LINE MAINTENANCE
    - 2) SYSTEM CONFIGURATION
    - 3) 71-80 RIGHT ENGINE
  - (e) Make a record of the EEC software part number for the right EEC Ch A and Ch B.
  - (f) Compare the EEC software part numbers from the System Configuration Page to the software part numbers from the engine records.
- (2) If the software part numbers do not agree, do this task: EEC (FADEC) Software Installation (on the MAT), AMM TASK 73-21-15-400-802-H01.
- (3) Select the Existing Fault Screen on the MAT.
- (4) Set the Left and Right EEC MAINT POWER switch on the Overhead Maintenance Panel, P61, to the TEST position.
- (5) If the MAT shows NOT ACTIVE for the maintenance message, then you have corrected the fault.
- (6) If the MAT shows ACTIVE for the maintenance message, then replace the EEC.

These are the tasks:

EEC (FADEC) Removal, AMM TASK 73-21-15-000-801-H01,  
EEC (FADEC) Installation, AMM TASK 73-21-15-400-801-H01.

### 811. Left AIMS Detects an Out of Range Left Engine N1 Signal - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-84131.

#### B. Description

- (1) The left AIMS detects an out of range analog N1 speed input signal from the N1 speed sensor on the left engine.

#### C. Initial Evaluation

- (1) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
  - (a) If the MAT shows ACTIVE for the maintenance message while the engine operates, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, then there was an intermittent fault.

**NOTE:** If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.

- (c) Stop the engine (AMM TASK 71-00-00-800-837-H00).

#### D. Fault Isolation Procedure

- (1) Remove the connector DM77005 from the N1 speed sensor, M77005.
- (2) Measure the resistances between these pairs of pins on the sensor:
  - (a) Pin 1 to pin 2, specified resistance 5-200 ohms
  - (b) Pin 1 to GND, specified resistance >100K ohms
  - (c) Pin 2 to GND, specified resistance >100K ohms.
- (3) If the resistance is not in the range specified for each pair of pins, replace the N1 speed sensor, M77005. These are the tasks:  
N1 Speed Sensor Removal (AMM TASK 77-12-01-000-801-H01),  
N1 Speed Sensor Installation (AMM TASK 77-12-01-400-801-H01).
  - (a) Do the repair confirmation procedure at the end of this task.
- (4) If the resistance is in the range specified for each pair of pins, do this check of the wiring:
  - (a) Remove the left EDIU, M73103. To remove the EDIU, do this task: Engine Data Interface Unit (EDIU) Removal (AMM TASK 73-21-22-000-804-H00).
  - (b) Remove the left AVM, M77102. To remove the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Removal (AMM TASK 77-31-03-000-803-H00).
  - (c) Disconnect connector D6708 from the right AIMS cabinet, M31201.
  - (d) Disconnect connector D6608 from the left AIMS cabinet, M31101.
  - (e) Do a wiring check between these pins of connector DM77005 at the left N1 speed sensor, M77005 and connector D6608 at the left AIMS cabinet, M31101.

#### DM77005

## 777-200/300 FAULT ISOLATION MANUAL

- 1) Repair the wiring.
  - 2) Install the left EDIU, M73103. To install the EDIU, do this task: Engine Data Interface Unit (EDIU) Installation (AMM TASK 73-21-22-400-808-H00).
  - 3) Install the left AVM, M77102. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
  - 4) Reconnect connector D6708 to the right AIMS cabinet, M31201.
  - 5) Reconnect connector D6608 to the left AIMS cabinet, M31101.
  - 6) Do the repair confirmation procedure at the end of this task.
- (g) If you do not find a problem with the wiring, then do these steps:
- 1) Install the left EDIU, M73103. To install the EDIU, do this task: Engine Data Interface Unit (EDIU) Installation (AMM TASK 73-21-22-400-808-H00).
  - 2) Install the left AVM, M77102. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
  - 3) Reconnect connector D6708 to the right AIMS cabinet, M31201.
  - 4) Reconnect connector D6608 to the left AIMS cabinet, M31101.
  - 5) Continue with the subsequent step of this procedure.
- (5) Replace the input/output module, M008, in the left AIMS cabinet, M31101.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) Do the repair confirmation procedure at the end of this task.
- (6) Replace the input/output module, M009, in the left AIMS cabinet, M31101.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) Do the repair confirmation procedure at the end of this task.

### E. Repair Confirmation

- (1) Do these steps:
- (a) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
    - 1) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, (or if the message does not show) then you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message while the engine operates, then continue with this fault isolation procedure at the subsequent step.
  - (b) Stop the engine (AMM TASK 71-00-00-800-837-H00).

————— END OF TASK —————

## 812. Right AIMS Detects an Out of Range Left Engine N1 Signal - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-84132.

EFFECTIVITY  
ARO ALL

## 31-48 TASKS 811-812

D633W103-ARO

Page 211  
Sep 05/2015

## 777-200/300 FAULT ISOLATION MANUAL

### B. Description

- (1) The right AIMS detects an out of range analog N1 speed input signal from the N1 speed sensor on the left engine.

### C. Initial Evaluation

- (1) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
  - (a) If the MAT shows ACTIVE for the maintenance message while the engine operates, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, then there was an intermittent fault.

NOTE: If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.

- (c) Stop the engine (AMM TASK 71-00-00-800-837-H00).

### D. Fault Isolation Procedure

- (1) Remove the connector DM77005 from the N1 speed sensor, M77005.
- (2) Measure the resistances between these pairs of pins on the sensor:
  - (a) Pin 1 to pin 2, specified resistance 5-200 ohms
  - (b) Pin 1 to GND, specified resistance >100K ohms
  - (c) Pin 2 to GND, specified resistance >100K ohms.
- (3) If the resistance is not in the range specified for each pair of pins, replace the N1 speed sensor, M77005. These are the tasks:  
N1 Speed Sensor Removal (AMM TASK 77-12-01-000-801-H01),  
N1 Speed Sensor Installation (AMM TASK 77-12-01-400-801-H01).
  - (a) Do the repair confirmation procedure at the end of this task.
- (4) If the resistance is in the range specified for each pair of pins, do this check of the wiring:
  - (a) Remove the left EDIU, M73103. To remove the EDIU, do this task: Engine Data Interface Unit (EDIU) Removal (AMM TASK 73-21-22-000-804-H00).
  - (b) Remove the left AVM, M77102. To remove the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Removal (AMM TASK 77-31-03-000-803-H00).
  - (c) Disconnect connector D6708 from the right AIMS cabinet, M31201.
  - (d) Disconnect connector D6608 from the left AIMS cabinet, M31101.
  - (e) Do a wiring check between these pins of connector DM77005 at the left N1 speed sensor, M77005 and connector D6708 at the right AIMS cabinet.

| DM77005 | D6708   |
|---------|---------|
| pin 1   | pin F12 |
| pin 2   | pin G13 |

- (f) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Install the left EDIU, M73103. To install the EDIU, do this task: Engine Data Interface Unit (EDIU) Installation (AMM TASK 73-21-22-400-808-H00).

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 212  
Sep 05/2015

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Install the left AVM, M77102. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
- 4) Reconnect connector D6708 to the right AIMS cabinet, M31201.
- 5) Reconnect connector D6608 to the left AIMS cabinet, M31101.
- 6) Do the repair confirmation procedure at the end of this task.
- (g) If you do not find a problem with the wiring, then do these steps:
  - 1) Install the left EDIU, M73103. To install the EDIU, do this task: Engine Data Interface Unit (EDIU) Installation (AMM TASK 73-21-22-400-808-H00).
  - 2) Install the left AVM, M77102. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
  - 3) Reconnect connector D6708 to the right AIMS cabinet, M31201.
  - 4) Reconnect connector D6608 to the left AIMS cabinet, M31101.
  - 5) Continue with the subsequent step of this procedure.
- (5) Replace the input/output module, M008, in the right AIMS cabinet, M31201.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) Do the repair confirmation procedure at the end of this task.
- (6) Replace the input/output module, M009, in the right AIMS cabinet, M31201.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) Do the repair confirmation procedure at the end of this task.

### E. Repair Confirmation

- (1) Do these steps:
  - (a) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
    - 1) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, (or if the message does not show) then you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message while the engine operates, then continue with this fault isolation procedure at the subsequent step.
  - (b) Stop the engine (AMM TASK 71-00-00-800-837-H00).

————— END OF TASK —————

## 777-200/300 FAULT ISOLATION MANUAL

### B. Description

- (1) The left AIMS detects an out of range analog N1 speed input signal from the N1 speed sensor on the right engine.

### C. Initial Evaluation

- (1) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
  - (a) If the MAT shows ACTIVE for the maintenance message while the engine operates, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, then there was an intermittent fault.

NOTE: If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.

- (c) Stop the engine (AMM TASK 71-00-00-800-837-H00).

### D. Fault Isolation Procedure

- (1) Remove the connector DM77005 from the N1 speed sensor, M77005.
- (2) Measure the resistances between these pairs of pins on the sensor:
  - (a) Pin 1 to pin 2, specified resistance 5-200 ohms
  - (b) Pin 1 to GND, specified resistance >100K ohms
  - (c) Pin 2 to GND, specified resistance >100K ohms.
- (3) If the resistance is not in the range specified for each pair of pins, replace the N1 speed sensor, M77005. These are the tasks:  
N1 Speed Sensor Removal (AMM TASK 77-12-01-000-801-H01),  
N1 Speed Sensor Installation (AMM TASK 77-12-01-400-801-H01).
  - (a) Do the repair confirmation procedure at the end of this task.
- (4) If the resistance is in the range specified for each pair of pins, do this check of the wiring:
  - (a) Remove the right EDIU, M73203. To remove the EDIU, do this task: Engine Data Interface Unit (EDIU) Removal (AMM TASK 73-21-22-000-804-H00).
  - (b) Remove the right AVM, M77202. To remove the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Removal (AMM TASK 77-31-03-000-803-H00).
  - (c) Disconnect connector D6720 from the right AIMS cabinet, M31201.
  - (d) Disconnect connector D6620 from the left AIMS cabinet, M31101.
  - (e) Do a wiring check between these pins of connector DM77005 at the left N1 speed sensor, M77005 and connector D6620 at the left AIMS cabinet, M31101.

| DM77005 | D6620   |
|---------|---------|
| pin 1   | pin F12 |
| pin 2   | pin G13 |

- (f) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Install the right EDIU, M73203. To install the EDIU, do this task: Engine Data Interface Unit (EDIU) Installation (AMM TASK 73-21-22-400-808-H00).

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Install the right AVM, M77202. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
- 4) Reconnect connector D6720 to the right AIMS cabinet, M31201.
- 5) Reconnect connector D6620 to the left AIMS cabinet, M31101.
- 6) Do the repair confirmation procedure at the end of this task.
- (g) If you do not find a problem with the wiring, then do these steps:
  - 1) Install the right EDIU, M73203. To install the EDIU, do this task: Engine Data Interface Unit (EDIU) Installation (AMM TASK 73-21-22-400-808-H00).
  - 2) Install the right AVM, M77202. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
  - 3) Reconnect connector D6720 to the right AIMS cabinet, M31201.
  - 4) Reconnect connector D6620 to the left AIMS cabinet, M31101.
  - 5) Continue with the subsequent step of this procedure.
- (5) Replace the input/output module, M003, in the left AIMS cabinet, M31101.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) Do the repair confirmation procedure at the end of this task.
- (6) Replace the input/output module, M004, in the left AIMS cabinet, M31101.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) Do the repair confirmation procedure at the end of this task.

### E. Repair Confirmation

- (1) Do these steps:
  - (a) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
    - 1) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, (or if the message does not show) then you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message while the engine operates, then continue with this fault isolation procedure at the subsequent step.
  - (b) Stop the engine (AMM TASK 71-00-00-800-837-H00).

### B. Description

- (1) The right AIMS detects an out of range analog N1 speed input signal from the N1 speed sensor on the right engine.

### C. Initial Evaluation

- (1) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
  - (a) If the MAT shows ACTIVE for the maintenance message while the engine operates, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, then there was an intermittent fault.

NOTE: If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.

- (c) Stop the engine (AMM TASK 71-00-00-800-837-H00).

### D. Fault Isolation Procedure

- (1) Remove the connector DM77005 from the N1 speed sensor, M77005.
- (2) Measure the resistances between these pairs of pins on the sensor:
  - (a) Pin 1 to pin 2, specified resistance 5-200 ohms
  - (b) Pin 1 to GND, specified resistance >100K ohms
  - (c) Pin 2 to GND, specified resistance >100K ohms.
- (3) If the resistance is not in the range specified for each pair of pins, replace the N1 speed sensor, M77005. These are the tasks:  
N1 Speed Sensor Removal (AMM TASK 77-12-01-000-801-H01),  
N1 Speed Sensor Installation (AMM TASK 77-12-01-400-801-H01).
  - (a) Do the repair confirmation procedure at the end of this task.
- (4) If the resistance is in the range specified for each pair of pins, do this check of the wiring:
  - (a) Remove the right EDIU, M73203. To remove the EDIU, do this task: Engine Data Interface Unit (EDIU) Removal (AMM TASK 73-21-22-000-804-H00).
  - (b) Remove the right AVM, M77202. To remove the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Removal (AMM TASK 77-31-03-000-803-H00).
  - (c) Disconnect connector D6720 from the right AIMS cabinet, M31201.
  - (d) Disconnect connector D6620 from the left AIMS cabinet, M31101.
  - (e) Do a wiring check between these pins of connector DM77005 at the right N1 speed sensor, M77005 and connector D6720 at the right AIMS cabinet.

| DM77005 | D6720   |
|---------|---------|
| pin 1   | pin F12 |
| pin 2   | pin G13 |

- (f) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Install the right EDIU, M73203. To install the EDIU, do this task: Engine Data Interface Unit (EDIU) Installation (AMM TASK 73-21-22-400-808-H00).

- 3) Install the right AVM, M77202. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
- 4) Reconnect connector D6720 to the right AIMS cabinet, M31201.
- 5) Reconnect connector D6620 to the left AIMS cabinet, M31101.
- 6) Do the repair confirmation procedure at the end of this task.
- (g) If you do not find a problem with the wiring, then do these steps:
  - 1) Install the right EDIU, M73203. To install the EDIU, do this task: Engine Data Interface Unit (EDIU) Installation (AMM TASK 73-21-22-400-808-H00).
  - 2) Install the right AVM, M77202. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
  - 3) Reconnect connector D6720 to the right AIMS cabinet, M31201.
  - 4) Reconnect connector D6620 to the left AIMS cabinet, M31101.
  - 5) Continue with the subsequent step of this procedure.
- (5) Replace the input/output module, M003, in the right AIMS cabinet, M31201.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) Do the repair confirmation procedure at the end of this task.
- (6) Replace the input/output module, M004, in the right AIMS cabinet, M31201.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) Do the repair confirmation procedure at the end of this task.

### E. Repair Confirmation

- (1) Do these steps:
  - (a) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
    - 1) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, (or if the message does not show) then you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message while the engine operates, then continue with this fault isolation procedure at the subsequent step.
  - (b) Stop the engine (AMM TASK 71-00-00-800-837-H00).

————— END OF TASK —————

D633W103-ARO

Page 217  
Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

### B. Description

- (1) The left AIMS detects an out of range analog N2 speed input signal from the N2 speed sensor on the left engine.

### C. Initial Evaluation

- (1) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
  - (a) If the MAT shows ACTIVE for the maintenance message while the engine operates, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, then there was an intermittent fault.

NOTE: If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.

- (c) Stop the engine (AMM TASK 71-00-00-800-837-H00).

### D. Fault Isolation Procedure

- (1) Remove the connector DM77006 from the N2 speed sensor, M77006.
- (2) Measure the resistances between these pairs of pins on the sensor:
  - (a) Pin 1 to pin 2, specified resistance 5-200 ohms
  - (b) Pin 1 to GND, specified resistance >100K ohms
  - (c) Pin 2 to GND, specified resistance >100K ohms.
- (3) If the resistance is not in the range specified for each pair of pins, replace the N2 speed sensor, M77006. These are the tasks:  
N2 Speed Sensor Removal (AMM TASK 77-12-02-000-801-H01),  
N2 Speed Sensor Installation (AMM TASK 77-12-02-400-801-H01).
  - (a) Do the repair confirmation procedure at the end of this task.
- (4) If the resistance is in the range specified for each pair of pins, do this check of the wiring:
  - (a) Remove the left AVM, M77102. To remove the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Removal (AMM TASK 77-31-03-000-803-H00).
  - (b) Disconnect connector D6708 from the right AIMS cabinet, M31201.
  - (c) Disconnect connector D6608 from the left AIMS cabinet, M31101.
  - (d) Do a wiring check between these pins of connector DM77006 at the left N2 speed sensor, M77006 and connector D6608 at the left AIMS cabinet, M31101.

| DM77006 | D6608   |
|---------|---------|
| pin 1   | pin F14 |
| pin 2   | pin G15 |

- (e) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Install the left AVM, M77102. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
    - 3) Reconnect connector D6708 to the right AIMS cabinet, M31201.

D633W103-ARO

Page 218  
Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- 4) Reconnect connector D6608 to the left AIMS cabinet, M31101.
- 5) Do the repair confirmation procedure at the end of this task.
- (f) If you do not find a problem with the wiring, then do these steps:
  - 1) Install the left AVM, M77102. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
  - 2) Reconnect connector D6708 to the right AIMS cabinet, M31201.
  - 3) Reconnect connector D6608 to the left AIMS cabinet, M31101.
  - 4) Continue with the subsequent step of this procedure.
- (5) Replace the input/output module, M008, in the left AIMS cabinet, M31101.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) Do the repair confirmation procedure at the end of this task.
- (6) Replace the input/output module, M009, in the left AIMS cabinet, M31101.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) Do the repair confirmation procedure at the end of this task.

### E. Repair Confirmation

- (1) Do these steps:
  - (a) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
    - 1) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, (or if the message does not show) then you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message while the engine operates, then continue with this fault isolation procedure at the subsequent step.
  - (b) Stop the engine (AMM TASK 71-00-00-800-837-H00).

————— END OF TASK —————

## 816. Right AIMS Detects an Out of Range Left Engine N2 Signal - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-84152.

### B. Description

- (1) The right AIMS detects an out of range analog N2 speed input signal from the N2 speed sensor on the left engine.

### C. Initial Evaluation

- (1) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
  - (a) If the MAT shows ACTIVE for the maintenance message while the engine operates, then do the Fault Isolation Procedure below.

EFFECTIVITY  
ARO ALL

## 31-48 TASKS 815-816

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, then there was an intermittent fault.

**NOTE:** If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.

- (c) Stop the engine (AMM TASK 71-00-00-800-837-H00).

### D. Fault Isolation Procedure

- (1) Remove the connector DM77006 from the N2 speed sensor, M77006.
- (2) Measure the resistances between these pairs of pins on the sensor:
  - (a) Pin 1 to pin 2, specified resistance 5-200 ohms
  - (b) Pin 1 to GND, specified resistance >100K ohms
  - (c) Pin 2 to GND, specified resistance >100K ohms.
- (3) If the resistance is not in the range specified for each pair of pins, replace the N2 speed sensor, M77006. These are the tasks:

N2 Speed Sensor Removal (AMM TASK 77-12-02-000-801-H01),  
N2 Speed Sensor Installation (AMM TASK 77-12-02-400-801-H01).

  - (a) Do the repair confirmation procedure at the end of this task.
- (4) If the resistance is in the range specified for each pair of pins, do this check of the wiring:
  - (a) Remove the left AVM, M77102. To remove the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Removal (AMM TASK 77-31-03-000-803-H00).
  - (b) Disconnect connector D6708 from the right AIMS cabinet, M31201.
  - (c) Disconnect connector D6608 from the left AIMS cabinet, M31101.
  - (d) Do a wiring check between these pins of connector DM77006 at the left N2 speed sensor, M77006 and connector D6708 at the right AIMS cabinet.

| DM77006         | D6708   |
|-----------------|---------|
| pin 1 . . . . . | pin F14 |
| pin 2 . . . . . | pin G15 |

- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Install the left AVM, M77102. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
  - 3) Reconnect connector D6708 to the right AIMS cabinet, M31201.
  - 4) Reconnect connector D6608 to the left AIMS cabinet, M31101.
  - 5) Do the repair confirmation procedure at the end of this task.
- (f) If you do not find a problem with the wiring, then do these steps:
  - 1) Install the left AVM, M77102. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
  - 2) Reconnect connector D6708 to the right AIMS cabinet, M31201.
  - 3) Reconnect connector D6608 to the left AIMS cabinet, M31101.

Page 220  
Jan 05/2013

## 777-200/300 FAULT ISOLATION MANUAL

- 4) Continue with the subsequent step of this procedure.
- (5) Replace the input/output module, M008, in the right AIMS cabinet, M31201.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) Do the repair confirmation procedure at the end of this task.
- (6) Replace the input/output module, M009, in the right AIMS cabinet, M31201.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) Do the repair confirmation procedure at the end of this task.

### E. Repair Confirmation

- (1) Do these steps:
  - (a) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
    - 1) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, (or if the message does not show) then you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message while the engine operates, then continue with this fault isolation procedure at the subsequent step.
  - (b) Stop the engine (AMM TASK 71-00-00-800-837-H00).

### — END OF TASK —

## 817. Left AIMS Detects an Out of Range Right Engine N2 Signal - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-84161.

### B. Description

- (1) The left AIMS detects an out of range analog N2 speed input signal from the N2 speed sensor on the right engine.

### C. Initial Evaluation

- (1) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
  - (a) If the MAT shows ACTIVE for the maintenance message while the engine operates, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, then there was an intermittent fault.  
**NOTE:** If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.
  - (c) Stop the engine (AMM TASK 71-00-00-800-837-H00).

### D. Fault Isolation Procedure

- (1) Remove the connector DM77006 from the N2 speed sensor, M77006.
- (2) Measure the resistances between these pairs of pins on the sensor:

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Pin 1 to pin 2, specified resistance 5-200 ohms
  - (b) Pin 1 to GND, specified resistance >100K ohms
  - (c) Pin 2 to GND, specified resistance >100K ohms.
- (3) If the resistance is not in the range specified for each pair of pins, replace the N2 speed sensor, M77006. These are the tasks:
- N2 Speed Sensor Removal (AMM TASK 77-12-02-000-801-H01),  
N2 Speed Sensor Installation (AMM TASK 77-12-02-400-801-H01).
- (a) Do the repair confirmation procedure at the end of this task.
- (4) If the resistance is in the range specified for each pair of pins, do this check of the wiring:
- (a) Remove the right AVM, M77202. To remove the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Removal (AMM TASK 77-31-03-000-803-H00).
  - (b) Disconnect connector D6720 from the right AIMS cabinet, M31201.
  - (c) Disconnect connector D6620 from the left AIMS cabinet, M31101.
  - (d) Do a wiring check between these pins of connector DM77006 at the left N2 speed sensor, M77006 and connector D6620 at the left AIMS cabinet, M31101.

| DM77005         | D6620   |
|-----------------|---------|
| pin 1 . . . . . | pin F14 |
| pin 2 . . . . . | pin G15 |

- (e) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Install the right AVM, M77202. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
    - 3) Reconnect connector D6720 to the right AIMS cabinet, M31201.
    - 4) Reconnect connector D6620 to the left AIMS cabinet, M31101.
    - 5) Do the repair confirmation procedure at the end of this task.
  - (f) If you do not find a problem with the wiring, then do these steps:
    - 1) Install the right AVM, M77202. To install the AVM, do this task: Airborne Vibration Monitor (AVM) Signal Conditioner Unit Installation (AMM TASK 77-31-03-400-804-H00).
    - 2) Reconnect connector D6720 to the right AIMS cabinet, M31201.
    - 3) Reconnect connector D6620 to the left AIMS cabinet, M31101.
    - 4) Continue with the subsequent step of this procedure.
- (5) Replace the input/output module, M003, in the left AIMS cabinet, M31101.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) Do the repair confirmation procedure at the end of this task.
- (6) Replace the input/output module, M004, in the left AIMS cabinet, M31101.  
These are the tasks:

## 818. Right AIMS Detects an Out of Range Right Engine N2 Signal - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-84162.

### B. Description

- (1) The right AIMS detects an out of range analog N2 speed input signal from the N2 speed sensor on the right engine.

### C. Initial Evaluation

- (1) Start the engine and permit the engine to operate at ground idle (AMM TASK 71-00-00-800-835-H00).
  - (a) If the MAT shows ACTIVE for the maintenance message while the engine operates, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message while the engine operates, then there was an intermittent fault.

NOTE: If you have an intermittent fault, you must use your judgement (and your airlines policy) to make a decision if you will replace components and if so, which components to replace. Then monitor the airplane on the subsequent flight.
  - (c) Stop the engine (AMM TASK 71-00-00-800-837-H00).

### D. Fault Isolation Procedure

- (1) Remove the connector DM77006 from the N2 speed sensor, M77006.
- (2) Measure the resistances between these pairs of pins on the sensor:
  - (a) Pin 1 to pin 2, specified resistance 5-200 ohms
  - (b) Pin 1 to GND, specified resistance >100K ohms
  - (c) Pin 2 to GND, specified resistance >100K ohms.
- (3) If the resistance is not in the range specified for each pair of pins, replace the N2 speed sensor, M77006. These are the tasks:

N2 Speed Sensor Removal (AMM TASK 77-12-02-000-801-H01),  
N2 Speed Sensor Installation (AMM TASK 77-12-02-400-801-H01).

  - (a) Do the repair confirmation procedure at the end of this task.

## 777-200/300 FAULT ISOLATION MANUAL

### 801. WEU-L Internal Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-70011, 31-78801.

#### B. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the program pin inputs to the WEU-L channel 1:
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Do a wiring check between these pins of connector DM31107AA and TB1501 at the E1-5 shelf (WDM 31-51-15).

| DM31107AA         | TB1501 |
|-------------------|--------|
| pin F10 . . . . . | TB1501 |
| pin G10 . . . . . | TB1501 |
| pin H10 . . . . . | TB1501 |
| pin G2 . . . . .  | TB1501 |
| pin G3 . . . . .  | TB1501 |
| pin G4 . . . . .  | TB1501 |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
- 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
- 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- 4) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the program pin inputs to the WEU-L channel 2:
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Do a wiring check between these pins of connector DM31107AC and TB1501 at the E1-5 shelf (WDM 31-51-15):

| DM31107AC         | TB1501 |
|-------------------|--------|
| pin F10 . . . . . | TB1501 |
| pin G2 . . . . .  | TB1501 |
| pin G3 . . . . .  | TB1501 |
| pin G5 . . . . .  | TB1501 |

- (c) If you find a problem with the wiring, then do these steps:

EFFECTIVITY

## 31-51 TASK 801

D633W103-ARO

Page 201  
Sep 05/2016

**777-200/300**  
**FAULT ISOLATION MANUAL**

- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
- 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
- 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**802. WEU-L Software Configuration Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-70021.

**B. Fault Isolation Procedure**

- (1) Do a check of the system configuration for this system on the MAT: 31 Warning Electronic Systems.
  - (a) Find Warning Electronic Unit (left channel 1) and Warning Electronic Unit (left channel 2) on the display and make sure that the software part numbers are correct.
  - (b) If a part number is incorrect, install software in the WEU-L. To install it, do this task: Warning Electronic Unit Software Installation, AMM TASK 31-51-01-400-802.
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**803. WEU-R No Output On WEU-R Ch2 OAP1 429 Bus - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-78892.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (c) Do a wiring check between these pins of connector D31207AC at the E4-2 shelf and connector DM31107AC at the E1-5 shelf (WDM 31-51-23):

### DM31207AC

pin G7 . . . . .  
pin H7 . . . . .

### DM31107AC

pin J6  
pin K6

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

## 804. WEU-L Channel 1 No Input On Systems 629 Bus-L - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79401.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31122, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-L channel 1 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of wiring from the WEU-L to the coupler:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31122 from the coupler, B31122.
  - (c) Do a wiring check between these pins of connector DM31107AB at the E1-5 shelf and connector DB31122 at the P111 panel (WDM 31-51-13):

| DM31107AB         | DB31122 |
|-------------------|---------|
| pin 5T . . . . .  | pin 5   |
| pin 5TR . . . . . | pin 4   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31122.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 805. WEU-L Channel 2 No Input On Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79402.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.  
These are the tasks:  
Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31123, in the P111 panel.  
These are the tasks:  
ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.  
NOTE: This coupler connects the WEU-L channel 2 to the Systems 629 Bus-L.

## 777-200/300 FAULT ISOLATION MANUAL

### DM22101AD

pin 5T . . . . . pin 2  
pin 5TR . . . . . pin 1

### DB22104

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB22104.
  - 3) Re-install the AFDC-L, M22101. To install it, do this task: Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### ————— END OF TASK —————

## 807. WEU-L Channel 2 No Input from AFDC-L on Systems 629 Bus-L - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79407.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left Autopilot Flight Director Computer (AFDC-L), M22101.

These are the tasks:

Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,

Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31123, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-L channel 2 to the Systems 629 Bus-L.

## 777-200/300 FAULT ISOLATION MANUAL

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-L to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the WEU-L to the coupler (WDM 31-51-13):
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31122 from the P111 panel.
  - (c) Do a wiring check between these pins of connector DB31122 at the P111 panel and connector DM31107AB at the E1-5 shelf (WDM 31-51-13):

### DM31107AB

### DB31122

|         |       |       |
|---------|-------|-------|
| pin 5T  | ..... | pin 5 |
| pin 5TR | ..... | pin 4 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31122.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this check of the wiring from the LSCF to the coupler:
  - (a) Remove the ASG-L card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31101 from the P111 panel.
  - (c) Do a wiring check between these pins of connector XA12 at the P85 LSCF and connector DB31101 at the P111 panel (SSM 31-09-12):

### DB31101

### XA12

|       |       |       |
|-------|-------|-------|
| pin 2 | ..... | pin 9 |
| pin 1 | ..... | pin 6 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the ASG-L card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

### 812. WEU-L Channel 2 No Input From ASG-L LSCF on Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79431.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left ARINC signal gateway (ASG-L) card, P85A12, in the left system cardfile (LSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31123, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-L channel 2 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-L to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the WEU-L to the coupler (WDM 31-51-13):

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Disconnect connector DB31123 from the P111 panel.
- (c) Do a wiring check between these pins of connector DB31123 at the P111 panel and connector DM31107AD at the E1-5 shelf (WDM 31-51-13):

| DM31107AD         | DB31123 |
|-------------------|---------|
| pin 6T . . . . .  | pin 5   |
| pin 6TR . . . . . | pin 4   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31123.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this check of the wiring from the LSCF to the coupler:
  - (a) Remove the ASG-L, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31101 from the P111 panel.
  - (c) Do a wiring check between these pins of connector XA12 at the P85 LSCF and connector DB31101 at the P111 panel (SSM 31-09-12):

| DB31101         | XA12  |
|-----------------|-------|
| pin 2 . . . . . | pin 9 |
| pin 1 . . . . . | pin 6 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the ASG-L, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left ARINC Signal Gateway Card, P084A12, in the right System Cardfile (RSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31122, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-L channel 1 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the RSCF to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the WEU-L to the coupler (WDM 31-51-13):
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31122 from the P111 panel.

## 777-200/300 FAULT ISOLATION MANUAL

- (c) Do a wiring check between these pins of connector DB31122 at the P111 panel and connector DM31107AB at the E1-5 shelf (WDM 31-51-13):

| <b>DM31107AB</b> | <b>DB31122</b> |
|------------------|----------------|
| pin 5T .....     | pin 5          |
| pin 5TR .....    | pin 4          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31122.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this check of the wiring from the RSCF to the coupler:
- (a) Remove the ASG-L card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31201 from the P111 panel.
  - (c) Do a wiring check between these pins of connector XA12 at the P84 RSCF and connector DB31201 at the P111 panel (WDM 31-09-22):

| <b>DB31201</b> | <b>XA12</b> |
|----------------|-------------|
| pin 2 .....    | pin 2       |
| pin 1 .....    | pin 1       |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31201.
  - 3) Re-install the ASG-L, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left ARINC Signal Gateway Card (ASG-L), P84A12, in the right System Cardfile (RSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31123, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-L channel 2 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the RSCF to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the WEU-L to the coupler (WDM 31-51-13)
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Disconnect connector DB31123 from the P111 panel.
- (c) Do a wiring check between these pins of connector DB31123 at the P111 panel and connector DM31107AD at the E1-5 shelf (WDM 31-51-13):

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the flap slat electronic unit 1 (FSEU 1), M27001.
- These are the tasks:
- Flap/Slat Electronics Unit (FSEU) Removal, AMM TASK 27-51-01-000-801,  
Flap/Slat Electronics Unit (FSEU) Installation, AMM TASK 27-51-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31122, in the P111 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE:** This coupler connects the WEU-L channel 1 to the Systems 629 Bus-L.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B27101, in the P211 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE:** This coupler connects the FSEU 1 to the Systems 629 Bus-L.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the WEU-L to the coupler (WDM 31-51-13):
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Disconnect connector DB31122 from the P111 panel.
- (c) Do a wiring check between these pins of connector DB31122 at the P111 panel and connector DM31107AB at the E1-5 shelf (WDM 31-51-13):
- | <b>DM31107AB</b>  | <b>DB31122</b> |
|-------------------|----------------|
| pin 5T . . . . .  | pin 5          |
| pin 5TR . . . . . | pin 4          |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31122.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

| pin 2T . . . . .  | pin 2   |
| pin 2TR . . . . . | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-install the FSEU 1, M27001. To install it, do this task: Flap/Slat Electronics Unit (FSEU) Installation, AMM TASK 27-51-01-400-801.
  - 3) Re-connect connector DB27101.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 816. WEU-L Channel 2 No Input from FSEU 1 On Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79439.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.  
These are the tasks:  
Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the flap slat electronic unit 1 (FSEU 1), M27001.  
These are the tasks:  
Flap/Slat Electronics Unit (FSEU) Removal, AMM TASK 27-51-01-000-801,  
Flap/Slat Electronics Unit (FSEU) Installation, AMM TASK 27-51-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

**777-200/300  
FAULT ISOLATION MANUAL**

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31123, in the P111 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE: This coupler connects the WEU-L channel 2 to the Systems 629 Bus-L.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B27101, in the P211 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE: This coupler connects the FSEU 1 to the Systems 629 Bus-L.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the WEU-L to the coupler (WDM 31-51-13):
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Disconnect connector DB31123 from the P111 panel.
- (c) Do a wiring check between these pins of connector DB31123 at the P111 panel and connector DM31107AD at the E1-5 shelf (WDM 31-51-13):
- | <b>DM31107AD</b>  | <b>DB31123</b> |
|-------------------|----------------|
| pin 6T . . . . .  | pin 5          |
| pin 6TR . . . . . | pin 4          |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31123.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this check of the wiring from the FSEU 1 to the coupler:
- (a) Remove the FSEU 1, M27001. To remove it, do this task: Flap/Slat Electronics Unit (FSEU) Removal, AMM TASK 27-51-01-000-801.
- (b) Disconnect connector DB27101 from the coupler, B27101.
- (c) Do a wiring check between these pins of connector DM27001AB at the E1-6 shelf and connector DB27101 at the P111 panel (WDM 27-51-11):

### DM27001AB

pin 2T ..... pin 2  
pin 2TR ..... pin 1

### DB27101

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-install the FSEU 1, M27001. To install it, do this task: Flap/Slat Electronics Unit (FSEU) Installation, AMM TASK 27-51-01-400-801.
  - 3) Re-connect connector DB27101.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

## 817. WEU-L Channel 1 No Input From OPBC-L On Systems 629 Bus-L - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79445.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.
- These are the tasks:
- Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left overhead panel bus controller (OPBC-L), M23112.
- These are the tasks:
- Left Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-801,  
Left Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31122, in the P111 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE:** This coupler connects the WEU-L channel 1 to the Systems 629 Bus-L.

## 777-200/300 FAULT ISOLATION MANUAL

### 819. WEU-L Channel 1 No Input From OPBC-R on Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79449.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right overhead panel bus controller (OPBC-R), M23212.

These are the tasks:

Right Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-802,

Right Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31122, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-L channel 1 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B23127 in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the OPBC-R to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the WEU-L to the coupler (WDM 31-51-13):

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Disconnect connector DB31122 from the P111 panel.
- (c) Do a wiring check between these pins of connector DB31122 at the P111 panel and connector DM31107AB at the E1-5 shelf (WDM 31-51-13):

| DM31107AB         | DB31122 |
|-------------------|---------|
| pin 5T . . . . .  | pin 5   |
| pin 5TR . . . . . | pin 4   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31122.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this check of the wiring from the OPBC-R to the coupler:
  - (a) Remove the OPBC-R, M23212. To remove it, do this task: Right Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-802.
  - (b) Disconnect connector DB23127 from the coupler, B23127.
  - (c) Do a wiring check between these pins of connector DM23212B from the OPBC-R and connector DB23127 at the P111 panel (WDM 23-93-21):

| DM23212B        | DB23127 |
|-----------------|---------|
| pin 2 . . . . . | pin 2   |
| pin 1 . . . . . | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-install the OPBC-R, M23212. To install it, do this task: Right Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-802.
  - 3) Re-connect connector DB23127.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right overhead panel bus controller (OPBC-R), M23212.

These are the tasks:

Right Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-802,

Right Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31123, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-L channel 2 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B23127 in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the OPBC-R to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the WEU-L to the coupler (WDM 31-51-13):
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31123 from the P111 panel.

## 777-200/300 FAULT ISOLATION MANUAL

- (c) Do a wiring check between these pins of connector DB31123 at the P111 panel and connector DM31107AD at the E1-5 shelf (WDM 31-51-13):

| <b>DM31107AD</b>  | <b>DB31123</b> |
|-------------------|----------------|
| pin 6T . . . . .  | pin 5          |
| pin 6TR . . . . . | pin 4          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31123.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this check of the wiring from the OPBC-R to the coupler:
- (a) Remove the OPBC-R, M23212. To remove it, do this task: Right Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-802.
  - (b) Disconnect connector DB23127 from the coupler, B23127.
  - (c) Do a wiring check between these pins of connector DM23212B from the OPBC-R and connector DB23127 at the P111 panel (WDM 23-93-21):

| <b>DM23212B</b> | <b>DB23127</b> |
|-----------------|----------------|
| pin 2 . . . . . | pin 2          |
| pin 1 . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-install the OPBC-R, M23212. To install it, do this task: Right Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-802.
  - 3) Re-connect connector DB23127.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 821. WEU-R Internal Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-70012, 31-78802.

#### **B. Fault Isolation Procedure**

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the program pin inputs to the WEU-R channel 1:
- (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Disconnect connector D4400P from D4400J.
- (c) Do a wiring check between these pins of connector DM31207AA at the E4-2 shelf and TB4001 at the P205 panel (WDM 31-51-25):

| DM31207AA     | D4400P        | TB4001 |
|---------------|---------------|--------|
| pin F10 ..... | pin A11 ..... | TB4001 |
| pin G10 ..... | pin B11 ..... | TB4001 |
| pin F9 .....  | pin B12 ..... | TB4001 |
| pin G2 .....  | pin A13 ..... | TB4001 |
| pin G3 .....  | pin A12 ..... | TB4001 |
| pin G5 .....  | pin B13 ..... | TB4001 |
| pin H5 .....  | pin A14 ..... | TB4001 |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector D4400P.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the program pin inputs to the WEU-R channel 2:
- (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Disconnect connector D4400P from D4400J.
- (c) Do a wiring check between these pins of connector DM31207AC at the E4-2 shelf and TB4001 at the P205 panel (WDM 31-51-25):

| DM31207AC     | D4400P        | TB4001 |
|---------------|---------------|--------|
| pin F10 ..... | pin B14 ..... | TB4001 |
| pin H10 ..... | pin A15 ..... | TB4001 |
| pin F9 .....  | pin B15 ..... | TB4001 |
| pin G2 .....  | pin A16 ..... | TB4001 |
| pin G3 .....  | pin B16 ..... | TB4001 |
| pin H5 .....  | pin A17 ..... | TB4001 |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector D4400P.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 822. WEU-R Software Configuration Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-70022.

#### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 Warning Electronic Systems.
  - (a) Find Warning Electronic Unit (right channel 1) and Warning Electronic Unit (right channel 2) on the display and make sure that the software part numbers are correct.
  - (b) If a part number is incorrect, install software in the WEU-R. To install it, do this task: Warning Electronic Unit Software Installation, AMM TASK 31-51-01-400-802.
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 824. GND PROX GEAR Switch Signals Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-78090.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the GND PROX GEAR switch, S4 on the landing gear module assembly, M32002, on the P2-2 panel.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this wiring check:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the GND PROX GEAR switch, S4.
  - (c) Do a wiring check between these pins of connector DM31107AC at the E1-5 shelf and connector DM32002A (WDM 31-51-14):

**DM31107AC**

**DM32002A**

pin J3 . . . . . pin 13

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Re-install the GND PROX GEAR switch, S4.
- 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this wiring check:
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the GND PROX GEAR switch, S4.
  - (c) Do a wiring check between these pins of connector DM31107AC at the E1-5 shelf and connector DM32002A (WDM 31-51-14):

### **DM31107AC**

pin J3 . . . . .

### **DM32002A**

pin 15

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the GND PROX GEAR switch, S4.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### ————— END OF TASK —————

## **825. WEU-L to Systems 629 Bus-L Communication Problems - Fault Isolation**

### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-78841.

### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### **C. Fault Isolation Procedure**

- (1) Replace the left warning electronic unit (WEU-L), M31107.  
These are the tasks:  
Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31122, in the P111 panel.  
These are the tasks:

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

### 827. WEU-R to Systems 629 Bus-R Communication Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-78862.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31222, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-R channel 1 to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of wiring from the WEU-R to the coupler:
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31222 from the coupler, B31222.
  - (c) Do a wiring check between these pins of connector DM31207AB at the E4-2 shelf and connector DB31222 at the P211 panel (WDM 31-51-23):

#### DM31207AB

pin 2T . . . . . pin 2  
pin 2TR . . . . . pin 1

#### DB31222

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
    - 2) Re-connect connector DB31222.
    - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 5) If the MAT shows ACTIVE for the maintenance message, then continue.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (4) Do this check of the program pin inputs to the WEU-R channel 1:
- (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector D4400P from D4400J.
  - (c) Do a wiring check between these pins of connector DM31207AA at the E4-2 shelf and TB4001 at the P205 panel (WDM 31-51-25):

| DM31207AA     | D4400P        | TB4001 |
|---------------|---------------|--------|
| pin F10 ..... | pin A11 ..... | TB4001 |
| pin G10 ..... | pin B11 ..... | TB4001 |
| pin F9 .....  | pin B12 ..... | TB4001 |
| pin G2 .....  | pin A13 ..... | TB4001 |
| pin G3 .....  | pin A12 ..... | TB4001 |
| pin G5 .....  | pin B13 ..... | TB4001 |
| pin H5 .....  | pin A14 ..... | TB4001 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector D4400P.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the program pin inputs to the WEU-R channel 2:
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector D4400P from D4400J.
  - (c) Do a wiring check between these pins of connector DM31207AC at the E4-2 shelf and TB4001 at the P205 panel (WDM 31-51-25):

| DM31207AC     | D4400P        | TB4001 |
|---------------|---------------|--------|
| pin F10 ..... | pin B14 ..... | TB4001 |
| pin H10 ..... | pin A15 ..... | TB4001 |
| pin F9 .....  | pin B15 ..... | TB4001 |
| pin G2 .....  | pin A16 ..... | TB4001 |
| pin G3 .....  | pin B16 ..... | TB4001 |
| pin H5 .....  | pin A17 ..... | TB4001 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector D4400P.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 828. WEU-L No Output On WEU-L Ch1 OAP1 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-78891.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (c) Do a wiring check between these pins of connector D31107AA at the E1-5 shelf and connector DM31207AA at the E4-2 shelf (WDM 31-51-13):

#### **DM31107AA**

pin G7 . . . . .

pin H7 . . . . .

#### **DM31207AA**

pin J6

pin K6

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 831. WEU-L Channel 1 No Input from AIMS-L on Systems 629 Bus-L - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-79421.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM (M009) module in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31122, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-L channel 1 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31112, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the left AIMS to the Systems 629 Bus-L.

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-L channel 2 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B32215 in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the PSEU 2 to the Systems 629 Bus-L.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 836. WEU-L Channel 1 to Systems 629 Bus-C Communication Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79501.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31322, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-L channel 1 to the Systems 629 Bus-C.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring from the WEU-L to the coupler (WDM 31-51-13):
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Disconnect connector DB31322 from the P311 panel.
- (c) Do a wiring check between these pins of connector DB31322 at the P311 panel and connector DM31107AB at the E1-5 shelf (WDM 31-51-13):

#### **DM31107AB**

pin 6T . . . . . pin 5  
pin 6TR . . . . . pin 4

#### **DB31322**

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
- 2) Re-connect connector DB31322.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 837. WEU-R Channel 1 to Systems 629 Bus-C Communication Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-79502.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31306, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-R to the Systems 629 Bus-C.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring from the WEU-R to the coupler (WDM 31-51-23):
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31306 from the P311 panel.
  - (c) Do a wiring check between these pins of connector DB31306 at the P311 panel and connector DM31207AD at the E4-2 shelf (WDM 31-51-23):

#### **DM31207AD**

#### **DB31306**

pin 6T . . . . . pin 5

pin 6TR . . . . . pin 4

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left AIMS to the Systems 629 Bus-C.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 845. **WEU-R Channel 1 No Input from AIMS-L on Systems 629 Bus-C - Fault Isolation**

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-79522.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM (M008) module in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31306, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-R to the Systems 629 Bus-C.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31312, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

EFFECTIVITY  
ARO ALL

### 854. WEU-L Channel 2 No Input from FSEU 1 On Systems 629 Bus-C - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-79539.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the flap slat electronic unit 1 (FSEU 1), M27001.

These are the tasks:

Flap/Slat Electronics Unit (FSEU) Removal, AMM TASK 27-51-01-000-801,

Flap/Slat Electronics Unit (FSEU) Installation, AMM TASK 27-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31323, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-L channel 2 to the Systems 629 Bus-C.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B27302, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

EFFECTIVITY  
ARO ALL

### 860. WEU-R Channel 1 to Systems 629 Bus-R Communication Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-79603.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of wiring from the WEU-R to the coupler:
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31222 from the coupler, B31222.
  - (c) Do a wiring check between these pins of connector DM31207AB at the E4-2 shelf and connector DB31222 at the P211 panel (WDM 31-51-23):

#### **DM31207AB**

#### **DB31222**

|                   |       |
|-------------------|-------|
| pin 5T . . . . .  | pin 5 |
| pin 5TR . . . . . | pin 4 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31222.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right autopilot flight director computer (AFDC-R), M22201.

These are the tasks:

Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,

Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31222, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-R channel 1 to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B22204, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the AFDC-R to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right autopilot flight director computer (AFDC-R), M22201.

These are the tasks:

Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,

Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31223, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-R channel 2 to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B22204, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the AFDC-R to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM (M004) module in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31222, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-R channel 1 to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31211, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left AIMS to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the flap slat electronic unit 2 (FSEU 2), M27002.

These are the tasks:

Flap/Slat Electronics Unit (FSEU) Removal, AMM TASK 27-51-01-000-801,

Flap/Slat Electronics Unit (FSEU) Installation, AMM TASK 27-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31223, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-R channel 2 to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B27201, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the FSEU 2 to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 874. WEU-R Channel 1 No Input From OPBC-L on Systems 629 Bus-R - Fault Isolation

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left overhead panel bus controller (OPBC-L), M23112.

These are the tasks:

Left Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-801,

Left Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31222, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-R channel 1 to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B23226 in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the OPBC-L to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 883. WEU-R Channel 1 No Input From WEU-R Channel 2 on WEU Backplane 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79906.

#### B. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 884. WEU-L Channel 2 No Input From WEU-L Channel 1 on WEU Backplane 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79907.

#### B. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 885. WEU-L Channel 1 No Input From WEU-R Channel 1 on WEU L1 IAP2 429 Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79909.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of wiring:
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (c) Do a wiring check between these pins of connector DM31107AA at the E1-5 shelf and connector DM31207AA at the E4-2 shelf (WDM 31-51-23):

##### DM31107AA

pin J6 . . . . .

pin K6 . . . . .

##### DM31207AA

pin G7

pin H7

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
- 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

pin D10 . . . . . pin C1

**DM32037AB**

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the main gear steering control unit, M32037. To install it, do this task: Main Landing Gear Steering Control Unit (MGSCU) Installation, AMM TASK 32-53-02-420-801.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

———— **END OF TASK** ————

### 893. AFDC Autopilot Disconnect Warning Signals Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-78150.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the left autopilot flight director computer (AFDC-L), M22101.  
These are the tasks:  
Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,  
Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

EFFECTIVITY  
ARO ALL

**777-200/300  
FAULT ISOLATION MANUAL**

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right autopilot flight director computer (AFDC-R), M22201.  
These are the tasks:  
Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,  
Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the center autopilot flight director computer (AFDC-C), M22301.  
These are the tasks:  
Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,  
Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this wiring check:
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Remove the AFDC-L, M22101. To remove it, do this task: Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801.
- (c) Do a wiring check between these pins of connector DM31107AA and DM31107AC at the E1-5 shelf and connector DM22101AA at E1-3 shelf (WDM 22-11-39):
- |                  |                  |
|------------------|------------------|
| <b>DM31107AA</b> | <b>DM22101AA</b> |

## 777-200/300 FAULT ISOLATION MANUAL

### 894. Aural Enable Signals Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-78170.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this wiring check:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (c) Do a wiring check between these pins of connector DM31107AC at the E1-5 shelf and connector DM31207AC at E4-2 shelf (WDM 31-51-11):

#### DM31107AC

### 895. APU Fire Detection Card Voltage Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-78190.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the APU fire detection card, A09, in the left systems cardfile, P85.

These are the tasks:

APU Fire Control Card Removal, AMM TASK 26-15-03-000-801,

APU Fire Control Card Installation, AMM TASK 26-15-03-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this wiring check:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the APU fire detection card, A09, in the left systems cardfile, P85. To remove it, do this task: APU Fire Control Card Removal, AMM TASK 26-15-03-000-801.
  - (c) Do a wiring check between these pins of connector DM31107AC at the E1-5 shelf and connector DP8509 (WDM 26-15-11):

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the right fire detection card, A10, in the right systems cardfile, P84.

These are the tasks:

Engine Fire Detection Card Removal, AMM TASK 26-11-03-000-801,

Engine Fire Detection Card Installation, AMM TASK 26-11-03-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this wiring check:
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Remove the right fire detection card, A10, in the right systems cardfile, P84. To remove it, do this task: Engine Fire Detection Card Removal, AMM TASK 26-11-03-000-801.
- (c) Do a wiring check between these pins of connector DM31107AC at the E1-5 shelf and connector DP8408 (WDM 26-11-21):

| <b>DM31107AC</b> | <b>DP8408</b> |
|------------------|---------------|
| pin D6 . . . . . | pin 43        |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
- 3) Re-install the right fire detection card, A10, in the right systems cardfile, P84. To install it, do this task: Engine Fire Detection Card Installation, AMM TASK 26-11-03-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this wiring check:
- (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Remove the right fire detection card, A10, in the right systems cardfile, P84. To remove it, do this task: Engine Fire Detection Card Removal, AMM TASK 26-11-03-000-801.
- (c) Do a wiring check between these pins of connector DM31207AC at the E4-2 shelf and connector DP8408 (WDM 26-11-21):

| <b>DM31207AC</b> | <b>DP8408</b> |
|------------------|---------------|
| pin D6 . . . . . | pin 43        |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the right fire detection card, A10, in the right systems cardfile, P84. To install it, do this task: Engine Fire Detection Card Installation, AMM TASK 26-11-03-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 898. WEU-R to Systems 629 Bus-C Communication Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-78852.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31306, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-R channel 1 to the Systems 629 Bus-C.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31307, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-R channel 2 to the Systems 629 Bus-C.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this check of wiring from the WEU-R to the coupler:
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Disconnect connector DB31306 from the coupler, B31306.
- (c) Do a wiring check between these pins of connector DM31207AB at the E4-2 shelf and connector DB31306 at the P311 panel (WDM 31-51-23):

| <b>DM31207AB</b>  | <b>DB31306</b> |
|-------------------|----------------|
| pin 3T . . . . .  | pin 2          |
| pin 3TR . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31306.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (5) Do this check of wiring from the WEU-R to the coupler:
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31307 from the coupler, B31307.
  - (c) Do a wiring check between these pins of connector DM31207AD at the E4-2 shelf and connector DB31307 at the P311 panel (WDM 31-51-23):

| <b>DM31207AD</b>  | <b>DB31307</b> |
|-------------------|----------------|
| pin 2T . . . . .  | pin 2          |
| pin 2TR . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31307.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this check of the program pin inputs to the WEU-R channel 1:
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector D4400P from D4400J.
  - (c) Do a wiring check between these pins of connector DM31207AA at the E4-2 shelf and TB4001 at the P205 panel (WDM 31-51-25):

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the ALT GEAR DOWN switch, S27033.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this wiring check:
  - (a) Remove the ALT GEAR DOWN switch, S27033.
  - (b) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (c) Do a wiring check between these pins of connectors DM31107AA and DM31107AC at the E1-5 shelf and the ALT GEAR DOWN switch, S27033 (WDM 27-32-11):

| <b>DM31107AA</b> | <b>S27033</b> |
|------------------|---------------|
| pin D8 . . . . . | pin 2         |
| pin H2 . . . . . | pin 8         |

| <b>DM31107AC</b> | <b>S27033</b> |
|------------------|---------------|
| pin D8 . . . . . | pin 5         |

- (d) If you find a problem with the wiring, then do these steps:
      - 1) Repair the wiring.
      - 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
      - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - (e) If you do not find a problem with the wiring, then continue.
  - (3) Do this wiring check:
    - (a) Remove the ALT GEAR DOWN switch, S27033.
    - (b) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
    - (c) Do a wiring check between these pins of connectors DM31207AA and DM31207AC at the E4-2 shelf and the ALT GEAR DOWN switch, S27033 (WDM 27-32-12):

| <b>DM31207AA</b> | <b>S27033</b> |
|------------------|---------------|

## 777-200/300 FAULT ISOLATION MANUAL

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 903. WEU-L to ALT GEAR DOWN Switch Signals Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-78051, 31-78052.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ALT GEAR DOWN switch, S27033.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this wiring check:
- (a) Remove the ALT GEAR DOWN switch, S27033.
- (b) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (c) Do a wiring check between these pins of connectors DM31107AA and DM31107AC at the E1-5 shelf and the ALT GEAR DOWN switch, S27033 (WDM 27-32-11):

|                  |               |
|------------------|---------------|
| <b>DM31107AA</b> | <b>S27033</b> |
| pin D8 . . . . . | pin 2         |
| pin H2 . . . . . | pin 8         |

|                  |               |
|------------------|---------------|
| <b>DM31107AC</b> | <b>S27033</b> |
| pin D8 . . . . . | pin 5         |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
- 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### ————— END OF TASK —————

#### 904. WEU-R to ALT GEAR DOWN Switch Signals Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-78053, 31-78054.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the right warning electronic unit (WEU-R), M31207.  
These are the tasks:  
Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ALT GEAR DOWN switch, S27033.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this wiring check:
  - (a) Remove the ALT GEAR DOWN switch, S27033.
  - (b) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (c) Do a wiring check between these pins of connectors DM31207AA and DM31207AC at the E4-2 shelf and the ALT GEAR DOWN switch, S27033 (WDM 27-32-11):

| DM31207AA    | S27033 |
|--------------|--------|
| pin D8 ..... | pin 2  |
| pin H2 ..... | pin 8  |

| DM31207AC    | S27033 |
|--------------|--------|
| pin D8 ..... | pin 5  |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

  - 1) Repair the wiring.
  - 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (2) Replace the WEU-L, M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the WEU-R, M31207.
- These are the tasks:
- Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 909. Master Warning Light Input Signals to WEU-R Problems - Fault Isolation

#### A. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### B. Fault Isolation Procedure

- (1) Do this wiring check:
- (a) Remove the left warning electronic unit (WEU-L), M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Remove the right warning electronic unit (WEU-R), M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (c) Do a wiring check between these pins of connectors DM31107AA and DM31107AC at the E1-5 shelf and connectors DM31207AA and DM31207AC at the E4-2 shelf (WDM 31-51-12):

##### DM31107AA

## 777-200/300 FAULT ISOLATION MANUAL

Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this wiring check:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the AFDC-L, M22101. To remove it, do this task: Main Landing Gear Steering Control Unit (MGSCU) Removal, AMM TASK 32-53-02-020-801.
  - (c) Do a wiring check between these pins of connector DM31107AA and DM31107AC at the E1-5 shelf and connector DM22101AA at E1-3 shelf (WDM 22-11-39):

|                  |                  |
|------------------|------------------|
| <b>DM31107AA</b> | <b>DM22101AA</b> |
| pin J3 . . . . . | pin E3           |
| pin E7 . . . . . | pin A2           |

|                  |                  |
|------------------|------------------|
| <b>DM31107AC</b> | <b>DM22101AA</b> |
| pin E7 . . . . . | pin F1           |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the AFDC-L, M22101. To install it, do this task: Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this wiring check:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the AFDC-R, M22201. To remove it, do this task: Main Landing Gear Steering Control Unit (MGSCU) Removal, AMM TASK 32-53-02-020-801.
  - (c) Do a wiring check between these pins of connector DM31107AA and DM31107AC at the E1-5 shelf and connector DM22201AA shelf E2-5 (WDM 22-11-39):

|                  |                  |
|------------------|------------------|
| <b>DM31107AA</b> | <b>DM22201AA</b> |
| pin J3 . . . . . | pin E3           |
| pin E7 . . . . . | pin A2           |

|                  |                  |
|------------------|------------------|
| <b>DM31107AC</b> | <b>DM22201AA</b> |
| pin E7 . . . . . | pin F1           |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.

EFFECTIVITY  
ARO ALL

Page 298.31  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Re-install the AFDC-R, M22201. To install it, do this task: Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If the MAT shows ACTIVE for the maintenance message, then continue.
- (7) Do this wiring check:
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the AFDC-C, M22301. To remove it, do this task: Main Landing Gear Steering Control Unit (MGSCU) Removal, AMM TASK 32-53-02-020-801.
  - (c) Do a wiring check between these pins of connector DM31107AA and DM31107AC at the E1-5 shelf and connector DM22301AA at E4-1 shelf (WDM 22-11-39):

**DM31107AA**

pin J3 . . . . .  
pin E7 . . . . .

**DM22301AA**

pin E3  
pin A2

**DM31107AC**

pin E7 . . . . .

**DM22301AA**

pin F1

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the AFDC-C, M22301. To install it, do this task: Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 916. WEU-R Autopilot Disconnect Warning Signals Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-78153, 31-78154.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left autopilot flight director computer (AFDC-L), M22101.  
These are the tasks:  
Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,  
Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the right autopilot flight director computer (AFDC-R), M22201.  
These are the tasks:  
Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,  
Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the center autopilot flight director computer (AFDC-C), M22301.  
These are the tasks:  
Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,  
Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this wiring check:
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the AFDC-L, M22101. To remove it, do this task: Main Landing Gear Steering Control Unit (MGSCU) Removal, AMM TASK 32-53-02-020-801.
  - (c) Do a wiring check between these pins of connector DM31207AA and DM31207AC at the E4-2 shelf and connector DM22101AA at E1-3 shelf (WDM 22-11-39):

### **DM31207AA**

pin J3 . . . . .

## 777-200/300 FAULT ISOLATION MANUAL

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the AFDC-C, M22301. To install it, do this task: Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 917. WEU-L and WEU-R to Autopilot Disconnect Warning Signals Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-78155, 31-78156.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Do this wiring check:
- (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the AFDC-L, M22101. To remove it, do this task: Main Landing Gear Steering Control Unit (MGSCU) Removal, AMM TASK 32-53-02-020-801.
  - (c) Do a wiring check between these pins of connector DM31207AA and DM31207AC at the E4-2 shelf and connector DM22101AA at E1-3 shelf (WDM 22-11-39):

###### DM31207AA

pin J3 ..... pin E3  
pin E7 ..... pin A2

###### DM22101AA

###### DM31207AC

pin E7 ..... pin F1

###### DM22101AA

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the AFDC-L, M22101. To install it, do this task: Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this wiring check:

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the APU fire detection card, A09, in the left systems cardfile, P85.

These are the tasks:

APU Fire Control Card Removal, AMM TASK 26-15-03-000-801,

APU Fire Control Card Installation, AMM TASK 26-15-03-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this wiring check:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the APU fire detection card, A09, in the left systems cardfile, P85. To remove it, do this task: APU Fire Control Card Removal, AMM TASK 26-15-03-000-801.
  - (c) Do a wiring check between these pins of connector DM31107AC at the E1-5 shelf and connector DP8509 (WDM 26-15-11):

**DM31107AC**

**DP8509**

pin H2 . . . . . pin 1

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
    - 3) Re-install the APU fire detection card, A09, in the left systems cardfile, P85. To install it, do this task: APU Fire Control Card Installation, AMM TASK 26-15-03-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 919. WEU-R APU Fire Voltage Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-78193, 31-78194.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the APU fire detection card, A09, in the left systems cardfile, P85.

These are the tasks:

APU Fire Control Card Removal, AMM TASK 26-15-03-000-801,

APU Fire Control Card Installation, AMM TASK 26-15-03-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this wiring check:
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the APU fire detection card, A09, in the left systems cardfile, P85. To remove it, do this task: APU Fire Control Card Removal, AMM TASK 26-15-03-000-801.
  - (c) Do a wiring check between these pins of connector DM31207AC at the E4-2 shelf and connector DP8509 (WDM 26-15-11):

**DM31207AC**

**DP8509**

pin H2 . . . . . pin 1

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
    - 3) Re-install the APU fire detection card, A09, in the left systems cardfile, P85. To install it, do this task: APU Fire Control Card Installation, AMM TASK 26-15-03-400-801.

————— END OF TASK —————

### 926. WEU-L and WEU-R Engine Fire Detection Card Right Voltage Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-78235, 31-78236.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Do this wiring check:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the right fire detection card, A10, in the right systems cardfile, P84. To remove it, do this task: Engine Fire Detection Card Removal, AMM TASK 26-11-03-000-801.
  - (c) Do a wiring check between these pins of connector DM31107AC at the E1-5 shelf and connector DP8408 (WDM 26-11-21):

| DM31107AC | DP8408 |
|-----------|--------|
| pin D6    | pin 43 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 3) Re-install the right fire detection card, A10, in the right systems cardfile, P84. To install it, do this task: Engine Fire Detection Card Installation, AMM TASK 26-11-03-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (2) Do this wiring check:
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the right fire detection card, A10, in the right systems cardfile, P84. To remove it, do this task: Engine Fire Detection Card Removal, AMM TASK 26-11-03-000-801.
  - (c) Do a wiring check between these pins of connector DM31207AC at the E4-2 shelf and connector DP8408 (WDM 26-11-21):

## 777-200/300 FAULT ISOLATION MANUAL

**DM31207AC**

pin D6 . . . . .

**DP8408**

pin 43

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 3) Re-install the right fire detection card, A10, in the right systems cardfile, P84. To install it, do this task: Engine Fire Detection Card Installation, AMM TASK 26-11-03-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

## 927. Aural Arm L Channel 1 to Aural Enable R Channel 1 and 2 Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-78301, 31-78302.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Do this wiring check:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.

## 777-200/300 FAULT ISOLATION MANUAL

### 931. WEU-L Channel 1 429 Bus Output Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-78321.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of wiring from the WEU-L to the coupler:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (c) Do a wiring check between these pins of connector DM31107AA at the E1-5 shelf and connector DM31207AA at E4-2 shelf (WDM 31-51-13):

#### DM31107AA

pin H7 . . . . . pin K6  
pin G7 . . . . . pin J6

#### DM31207AA

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the wiring.
  - 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

pin J6

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the wiring.
  - 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 935. WEU-R No Input From WEU-L Channel 1 on ARINC 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79917.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Do this check of wiring:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (c) Do a wiring check between these pins of connector DM31107AA at the E1-5 shelf and connector DM31207AA at the E4-2 shelf (WDM 31-51-13):

##### DM31107AA

pin G7 . . . . .  
pin H7 . . . . .

##### DM31207AA

pin J6  
pin K6

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 937. Aural Enable Input Signals to WEU-L Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-78171, 31-78172.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this wiring check:
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (c) Do a wiring check between these pins of connector DM31107AC at the E1-5 shelf and connector DM31207AC at E4-2 shelf (WDM 31-51-11):

#### DM31207AC

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 944. WEU-R Channel 2 No Input From WEU-L Channel 1 on WEU R1 IAP2 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-79916.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of wiring:
    - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
    - (b) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
    - (c) Do a wiring check between these pins of connector DM31107AA at the E1-5 shelf and connector DM31207AA at the E4-2 shelf (WDM 31-51-13):

#### **DM31107AA**

pin G7

pin H7

#### **DM31207AA**

pin J6

pin K6

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

**945. ADIRS Pitch Attitude Is Out Of Range - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-83511, 31-83512, 31-83515, 31-83516.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the CPM/GG (M010) module in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the CPM/GG (M011) module in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the CPM/GG (M010) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the CPM/GG (M011) module in the right AIMS cabinet.

## 777-200/300 FAULT ISOLATION MANUAL

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the CPM/GG (M011) module in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the CPM/GG (M010) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the CPM/GG (M011) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the right DME interrogator, M34209.

These are the tasks:

DME Interrogator Removal, AMM TASK 34-55-01-000-801,

DME Interrogator Installation, AMM TASK 34-55-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (2) Replace the CPM/GG (M010) module in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (3) Replace the CPM/GG (M011) module in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (4) Replace the CPM/GG (M010) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (5) Replace the CPM/GG (M011) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the CPM/GG (M011) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 949. EICAS Message CONFIG SPOILERS - Fault Isolation

#### A. Description

- (1) This message shows when the Takeoff Warning Function is enabled and the Warning Electronic Unit (WEU) detects that the Speedbrake Handle is not in the DOWN Detent and Takeoff Thrust is selected on at least one engine.
- (2) Airplane Information Management System (AIMS) monitors N1 Speed for the two engines and if an engine exceeds a predetermined Takeoff Thrust Threshold value, it sends an output discrete to the WEU.

#### B. Possible Causes

- (1) Incorrect Speedbrake Handle setting for Takeoff

#### C. Fault Isolation Procedure

- (1) Set the Speedbrake Handle to DOWN to put the airplane in the correct Takeoff Configuration.

————— END OF TASK —————

### 950. EICAS Message CONFIG STABILIZER - Fault Isolation

#### A. Description

- (1) This message shows when the Takeoff Warning Function is enabled and the WEU detects that the Stabilizer is not positioned in the Takeoff Green Band Range and Takeoff Thrust is selected on at least one engine.
- (2) AIMS monitors N1 Speed for the two engines and if an engine exceeds a predetermined Takeoff Thrust Threshold value, it sends an output discrete to the WEU.

#### B. Possible Causes

- (1) Incorrect Stabilizer Setting for Takeoff

#### C. Fault Isolation Procedure

- (1) Set the Stabilizer to a correct setting for Takeoff.

**FAULT ISOLATION MANUAL**

**951. EICAS Message CONFIG FLAPS - Fault Isolation**

**A. Description**

- (1) This message shows when the Leading Edge (LE) and/or Trailing Edge (TE) Flaps are not in a takeoff position and Takeoff Thrust is selected on at least one engine.
- (2) AIMS monitors N1 Speed for the two engines and if an engine exceeds a predetermined Takeoff Thrust Threshold value, it sends an output discrete to the WEU.

**B. Possible Causes**

- (1) Incorrect Flap Setting for Takeoff

**C. Fault Isolation Procedure**

- (1) Put the flaps to a takeoff position to put the airplane in the correct Takeoff Configuration.

————— **END OF TASK** —————

**952. EICAS Message CONFIG RUDDER - Fault Isolation**

**A. Description**

- (1) This message shows when the Takeoff Warning Function is enabled and the WEU detects that the Rudder Trim is not within 2 units of Zero and Takeoff Thrust is selected on at least one engine.
- (2) AIMS monitors N1 Speed for the two engines and if an engine exceeds a predetermined Takeoff Thrust Threshold value, it sends an output discrete to the WEU.

**B. Possible Causes**

- (1) Incorrect Rudder Trim Setting for Takeoff

**C. Fault Isolation Procedure**

- (1) Set the Rudder Trim to Zero to put the airplane in the correct Takeoff Configuration.

————— **END OF TASK** —————

**953. EICAS Message CONFIG DOORS - Fault Isolation**

**A. Description**

- (1) This message shows when ALL Passenger and/or Cargo Doors are not closed and locked and Takeoff Thrust is selected on at least one engine.
- (2) AIMS monitors N1 Speed for the two engines and if an engine exceeds a predetermined Takeoff Thrust Threshold value, it sends an output discrete to the WEU.

**B. Possible Causes**

- (1) One or more Passenger Entry or Cargo Doors not closed/unlocked

**C. Fault Isolation Procedure**

- (1) Close and lock all Passenger and Cargo Doors to put the airplane in the correct Takeoff Configuration.

**FAULT ISOLATION MANUAL**

**954. EICAS Message CONFIG PARKING BRAKE - Fault Isolation**

**A. Description**

- (1) This message shows when the Takeoff Warning Function is enabled and the WEU detects that the Parking Brake is set and Takeoff Thrust is selected on at least one engine.
- (2) AIMS monitors N1 Speed for the two engines and if an engine exceeds a predetermined Takeoff Thrust Threshold value, it sends an output discrete to the WEU.

**B. Possible Causes**

- (1) Incorrect Parking Brake Setting for Takeoff

**C. Fault Isolation Procedure**

- (1) Release the Parking Brake to put the airplane in the correct Takeoff Configuration.

————— **END OF TASK** —————

**955. EICAS Message SPEEDBRAKE EXTENDED - Fault Isolation**

**A. Initial Evaluation**

NOTE: This message shows when the speed brake lever is beyond the armed detent and one or more of the following conditions exists:

- Radio altitude is between 800 and 15 feet.
- The flaps are in a landing position and the radio altitude is greater than 15 feet.
- One throttle lever is set above 41 degrees of TLA and the radio altitude is greater than 15 feet.

No maintenance action is necessary.

————— **END OF TASK** —————

**956. EICAS Message OVERSPEED - Fault Isolation**

**A. Initial Evaluation**

NOTE: This message shows when the airplane exceeds the maximum allowable operating speed (Vmo/Mmo).

- (1) Do this task: Severe or Unusual Turbulence, Excessive Maneuver, Buffet, or Speeds More than the Design Limits Conditional Inspection, AMM TASK 05-51-04-210-801.

————— **END OF TASK** —————

**957. EICAS Message VMO GEAR DOWN - Fault Isolation**

**A. Description**

- (1) This message shows when the ALTERNATE GEAR DOWN DISPATCH switch is set to the VMO position.

NOTE: The ALTERNATE GEAR DOWN DISPATCH switch is located on the right side of the lower Main Equipment Access Hatch.

**B. Fault Isolation Procedure**

- (1) Set the ALTERNATE GEAR DOWN DISPATCH switch to NORM to put the Stall Warning Management System back to Normal Mode.

**FAULT ISOLATION MANUAL**

**958. EICAS Message ALTITUDE ALERT - Fault Isolation**

**A. Initial Evaluation**

NOTE: This message shows when the airplane altitude is 200 feet above or below the mode control panel (MCP) selected altitude.

- (1) To put the altitude alert system back to the normal mode, set the selected altitude on the MCP to the airplane altitude.

————— **END OF TASK** —————

**959. WEU-L Channel 1 to Systems 629 Bus-L Communication Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-70031.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the ARINC 629 coupler, B31122, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-L channel 1 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31322, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-L channel 1 to the Systems 629 Bus-C1.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.

Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (4) Do this check of wiring from the WEU-L to the B31122 coupler in the P111 panel:

**NOTE:** This coupler connects the WEU-L channel 1 to the Systems 629 Bus-L.

- Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- Disconnect connector DB31122 from the coupler, B31122.
- Do a wiring check between these pins of connector DM31107AB at the E1-5 shelf and connector DB31122 at the P111 panel (WDM 31-51-13):

| DM31107AB | DB31122 |
|-----------|---------|
| pin 2T    | pin 2   |
| pin 2TR   | pin 1   |
| pin 5T    | pin 5   |
| pin 5TR   | pin 4   |

- If you find a problem with the wiring, then do these steps:
  - Replace the ARINC 629 wiring (SWPM 20-11-11).
  - Re-connect connector DB31122.
  - Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - If the MAT shows ACTIVE for the maintenance message, then continue.

- (5) Do this check of wiring from the WEU-L to the B31322 coupler in the P311 panel:

**NOTE:** This coupler connects the WEU-L channel 1 to the Systems 629 Bus-C1.

- Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- Disconnect connector DB31322 from the coupler, B31322.
- Do a wiring check between these pins of connector DM31107AB at the E1-5 shelf and connector DB31322 at the P311 panel (WDM 31-51-13):

| DM31107AB | DB31322 |
|-----------|---------|
| pin 3T    | pin 2   |
| pin 3TR   | pin 1   |
| pin 6T    | pin 5   |
| pin 6TR   | pin 4   |

- If you find a problem with the wiring, then do these steps:
  - Replace the ARINC wiring (SWPM 20-11-11).
  - Re-connect connector DB31322.
  - Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - If the MAT shows ACTIVE for the maintenance message, then continue.

- (6) Do this check of the program pin inputs to the WEU-L channel 1:

Page 298.77  
Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Do a wiring check between these pins of connector DM31107AA and TB1501 at the E1-5 shelf (WDM 31-51-15):

| DM3107AA      | TB1501 |
|---------------|--------|
| pin F10 ..... | TB1501 |
| pin G10 ..... | TB1501 |
| pin H10 ..... | TB1501 |
| pin G2 .....  | TB1501 |
| pin G3 .....  | TB1501 |
| pin G4 .....  | TB1501 |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring SWPM 20-11-11.
  - 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 960. WEU-L Channel 2 to Systems 629 Bus-L Communication Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-70032.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the ARINC 629 coupler, B31323, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-L channel 2 to the Systems 629 Bus-C1.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31123, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-L channel 2 to the Systems 629 Bus-L.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the left warning electronic unit (WEU-L), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this check of wiring from the WEU-L to the B31123 coupler in the P111 panel:

NOTE: This coupler connects the WEU-L channel 2 to the Systems 629 Bus-L.

- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Disconnect connector DB31123 from the coupler, B31123.
- (c) Do a wiring check between these pins of connector DM31107AD at the E1-5 shelf and connector DB31123 at the P111 panel (WDM 31-51-13):

| DM31107AD | DB31123 |
|-----------|---------|
| pin 3T    | pin 2   |
| pin 3TR   | pin 1   |
| pin 6T    | pin 5   |
| pin 6TR   | pin 4   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31123.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of wiring from the WEU-L to the B31323 coupler in the P311 panel:

NOTE: This coupler connects the WEU-L channel 2 to the Systems 629 Bus-C1.

  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31323 from the coupler, B31323.
  - (c) Do a wiring check between these pins of connector DM31107AD at the E1-5 shelf and connector DB31323 at the P311 panel (WDM 31-51-13):

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the ARINC 629 coupler, B31222, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-R channel 1 to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31306, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the WEU-R channel 1 to the Systems 629 Bus-C1

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this check of wiring from the WEU-R to the B31222 coupler in the P211 panel:

**NOTE:** This coupler connects the WEU-R channel 1 to the Systems 629 Bus-R.

- (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Disconnect connector DB31222 from the coupler, B31222.
- (c) Do a wiring check between these pins of connector DM31207AB at the E4-2 shelf and connector DB31222 at the P211 panel (WDM 31-51-23):

| DM31207AB | DB31222 |
|-----------|---------|
| pin 2T    | pin 2   |
| pin 2TR   | pin 1   |
| pin 5T    | pin 5   |
| pin 5TR   | pin 4   |

- (d) If you find a problem with the wiring, then do these steps:

- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
- 2) Re-connect connector DB31222.
- 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

**FAULT ISOLATION MANUAL**

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**962. WEU-R Channel 2 to Systems 629 Bus-R Communication Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-70034.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the ARINC 629 coupler, B31307, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-R channel 2 to the Systems 629 Bus-C1.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (2) Replace the ARINC 629 coupler, B31223, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-R channel 2 to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (3) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (4) Do this check of wiring from the WEU-R to the B31323 coupler in the P211 panel:

NOTE: This coupler connects the WEU-R channel 2 to the Systems 629 Bus-R.

- (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Disconnect connector DB31223 from the coupler, B31223.

### 963. WEU-L Channel 1 to WEU Speaker-L Circuit Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-70035.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left warning speaker, B31124.

These are the tasks:

Warning Speaker Removal, AMM TASK 31-51-02-000-801,

Warning Speaker Installation, AMM TASK 31-51-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left warning electronic unit (WEU-L), M31107.
- These are the tasks:
- Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,
- Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do a check for 28 VDC from pin 4 (+) of connector DB31124 to structure ground (WDM 31-51-11).

**777-200/300  
FAULT ISOLATION MANUAL**

- (a) If there is not 28 VDC at pin 4 of connector DB31124, then do these steps:
- 1) Open the P11 circuit breaker panel.
  - 2) Do a check for 28 VDC at the load terminal of the circuit breaker, C31001.
  - 3) If there is not 28 VDC at the circuit breaker, then do these steps (WDM 31-51-11):
    - a) Replace this circuit breaker:

**Overhead Circuit Breaker Panel, P11**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>       |
|------------|------------|---------------|-------------------|
| C          | 1          | C31001        | WARNING SPEAKER-L |

- b) Re-connect connector DB31124.
  - c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- 4) If there is 28 VDC at the circuit breaker, then do these steps:
- a) Repair the wiring between these pins of connector DB31124 at the left warning speaker, B31124, and the load terminal of circuit breaker C31001 (WDM 31-51-11):

| <b>DB31124</b>  | <b>C31001</b> |
|-----------------|---------------|
| pin 4 . . . . . | pin 4         |

- b) Re-connect connector DB31124.
  - c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If there is 28 VDC at pin 4 of connector DB31124, then continue.
- (4) Do this wiring check:
- (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the left warning speaker, B31124. To remove it, do this task: Warning Speaker Removal, AMM TASK 31-51-02-000-801.
  - (c) Do a wiring check between these pins of connector DM31107AA at the E1-5 shelf and connector DB31124 at the left warning speaker (WDM 31-51-11):

| <b>DM31107AA</b>  | <b>DB31124</b> |
|-------------------|----------------|
| pin A11 . . . . . | pin 3          |
| pin B11 . . . . . | pin 5          |
| pin 114 . . . . . | pin 6          |
| pin D1 . . . . .  | pin 8          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-connect connector DB31124.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 964. WEU-R Channel 1 to WEU Speaker-R Circuit Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-70036.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the right warning speaker, B31224.

These are the tasks:

Warning Speaker Removal, AMM TASK 31-51-02-000-801,

Warning Speaker Installation, AMM TASK 31-51-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right warning electronic unit (WEU-R), M31207.  
These are the tasks:  
Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.  
(a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.  
(b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do a check for 28 VDC from pin 4 (+) of connector DB31224 to structure ground (WDM 31-51-21).  
(a) If there is not 28 VDC at pin 4 of connector DB31224, then do these steps:

- 1) Open the P11 circuit breaker panel.
- 2) Do a check for 28 VDC at the load terminal of the circuit breaker, C31606.
- 3) If there is not 28 VDC at the circuit breaker, then do these steps (WDM 31-51-21):
  - a) Replace this circuit breaker:

#### **Overhead Circuit Breaker Panel, P11**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>       |
|------------|------------|---------------|-------------------|
| C          | 14         | C31606        | WARNING SPEAKER-R |

- b) Re-connect connector DB31224.
- c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- 4) If there is 28 VDC at the circuit breaker, then do these steps:

## 777-200/300 FAULT ISOLATION MANUAL

- a) Repair the wiring between these pins of connector DB31224 at the right warning speaker, B31224, and the load terminal of circuit breaker C31606 (WDM 31-51-21):

| DB31224         | C31606 |
|-----------------|--------|
| pin 4 . . . . . | pin 4  |

- b) Re-connect connector DB31224.
- c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If there is 28 VDC at pin 4 of connector DB31224, then continue.
- (4) Do this wiring check:
- (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Remove the right warning speaker, B31224. To remove it, do this task: Warning Speaker Removal, AMM TASK 31-51-02-000-801.
- (c) Do a wiring check between these pins of connector DM31207AA at the E4-2 shelf and connector DB31224 at the right warning speaker (WDM 31-51-21):

| DM31207AA         | DB31224 |
|-------------------|---------|
| pin A11 . . . . . | pin 3   |
| pin B11 . . . . . | pin 5   |
| pin 114 . . . . . | pin 6   |
| pin D1 . . . . .  | pin 8   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-connect connector DB31224.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left warning electronic unit (WEU-L), M31107.  
These are the tasks:  
Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this wiring check:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Remove the left master warning light, L31101.
  - (c) Do a wiring check between these pins of connector DM31107AA at the E1-5 shelf and connector DL31101 at the left master warning light (WDM 31-51-11):

| DM31107AA        | DL31101 |
|------------------|---------|
| pin B2 . . . . . | pin 15  |
| pin D9 . . . . . | pin 3   |

- (d) Do a wiring check between pin 2 of connector DL31101 at the left master warning light to the structure ground (WDM 31-51-11).
- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-connect connector DL31101.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 966. WEU-R to Right Master Warning Light Circuit Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-70038.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the right master warning light, L31201.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.

Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this wiring check:
- (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (b) Remove the right master warning light, L31201.
- (c) Do a wiring check between these pins of connectors DM31207AA and DM31207AC at the E4-2 shelf and connector DL31201 at the right master warning light (WDM 31-51-21):

|                  |                |
|------------------|----------------|
| <b>DM31207AA</b> | <b>DL31201</b> |
| pin B2 . . . . . | pin 15         |

|                  |                |
|------------------|----------------|
| <b>DM31207AC</b> | <b>DL31201</b> |
| pin D9 . . . . . | pin 3          |

- (d) Do a wiring check between pin 2 of connector DL31201 at the right master warning light to the structure ground (WDM 31-51-21).
- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-connect connector DL31201.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 967. WEU-R Channel 2 No Input From WEU-R Channel 1 on WEU Backplane 429 Bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-79908.

#### **B. Fault Isolation Procedure**

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right warning electronic unit (WEU-R), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 968. EICAS Message CONFIG GEAR - Fault Isolation

#### A. Initial Evaluation

**NOTE:** This message shows when the landing gear is not down and locked and the flap handle position at 25 or more or the left or right thrustlever at idle with radio altitude less than 800 feet.

- (1) To put the airplane to the normal configuration, make sure the gear is down and locked before landing.

————— END OF TASK —————

### 969. Aural Warning Speaker (Left) on Flight Deck Does Not Operate - Fault Isolation

#### A. Initial Evaluation

- (1) Do this ground test on the MAT: 31 Warning Electronic System, System Test, Warning Electronic system.
- (a) If one or more maintenance message related to the aural warning speaker show on the ground test display, then do these steps:
- 1) Find each message in the Maintenance Message Index.
  - 2) Do the specified fault isolation task.
- (b) If no maintenance message shows on the ground test display, then there was an intermittent fault.

————— END OF TASK —————

### 970. Aural Warning Speaker (Right) on Flight Deck Does Not Operate - Fault Isolation

#### A. Initial Evaluation

- (1) Do this ground test on the MAT: 31 Warning Electronic System, System Test, Warning Electronic system.
- (a) If one or more maintenance message related to the aural warning speaker show on the ground test display, then do these steps:
- 1) Find each message in the Maintenance Message Index.
  - 2) Do the specified fault isolation task.
- (b) If no maintenance message shows on the ground test display, then there was an intermittent fault.

————— END OF TASK —————

### 971. WEU Does Not Receive Valid Data From ACIPS - Fault Isolation

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the fault isolation procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) If the MAT shows ACTIVE for one of the maintenance messages, then do a replacement of the applicable WEU.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE, you corrected the fault.
- (2) If the MAT shows ACTIVE for two maintenance messages, then do these steps to isolate the fault.

- (a) Replace the left ACIPS card (P85A6) in the left system cardfile.

These are the tasks:

Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Removal, AMM TASK 30-21-01-000-801,

Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Installation, AMM TASK 30-21-01-400-801.

- (b) If the MAT shows NOT ACTIVE, you corrected the fault.
  - (c) If the MAT shows ACTIVE, then continue.
  - (d) Replace the right ACIPS card (P84A6) in the right system cardfile.

These are the tasks:

Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Removal, AMM TASK 30-21-01-000-801,

Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Installation, AMM TASK 30-21-01-400-801.

- (e) If the MAT shows NOT ACTIVE, you corrected the fault.
  - (f) If the MAT shows ACTIVE, then continue.
  - (g) Replace the center ACIPS card (P84A7) in the right system cardfile.

These are the tasks:

Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Removal, AMM TASK 30-21-01-000-801,

Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Installation, AMM TASK 30-21-01-400-801.

- (h) If the MAT shows NOT ACTIVE, you corrected the fault.
  - (i) If the MAT shows ACTIVE, then continue.
  - (j) Replace the left ASG card (P85A12) in the left system cardfile.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

These are the tasks:

Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,  
Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.

- (e) If the MAT shows NOT ACTIVE, you corrected the fault.
- (f) If the MAT shows ACTIVE, then continue.
- (g) Replace the center AFDC (M22301).

These are the tasks:

Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,  
Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.

- (h) If the MAT shows NOT ACTIVE, you corrected the fault.

### ————— END OF TASK —————

#### 974. WEU Does Not Receive Valid Data From EDIU - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-72051, 31-72052.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the fault isolation procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) If the MAT shows ACTIVE for one of the maintenance messages, then do a replacement of the applicable WEU.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE, you corrected the fault.
- (2) If the MAT shows ACTIVE for two maintenance messages, then do these steps to isolate the fault.

- (a) Replace the left EDIU (M73103).

These are the tasks:

Engine Data Interface Unit (EDIU) Removal, AMM TASK 73-21-22-000-804-H00,  
Engine Data Interface Unit (EDIU) Installation, AMM TASK 73-21-22-400-808-H00.

- (b) If the MAT shows NOT ACTIVE, you corrected the fault.
- (c) If the MAT shows ACTIVE, then continue.
- (d) Replace the right EDIU (M73203).

These are the tasks:

### 975. WEU Does Not Receive Valid Engine Display Data From AIMS - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-72061, 31-72062.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the fault isolation procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) If the MAT shows ACTIVE for one of the maintenance messages, then do a replacement of the applicable WEU.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE, you corrected the fault.
- (2) If the MAT shows ACTIVE for two maintenance messages, then do these steps to isolate the fault.

- (a) Replace the IOM-1 (M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (b) If the MAT shows NOT ACTIVE, you corrected the fault.
- (c) If the MAT shows ACTIVE, then continue.
- (d) Replace the IOM-2 (M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (e) If the MAT shows NOT ACTIVE, you corrected the fault.
- (f) If the MAT shows ACTIVE, then continue.
- (g) Replace the IOM-3 (M004) in the left AIMS cabinet.

### 978. WEU Does Not Receive Valid Fuel Switch Data From AIMS - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-72111, 31-72112.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the fault isolation procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) If the MAT shows ACTIVE for one of the maintenance messages, then do a replacement of the applicable WEU.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE, you corrected the fault.
- (2) If the MAT shows ACTIVE for two maintenance messages, then do these steps to isolate the fault.

- (a) Replace the IOM-1 (M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (b) If the MAT shows NOT ACTIVE, you corrected the fault.
  - (c) If the MAT shows ACTIVE, then continue.
- (d) Replace the IOM-2 (M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (e) If the MAT shows NOT ACTIVE, you corrected the fault.
  - (f) If the MAT shows ACTIVE, then continue.
- (g) Replace the IOM-3 (M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (h) If the MAT shows NOT ACTIVE, you corrected the fault.
  - (i) If the MAT shows ACTIVE, then continue.
- (j) Replace the IOM-1 (M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) If the MAT shows ACTIVE for one of the maintenance messages, then do a replacement of the applicable WEU.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE, you corrected the fault.

- (2) If the MAT shows ACTIVE for two maintenance messages, then do these steps to isolate the fault.

- (a) Replace the left EFIS control panel (M31102).

These are the tasks:

EFIS Control Panel Removal, AMM TASK 31-61-02-000-801,

EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.

- (b) If the MAT shows NOT ACTIVE, you corrected the fault.

- (c) If the MAT shows ACTIVE, then continue.

- (d) Replace the right EFIS control panel (M31202).

These are the tasks:

EFIS Control Panel Removal, AMM TASK 31-61-02-000-801,

EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.

- (e) If the MAT shows NOT ACTIVE, you corrected the fault.

- (f) If the MAT shows ACTIVE, then continue.

- (g) Replace the IOM-1 (M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (h) If the MAT shows NOT ACTIVE, you corrected the fault.

- (i) If the MAT shows ACTIVE, then continue.

- (j) Replace the IOM-2 (M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (k) If the MAT shows NOT ACTIVE, you corrected the fault.

- (l) If the MAT shows ACTIVE, then continue.

- (m) Replace the IOM-3 (M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (n) If the MAT shows NOT ACTIVE, you corrected the fault.

- (o) If the MAT shows ACTIVE, then continue.

- (p) Replace the IOM-1 (M009) in the right AIMS cabinet.

### 986. WEU OPC Variable Is Out Of Range - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-72210.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Use the MAT to do a software configuration check (AMM TASK 31-51-00-730-801).
  - (a) If one or more of the part numbers are incorrect, install software in the WEU (AMM TASK 31-51-01-400-802).
  - (b) If the MAT shows NOT ACTIVE, you corrected the fault.
  - (c) If the MAT shows ACTIVE, then continue.
  - (d) Replace the left WEU (M31107).

These are the tasks:  
Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - (e) If the MAT shows NOT ACTIVE, you corrected the fault.
  - (f) If the MAT shows ACTIVE, then continue.
  - (g) Replace the right WEU (M31207).

These are the tasks:  
Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,  
Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - (h) If the MAT shows NOT ACTIVE, you corrected the fault.

### 988. NO V1 AURAL DURING TAKEOFF - Fault Isolation

#### A. Initial Evaluation

NOTE: The ground test will make sure the warning speakers operate correctly.

- (1) Do this ground test on the MAT: 31 Warning Electronic System, System Test, Warning Electronic system.
  - (a) If one or more maintenance message related to the aural warning speaker show on the ground test display, then do these steps:
    - 1) Find each message in the Maintenance Message Index.
    - 2) Do the specified fault isolation task.
  - (b) If no maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

(1) Do this check of the wiring:

- (a) Remove the GPWC, M34004. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
- (b) Remove the IOM(M003) module from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Remove the IOM(M003) module from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (d) Do a wiring check between these pins of connector DM34004AB at the GPWC, M34004 and connector J240-A in the left AIMS cabinet (WDM 31-41-21).

| <b>DM34004AB</b>  | <b>J240-A</b> |
|-------------------|---------------|
| pin B11 . . . . . | pin G12       |
| pin A11 . . . . . | pin F11       |

- (e) Do a wiring check between these pins of connector DM34004AB at the GPWC, M34004 and connector J240-A in the right AIMS cabinet (WDM 31-41-23).

| <b>DM34004AB</b>  | <b>J240-A</b> |
|-------------------|---------------|
| pin A10 . . . . . | pin F11       |
| pin B10 . . . . . | pin G12       |

- (f) If you find any wiring problems, then do these steps to correct the fault:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) module in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M003) module in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (g) If you do not find any wiring problems, then continue.

(2) Do this check of the wiring:

- (a) Remove the GPWC, M34004. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
- (b) Remove the WEU-R and the WEU-L. To remove them, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
- (c) Do a wiring check between these pins of connector DM34004AB of the GPWC, M34004 and connector DM31207AA of the WEU-R, M31207 (WDM 34-46-12).

| <b>DM34004AB</b>  | <b>DM31207AA</b> |
|-------------------|------------------|
| pin C13 . . . . . | pin E11          |
| pin D13 . . . . . | pin F11          |

- (d) Do a wiring check between these pins of connector DM34004AB of the GPWC, M34004 and connector DM31107AA of the WEU-L, M31107 (WDM 34-46-12).

| <b>DM34004AB</b>  | <b>DM31107AA</b> |

- (e) If you find any wiring problems, then do these steps to correct the fault:
  - 1) Repair the wiring.
  - 2) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
  - 3) Re-install the WEU-R and the WEU-L. To install them, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

————— **END OF TASK** —————

### 989. **EICAS Message STAB GREENBAND - Fault Isolation**

#### **A. Initial Evaluation**

NOTE: This message can show after touchdown (during rollout or taxi in), and may be considered to be a nuisance message. No maintenance action is required.

NOTE: This message can show when the gross weight, center of gravity and takeoff thrust values that were entered in the FMC disagree with the stabilizer greenband nose gear pressure transducer.

#### **B. Fault Isolation Procedure - Nose Gear Pressure Transducer**

- (1) Do this task: Nose Landing Gear Shock Strut Servicing, AMM TASK 12-15-02-610-805-002.
  - (a) If the EICAS advisory message STAB GREENBAND does not show, then you corrected the fault.
  - (b) If the EICAS advisory message STAB GREENBAND shows, then continue.
- (2) Replace the stabilizer nose gear pressure transducer.

These are the tasks:

Nose Gear Pressure Transducer Removal, AMM TASK 27-48-07-000-803,  
Nose Gear Pressure Transducer Installation, AMM TASK 27-48-07-400-801.

  - (a) If the EICAS advisory message STAB GREENBAND does not show, then you corrected the fault.
  - (b) If the EICAS advisory message STAB GREENBAND shows, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the right HYDIM card, P84A17. To remove it, do this task: Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801.
  - (b) Disconnect connector DM29027 from the nose gear pressure transducer, M29027.
  - (c) Disconnect connector DP8412 from the right system card file, P84.
  - (d) Do a wiring check between these pins of connector DM29027 at the nose gear pressure transducer and connector DP8412 at the P84 panel (WDM 29-27-11):

| <b>DM29027</b> | <b>DP8412</b> |
|----------------|---------------|
| pin 2 .....    | pin 4         |
| pin 3 .....    | pin 3         |

- (e) Do a wiring check between pin 1 of connector DM29027 at the nose gear pressure transducer to the structure ground (WDM 29-27-11).
- (f) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-connect connectors DM29027 and DP8412.

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the right HYDIM card, P84A17. To install it, do this task: Hydraulic Interface Module (HYDIM) Cards Installation, AMM TASK 29-11-50-400-801.
- 4) If the EICAS advisory message STAB GREENBAND does not show, then you corrected the fault.

————— **END OF TASK** —————

### 990. WES Nose Gear Pressure Transducer Voltage Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-78020.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the nose gear pressure transducer, M29027.  
These are the tasks:  
Nose Gear Pressure Transducer Removal, AMM TASK 27-48-07-000-803,  
Nose Gear Pressure Transducer Installation, AMM TASK 27-48-07-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right hydraulic interface module (HYDIM) card, P84A17.  
These are the tasks:  
Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801,  
Hydraulic Interface Module (HYDIM) Cards Installation, AMM TASK 29-11-50-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the right HYDIM card, P84A17. To remove it, do this task: Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801.
  - (b) Disconnect connector DM29027 from the nose gear pressure transducer, M29027.
  - (c) Disconnect connector DP8412 from the right system card file, P84.
  - (d) Do a wiring check between these pins of connector DM29027 at the nose gear pressure transducer and connector DP8412 at the P84 panel (WDM 29-27-11):

#### DM29027

pin 2 ..... pin 4  
pin 3 ..... pin 3

#### DP8412

- (e) Do a wiring check between pin 1 of connector DM29027 at the nose gear pressure transducer to the structure ground (WDM 29-27-11).

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (f) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-connect connectors DM29027 and DP8412.
  - 3) Re-install the right HYDIM card, P84A17. To install it, do this task: Hydraulic Interface Module (HYDIM) Cards Installation, AMM TASK 29-11-50-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**991. EICAS Message CONFIG GEAR STEERING - Fault Isolation**

**A. Description**

- (1) This message shows when the Takeoff Warning Function is enabled and the WEU detects that the Main Landing Gear Rear Steering is not Locked and Centered and Takeoff Thrust is selected on at least one engine with the Fuel Switch set to the RUN position.
- (2) AIMS monitors N1 Speed for the two engines and if an engine exceeds a predetermined Takeoff Thrust Threshold value, it sends an output discrete to the WEU.

**B. Possible Causes**

- (1) Incorrect Main Landing Gear Rear Steering Configuration for Takeoff

**C. Initial Evaluation**

- (1) If correlated maintenance messages did not show on the Maintenance Access Terminal (MAT), do the Fault Isolation Procedure below.
- (2) If correlated maintenance messages also showed on the MAT, first do the Fault Isolation Procedure below.
  - (a) If the problem continues, then refer to 31-MAINT MSG INDEX to find the applicable Fault Isolation Manual (FIM) Tasks for the correlated maintenance messages that show with the CONFIG GEAR STEERING Engine Indication and Crew Alerting System (EICAS) Message.

**D. Fault Isolation Procedure**

- (1) Make sure that the Main Landing Gear Rear Steering is Locked and Centered for correct Takeoff Configuration.

**802. Right AIMS Display Function (M010) Internal Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51562, 31-51572, 31-81052.

**B. Fault Isolation Procedure**

- (1) Replace the CPM/GG(M010) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**803. Left AIMS Display Function (M010) Internal S/W Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51563, 31-51573, 31-81041.

**B. Fault Isolation Procedure**

- (1) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/GG(M010) in Left AIMS Module Reset.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

**804. Right AIMS Display Function (M010) Internal S/W Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51564, 31-51574, 31-81042.

**B. Fault Isolation Procedure**

- (1) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/GG(M010) in Right AIMS Module Reset.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

**805. Left AIMS Display Function (M011) Internal Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51761, 31-51771, 31-82051.

**B. Fault Isolation Procedure**

- (1) Replace the CPM/GG(M011) module in the left AIMS cabinet.

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 806. Right AIMS Display Function (M011) Internal Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51762, 31-51772, 31-82052.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/GG(M011) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 807. Left AIMS Display Function (M011) Internal S/W Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51763, 31-51773, 31-82041.

#### B. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/GG(M011) in Left AIMS Module Reset.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 808. Right AIMS Display Function (M011) Internal S/W Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51764, 31-51774, 31-82042.

#### B. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/GG(M011) in Right AIMS Module Reset.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 809. Cursor Control Device-L No Output on ARINC 429 Bus - Fault Isolation

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Remove the IOM(M003) module from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Remove the IOM(M004) module from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Remove the IOM(M008) module from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Remove the IOM(M009) module from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Re-install the IOM(M003) module in the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (6) Re-install the IOM(M004) module in the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (7) Re-install the IOM(M008) module in the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (8) Re-install the IOM(M009) module in the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (9) Replace the left cursor control device, M31103.  
These are the tasks:  
Cursor Control Device Removal, AMM TASK 31-61-07-000-801,  
Cursor Control Device Installation, AMM TASK 31-61-07-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for the left AIMS system on the MAT: 31 AIMS - Left AIMS.
  - (a) Find the CPM/GG(M010) in Left AIMS on the display and make sure that the software part numbers are correct:
  - (b) If the part numbers are incorrect, install software in the CPM/GG(M010) module in the left AIMS cabinet. To install the software, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 812. Right AIMS Display Function (M010) S/W Config Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-81002, 31-81012.

#### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for the right AIMS system on the MAT: 31 AIMS - Right AIMS.
  - (a) Find the CPM/GG(M010) in right AIMS on the display and make sure that the software part numbers are correct:
  - (b) If the part numbers are incorrect, install software in the CPM/GG(M010) module in the right AIMS cabinet. To install the software, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 813. CPM/GG(M010) in Left AIMS has No Output on Coax - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-81081.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the CPM/GG(M010) module in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Coax Coupler, B31117.  
These are the tasks:  
Coaxial Coupler Removal, AMM TASK 31-61-11-000-801,  
Coaxial Coupler Installation, AMM TASK 31-61-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Use a time domain reflectometer (TDR) test set to do an electrical check of the coaxial cable between the coax coupler, B31117, and the CPM/GG(M010) module:
  - (a) Remove the CPM/GG(M010) module from the left AIMS cabinet. To remove it, do this task: Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801.
  - (b) Disconnect connector DB31117G from the coax coupler, B31117 (WDM 31-61-14).
  - (c) Connect the TDR test set to coaxial connector DB31117G (WDM 31-61-14):
  - (d) Do an electrical check of the coaxial cable.  
NOTE: The TDR test set has instructions which tell how to perform the check of the coaxial cable.
  - (e) Disconnect the TDR test set.
  - (f) Re-install the CPM/GG(M010) module in the left AIMS cabinet. To install it, do this task: Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.
- (4) If you find a problem with the coaxial cable, do these steps:
  - (a) Replace the coaxial cable (WDM 31-61-14).
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (5) If you do not find a problem with the coaxial cable, do these steps:
  - (a) Re-install the coaxial cable (WDM 31-61-14).
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 814. Left AIMS Display Function (M011) S/W Config Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-82001, 31-82011.

#### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for the left AIMS system on the MAT: 31 AIMS - Left AIMS.
  - (a) Find the CPM/GG(M011) in Left AIMS on the display and make sure that the software part numbers are correct:
  - (b) If the part numbers are incorrect, install software in the CPM/GG(M011) module in the left AIMS cabinet. To install it, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the CPM/GG module(M011) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Coax Coupler, B31118.

These are the tasks:

Coaxial Coupler Removal, AMM TASK 31-61-11-000-801,

Coaxial Coupler Installation, AMM TASK 31-61-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Use a time domain reflectometer (TDR) test set to do an electrical check of the coaxial cable between the coax coupler, B31118, and the CPM/GG module(M011):
- (a) Remove the CPM/GG module(M011) from the left AIMS cabinet. To remove it, do this task: Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801.
- (b) Disconnect connector DB31118G from the coax coupler, B31118.
- (c) Connect the TDR test set to coaxial connector DB31118G (WDM 31-61-14).
- (d) Do an electrical check of the coaxial cable.

NOTE: The TDR test set has instructions which tell how to perform the check of the coaxial cable.

- (e) Disconnect the TDR test set.
- (f) Re-install the CPM/GG module(M011) in the left AIMS cabinet. To install it, do this task: Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (4) If you find a problem with the coaxial cable, do these steps:
  - (a) Replace the coaxial cable (WDM 31-61-14).
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (5) If you do not find a problem with the coaxial cable, do these steps:
  - (a) Re-install the coaxial cable (WDM 31-61-14).
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 818. Display Select Panel CANC/RCL Switch Problems - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Replace the display select panel, M31038.  
These are the tasks:  
Display Select Panel Removal, AMM TASK 31-61-03-000-801,  
Display Select Panel Installation, AMM TASK 31-61-03-400-801.
  - (a) If the CANC/RCL switch on the display select panel operates correctly, then you corrected the fault.

————— END OF TASK —————

### 819. Inboard Display Selector (Left, Right) Problems - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Replace the captain's (first officer's) display switching panel, M31001 (M31002).  
These are the tasks:  
Display Switching Panel Removal, AMM TASK 31-61-06-000-801,  
Display Switching Panel Installation, AMM TASK 31-61-06-400-801.
  - (a) If the applicable display selector operates correctly, then you corrected the fault.

————— END OF TASK —————

### 822. Inbd/Outbd DU Manual Brightness Control Problems - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Replace the captain's (first officer's) forward panel brightness/heater control panel, M33414 (M33415).
  - (a) If the brightness control switch operates correctly, then you corrected the fault.

————— END OF TASK —————

### 823. Left Outboard DU Decision Height Indication Problems - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS, 31 AIMS - Right AIMS, and 31 AIMS - Display Systems.
  - (a) If a maintenance message related to an AIMS IOM, or the Display System shows in Existing Faults, then do these steps:

## 777-200/300 FAULT ISOLATION MANUAL

- 1) Find the message in the applicable FIM Maintenance Message Index.
- 2) Do the specified task for the maintenance message.
- (b) If a maintenance message related to an AIMS IOM, or the Display System does not show in Existing Faults, then continue.
- (2) Replace the left EFIS control panel, M31102.  
These are the tasks:  
EFIS Control Panel Removal, AMM TASK 31-61-02-000-801,  
EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.
- (a) If the decision height indication is OK, then you corrected the fault.

————— **END OF TASK** —————

### 824. Right Outboard DU Decision Height Indication Problems - Fault Isolation

#### A. **Fault Isolation Procedure**

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS, 31 AIMS - Right AIMS, and 31 AIMS - Display Systems.
  - (a) If a maintenance message related to an AIMS IOM, or the Display System shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
  - (b) If a maintenance message related to an AIMS IOM, or the Display System does not show in Existing Faults, then continue.
- (2) Replace the right EFIS control panel, M31202.  
These are the tasks:  
EFIS Control Panel Removal, AMM TASK 31-61-02-000-801,  
EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.
- (a) If the decision height indication is OK, then you corrected the fault.

————— **END OF TASK** —————

### 827. Left EFIS Control Panel Problems - Fault Isolation

#### A. **Fault Isolation Procedure**

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS, 31 AIMS - Right AIMS, and 31 AIMS - Display Systems.
  - (a) If a maintenance message related to an AIMS IOM, or the Display System shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
  - (b) If a maintenance message related to an AIMS IOM, or the Display System does not show in Existing Faults, then continue.
- (2) Replace the left EFIS control panel, M31102.

### 828. Right EFIS Control Panel Problems - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS, 31 AIMS - Right AIMS, and 31 AIMS - Display Systems.
  - (a) If a maintenance message related to an AIMS IOM, or the Display System shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
  - (b) If a maintenance message related to an AIMS IOM, or the Display System does not show in Existing Faults, then continue.
- (2) Replace the right EFIS control panel, M31202.

These are the tasks:

EFIS Control Panel Removal, AMM TASK 31-61-02-000-801,  
EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.

  - (a) If there is no EFIS control panel problems, then you corrected the fault.

————— END OF TASK —————

### 829. Left and Right AIMS Display Functions S/W Config Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-80010, 31-80020.

#### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for the left AIMS system on the MAT: 31 AIMS - Left AIMS.
  - (a) Find these line replaceable modules (LRM) on the display and make sure that the software part numbers are correct:
    - 1) CPM/GG(M010) in Left AIMS
    - 2) CPM/GG(M011) in Left AIMS
  - (b) If the part numbers are incorrect, install software in the applicable LRM in the left AIMS cabinet: Core Processor Module/Graphics Generator Software Installation. To install the software, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do a check of the system configuration for the right AIMS system on the MAT: 31 AIMS - Right AIMS.
  - (a) Find these line replaceable modules (LRM) on the display and make sure that the software part numbers are correct:
    - 1) CPM/GG(M010) in Right AIMS
    - 2) CPM/GG(M011) in Right AIMS

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the part numbers are incorrect, install software in the applicable LRM in the right AIMS cabinet: Core Processor Module/Graphics Generator Software Installation. To install the software, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### ————— END OF TASK —————

#### 830. CPM/GG(M010) in Right AIMS has No Output on Coax - Fault Isolation

##### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-81082.

##### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### **C. Fault Isolation Procedure**

- (1) Replace the CPM/GG(M010) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Coax Coupler, B31215.

These are the tasks:

Coaxial Coupler Removal, AMM TASK 31-61-11-000-801,

Coaxial Coupler Installation, AMM TASK 31-61-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Use a time domain reflectometer (TDR) test set to do an electrical check of the coaxial cable between the coax coupler, B31215, and the CPM/GG(M010) module:
  - (a) Remove the CPM/GG(M010) module from the right AIMS cabinet. To remove it, do this task: Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801.
  - (b) Disconnect connector DB31215G from the coax coupler, B31215 (WDM 31-61-14).
  - (c) Connect the TDR test set to coaxial connector DB31215G (WDM 31-61-14):
  - (d) Do an electrical check of the coaxial cable.

**NOTE:** The TDR test set has instructions which tell how to perform the check of the coaxial cable.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right EFIS control panel, M31202.

These are the tasks:

EFIS Control Panel Removal, AMM TASK 31-61-02-000-801,

EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring to the right EFIS control panel, M31202:
  - (a) Remove the right EFIS control panel, M31202. To remove it, do this task: EFIS Control Panel Removal, AMM TASK 31-61-02-000-801.
  - (b) Disconnect connector D4319P from the left integration panel, P105.
  - (c) Do a wiring check between these pins of connector DM31202B at the right EFIS control panel, M31202, and connector D4319J at the left integration panel, P105 (WDM 31-61-19):

|                 |       |               |
|-----------------|-------|---------------|
| <b>DM31202B</b> |       | <b>D4319J</b> |
| pin 7           | ..... | pin A2        |
| pin 8           | ..... | pin B2        |
  - (d) Repair any wiring problems you find.
  - (e) Re-connect D4319P.
  - (f) Re-install the right EFIS control panel, M31202. To install it, do this task: EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.
  - (g) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left outboard display unit, N31101.

These are the tasks:

Display Unit Removal, AMM TASK 31-61-01-000-801,

Display Unit Installation, AMM TASK 31-61-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the left outboard DU, N31101. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - (b) Remove the IOM(M008) and IOM(M009) modules from the left AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of connector DN31101AB at the P1-1 panel and connector J410-A in the left AIMS cabinet (WDM 31-61-16).

| <b>DN31101AB</b> |       | <b>J410-A</b> |
|------------------|-------|---------------|
| pin A3           | ..... | pin A9        |
| pin A4           | ..... | pin B9        |

- (d) Do a wiring check between these pins of connector DN31101AB at the P1-1 panel and connector J420-A in the left AIMS cabinet (WDM 31-61-16).

| <b>DN31101AB</b> |       | <b>J420-A</b> |
|------------------|-------|---------------|
| pin A3           | ..... | pin A9        |
| pin A4           | ..... | pin B9        |

- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) and IOM(M009) modules in the left AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left outboard DU, N31101. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (f) If you do not find a problem with the wiring, then continue.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Remove the IOM(M003) and IOM(M004) modules from the left AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of connector DN31102AB at the P1-1 panel and connector J240-B in the left AIMS cabinet (WDM 31-61-16):

| <b>DN31102AB</b> | <b>J240-B</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A9        |
| pin A4 . . . . . | pin B9        |

- (d) Do a wiring check between these pins of connector DN31102AB at the P1-1 panel and connector J250-B in the left AIMS cabinet (WDM 31-61-16):

| <b>DN31102AB</b> | <b>J250-B</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A9        |
| pin A4 . . . . . | pin B9        |

- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) and IOM(M004) modules in the left AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left inboard DU, N31102. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (f) If you do not find a problem with the wiring, then continue.
- (3) Re-install the IOM(M003) and IOM(M004) modules in the left AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the IOM(M003) module from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Do a wiring check between these pins of connector DN31102AB at the P1-1 panel and connector J240-B in the right AIMS cabinet (WDM 31-61-16):

| <b>DN31102AB</b> | <b>J240-B</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A4        |
| pin A4 . . . . . | pin B4        |

- (c) Repair any wiring problems you find.
- (d) Re-install the IOM(M003) module in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) Re-install the left outboard DU, N31102. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
- (f) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 836. Right Inboard DU has No Output on ARINC 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-88895.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right inboard display unit, N31202.

These are the tasks:

Display Unit Removal, AMM TASK 31-61-01-000-801,

Display Unit Installation, AMM TASK 31-61-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
    - (a) Remove the right inboard DU, N31202. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
    - (b) Remove the IOM(M003) and IOM(M004) modules from the left AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (c) Do a wiring check between these pins of connector DN31102AB at the P1-1 panel and connector J240-B in the left AIMS cabinet (WDM 31-61-17):

#### DN31102AB

|        |       |        |
|--------|-------|--------|
| pin A3 | ..... | pin A9 |
| pin A4 | ..... | pin B9 |

#### J240-B

- (d) Do a wiring check between these pins of connector DN31102AB at the P1-1 panel and connector J250-B in the left AIMS cabinet (WDM 31-61-16):

#### DN31102AB

|        |       |        |
|--------|-------|--------|
| pin A3 | ..... | pin A9 |
| pin A4 | ..... | pin B9 |

#### J250-B

- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) and IOM(M004) modules in the left AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the right inboard DU, N31202. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (f) If you do not find a problem with the wiring, then continue.
- (3) Re-install the IOM(M003) and IOM(M004) modules in the left AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the IOM(M003) module from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Do a wiring check between these pins of connector DN31102AB at the P1-1 panel and connector J240-B in the right AIMS cabinet (WDM 31-61-16):

| <b>DN31102AB</b> | <b>J240-B</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A4        |
| pin A4 . . . . . | pin B4        |
- (c) Repair any wiring problems you find.
- (d) Re-install the IOM(M003) module in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) Re-install the right outboard DU, N31202. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
- (f) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 837. Right Outboard DU has No Output on ARINC 429 Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-88896.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right outboard display unit, N31201.

These are the tasks:

Display Unit Removal, AMM TASK 31-61-01-000-801,

Display Unit Installation, AMM TASK 31-61-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the right outboard DU, N31201. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
- (b) Remove the IOM(M008) and IOM(M009) modules from the right AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of connector DN31201AB at the P3-1 panel and connector J410-A in the right AIMS cabinet (WDM 31-61-17):

| <b>DN31201AB</b> | <b>J410-A</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A16       |
| pin A4 . . . . . | pin B16       |

- (d) Do a wiring check between these pins of connector DN31201AB at the P3-1 panel and connector J420-A in the right AIMS cabinet (WDM 31-61-17):

| <b>DN31201AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A16       |
| pin A4 . . . . . | pin B16       |

- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M008) and IOM(M009) modules in the right AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right outboard DU, N31201. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (f) If you do not find a problem with the wiring, then continue.
- (3) Re-install the IOM(M008) and IOM(M009) modules in the right AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (4) Do this check of the wiring:
- (a) Remove the IOM(M008) module from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Do a wiring check between these pins of connector DN31201AB at the P3-1 panel and connector J410-A in the left AIMS cabinet (WDM 31-61-17):

| <b>DN31201AB</b> | <b>J410-A</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A8        |
| pin A4 . . . . . | pin B8        |

- (c) Repair any wiring problems you find.
- (d) Re-install the IOM(M008) module in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) Re-install the right outboard DU, N31201. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.

777-200/300  
FAULT ISOLATION MANUAL

- (f) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

**838. EFIS Control Panel-L No Output on ARINC 429 Bus - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-88899.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left EFIS control panel, M31102.

These are the tasks:

EFIS Control Panel Removal, AMM TASK 31-61-02-000-801,

EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do a check of the wiring to the left EFIS control panel, M31102:
- (a) Remove the left EFIS control panel, M31102. To remove it, do this task: EFIS Control Panel Removal, AMM TASK 31-61-02-000-801.
- (b) Disconnect connector D5714P from the left integration panel, P105.
- (c) Do a wiring check between these pins of connector DM31102B at the left EFIS control panel, M31102, and connector J5714P at the left integration panel, P105 (WDM 31-61-19):

| DM31102B    | D4319P |
|-------------|--------|
| pin 7 ..... | pin A1 |
| pin 8 ..... | pin B1 |

- (d) Repair any wiring problems you find.
- (e) Re-connect D5714P.
- (f) Re-install the left EFIS control panel, M31102. To install it, do this task: EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.
- (g) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

- (1) Do this special function on the MAT to isolate the fault: 31 AIMS - Display System, OTHER, SYSTEM, CPM/GG(M011) in R-AIMS WXR Interface Check.
  - (a) If a maintenance message related to a weather radar transceiver or to a AIMS module shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.

————— **END OF TASK** —————

### 843. AIMS-L Display Function no Input from Left Outboard DU on ARINC 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-89905.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M008) module in the left AIMS cabinet.

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M009) module in the left AIMS cabinet.

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the left outboard DU, N31101. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - (b) Remove the IOM(M008) and IOM(M009) modules from the left AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of connector DN31101AB at the P1-1 panel and connector J410-A in the left AIMS cabinet (WDM 31-61-16).

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) module in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (2) Replace the IOM(M004) module in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (3) Do this check of the wiring:

- (a) Remove the left inboard DU, N31102. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.

- (b) Remove the IOM(M003) and IOM(M004) modules from the left AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.

- (c) Do a wiring check between these pins of connector DN31102AB at the P1-1 panel and connector J240-B in the left AIMS cabinet (WDM 31-61-16):

| <b>DN31102AB</b> |       | <b>J240-B</b> |
|------------------|-------|---------------|
| pin A3           | ..... | pin A9        |
| pin A4           | ..... | pin B9        |

- (d) Do a wiring check between these pins of connector DN31102AB at the P1-1 panel and connector J250-B in the left AIMS cabinet (WDM 31-61-16):

| <b>DN31102AB</b> |       | <b>J250-B</b> |
|------------------|-------|---------------|
| pin A3           | ..... | pin A9        |
| pin A4           | ..... | pin B9        |

- (e) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the IOM(M003) and IOM(M004) modules in the left AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the left inboard DU, N31102. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.

## 31-61 TASK 850

D633W103-ARO

Page 234  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 851. AIMS-L Display Function no Input from Right Inboard DU on ARINC 429 Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-89921.

##### B. Initial Evaluation

- (1) AIMS CPM/COMM OPS S/W -07 (IF INSTALLED) ;  
If the maintenance message shows without a correlated flight deck effect, then no maintenance action is necessary.
- (2) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (3) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) module in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M003) module from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the right inboard display unit (DU), N31202. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
- (c) Do a wiring check between these pins of connector DN31202AB at the P3-1 panel and connector J240-B in the left AIMS cabinet (WDM 31-61-17):

#### DN31202AB

pin A3 . . . . . pin A4  
pin A4 . . . . . pin B4

#### J240-B

- (d) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the IOM(M003) module in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the right inboard DU, N31202. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Re-install the IOM(M003) module in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (4) Install a new right inboard DU, N31202. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 852. AIMS-R Display Function no Input from Right Inboard DU on ARINC 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-89922.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) module in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M004) module in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the right inboard display unit(DU), N31202. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M004) module in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the right EFIS control panel (EFIS CP), M31202. To remove it, do this task: EFIS Control Panel Removal, AMM TASK 31-61-02-000-801.
  - (b) Remove the IOM(M004) module from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of connector DM31202AB at the glareshield center panel, P55 and connector J250-B in the left AIMS cabinet (WDM 31-61-19):

| DM31202AB       | J250-B |
|-----------------|--------|
| pin 7 . . . . . | pin A1 |
| pin 8 . . . . . | pin B1 |
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M004) module in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right EFIS CP, M31202. To install it, do this task: EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the IOM(M004) module in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (4) Install a new right EFIS CP, M31202. To install it, do this task: EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.

D633W103-ARO

Page 243  
Sep 05/2016

**777-200/300  
FAULT ISOLATION MANUAL**

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**858. AIMS-R Display Function no Input from Right EFIS CP on ARINC 429 Bus - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-89934.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M008) module in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M009) module in the right AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,
- Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
- (a) Remove the right EFIS control panel (EFIS CP), M31202. To remove it, do this task: EFIS Control Panel Removal, AMM TASK 31-61-02-000-801.
- (b) Remove the IOM(M008) and IOM(M009) modules from the right AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of connector DM31202AB at the glareshield center panel, P55 and connector J410-B in the right AIMS cabinet (WDM 31-61-19):

**DM31202AB**

pin 7 ..... pin A9  
pin 8 ..... pin B9

- (1) This task is for maintenance messages: 31-83012, 31-83072, 31-83092, 31-83152.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS and 31 AIMS - Right AIMS.
- (a) If a maintenance message related to an AIMS IOM or an AIMS CPM shows in Existing Faults, then do these steps:
- 1) Find the message in the applicable FIM Maintenance Message Index.
  - 2) Do the specified task for the maintenance message.
- (b) If a maintenance message related to an AIMS IOM or an AIMS CPM does not show in Existing Faults, then continue.
- (2) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/GG(M010) in Right AIMS Module Reset.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.
- NOTE:** The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, Right AIMS Cabinet Reset.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS and 31 AIMS - Right AIMS.
  - (a) If a maintenance message related to an AIMS IOM or an AIMS CPM shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
  - (b) If a maintenance message related to an AIMS IOM or an AIMS CPM does not show in Existing Faults, then continue.
- (2) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/GG(M010) in Left AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, Left AIMS Cabinet Reset.  
NOTE: The Left AIMS Cabinet Reset ground test must be started by the PMAT.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, Right AIMS Cabinet Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, Right AIMS cabinet Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the CPM/Comm(M001) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the CPM/GG(M010) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 867. AIMS-L Display Function (1 or 2) No Input from Function (DCGF-1 or Display (1 or 2)) in AIMS-L - Fault Isolation

#### A. Maintenance Messages

**C. Fault Isolation Procedure**

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS and 31 AIMS - Right AIMS.
- (a) If a maintenance message related to an AIMS IOM or an AIMS CPM shows in Existing Faults, then do these steps:
- 1) Find the message in the applicable FIM Maintenance Message Index.
  - 2) Do the specified task for the maintenance message.
- (b) If a maintenance message related to an AIMS IOM or an AIMS CPM does not show in Existing Faults, then continue.
- (2) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/GG(M010) in Left AIMS Module Reset.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this ground test on the MAT:
- (a) 31 AIMS - Right AIMS, System Test, CPM/STD(M002) in Right AIMS Module Reset.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, Right AIMS Cabinet Reset.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, Left AIMS Cabinet Reset.  
NOTE: The Left AIMS Cabinet Reset ground test must be started by the PMAT.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 877. AIMS-R Display Function 1 No Input from Function (FMCF or TMCF) in AIMS-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-83174, 31-83194.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the CPM/STD (M002) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the CPM/GG(M010) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 878. EFIS-L CP Map Range does Not Agree With Map Range From WXR-L or FMCF in AIMS-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-83521, 31-83523, 31-83525.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, Left AIMS cabinet Reset.

NOTE: The Left AIMS Cabinet Reset ground test must be started by the PMAT.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the CPM/STD(M002) module in the left AIMS cabinet.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M003) module in the right AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the IOM(M004) module in the right AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this check of the wiring:
- (a) Remove the center upper DU, N31301. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
- (b) Remove the IOM(M003) and IOM(M004) modules from the right AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of connector DN31301AB at the P2 panel and connector J240-B in the right AIMS cabinet (WDM 31-61-16):
- | <b>DN31301AB</b> | <b>J240-A</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A16       |
| pin A4 . . . . . | pin B16       |
- (d) Do a wiring check between these pins of connector DN31301AB at the P2 panel and connector J250-B in the right AIMS cabinet (WDM 31-61-16):
- | <b>DN31301AB</b> | <b>J250-A</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A16       |
| pin A4 . . . . . | pin B16       |
- (e) Repair any wiring problems you find.
- (f) Re-install the IOM(M003) and IOM(M004) modules in the right AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (g) Re-install the center upper DU, N31301. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
- (h) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 886. Center Lower Display Unit Internal Fault Or ARINC 429 Feedback Fault (AIMS-L) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-80141.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the center lower display unit (DU), N31302.

These are the tasks:

Display Unit Removal, AMM TASK 31-61-01-000-801,

Display Unit Installation, AMM TASK 31-61-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M008) module in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the IOM(M009) module in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this check of the wiring:
  - (a) Remove the center lower DU, N31302. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - (b) Remove the IOM(M008) and IOM(M009) modules from the left AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of connector DN31302AB at the P2 panel and connector J410-A in the left AIMS cabinet (WDM 31-61-17):

#### DN31302AB

pin A3 ..... pin A16

## 777-200/300 FAULT ISOLATION MANUAL

### 891. Right Outboard Display Unit Internal Fault Or ARINC 429 Feedback Fault (AIMS-R) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-80162.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the right outboard display unit (DU), N31201.

These are the tasks:

Display Unit Removal, AMM TASK 31-61-01-000-801,

Display Unit Installation, AMM TASK 31-61-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M008) module in the right AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the IOM(M009) module in the right AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this check of the wiring:
  - (a) Remove the right outboard DU, N31201. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - (b) Remove the IOM(M008) and IOM(M009) modules from the right AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of connector DN31201AB at the P3-1 panel and connector J410-A in the right AIMS cabinet (WDM 31-61-17):

#### DN31201AB

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the left remote light sensor, M31104.

These are the tasks:

Remote Light Sensor Removal, AMM TASK 31-61-08-000-801,

Remote Light Sensor Installation, AMM TASK 31-61-08-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the left outboard display unit, N31101. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
- (b) Disconnect connector DM31104 from the remote light sensor, M31104 (WDM 31-61-11).
- (c) Do a wiring check between these pins of connector DM31104 at the glareshield panel, P7, and connector DN31101AB at the P3 panel (WDM 31-61-11):

| <b>DM31104</b> | <b>DN31101AB</b> |
|----------------|------------------|
| pin 5 .....    | pin E3           |
| pin 6 .....    | pin E4           |
| pin 2 .....    | pin D3           |
| pin 9 .....    | pin C4           |
| pin 11 .....   | pin C3           |

## 777-200/300 FAULT ISOLATION MANUAL

- (d) Repair any wiring problems you find.
- (e) Re-connect connector DM31104 (WDM 31-61-11).
- (f) Re-install the left outboard DU, N31101. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
- (g) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### ————— END OF TASK —————

#### 893. Right Remote Light Sensor Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-80172.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the right remote light sensor, M31204.

These are the tasks:

Remote Light Sensor Removal, AMM TASK 31-61-08-000-801,

Remote Light Sensor Installation, AMM TASK 31-61-08-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the right outboard display unit, N31201. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - (b) Disconnect connector DM31204 from the remote light sensor, M31204 (WDM 31-61-12).
  - (c) Do a wiring check between these pins of connector DM31204 at the glareshield panel, P7, and connector DN31201AB at the P3 panel (WDM 31-61-12):

#### DM31204

|        |       |        |
|--------|-------|--------|
| pin 5  | ..... | pin E3 |
| pin 6  | ..... | pin E4 |
| pin 2  | ..... | pin D3 |
| pin 9  | ..... | pin C4 |
| pin 11 | ..... | pin C3 |

#### DN31201AB

- (d) Repair any wiring problems you find.
- (e) Re-connect connector DM31204 (WDM 31-61-12).
- (f) Re-install the right outboard DU, N31201. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS and 31 AIMS - Right AIMS.
  - (a) If a maintenance message related to an AIMS IOM or an AIMS CPM shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
  - (b) If a maintenance message related to an AIMS IOM does not show in Existing Faults, then continue.
- (2) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/GG(M011) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.

NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, Right AIMS Cabinet Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 896. AIMS-L Display Function 2 No Input from Function (CMCF, DCMF, DFDAF, or FDCF) in AIMS-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-83023, 31-83083, 31-83103, 31-83163.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS and 31 AIMS - Right AIMS.
  - (a) If a maintenance message related to an AIMS IOM or an AIMS CPM shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.

**777-200/300  
FAULT ISOLATION MANUAL**

**C. Fault Isolation Procedure**

- (1) Replace the CPM/GG(M011) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**917. AIMS-L Display Function 2 No Input from Function (FMCF or TCMF) in AIMS-L - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-83181, 31-83201.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the CPM/STD(M002) module in the left AIMS cabinet.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the CPM/GG(M011) module in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS and 31 AIMS - Right AIMS.
  - (a) If a maintenance message related to an AIMS IOM or an AIMS CPM shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
  - (b) If a maintenance message related to an AIMS IOM does not show in Existing Faults, then continue.
- (2) Do these ground tests on the MAT: 31 AIMS - Right AIMS, System Test, CPM/GG(M011) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this ground test on the MAT:
  - (a) 31 AIMS - Left AIMS, System Test, CPM/STD(M002) in Left AIMS Module Reset.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, Right AIMS Cabinet Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, Left AIMS Cabinet Reset.

**NOTE:** The Left AIMS Cabinet Reset ground test must be started by the PMAT.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

## 919. AIMS-L Display Function 2 No Input from Function (FMCf or TMCf) in AIMS-R - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-83183, 31-83203.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS and 31 AIMS - Right AIMS.
  - (a) If a maintenance message related to an AIMS IOM or an AIMS CPM shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
  - (b) If a maintenance message related to an AIMS IOM does not show in Existing Faults, then continue.
- (2) Do this ground tests on the MAT: 31 AIMS - Left AIMS, System Test, CPM/GG(M011) in Left AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this ground tests on the MAT:
  - (a) 31 AIMS - Right AIMS, System Test, CPM/STD(M002) in Right AIMS Module Reset.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, Right AIMS Cabinet Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, Left AIMS Cabinet Reset.

**NOTE:** The Left AIMS Cabinet Reset ground test must be started by the PMAT.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 920. AIMS-R Display Function 2 No Input from Function (FMCF or TMCF) in AIMS-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-83184, 31-83204.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the CPM/STD (M002) module in the right AIMS cabinet.

These are the tasks:  
Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the CPM/GG(M011) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 921. Center Upper DU has No Output on ARINC 429 Bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-88893.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the center upper display unit, N31301.

These are the tasks:

Display Unit Removal, AMM TASK 31-61-01-000-801,

Display Unit Installation, AMM TASK 31-61-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the center upper DU, N31301. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - (b) Remove the IOM(M003) and IOM(M004) modules from the left and right AIMS cabinets. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of connector DN31301AB at the P2 panel and connector J240-A in the left and right AIMS cabinets (WDM 31-61-16):

EFFECTIVITY  
ARO ALL

- (e) Repair any wiring problems you find.
- (f) Re-install the IOM(M003) and IOM(M004) modules in the left and right AIMS cabinets. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (g) Re-install the center upper DU, N31301. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
- (h) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 922. Center Lower DU has No Output on ARINC 429 Bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-88894.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the center lower display unit, N31302.
- These are the tasks:
- Display Unit Removal, AMM TASK 31-61-01-000-801,  
Display Unit Installation, AMM TASK 31-61-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the center lower DU, N31302. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Remove the IOM(M008) and IOM(M009) modules from the left AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of connector DN31302AB at the P2 panel and connector J410-A in the left AIMS cabinet (WDM 31-61-17):

| <b>DN31302AB</b> | <b>J410-A</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A16       |
| pin A4 . . . . . | pin B16       |

- (d) Do a wiring check between these pins of connector DN31302AB at the P2 panel and connector J420-A in the left AIMS cabinet (WDM 31-61-17):

| <b>DN31302AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A16       |
| pin A4 . . . . . | pin B16       |

- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M008) and IOM(M009) modules in the left AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the center lower DU, N31302. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (f) If you do not find a problem with the wiring, then continue.
- (3) Re-install the IOM(M008) and IOM(M009) modules in the left AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (4) Do this check of the wiring:
- (a) Remove the IOM(M008) and IOM(M009) modules from the right AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Do a wiring check between these pins of connector DN31302AB at the P2 panel and connector J410-B in the right AIMS cabinet (WDM 31-61-17):

| <b>DN31302AB</b> | <b>J410-B</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A11       |
| pin A4 . . . . . | pin B11       |

- (c) Do a wiring check between these pins of connector DN31302AB at the P2 panel and connector P9-B in the right AIMS cabinet (WDM 31-61-17):

| <b>DN31302AB</b> | <b>J420-B</b> |
|------------------|---------------|
| pin A3 . . . . . | pin A11       |
| pin A4 . . . . . | pin B11       |

- (d) Repair any wiring problems you find.
- (e) Re-install the IOM(M008) and IOM(M009) modules in the right AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (f) Re-install the center lower DU, N31302. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
- (g) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 930. DU Brightness Irregular Problem - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS, 31 AIMS - Right AIMS, and 31 AIMS - Display Systems.
  - (a) If a maintenance message related to an AIMS CPM, or the Display System shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
  - (b) If a maintenance message related to an AIMS CPM, or the Display System does not show in Existing Faults, then continue.
- (2) Replace the applicable Display Unit.

These are the tasks:  
Display Unit Removal, AMM TASK 31-61-01-000-801,  
Display Unit Installation, AMM TASK 31-61-01-400-801.

  - (a) If the Display Unit brightness operates correctly, then you corrected the fault.

————— **END OF TASK** —————

### 931. DU Automatic Brightness Control Problem - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS, 31 AIMS - Right AIMS, and 31 AIMS - Display Systems.
  - (a) If a maintenance message related to an AIMS CPM, or the Display System shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
  - (b) If a maintenance message related to an AIMS CPM, or the Display System does not show in Existing Faults, then continue.
- (2) Replace the applicable Display Unit.

These are the tasks:  
Display Unit Removal, AMM TASK 31-61-01-000-801,  
Display Unit Installation, AMM TASK 31-61-01-400-801.

  - (a) If the Display Unit automatic brightness operates correctly, then you corrected the fault.

————— **END OF TASK** —————

### 932. Left AIMS Display Function (M001) Internal Problems - Fault Isolation

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

- (1) Replace the CPM/Comm(M001) module in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 933. Right AIMS Display Function (M001) Internal Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51162, 31-51172.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/Comm(M001) module in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 934. Right AIMS Display Function (M001) Internal S/W Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51164, 31-51174.

#### B. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 935. Left AIMS Display Function (M001) Internal S/W Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51163, 31-51173.

#### B. Fault Isolation Procedure

- (1) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.

NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.

### 940. Left AIMS Display Function (M010) Internal Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51561, 31-51571, 31-81051.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/GG(M010) module in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 941. Display Unit Problems - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Wait 6 minutes before swapping out a DU. There is a 6 minute "Flop Monitor" that filters out intermittent DU blanking.
  - (a) If the Display Unit does not operate correctly, then continue.
- (2) Look at the Existing Faults display on the MAT for these ATA Systems: 31 AIMS - Left AIMS, 31 AIMS - Right AIMS, and 31 AIMS - Display Systems.
  - (a) If a maintenance message related to an AIMS CPM, or the Display System shows in Existing Faults, then do these steps:
    - 1) Find the message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
  - (b) If a maintenance message related to an AIMS CPM, or the Display System does not show in Existing Faults, then continue.
- (3) Do these steps to check the coaxial connections.

## 777-200/300 FAULT ISOLATION MANUAL

### WARNING

REMOVE ELECTRICAL POWER FROM THE CAPTAIN'S (FIRST OFFICER'S) SEAT. YOU CAN ACCIDENTALLY CAUSE A SEAT TO MOVE AND CAUSE INJURIES TO PERSONS AND DAMAGE TO EQUIPMENT.

- (a) Open these circuit breakers and install safety tags:

#### Left Power Management Panel, P110

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| D          | 18         | C25323        | CAPT SEAT   |

#### Right Power Management Panel, P210

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 13         | C25324        | F/O SEAT    |

- (b) Open the forward access panel that is outboard of the rudder pedals.  
(c) Make sure the coaxial cable connection is OK (WDM 31-61-14) (WDM 31-61-15).  
(d) If the Display Unit operates correctly, then you corrected the fault.  
1) Close the forward access panel that is outboard of the rudder pedals.  
2) Remove the safety tags and close these circuit breakers:

#### Left Power Management Panel, P110

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| D          | 18         | C25323        | CAPT SEAT   |

#### Right Power Management Panel, P210

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 13         | C25324        | F/O SEAT    |

- (e) If the Display Unit does not operate correctly, then continue.  
(4) Replace the applicable Display Unit.  
These are the tasks:  
Display Unit Removal, AMM TASK 31-61-01-000-801,  
Display Unit Installation, AMM TASK 31-61-01-400-801.  
(a) If the Display Unit operates correctly, then you corrected the fault.

————— END OF TASK —————

### 942. Upper/Lower Center DU Manual Brightness Control Problems - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Wait 6 minutes before swapping out a DU. There is a 6 minute "Flop Monitor" that filters out intermittent DU blanking.  
(a) If the Display Unit does not operate correctly, then continue.  
(2) Replace the center display control panel, M31058.

These are the tasks:

Center Display Control Panel Removal, AMM TASK 31-61-04-000-801,  
Center Display Control Panel Installation, AMM TASK 31-61-04-400-801.

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (a) If the applicable brightness control switch operates correctly, then you corrected the fault.

————— **END OF TASK** —————

**943. EICAS Message GROUND TEST ENABLE - Fault Isolation**

**A. Initial Evaluation**

NOTE: This message shows when the GRD TEST switch is set to ENABLE.

- (1) To put the airplane back to the normal mode, set the GRD TEST switch to NORM.

————— **END OF TASK** —————

**944. EICAS Message BARO SET DISAGREE - Fault Isolation**

**A. Initial Evaluation**

NOTE: This message shows when the captain's and first officer's baro settings differ by more than 0.03 inches of mercury for more than one minute.

- (1) To put the airplane back to the normal mode, set the captain's and first officer's baro to the same setting.

————— **END OF TASK** —————

**945. EICAS Message SGL SOURCE AIR DATA - Fault Isolation**

**A. Initial Evaluation**

NOTE: This message shows when the alternate air data system is selected and additional faults cause both PFD's to be on the same air data source.

- (1) To put the airplane back to the normal mode, Push the AIR DATA/AAT switch that is in the ALTN position.

————— **END OF TASK** —————

**946. EICAS Message DISPLAY SELECT PNL - Fault Isolation**

**A. Initial Evaluation**

NOTE: This message shows when the display select panel function has been moved to the control display unit (CDU) backup function.

- (1) To put the airplane back to the normal mode, do these steps at the CDU.  
(a) Push the MENU key.  
(b) Push the line select key adjacent to DSP CTL.

————— **END OF TASK** —————

**947. EICAS Message ALTN ATTITUDE - Fault Isolation**

**A. Initial Evaluation**

NOTE: This message shows when the ALTN position is selected on both the left and right AIR DATA/ATT switches.

- (1) To put the airplane back to the normal mode, Push one of the two AIR DATA/AAT switches.

FAULT ISOLATION MANUAL

948. EICAS Message TCAS RA CAPTAIN - Fault Isolation

A. Initial Evaluation

NOTE: This message shows when the AIMS cannot show the TCAS resolution advisory (RA) on the captain's displays. No maintenance action is necessary.

————— END OF TASK —————

949. EICAS Message TCAS RA F/O - Fault Isolation

A. Initial Evaluation

NOTE: This message shows when the AIMS cannot show the TCAS resolution advisory (RA) on the first officer's displays. No maintenance action is necessary.

————— END OF TASK —————

950. EICAS Message CHECKLIST SYS (STATUS) - Fault Isolation

A. Initial Evaluation

NOTE: This message shows when the electronic checklist was created with information that was not compatible with the checklist operating system.

- (1) To put the airplane back to the normal mode, load the correct checklist database.

NOTE: You can use the paper backup checklist until you load the correct checklist database.

————— END OF TASK —————

951. Checklist Airline DB Problems (Left AIMS CPM/GG(M010)) - Fault Isolation

A. Maintenance Messages

- (1) This task is for maintenance message: 31-81021.

B. Fault Isolation Procedure

NOTE: This maintenance message can show if you install a bad checklist airline database (DB) in the CPM/GG. The checklist airline DB is airline modifiable information (AMI). The checklist airline DB is bad if it does not agree with the engine type or the AIMS operational program software (OPS), or if the structure of the data is incorrect.

- (1) Correct and re-install the checklist airline DB or install a good checklist airline DB in the left AIMS CPM/GG(M010). To install it, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

952. Checklist Airline DB Problems (Right AIMS CPM/GG(M010)) - Fault Isolation

A. Maintenance Messages

- (1) This task is for maintenance message: 31-81022.

B. Fault Isolation Procedure

NOTE: This maintenance message can show if you install a bad checklist airline database (DB) in the CPM/GG. The checklist airline DB is airline modifiable information (AMI). The checklist airline DB is bad if it does not agree with the engine type or the AIMS operational program software (OPS), or if the structure of the data is incorrect.

## 777-200/300 FAULT ISOLATION MANUAL

- (1) Correct and re-install the checklist airline DB or install a good checklist airline DB in the right AIMS CPM/GG(M010). To install it, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 953. Checklist Airline DB Problems (Left AIMS CPM/GG(M011)) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-82021.

#### B. Fault Isolation Procedure

NOTE: This maintenance message can show if you install a bad checklist airline database (DB) in the CPM/GG. The checklist airline DB is airline modifiable information (AMI). The checklist airline DB is bad if it does not agree with the engine type or the AIMS operational program software (OPS), or if the structure of the data is incorrect.

- (1) Correct and re-install the checklist airline DB or install a good checklist airline DB in the left AIMS CPM/GG(M011). To install it, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 954. Checklist Airline DB Problems (Right AIMS CPM/GG(M011)) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-82022.

#### B. Fault Isolation Procedure

NOTE: This maintenance message can show if you install a bad checklist airline database (DB) in the CPM/GG. The checklist airline DB is airline modifiable information (AMI). The checklist airline DB is bad if it does not agree with the engine type or the AIMS operational program software (OPS), or if the structure of the data is incorrect.

- (1) Correct and re-install the checklist airline DB or install a good checklist airline DB in the right AIMS CPM/GG(M011). To install it, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 955. EICAS Message for System Not on Airplane - Fault Isolation

#### A. Initial Evaluation

NOTE: If an EICAS message shows for a system that is not installed on the airplane, then it is possible that an LRU with incorrect software was installed.

- (1) If you recently replaced an LRU that is possibly related to the EICAS message, then do a check of the software configuration of the LRU (an LRU installed with the incorrect software configuration can cause an incorrect EICAS message).

EFFECTIVITY  
ARO ALL

FAULT ISOLATION MANUAL

- (2) If the software configuration is not correct, then do the applicable procedure to install the correct software in the LRU.

————— END OF TASK —————

**956. Electronic Checklist ENABLE Button Problems - Fault Isolation**

**A. Fault Isolation Procedure**

- (1) Open and then close all of these circuit breakers at the same time:

**Overhead Circuit Breaker Panel, P11**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- (a) If the ENABLE button on the maintenance task maintenance page now operates, you corrected the fault.

————— END OF TASK —————

**957. Checklist Boeing DB Problems (Left AIMS CPM/GG(M010)) - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-81031.

**B. Fault Isolation Procedure**

NOTE: This message can show if you install an incorrect checklist Boeing database (DB) in the CPM/GG. The checklist Boeing DB must agree with the AIMS operational program software (OPS).

- (1) Install the correct checklist Boeing DB in the left AIMS CPM/GG(M010). To install it, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

**958. Checklist Boeing DB Problems (Right AIMS CPM/GG(M010)) - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-81032.

**B. Fault Isolation Procedure**

NOTE: This message can show if you install an incorrect checklist Boeing database (DB) in the CPM/GG. The checklist Boeing DB must agree with the AIMS operational program software (OPS).

- (1) Install the correct checklist Boeing DB in the right AIMS CPM/GG(M010). To install it, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 959. Checklist Boeing DB Problems (Left AIMS CPM/GG(M011)) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-82031.

#### B. Fault Isolation Procedure

NOTE: This message can show if you install an incorrect checklist Boeing database (DB) in the CPM/GG. The checklist Boeing DB must agree with the AIMS operational program software (OPS).

- (1) Install the correct checklist Boeing DB in the left AIMS CPM/GG(M011). To install it, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 960. Checklist Boeing DB Problems (Right AIMS CPM/GG(M011)) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-82032.

#### B. Fault Isolation Procedure

NOTE: This message can show if you install an incorrect checklist Boeing database (DB) in the CPM/GG. The checklist Boeing DB must agree with the AIMS operational program software (OPS).

- (1) Install the correct checklist Boeing DB in the right AIMS CPM/GG(M011). To install it, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 961. Display Unit Degradation - Fault Isolation

#### A. Fault Isolation

- (1) If a display unit screen defect impairs the Flight Crew's ability to operate the aircraft, and therefore affects airworthiness, it must be corrected. These defect types include an obscured part of the display, missing pixels, or regions displaying unintended colors, which could prevent the correct interpretation of the displayed data.

These are the tasks:

Display Unit Removal, AMM TASK 31-61-01-000-801

EFFECTIVITY  
ARO ALL

Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

Display Unit Installation, AMM TASK 31-61-01-400-801

**NOTE:** All other screen defects must be considered minor and the decision to remove units due to these minor defects must be made in accordance with the operator's operational and business requirements. These decisions must involve the same considerations that apply to CRT technology displays, or other flight deck instruments, which might also be removed for minor defects such as scratches, cover glass fogging, or degradation of painted dial graphics.

### — END OF TASK —

## 962. Ground Maneuver Camera System Problems - Fault Isolation

### A. Initial Evaluation

- (1) Any Camera image defect, which impairs the Flight Crew's ability to operate the aircraft during ground taxiing is corrected per the applicable camera replacement AMM tasks below.  
**NOTE:** Degraded image quality, such as color blemishes, tint variations, or minor differences in brightness, must only be considered as criteria for camera replacement when the quality of the image is such that it will interfere with the safe operation of the airplane.
- (2) Select the GMCS format on all three Multi-Function display (MFD) positions. Set the brightness and contrast knobs for all MFDs to the 12 o'clock position.
- (3) If the problem is associated with an individual camera image (identical fault symptoms of a single camera's view on all three displays), then do the Fault Isolation steps at B.(1), or B.(2) below.
- (4) If the problem is present on all three MFD positions (all three camera views appear to be identically faulted on all three displays), then do the Fault Isolation steps at B.(3) below.
- (5) If the problem is on a single MFD position (all three camera views appear to be identically faulted on an individual display), then do this task: Display Unit Degradation - Fault Isolation, 31-61 TASK 961.
- (6) If the ground maneuver camera video display is not normal (blank, noisy, rolling bars on the individual display), check the airplane wiring between the TCIU and the Display Unit (DU)/MFD position with the degraded/blank video image.

### B. Fault Isolation

- (1) If the problem is for the nose gear video display, then replace the nose gear taxi camera, M31011.  
These are the tasks:  
Nose Gear Taxi Camera Removal, AMM TASK 31-61-21-000-801,  
Nose Gear Taxi Camera Installation, AMM TASK 31-61-21-400-801.
  - (a) If the ground maneuver camera video display is normal, then you corrected the fault.
- (2) If the problem is for the main gear video display, then replace the applicable main gear taxi camera, M31012 (left) or M31013 (right).  
These are the tasks:  
Main Gear Taxi Camera Removal, AMM TASK 31-61-21-000-802,  
Main Gear Taxi Camera Installation, AMM TASK 31-61-21-400-802.
  - (a) If the ground maneuver camera video display is normal, then you corrected the fault.
- (3) Replace the taxi camera interface unit, M31010.  
These are the tasks:

Taxi Camera Interface Unit Removal, AMM TASK 31-61-22-000-801,  
Taxi Camera Interface Unit Installation, AMM TASK 31-61-22-400-801.

- (a) If the ground maneuver camera video display is normal, then you corrected the fault.

————— **END OF TASK** —————

### 963. AIMS Display Function no Input from EGPWC on WXR/EGPWC Data Bus-1 or Data Bus-2 - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-89133, 31-89134, 31-89135, 31-89136, 31-89143, 31-89144, 31-89146.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Make these selections on the MAT to look for the existing faults:
- (a) ONBOARD MAINTENANCE
  - (b) EXTENDED MAINTENANCE
  - (c) EXISTING FAULTS
- 1) If a maintenance message related to a Ground Proximity Warning Computer or to a AIMS module shows in Existing Faults, then do these steps:
- a) Find the message in the applicable FIM Maintenance Message Index.
  - b) Do the specified task for the maintenance message.

————— **END OF TASK** —————

## 777-200/300 FAULT ISOLATION MANUAL

### 801. Procedure To Be Determined - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-85101, 31-85102, 31-85103, 31-85104, 31-85105, 31-85106, 31-85107, 31-85108, 31-85109, 31-85110, 31-85111, 31-85112, 31-85113, 31-85114, 31-85115, 31-85116, 31-85117, 31-85118, 31-85119, 31-85120, 31-85121, 31-85122, 31-85123, 31-85124, 31-85125, 31-85126, 31-85127, 31-85128, 31-85129, 31-85130, 31-85131, 31-85132, 31-85201, 31-85202, 31-85203, 31-85204, 31-85205, 31-85206, 31-85207, 31-85208, 31-85209, 31-85210, 31-85211, 31-85212, 31-85213, 31-85214, 31-85215, 31-85216, 31-85217, 31-85218, 31-85219, 31-85220, 31-85221, 31-85222, 31-85223, 31-85224, 31-85225, 31-85226, 31-85227, 31-85228, 31-85229, 31-85230, 31-85231, 31-85232, 31-85233, 31-85234, 31-85235, 31-85236, 31-85301, 31-85302, 31-85303, 31-85304, 31-85305, 31-85306, 31-85307, 31-85308, 31-85309, 31-85310, 31-85311, 31-85312, 31-85351.

#### B. Fault Isolation Procedure

- (1) At this time the FIM does not have a procedure for this fault. The FIM will contain a procedure for this fault in the future.

————— END OF TASK —————

### 802. Observed Fault with Correlated Maintenance Messages - Fault Isolation

#### A. Initial Evaluation

NOTE: If maintenance memo DFDAF IN RIGHT AIMS (fault code 313 480 42) shows and there is no correlated maintenance message on the MAT, then no maintenance action is necessary.

- (1) Find the fault code to the right of the fault description in the Observed Faults List (at the front of the FIM).
  - (a) The first two digits of the fault code are the FIM chapter that you need. Go to the Fault Code Index in that chapter and find the fault code.
  - (b) Find the maintenance message to the right of the fault code.
  - (c) Find the task number on the same line as the maintenance message number.
  - (d) Go to the task in the FIM and do the steps in the task.

————— END OF TASK —————
