- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left CTC to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
  - (a) Remove the left ASG card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31201 from the coupler B31201.
  - (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector DB31201 at the P111 panel (SSM 31-09-22):

| <b>XA12</b> | <b>DB31201</b> |
|-------------|----------------|
| pin 10      | pin 5          |
| pin 7       | pin 4          |
| pin 9       | pin 2          |
| pin 6       | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31201.
  - 3) Re-install the left ASG card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31201.
- (g) Re-install the left ASG card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the left CTC to the coupler:
  - (a) Disconnect connector DM21631 from the left CTC, M21631.
  - (b) Disconnect connector DB21631 from the coupler B21631.
  - (c) Do a wiring check between these pins of connector DM21631AD at the left CTC and connector DB21631 at the P111 panel (WDM 21-61-11):

| <b>DM21631AD</b> | <b>DB21631</b> |
|------------------|----------------|
| pin 1T           | pin 5          |
| pin 1TR          | pin 4          |
| pin 2T           | pin 2          |
| pin 2TR          | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM21631 and DB21631.

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 210  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, re-connect connectors DM21631 and DB21631.

————— **END OF TASK** —————

### 806. LSCF ASG-L No Input from CTC-R on Systems 629 Bus-L - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-17453.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right Cabin Temperature Controller (CTC), M21632.

These are the tasks:

Cabin Temperature Controller (CTC) Removal, AMM TASK 21-61-01-000-801,

Cabin Temperature Controller (CTC) Installation, AMM TASK 21-61-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the right CTC to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
  - (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31101 from the coupler B31101.
  - (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector DB31101 at the P111 panel (WDM 21-61-12):

| <b>XA12</b> | <b>DB31101</b> |
|-------------|----------------|
| pin 10      | pin 5          |
| pin 7       | pin 4          |
| pin 9       | pin 2          |
| pin 6       | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31101.
- (g) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the right CTC to the coupler:
  - (a) Disconnect connector DM21632 from the right CTC, M21632.
  - (b) Disconnect connector DB21633 from the coupler B21633.
  - (c) Do a wiring check between these pins of connector DM21632AA at the right CTC and connector DB21633 at the P111 panel (WDM 21-61-12):

| <b>DM21632AA</b> | <b>DB21633</b> |
|------------------|----------------|
| pin 2T           | pin 5          |
| pin 2TR          | pin 4          |
| pin 1T           | pin 2          |
| pin 1TR          | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM21632 and DB21633.

| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31202.
  - 2) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the LSCF wiring from the ASG-R to the coupler:
  - (a) Remove the ASG-R card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31102 from the coupler B31102.
  - (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector DB31102 at the P211 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31102</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 822. LSCF ASG-L No Input from FSEU 1 on Systems 629 Bus-L - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-17469.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Flap Slat Electronics Unit 1 (FSEU 1), B27001.

These are the tasks:

Flap/Slat Electronics Unit (FSEU) Removal, AMM TASK 27-51-01-000-801,

Flap/Slat Electronics Unit (FSEU) Installation, AMM TASK 27-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the FSEU 1 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the LSCF wiring from the ASG-L to the coupler:
  - (a) Remove the ASG-L card, P85A12 in the LSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31101 from the coupler B31101.
  - (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector DB31101 at the P111 panel (SSM 31-09-12):

| <b>XA12</b> | <b>DB31101</b> |
|-------------|----------------|
| pin 10      | pin 5          |
| pin 7       | pin 4          |
| pin 9       | pin 2          |
| pin 6       | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the ASG-L card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31101.
- (g) Re-install the ASG-L card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the FSEU 1 to the coupler:
  - (a) Remove the FSEU 1, M27001. To remove it, do this task: Flap/Slat Electronics Unit (FSEU) Removal, AMM TASK 27-51-01-000-801.
  - (b) Disconnect connector DB27101 from the coupler B27101.
  - (c) Do a wiring check between these pins of connector DM27001AB at the E1-6 shelf and connector DB27101 at the P111 panel (WDM 27-51-11):

| <b>DM27001AB</b> | <b>DB27101</b> |
|------------------|----------------|
| pin 2T           | pin 2          |
| pin 2TR          | pin 1          |
| pin 5T           | pin 5          |
| pin 5TR          | pin 4          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB27101.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the left ARINC Signal Gateway (ASG) card, P84A12, in the right systems cardfile (RSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left overhead panel bus controller (OPBC), M23112.

These are the tasks:

Left Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-801,

Left Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-L card in the RSCF to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B23126, in the P111 panel.

## 777-200/300 FAULT ISOLATION MANUAL

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the OPBC-L to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the RSCF wiring from the ASG-L to the coupler:
  - (a) Remove the ASG-L card, P84A12 in the RSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31201 from the coupler B31201.
  - (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector DB31201 at the P111 panel (SSM 31-09-22):

| <b>XA12</b>      | <b>DB31201</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31201.
  - 3) Re-install the ASG-L card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31201.
  - 2) Re-install the ASG-L card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the OPBC-L to the coupler:
  - (a) Remove the OPBC-L, M23112. To remove it, do this task: Left Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-801.
  - (b) Disconnect connector DB23126 from the coupler B23126.
  - (c) Do a wiring check between these pins of connector DM23112B at STA 216, WL 220, LBL 65 and connector DB23126 at the P111 panel (WDM 23-93-11):

| <b>DM23112B</b> | <b>DB23126</b> |
|-----------------|----------------|
| pin 5 . . . . . | pin 5          |
| pin 4 . . . . . | pin 4          |
| pin 2 . . . . . | pin 2          |
| pin 1 . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB23126.

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the OPBC-L, M23112. To install it, do this task: Left Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then do these steps:
  - 1) Re-connect connector DB23126.
  - 2) Re-install the OPBC-L, M23112. To install it, do this task: Left Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-801.

### ————— END OF TASK —————

#### 826. LSCF ASG-L No Input from OPBC-R on Systems 629 Bus-L - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17481.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12, in the left systems cardfile (LSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right overhead panel bus controller (OPBC), M23212.

These are the tasks:

Right Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-802,

Right Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-L card in the LSCF to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.

EFFECTIVITY  
ARO ALL

Page 227  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (4) Replace the ARINC 629 coupler, B23127, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the OPBC-R to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the LSCF wiring from the ASG-L to the coupler:
- (a) Remove the ASG-L card, P85A12 in the LSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31101 from the coupler B31101.
- (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector DB31101 at the P111 panel (SSM 31-09-12):

| <b>XA12</b>  | <b>DB31101</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the ASG-L card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB31101.
  - 2) Re-install the ASG-L card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the OPBC-R to the coupler:
- (a) Remove the OPBC-R, M23212. To remove it, do this task: Right Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-802.
- (b) Disconnect connector DB23127 from the coupler B23127.
- (c) Do a wiring check between these pins of connector DM23212B at STA 237, WL 218, RBL 65 and connector DB23127 at the P111 panel (WDM 23-93-21):

| <b>DM23212B</b> | <b>DB23127</b> |
|-----------------|----------------|
| pin 5 .....     | pin 5          |
| pin 4 .....     | pin 4          |
| pin 2 .....     | pin 2          |

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Re-install the ASG-L card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the PSEU-1 to the coupler:
  - (a) Remove the PSEU-1, M32021. To remove it, do this task: Proximity Sensor Electronics Unit Removal, AMM TASK 32-08-01-000-801.
  - (b) Disconnect connector DB32115 from the coupler B32115.
  - (c) Do a wiring check between these pins of connector DM32021AD at the E1-5 shelf and connector DB32115 at the P111 panel (WDM 32-08-11):

| DM32021AD | DB32115 |
|-----------|---------|
| pin 2T    | pin 5   |
| pin 2TR   | pin 4   |
| pin 1T    | pin 2   |
| pin 1TR   | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB32115.
  - 3) Re-install the PSEU-1, M32021. To install it, do this task: Proximity Sensor Electronics Unit Installation, AMM TASK 32-08-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then do these steps:
  - 1) Re-connect connector DB32115.
  - 2) Re-install the PSEU-1, M32021. To install it, do this task: Proximity Sensor Electronics Unit Installation, AMM TASK 32-08-01-400-801.

————— **END OF TASK** —————

### 830. LSCF ASG-L No Input from PSEU-2 on Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17489.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12, in the left systems cardfile (LSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the circuit card assembly CCA, Communication, A17 in the proximity sensor electronics unit PSEU-2, M32025.

These are the tasks:

PSEU Circuit Card Removal, AMM TASK 32-08-02-000-801,

PSEU Circuit Card Installation, AMM TASK 32-08-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-L card in the LSCF to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B32215, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the PSEU-2 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the LSCF wiring from the ASG-L to the coupler:
- (a) Remove the ASG-L card, P85A12 in the LSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31101 from the coupler B31101.
- (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector DB31101 at the P111 panel (SSM 31-09-12):

| <b>XA12</b>      | <b>DB31101</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the ASG-L card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31101.
  - 2) Re-install the ASG-L card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the PSEU-2 to the coupler:
  - (a) Remove the PSEU-2, M32025. To remove it, do this task: Proximity Sensor Electronics Unit Removal, AMM TASK 32-08-01-000-801.
  - (b) Disconnect connector DB32215 from the coupler B32215.
  - (c) Do a wiring check between these pins of connector DM32025AA at the E4-1 shelf and connector DB32215 at the P111 panel (WDM 32-08-21):

| DM32025AA | DB32215 |
|-----------|---------|
| pin 2T    | pin 5   |
| pin 2TR   | pin 4   |
| pin 1T    | pin 2   |
| pin 1TR   | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB32215.
  - 3) Re-install the PSEU-2, M32025. To install it, do this task: Proximity Sensor Electronics Unit Installation, AMM TASK 32-08-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then do these steps:
  - 1) Re-connect connector DB32215.
  - 2) Re-install the PSEU-2, M32025. To install it, do this task: Proximity Sensor Electronics Unit Installation, AMM TASK 32-08-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,  
ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the circuit card assembly CCA, Communication, A17 in the proximity sensor electronics unit PSEU-2, M32025.

These are the tasks:

PSEU Circuit Card Removal, AMM TASK 32-08-02-000-801,  
PSEU Circuit Card Installation, AMM TASK 32-08-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-L card in the RSCF to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B32215, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the PSEU-2 to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the RSCF wiring from the ASG-L to the coupler:
- (a) Remove the ASG-L card, P84A12 in the RSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31201 from the coupler B31201.
  - (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector DB31201 at the P111 panel (SSM 31-09-22):

| <b>XA12</b> | <b>DB31201</b> |
|-------------|----------------|
| pin 10      | pin 5          |
| pin 7       | pin 4          |
| pin 9       | pin 2          |
| pin 6       | pin 1          |

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left Warning Electronic Unit (WEU), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31122, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects left WEU to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (5) Do this check of the wiring from the ASG-L to the coupler:
  - (a) Remove the ASG-L card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31101 from the coupler B31101.
  - (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector DB31101 at the P111 panel (SSM 31-09-12):

**777-200/300  
FAULT ISOLATION MANUAL**

| <b>XA12</b>  | <b>DB31101</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the ASG-L card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31101.
- (g) Re-install the ASG-L card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the WEU-L to the coupler:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31122 from the coupler B31122.
  - (c) Do a wiring check between these pins of connector DM31107AB at the E1-5 shelf and connector DB31122 at the P111 panel (WDM 31-51-13):

| <b>DM31107AB</b> | <b>DB31122</b> |
|------------------|----------------|
| pin 5T .....     | pin 5          |

## 777-200/300 FAULT ISOLATION MANUAL

### 833. RSCF ASG-L No Input from WEU-L on Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17494.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P84A12, in the right systems cardfile (RSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left warning electronic unit (WEU), M31107.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-L card in the RSCF to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31122, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-L to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the RSCF wiring from the ASG-L to the coupler:

EFFECTIVITY  
ARO ALL

## 31-10 TASK 833

D633W103-ARO

Page 242  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the ASG-L card, P84A12 in the RSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31201 from the coupler B31201.
- (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector DB31201 at the P111 panel (SSM 31-09-22):

| <b>XA12</b>      | <b>DB31201</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31201.
  - 3) Re-install the ASG-L card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31201.
  - 2) Re-install the ASG-L card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the WEU-L to the coupler:
  - (a) Remove the WEU-L, M31107. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31122 from the coupler B31122.
  - (c) Do a wiring check between these pins of connector DM31107AB at the E1-5 shelf and connector DB31122 at the P111 panel (WDM 31-51-13):

| <b>DM31107AB</b>  | <b>DB31122</b> |
|-------------------|----------------|
| pin 5T . . . . .  | pin 5          |
| pin 5TR . . . . . | pin 4          |
| pin 2T . . . . .  | pin 2          |
| pin 2TR . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31122.
  - 3) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31122.

D633W103-ARO

Page 243  
Sep 05/2016

**777-200/300**  
**FAULT ISOLATION MANUAL**

- 2) Re-install the WEU-L, M31107. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

————— **END OF TASK** —————

**834. LSCF ASG-R No Input from AIMS-L on Systems 629 Bus-R - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-17615.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15, in the left systems cardfile (LSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M004) module in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-R card in the LSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31211, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the left AIMS cabinet to the Systems 629 Bus-R.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the LSCF wiring from the ASG-R card to the coupler:
  - (a) Remove the ASG-R card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31102 from the coupler B31102.
  - (c) Do a wiring check between these pins of connector XA15 at the P85A15 shelf and connector DB31102 at the P211 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31102</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31102.
  - 2) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the AIMS-L cabinet to the coupler:
  - (a) Remove the IOM(M004) module from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31211 from the coupler B31211.
  - (c) Do a wiring check between these pins of connector J250-B at the left AIMS cabinet and connector DB31211 at the P211 panel (WDM 31-41-25):

| <b>J250-B</b>    | <b>DB31211</b> |
|------------------|----------------|
| pin G3 . . . . . | pin 5          |
| pin G4 . . . . . | pin 4          |
| pin G1 . . . . . | pin 2          |
| pin G2 . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31211.
  - 3) Re-install the IOM(M004) module in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB31202.
  - 2) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the AIMS-R cabinet to the coupler:

D633W103-ARO

Page 251  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the IOM(M004) module from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Disconnect connector DB31214 from the coupler B31214.
- (c) Do a wiring check between these pins of connector J250-B at the right AIMS cabinet and connector DB31214 at the P211 panel (WDM 31-41-26):

| J250-B | DB31214 |
|--------|---------|
| pin G3 | pin 5   |
| pin G4 | pin 4   |
| pin G1 | pin 2   |
| pin G2 | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31214.
  - 3) Re-install the IOM(M004) module in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31214.
  - 2) Re-install the IOM(M004) module in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

————— END OF TASK —————

### 838. LSCF ASG-R No Input from ASCPC-R on Systems 629 Bus-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17635.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15, in the left systems cardfile (LSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right Air Supply Cabin Pressure Controller (ASCPC), M36112.

These are the tasks:

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

ASCPC Removal, AMM TASK 36-11-20-000-801,  
ASCPC Installation, AMM TASK 36-11-20-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-R card in the LSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B36231, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASCPC-R to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the LSCF wiring from the ASG-R to the coupler:
- (a) Remove the ASG-R card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31102 from the coupler B31102.
  - (c) Do a wiring check between these pins of connector XA15 at the P85A15 shelf and connector DB31102 at the P211 panel (SSM 31-09-12):

| <b>XA15</b> |       | <b>DB31102</b> |
|-------------|-------|----------------|
| pin 10      | ..... | pin 5          |
| pin 7       | ..... | pin 4          |
| pin 9       | ..... | pin 2          |
| pin 6       | ..... | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring.
  - 2) Re-connect connector DB31102.
  - 3) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31102.

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the ASCPC-R to the coupler:
  - (a) Remove the ASCPC-R, M36112. To remove it, do this task: ASCPC Removal, AMM TASK 36-11-20-000-801.
  - (b) Disconnect connector DB36231 from the coupler B36231.
  - (c) Do a wiring check between these pins of connector DM36112AB at the E2-2 shelf and connector DB36231 at the P211 panel (WDM 36-21-12):

| DM36112AB | DB36231 |
|-----------|---------|
| pin 2T    | pin 5   |
| pin 2TR   | pin 4   |
| pin 1T    | pin 2   |
| pin 1TR   | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB36231.
  - 3) Re-install the ASCPC-R, M36112. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then do these steps:
  - 1) Re-connect connector DB36231.
  - 2) Re-install the ASCPC-R, M36112. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A15, in the right system cardfile (RSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Backup Generator Converter (VSCF), M24008.

These are the tasks:

Backup Generator Converter Removal, AMM TASK 24-25-09-000-801,

Backup Generator Converter Installation, AMM TASK 24-25-09-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-R card in the RSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B24202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the VSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the RSCF wiring from the ASG-R to the coupler:
  - (a) Remove the ASG-R card, P84A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31202 from the coupler B31202.
  - (c) Do a wiring check between these pins of connector XA15 at the P84A15 shelf and connector DB31202 at the P211 panel (SSM 31-09-22):

## 777-200/300 FAULT ISOLATION MANUAL

|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB31202.
  - 2) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the VSCF to the coupler:
- (a) Remove the Backup Generator Converter (VSCF), M24008. To remove it, do this task: Backup Generator Converter Removal, AMM TASK 24-25-09-000-801.
  - (b) Disconnect connector DB24202 from the coupler B24202.
  - (c) Do a wiring check between these pins of connector DM24008B at the E4-4 shelf and connector DB24202 at the P211 panel (WDM 24-25-33):

| <b>DM24008B</b> | <b>DB24202</b> |
|-----------------|----------------|
| pin 5 .....     | pin 5          |
| pin 4 .....     | pin 4          |
| pin 2 .....     | pin 2          |
| pin 1 .....     | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB24202.
  - 3) Re-install the Backup Generator Converter (VSCF), M24008. To install it, do this task: Backup Generator Converter Installation, AMM TASK 24-25-09-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB24202.
  - 2) Re-install the Backup Generator Converter (VSCF), M24008. To install it, do this task: Backup Generator Converter Installation, AMM TASK 24-25-09-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

### 842. LSCF ASG-R No Input from BPCU on Systems 629 Bus-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17647.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15, in the left systems cardfile (LSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Bus Power Control Unit (BPCU), M24002.

These are the tasks:

BPCU Removal, AMM TASK 24-41-05-000-801,

BPCU Installation, AMM TASK 24-41-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-R card in the LSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B24206, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the BPCU to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the LSCF wiring from the ASG-R to the coupler:

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 261  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the ASG-R card, P85A52. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31102 from the coupler B31102.
- (c) Do a wiring check between these pins of connector XA15 at the P85A15 shelf and connector DB31102 at the P211 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31102</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31102.
  - 2) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the BPCU to the coupler:
  - (a) Remove the Bus Power Control Unit (BPCU), M24002. To remove it, do this task: BPCU Removal, AMM TASK 24-41-05-000-801.
  - (b) Disconnect connector DB24206 from the coupler B24206.
  - (c) Do a wiring check between these pins of connector DM24002AC at the E1-1 shelf and connector DB24206 at the P211 panel (SSM 23-91-21):

| <b>DM24002AC</b>  | <b>DB24206</b> |
|-------------------|----------------|
| pin 5T . . . . .  | pin 5          |
| pin 5TR . . . . . | pin 4          |
| pin 2T . . . . .  | pin 2          |
| pin 2TR . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB24206.
  - 3) Reinstall the Bus Power Control Unit (BPCU), M24002. To install it, do this task: BPCU Installation, AMM TASK 24-41-05-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).

## 777-200/300 FAULT ISOLATION MANUAL

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the BPCU to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the RSCF wiring from the ASG-R to the coupler:
  - (a) Remove the ASG-R card, P84A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31202 from the coupler B31202.
  - (c) Do a wiring check between these pins of connector XA15 at the P84A15 shelf and connector DB31202 at the P211 panel (SSM 31-09-22):
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31202.
  - 2) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the BPCU to the coupler:
  - (a) Remove the Bus Power Control Unit (BPCU), M24002. To remove it, do this task: BPCU Removal, AMM TASK 24-41-05-000-801.
  - (b) Disconnect connector DB24206 from the coupler B24206.
  - (c) Do a wiring check between these pins of connector DM24002AC at the E1-1 shelf and connector DB24206 at the P211 panel (SSM 23-91-21):

| <b>XA15</b>      | <b>DB31202</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

| <b>DM24002AC</b>  | <b>DB24206</b> |
|-------------------|----------------|

- (5) Do this check of the RSCF wiring from the ASG-R to the coupler:
- (a) Remove the ASG-R card, P84A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31202 from the coupler B31202.
- (c) Do a wiring check between these pins of connector XA15 at the P84A15 shelf and connector DB31202 at the P211 panel (SSM 31-09-22):
- | <b>XA15</b>      | <b>DB31202</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB31202.
  - 2) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the CTC-L to the coupler:

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the CTC-L, M21631. To remove it, do this task: Cabin Temperature Controller (CTC) Removal, AMM TASK 21-61-01-000-801.
- (b) Disconnect connector DB21632 from the coupler B21632.
- (c) Do a wiring check between these pins of connector DM21631AA at the E1-2 shelf and connector DB21632 at the P211 panel (WDM 21-61-11):

| DM21631AA         | DB21632 |
|-------------------|---------|
| pin 2T . . . . .  | pin 5   |
| pin 2TR . . . . . | pin 4   |
| pin 1T . . . . .  | pin 2   |
| pin 1TR . . . . . | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB21632.
  - 3) Re-install the CTC-L, M21631. To install it, do this task: Cabin Temperature Controller (CTC) Installation, AMM TASK 21-61-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then do these steps:
  - 1) Re-connect connector DB21632.
  - 2) Re-install the CTC-L, M21631. To install it, do this task: Cabin Temperature Controller (CTC) Installation, AMM TASK 21-61-01-400-801.

### — END OF TASK —

#### 846. LSCF ASG-R No Input from CTC-R on Systems 629 Bus-R - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17655.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15, in the left system cardfile (LSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right Cabin Temperature Controller (CTC), M21632.

These are the tasks:

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

Cabin Temperature Controller (CTC) Removal, AMM TASK 21-61-01-000-801,  
Cabin Temperature Controller (CTC) Installation, AMM TASK 21-61-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-R card in the LSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B21634, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the CTC-R to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the LSCF wiring from the ASG-R to the coupler:
- (a) Remove the ASG-R card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31102 from the coupler B31102.
  - (c) Do a wiring check between these pins of connector XA15 at the P85A15 shelf and connector DB31102 at the P211 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31102</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31102.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A15, in the right systems cardfile (RSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the flap slat electronics unit FSEU 2, M27002.

These are the tasks:

Flap/Slat Electronics Unit (FSEU) Removal, AMM TASK 27-51-01-000-801,

Flap/Slat Electronics Unit (FSEU) Installation, AMM TASK 27-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-R card in the RSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B27201, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the FSEU 2 to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the RSCF wiring from the ASG-R to the coupler:
  - (a) Remove the ASG-R card, P84A15 in the RSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31202 from the coupler B31202.
  - (c) Do a wiring check between these pins of connector XA15 at the P84A15 slot and connector DB31202 at the P211 panel (SSM 31-09-22):

## 777-200/300 FAULT ISOLATION MANUAL

| <b>XA15</b>  | <b>DB31202</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB31202.
  - 2) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the FSEU 2 to the coupler:
- (a) Remove the FSEU 2, M27002. To remove it, do this task: Flap/Slat Electronics Unit (FSEU) Removal, AMM TASK 27-51-01-000-801.
- (b) Disconnect connector DB27201 from the coupler B27201.
- (c) Do a wiring check between these pins of connector DM27002AB at the E4-1 shelf, and connector DB27201 at the P211 panel (WDM 27-51-12):

| <b>DM27002AB</b> | <b>DB27201</b> |
|------------------|----------------|
| pin 5T .....     | pin 5          |
| pin 5TR .....    | pin 4          |
| pin 2T .....     | pin 2          |
| pin 2TR .....    | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB27201.
  - 3) Re-install the FSEU 2, M27002. To install it, do this task: Flap/Slat Electronics Unit (FSEU) Installation, AMM TASK 27-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB27201.
  - 2) Re-install the FSEU 2, M27002. To install it, do this task: Flap/Slat Electronics Unit (FSEU) Installation, AMM TASK 27-51-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

### 850. LSCF ASG-R No Input from OPBC-L on Systems 629 Bus-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17679.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15, in the left systems cardfile (LSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left overhead panel bus controller (OPBC), M23112.

These are the tasks:

Left Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-801,

Left Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-R card in the LSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B23226, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the OPBC-L to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the LSCF wiring from the ASG-R to the coupler:

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 278  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the ASG-R card, P85A15 in the LSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31102 from the coupler B31102.
- (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector DB31102 at the P211 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31102</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31102.
  - 2) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the OPBC-L to the coupler:
  - (a) Remove the OPBC-L, M23112. To remove it, do this task: Left Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-801.
  - (b) Disconnect connector DB23226 from the coupler B23226.
  - (c) Do a wiring check between these pins of connector DM23112C at STA 216, WL 220, LBL 65 and connector DB23226 at the P211 panel (WDM 23-93-11):

| <b>DM23112C</b> | <b>DB23226</b> |
|-----------------|----------------|
| pin 5 . . . . . | pin 5          |
| pin 4 . . . . . | pin 4          |
| pin 2 . . . . . | pin 2          |
| pin 1 . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB23226.
  - 3) Re-install the OPBC-L, M23112. To install it, do this task: Left Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB23226.

### 851. RSCF ASG-R No Input from OPBC-L on Systems 629 Bus-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17680.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A15, in the right systems cardfile (RSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left overhead panel bus controller (OPBC), M23112.

These are the tasks:

Left Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-801,

Left Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-R card in the RSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B23226, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the OPBC-L to the Systems 629 Bus-R.

These are the tasks:

Right Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-802,

Right Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-R card in the RSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B23227, in the P211 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE:** This coupler connects the OPBC-R to the Systems 629 Bus-R.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the RSCF wiring from the ASG-R to the coupler:
- (a) Remove the ASG-R card, P84A15 in the RSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31202 from the coupler B31202.
- (c) Do a wiring check between these pins of connector XA15 at the P84A15 slot and connector DB31202 at the P211 panel (SSM 31-09-22):
- | <b>XA15</b>      | <b>DB31202</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB31202.
  - 2) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the OPBC-R to the coupler:
- (a) Remove the OPBC-R, M23212. To remove it, do this task: Right Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-802.
- (b) Disconnect connector DB23227 from the coupler B23227.
- (c) Do a wiring check between these pins of connector DM23212C at STA 237, WL 218, RBL 65 and connector DB23227 at the P211 panel (WDM 23-93-21):

## 777-200/300 FAULT ISOLATION MANUAL

### DM23212C

|       |       |       |
|-------|-------|-------|
| pin 5 | ..... | pin 5 |
| pin 4 | ..... | pin 4 |
| pin 2 | ..... | pin 2 |
| pin 1 | ..... | pin 1 |

### DB23227

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB23227.
  - 3) Re-install the OPBC-R, M23212. To install it, do this task: Right Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB23227.
  - 2) Re-install the OPBC-R, M23212. To install it, do this task: Right Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-802.

### — END OF TASK —

## 854. LSCF ASG-R No Input from PSEU-1 on Systems 629 Bus-R - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17687.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15, in the left systems cardfile (LSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the circuit card assembly CCA, Communication, A17 in the proximity sensor electronics unit (PSEU)1, M32021.

These are the tasks:

PSEU Circuit Card Removal, AMM TASK 32-08-02-000-801,

PSEU Circuit Card Installation, AMM TASK 32-08-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE:** This coupler connects the ASG-R card in the LSCF to the Systems 629 Bus-R.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B32301, in the P211 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE:** This coupler connects the PSEU-1 to the Systems 629 Bus-R.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the LSCF wiring from the ASG-R to the coupler:
- (a) Remove the ASG-R card, P85A15 in the LSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31102 from the coupler B31102.
- (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector DB31102 at the P211 panel (SSM 31-09-12):
- | <b>XA15</b>      | <b>DB31102</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB31102.
  - 2) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the PSEU-1 to the coupler:

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A15, in the right systems cardfile (RSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the circuit card assembly CCA, Communication, A02 in the proximity sensor electronics unit PSEU 1, M32025.

These are the tasks:

PSEU Circuit Card Removal, AMM TASK 32-08-02-000-801,

PSEU Circuit Card Installation, AMM TASK 32-08-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-R card in the RSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B32302, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the PSEU 2 to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the RSCF wiring from the ASG-R to the coupler:
  - (a) Remove the ASG-R card, P84A15 in the RSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31202 from the coupler B31202.
  - (c) Do a wiring check between these pins of connector XA15 at the P84A15 slot and connector DB31202 at the P211 panel (SSM 31-09-22):

## 777-200/300 FAULT ISOLATION MANUAL

| <b>XA15</b>      | <b>DB31202</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB31202.
  - 2) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the PSEU 2 to the coupler:
- (a) Remove the PSEU 2, M32025. To remove it, do this task: Proximity Sensor Electronics Unit Removal, AMM TASK 32-08-01-000-801.
  - (b) Disconnect connector DB32302 from the coupler B32302.
  - (c) Do a wiring check between these pins of connector DM32025AD at the E4-1 shelf and connector DB32302 at the P211 panel (WDM 32-08-21):

| <b>DM32025AD</b>  | <b>DB32302</b> |
|-------------------|----------------|
| pin 2T . . . . .  | pin 5          |
| pin 2TR . . . . . | pin 4          |
| pin 1T . . . . .  | pin 2          |
| pin 1TR . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB32302.
  - 3) Re-install the PSEU 2, M32025. To install it, do this task: Proximity Sensor Electronics Unit Installation, AMM TASK 32-08-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB32302.
  - 2) Re-install the PSEU 2, M32025. To install it, do this task: Proximity Sensor Electronics Unit Installation, AMM TASK 32-08-01-400-801.

Page 294  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

### 858. LSCF ASG-R No Input from WEU-R on Systems 629 Bus-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17699.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15, in the left systems cardfile (LSCF).

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right warning electronic unit (WEU), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-R card in the LSCF to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31222, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the WEU-R to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the LSCF wiring from the ASG-R to the coupler:

## 31-10 TASK 858

D633W103-ARO

Page 295  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the ASG-R card, P85A15 in the RSCF. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31102 from the coupler B31102.
- (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector DB31102 at the P211 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31102</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31102.
  - 2) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the WEU-R to the coupler:
  - (a) Remove the WEU-R, M31207. To remove it, do this task: Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801.
  - (b) Disconnect connector DB31222 from the coupler B31222.
  - (c) Do a wiring check between these pins of connector DM31207AB at the E4-2 shelf and connector DB31222 at the P211 panel (WDM 31-51-23):

| <b>DM31207AB</b>  | <b>DB31222</b> |
|-------------------|----------------|
| pin 5T . . . . .  | pin 5          |
| pin 5TR . . . . . | pin 4          |
| pin 2T . . . . .  | pin 2          |
| pin 2TR . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31222.
  - 3) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31222.

**FAULT ISOLATION MANUAL**

- 2) Re-install the WEU-R, M31207. To install it, do this task: Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

**END OF TASK**

**859. LSCF ASG-L No Input from ELMS P110 Electronics Unit on Systems 629 Bus-L - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-17472.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do a check of the CCU in P110, M24502.

This is the task:

Computing and Communication Unit - Exchange Check, AMM TASK 24-09-00-700-802-002.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B24107, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ELMS P110 Electronics Unit to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
- (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31101 from the coupler B31101.
  - (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector DB31101 at the P111 panel (SSM 31-09-12):

| <b>XA12</b>  | <b>DB31101</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
    - 2) Re-connect connector DB31101.
    - 3) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
  - (f) Re-connect connector DB31101.
  - (g) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the left ELMS computing and communication unit (CCU) to the coupler:
- (a) Disconnect connector DM24502A from the CCU, M24502, in the P110 power panel.
  - (b) Disconnect connector DB24107 from the coupler B24107.
  - (c) Do a wiring check between these pins of connector DM24502A at the P110 power panel CCU and connector DB24107 at the P111 panel (WDM 24-09-24):

| <b>DB24107</b> | <b>DM24502A</b> |
|----------------|-----------------|
| pin 5 .....    | pin 2           |
| pin 4 .....    | pin 3           |
| pin 2 .....    | pin 5           |
| pin 1 .....    | pin 6           |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DB24107 and DM24502A.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 860. RSCF ASG-L No Input from ELMS P110 Electronics Unit on Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17473.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do a check of the CCU in P110, M24502.

This is the task:

Computing and Communication Unit - Exchange Check, AMM TASK 24-09-00-700-802-002.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-L card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B24107, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ELMS P110 Electronics Unit to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
  - (a) Remove the ASG-L card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.

Sep 05/2016

**777-200/300  
FAULT ISOLATION MANUAL**

- (b) Disconnect connector DB31201 from the coupler B31201.
- (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector DB31201 at the P111 panel (SSM 31-09-22):

| <b>XA12</b>  | <b>DB31201</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31201.
  - 3) Re-install the ASG-L card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31201.
  - 2) Re-install the ASG-L card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring:
  - (a) Disconnect connector DM24502A from CCU, M24502, in the P110 power panel.
  - (b) Disconnect connector DB24107 from the coupler B24107.
  - (c) Do a wiring check between these pins of connector DM24502A at the P110 power panel and connector DB24107 at the P111 panel (WDM 24-09-24):

| <b>DM24502A</b> | <b>DB24107</b> |
|-----------------|----------------|
| pin 2 .....     | pin 5          |
| pin 3 .....     | pin 4          |
| pin 5 .....     | pin 2          |
| pin 6 .....     | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM24502A and DB24107.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do a check of the CCU in P310, M24510.

This is the task:

Computing and Communication Unit - Exchange Check, AMM TASK 24-09-00-700-802-002.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-L card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B24109, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ELMS P310 Electronics Unit to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
  - (a) Remove the ASG-L card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31101 from the coupler B31101.
  - (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector DB31101 at the P111 panel (SSM 31-09-12):

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

| XA12         | DB31101 |
|--------------|---------|
| pin 10 ..... | pin 5   |
| pin 7 .....  | pin 4   |
| pin 9 .....  | pin 2   |
| pin 6 .....  | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the ASG-L card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB31101.
  - 2) Re-install the ASG-L card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring:
- (a) Disconnect connector DM24510A from CCU, M24510, in the P310 power panel.
  - (b) Disconnect connector DB24109 from the coupler B24109.
  - (c) Do a wiring check between these pins of connector DM24510A at the P310 power panel and connector DB24109 at the P111 panel (WDM 24-09-26):

| DB24109     | DM24510A |
|-------------|----------|
| pin 5 ..... | pin 2    |
| pin 4 ..... | pin 3    |
| pin 2 ..... | pin 5    |
| pin 1 ..... | pin 6    |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DB24109 and DM24510A.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P84A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (2) Do a check of the CCU in P310, M24510.

This is the task:

Computing and Communication Unit - Exchange Check, AMM TASK 24-09-00-700-802-002.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (3) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-L card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (4) Replace the ARINC 629 coupler, B24109, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ELMS P310 Electronics Unit to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (5) Do this check of the wiring from the ASG-L to the coupler:

- (a) Remove the ASG-L card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31201 from the coupler B31201.
- (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector DB31201 at the P111 panel (SSM 31-09-22):

| <b>XA12</b>  | <b>DB31201</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

## 777-200/300 FAULT ISOLATION MANUAL

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31201.
  - 3) Re-install the ASG-L card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31201.
  - 2) Re-install the ASG-L card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring:
  - (a) Disconnect connector DM24510A from CCU, M24510, in the P310 power panel.
  - (b) Disconnect connector DB24109 from the coupler B24109.
  - (c) Do a wiring check between these pins of connector DM24510A at the P310 power panel and connector DB24109 at the P111 panel (WDM 24-09-26):

| DB24109 | DM24510A |
|---------|----------|
| pin 5   | pin 2    |
| pin 4   | pin 3    |
| pin 2   | pin 5    |
| pin 1   | pin 6    |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DB24109 and DM24510A.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do a check of the CCU in P110, M24502.

This is the task:

Computing and Communication Unit - Exchange Check, AMM TASK 24-09-00-700-802-002.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-R card to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B24207, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ELMS P110 Electronics Unit to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-R to the coupler:
  - (a) Remove the ASG-R card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31102 from the coupler B31102.
  - (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector DB31102 at the P211 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31102</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring ( ).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

## 777-200/300 FAULT ISOLATION MANUAL

- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-R card to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B24208, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ELMS P210 Electronics Unit to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-R to the coupler:
- (a) Remove the ASG-R card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31102 from the coupler B31102.
- (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector DB31102 at the P211 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31102</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect connector DB31102.
  - 2) Re-install the ASG-R card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring:
- (a) Disconnect connector DM24506A from the CCU, M24506, in the P210 power panel.
- (b) Disconnect connector DB24208 from the coupler B24208.

## 777-200/300 FAULT ISOLATION MANUAL

- (c) Do a wiring check between these pins of connector DM24506A at the P210 power panel and connector DB24208 at the P211 panel (WDM 24-09-25):

| DB24208     | DM24506A |
|-------------|----------|
| pin 5 ..... | pin 123  |
| pin 4 ..... | pin 124  |
| pin 2 ..... | pin 126  |
| pin 1 ..... | pin 127  |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DB24208 and DM24506A.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### ———— END OF TASK ————

#### 866. RSCF ASG-R No Input from ELMS P210 Electronics Unit on Systems 629 Bus-R - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17669.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,  
ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do a check of the CCU in P210, M24506.

This is the task:

Computing and Communication Unit - Exchange Check, AMM TASK 24-09-00-700-802-002.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B24208, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ELMS P210 Electronics Unit to the Systems 629 Bus-R.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the ASG-R card to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-R to the coupler:
  - (a) Remove the ASG-R card, P84A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31202 from the coupler B31202.
  - (c) Do a wiring check between these pins of connector DP8406 at the P84A15 slot and connector DB31202 at the P211 panel (SSM 31-09-22):

| DP8406      | DB31202 |
|-------------|---------|
| pin 5 ..... | pin 5   |
| pin 4 ..... | pin 4   |
| pin 2 ..... | pin 2   |
| pin 1 ..... | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31202.
  - 2) Re-install the ASG-R card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring:
  - (a) Disconnect connector D21009P from the P210 Power Management Panel, right.
  - (b) Disconnect connector DB24208 from the coupler B24208.
  - (c) Do a wiring check between these pins of connector D21009P at the P210 and connector DB24208 at the P211 panel (WDM 24-09-25):

## 777-200/300 FAULT ISOLATION MANUAL

### 870. RSCF ASG-L No Input from ELMS P210 Electronics Unit on Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17501.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P84A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ASG-L card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B24108, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the ELMS P210 Electronics Unit to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do a check of the P210 panel CCU, M24506.

This is the task:

Computing and Communication Unit - Exchange Check, AMM TASK 24-09-00-700-802-002.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
  - (a) Remove the ASG-L card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (b) Disconnect connector DB31201 from the coupler B31201.
- (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector DB31201 at the P111 panel (SSM 31-09-22):

| <b>XA12</b>  | <b>DB31201</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31201.
  - 3) Re-install the ASG-L card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-connect connector DB31201.
  - 2) Re-install the ASG-L card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the ELMS system to the coupler:
  - (a) Disconnect connector DM24506A from the CCU, M24506.
  - (b) Disconnect connector DB24108 from the coupler B24108.
  - (c) Do a wiring check between these pins of connector DM24506A at the CCU, and connector DB24108 at the P111 panel (WDM 24-09-25):

| <b>DM24108</b> | <b>DM24506A</b> |
|----------------|-----------------|
| pin 5 .....    | pin 2           |
| pin 4 .....    | pin 3           |
| pin 2 .....    | pin 5           |
| pin 1 .....    | pin 6           |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM24108 and DM24506A.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 805. Captain's Pushbutton Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-80181.

#### B. Description

Left AIMS analog input signals from Captain's clock pushbutton (left) are invalid.

#### C. Possible Causes

Wiring

Captain's clock pushbutton (S31100)

IOM (M003) in Left AIMS

#### D. Related Data

WDM 31-25

SSM 31-25

#### E. Initial Evaluation

- (1) Do this task: Clocks - System Test, AMM TASK 31-25-00-730-802
- (2) If the Captain's clock pushbutton does not operate correctly, do the Fault Isolation Procedure.

#### F. Fault Isolation Procedure

- (1) Do these steps to check the wiring.
  - (a) Remove the Captain's clock pushbutton, S31100 (WDM 31-25-11).
  - (b) Remove IOM (M003) in the left AIMS cabinet, M31101. To remove it, do this task: (AIMS LRM Removal, AMM TASK 31-41-00-000-801).
  - (c) Do a wiring check between these pins of connector D6626 at the left AIMS cabinet on the E2-1 shelf and the Captain's clock pushbutton, S31100 at the glareshield panel, P7:

##### D6626

##### S31100

pin 3 ..... pin 57

pin 4 ..... pin 58

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Do this task: Clocks - System Test, AMM TASK 31-25-00-730-802
    - a) If the Captain's clock pushbutton operates correctly, you corrected the problem.
    - b) If the problem continues replace the Captain's clock pushbutton, S31100 and AIMS IOM (M003) in the left AIMS cabinet, M31101.

#### G. Repair Confirmation

- (1) Do this task: Clocks - System Test, AMM TASK 31-25-00-730-802
  - (a) If the Captain's clock pushbutton operates correctly, you corrected the problem.

————— **END OF TASK** —————

### 806. First Officer's Pushbutton Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-80182.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

### B. Description

Right AIMS analog input signals from First Officer's clock pushbutton (right) are invalid.

### C. Possible Causes

Wiring

First Officer's clock pushbutton (S31200)

IOM (M003) in Right AIMS

### D. Related Data

WDM 31-25

SSM 31-25

### E. Initial Evaluation

- (1) Do this task: Clocks - System Test, AMM TASK 31-25-00-730-802
- (2) If the First Officer's clock pushbutton does not operate correctly, do the Fault Isolation Procedure.

### F. Fault Isolation Procedure

- (1) Do these steps to check the wiring.
  - (a) Remove the First Officer's clock pushbutton, S31200 (WDM 31-25-11).
  - (b) Remove IOM (M003) in the right AIMS cabinet, M31201. To remove it, do this task: (Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801).
  - (c) Do a wiring check between these pins of connector D6726 at the right AIMS cabinet on the E2-1 shelf and the First Officer's clock pushbutton, S31100 at the glareshield panel, P7:

| D6726       | S31200 |
|-------------|--------|
| pin 3 ..... | pin 57 |
| pin 4 ..... | pin 58 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Do this task: Clocks - System Test, AMM TASK 31-25-00-730-802
    - a) If the First Officer's clock pushbutton operates correctly, you corrected the problem.
    - b) If the problem continues replace the First Officer's clock pushbutton, S31100 and AIMS IOM, S31101.

### G. Repair Confirmation

- (1) Do this task: Clocks - System Test, AMM TASK 31-25-00-730-802
  - (a) If the First Officer's clock pushbutton operates correctly, you corrected the problem.

## 777-200/300 FAULT ISOLATION MANUAL

### 801. Relay (Flt Rec AC PWR RLY) in P210 Not Commanded - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-20201, 31-20202.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the FLT REC AC circuit breaker on the P210 right power management panel.  
These are the tasks:  
Circuit Breaker - Removal, AMM TASK 24-09-00-000-818-002,  
Circuit Breaker - Installation, AMM TASK 24-09-00-400-814-002.
  - (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the FLT REC DC circuit breaker on the P210 right power management panel.  
These are the tasks:  
Circuit Breaker - Removal, AMM TASK 24-09-00-000-818-002,  
Circuit Breaker - Installation, AMM TASK 24-09-00-400-814-002.
  - (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Replace the flight recorder power control relay, K31002, on the P210 right power management panel.
  - (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (4) Replace the ELMS Signal Interface Unit 1, M24508, in the P210 right power management panel.  
These are the tasks:  
Signal Interface Unit - Removal, AMM TASK 24-09-00-000-814-002

EFFECTIVITY  
ARO ALL

May 05/2013

## 777-200/300 FAULT ISOLATION MANUAL

Signal Interface Unit - Installation, AMM TASK 24-09-00-400-810-002

- (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (5) Check the Computing and Communications Unit, M24506, in the P210 right power management panel.

This is the task:

Computing and Communication Unit - Exchange Check, AMM TASK 24-09-00-700-802-002

- (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (6) Do this check of the wiring:
- (a) Remove the flight data recorder, M31035. To remove it, do this task: Flight Data Recorder Removal, AMM TASK 31-31-01-000-801.
  - (b) Do a wiring check between these pins of connector DK31002 at the flight recorder power control relay and connector DM31035AA at the flight data recorder (WDM 31-31-11):

**DK31002**

**DM31035AA**

pin A1 . . . . . pin 1

- (c) If you find a problem in the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the flight data recorder, M31035. To install it, do this task: Flight Data Recorder Installation, AMM TASK 31-31-01-400-801.
  - 3) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

### 802. AIMS-L Software Configuration Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-20051.

#### **B. Fault Isolation Procedure**

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS.
  - (a) Find this line replaceable module (LRM) on the display and make sure that the software part number is correct:
    - 1) CPM/Comm, M001, in Left AIMS
- (2) If the part number is incorrect, install software in the LRM in the left AIMS cabinet:

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.
- (3) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm (M001) in Left AIMS Module Reset.  
NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.
- (4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 803. DFDAF in AIMS-L Internal Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-20031, 31-51151.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/Comm (M001), in the left AIMS, M31101.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 804. DFDAF in AIMS-L Internal Software Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-20061, 31-51153.

#### B. Fault Isolation Procedure

- (1) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm (M001) in Left AIMS Module Reset.

NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 805. DFDAF in AIMS-L Internal Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51351.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/STD (M002) in the left AIMS, M31101.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

### B. Fault Isolation Procedure

- (1) Replace the CPM/GG (M011) in the left AIMS, M31101.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 810. DFDAF in AIMS-L Internal Software Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51753.

#### B. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/GG (M011) in Left AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 811. DFDAF in AIMS-R Internal Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-20032, 31-51152.

#### B. Maintenance Messages

- (1) This task is for maintenance messages: 31-20032 or 31-51152

#### C. Initial Evaluation

- (1) When both the L and R DFDAF faults indicate:
  - (a) Do this ground test on the MAT: Flight Data Recorder System - Operational Test, AMM TASK 31-31-00-710-801
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (c) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Below.

#### D. Fault Isolation Procedure

- (1) Replace the CPM/Comm (M001) in the right AIMS, M31201.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

### 819. DFDAF AIMS-L and AIMS-R S/W Configuration Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-20040.

#### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS.
  - (a) Find this line replaceable module (LRM) on the display and make sure that the software part number is correct:
    - 1) CPM/Comm, M001, in Left AIMS
- (2) If the part number is incorrect, install software in the LRM in the left AIMS cabinet:
  - (a) Do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.
- (3) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm (M001) in Left AIMS Module Reset.

**NOTE:** The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do a check of the system configuration for this system on the MAT: 31 AIMS - Right AIMS.
  - (a) Find this line replaceable module (LRM) on the display and make sure that the software part number is correct:
    - 1) CPM/Comm, M001, in Right AIMS
- (5) If the part number is incorrect, install software in the LRM in the right AIMS cabinet:
  - (a) Do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.
- (6) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm (M001) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 820. DFDAF in AIMS-R Incorrect Software - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-20052.

#### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Right AIMS.
  - (a) Find this line replaceable module (LRM) on the display and make sure that the software part number is correct:
    - 1) CPM/Comm, M001, in Right AIMS
- (2) If the part number is incorrect, install software in the LRM in the right AIMS cabinet:
  - (a) Do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.

## 777-200/300 FAULT ISOLATION MANUAL

- (3) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm (M001) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 821. Flight Recorder Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-20020, 31-20070.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the flight data recorder, M31035, in the E7 equipment rack.

These are the tasks:

Flight Data Recorder Removal, AMM TASK 31-31-01-000-801,  
Flight Data Recorder Installation, AMM TASK 31-31-01-400-801.

  - (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the flight data recorder, M31035. To remove it, do this task: Flight Data Recorder Removal, AMM TASK 31-31-01-000-801.
  - (b) Remove the IOM (M003) in the left AIMS cabinet, M31101. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Remove the IOM (M004) in the left AIMS cabinet, M31101. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (d) Remove the IOM (M003) in the right AIMS cabinet, M31201. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (e) Remove the IOM (M004) in the right AIMS cabinet, M31201. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (f) Do a wiring check between these pins of connector J240-A at the left AIMS cabinet, M31101, in the E3-1 shelf and connector DM31035AA at the flight data recorder (WDM 31-31-11):

| pin E6 .....  | pin 21           |

- (g) Do a wiring check between these pins of connector J250-A at the left AIMS cabinet, M31101, in the E3-1 shelf and connector DM31035AA at the flight data recorder (WDM 31-31-11):

| <b>J250-A</b> | <b>DM31035AA</b> |
|---------------|------------------|
| pin E10 ..... | pin 22           |
| pin E6 .....  | pin 21           |

- (h) Do a wiring check between these pins of connector J240-A at the right AIMS cabinet, M31201, in the E2-1 shelf and connector DM31035AA at the flight data recorder (WDM 31-31-11):

| <b>J240-A</b> | <b>DM31035AA</b> |
|---------------|------------------|
| pin E10 ..... | pin 22           |
| pin E6 .....  | pin 21           |

- (i) Do a wiring check between these pins of connector J250-A at the right AIMS cabinet, M31201, in the E2-1 shelf and connector DM31035AA at the flight data recorder (WDM 31-31-11):

| <b>J250-A</b> | <b>DM31035AA</b> |
|---------------|------------------|
| pin E10 ..... | pin 22           |
| pin E6 .....  | pin 21           |

- (j) If you find a problem in the wiring, then do these steps:

- 1) Repair the wiring.
  - 2) Re-install the flight data recorder, M31035. To install it, do this task: Flight Data Recorder System - System Test, AMM TASK 31-31-00-730-801.
  - 3) Re-install the IOM (M003) in the left AIMS cabinet, M31101. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) Re-install the IOM (M004) in the left AIMS cabinet, M31101. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 5) Re-install the IOM (M003) in the right AIMS cabinet, M31201. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 6) Re-install the IOM (M004) in the right AIMS cabinet, M31201. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 7) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - 8) If the maintenance message does not show on the ground test display, you corrected the fault.
  - 9) If the maintenance message show on the ground test display, then continue.
- (3) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS.
- (4) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS.

D633W103-ARO

Page 210  
Jan 05/2014

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the OPC software P/Ns are different for the left and right AIMS cabinets, install OPC software, do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.
- (b) Use the table below to determine which FDR dataframe rate is supported by which OPC software P/N:

| FDR dataframe rate | CPM/Comm P/N            |
|--------------------|-------------------------|
| 128 wps            | 4075450-902 4075450-903 |
| 256 wps            | 4075450-903             |
| 1024 wps           | 4089450-901             |

- (5) Use the WDM 31-31-11 to check the FDR dataframe rate configured by the airplane wiring.
  - (a) If pin 17 of connector DM31035AA is grounded, then the FDR recording rate is 256 WPS.
  - (b) If pin 18 of connector DM31035AA is grounded, then the FDR recording rate is 128 WPS.
  - (c) If both pins 17 and 18 of connector DM31035AA are not grounded, then the FDR recording rate is 1024 WPS.
- (6) If the OPC software P/N installed in the left and right AIMS cabinets do not support the airplane dataframe rate, install OPC software, do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.
- (7) If the the AIMS OPC software dataframe setting is incorrect, please contact Boeing for instructions on how to reset the AIMS OPC dataframe setting.
- (8) If the wiring is incorrect, make the appropriate wiring changes to set the correct the dataframe rate.
- (9) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (a) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 822. DFDAF in AIMS-L No CMCF IN - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-21001.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/Comm (M001) in the left AIMS, M31101.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

Computing and Communication Unit - Exchange Check, AMM TASK 24-09-00-700-802-002

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show) on the existing faults display, you corrected the fault.

**NOTE:** Wait up to 5 minutes, or until the maintenance message shows, after there is power to the ELMS panel before you read the status of the maintenance message from the MAT.

- (b) If the maintenance message shows on the ground test display, then continue.

- (3) Replace the ARINC 629 coupler, B31112, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the IOM to the System 629 Bus-L.

- (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.

- (b) If the maintenance message does not show on the ground test display, you corrected the fault.

- (c) If the maintenance message shows on the ground test display, then continue.

- (4) Replace the ARINC 629 coupler, B24108, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the electronics unit to the System 629 Bus-L.

- (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.

- (b) If the maintenance message does not show on the ground test display, you corrected the fault.

- (c) If the maintenance message shows on the ground test display, then continue.

- (5) Do this check of the wiring from the IOM to the coupler:

- (a) Remove the IOM, M009 in the left AIMS cabinet, M31101. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.

- (b) Disconnect connector DB31112 from the coupler, B31112.

- (c) Do a wiring check between these pins of connector J420-B at the left AIMS cabinet, M31101, in the E3-1 shelf and connector DB31112 at the P111 panel (WDM 23-91-11)(WDM 31-41-25):

| <b>J420-B</b> | <b>DB31112</b> |
|---------------|----------------|
| pin G3        | pin 5          |
| pin G4        | pin 4          |
| pin G1        | pin 2          |
| pin G2        | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:

- 1) Replace the ARINC 629 wiring (SWPM 20-12-11).
- 2) Re-connect connector DB31112.

- (a) Remove the computing and communications unit (CCU), M24506, in the P210 panel. To remove it, (Computing and Communications Unit - Removal, AMM TASK 24-09-00-000-815-002).
  - (b) Disconnect connector DB24108 from the coupler, B24108.
  - (c) Do a wiring check between these pins of connector D21008 at the CCU P210 panel and connector DB24108 at the P111 panel (WDM 23-91-11)(WDM 24-09-25):

| D21008      | DB24108 |
|-------------|---------|
| pin 5 ..... | pin 5   |
| pin 4 ..... | pin 4   |
| pin 2 ..... | pin 2   |
| pin 1 ..... | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-12-11).
  - 2) Re-connect connector DB24108.
  - 3) Re-install the computing and communications unit (CCU), M24506, in the P210 panel. To install it, do this task: Computing and Communications Unit - Installation, AMM TASK 24-09-00-400-811-002.
  - 4) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - 5) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 826. DFDAF in AIMS-L No Input on System 629 Bus (right) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-29405.

D633W103-ARO

Page 216  
Jan 05/2014

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground display, you corrected the fault.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM (M004) in the left AIMS, M31101.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31211, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the IOM to the System 629 Bus-R.

- (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Replace the ARINC 629 coupler, B24208, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the electronics unit to the System 629 Bus-R.

- (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.

D633W103-ARO

Page 217  
Jan 05/2014

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If the maintenance message shows on the ground test display, then continue.
- (4) Do this check of the wiring from the IOM to the coupler:
- (a) Remove the IOM (M004) in the left AIMS cabinet, M31101. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31211 from the coupler, B31211.
  - (c) Do a wiring check between these pins of connector J250-B at the left AIMS cabinet, M31101, in the E3-1 shelf and connector DB31211 at the P211 panel (WDM 23-91-11)(WDM 31-41-25):
- | <b>J250-B</b> | <b>DB31211</b> |
|---------------|----------------|
| pin G3 .....  | pin 5          |
| pin G4 .....  | pin 4          |
| pin G1 .....  | pin 2          |
| pin G2 .....  | pin 1          |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-12-11).
  - 2) Re-connect connector DB31211.
  - 3) Re-install the IOM (M004) in the E3-1 shelf. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) Do this ground test on the MAT: 31 AIMS Flight Data Recorder, System Test, Flight Data Recorder System.
  - 5) If the maintenance message does not show on the ground test display, you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (5) Do this check of the wiring from the computing and communications unit to the coupler:
- (a) Remove the computing and communications unit (CCU), M24506, in the P210 panel. To remove it, do this task: Computing and Communications Unit - Removal, AMM TASK 24-09-00-000-815-002.
  - (b) Disconnect connector DB24208 from the coupler, B24208.
  - (c) Do a wiring check between these pins of connector D21009 at the CCU P210 panel and connector DB24208 at the P211 panel (WDM 23-91-11)(WDM 24-09-25):

| <b>D21009</b> | <b>DB24208</b> |
|---------------|----------------|
| pin 5 .....   | pin 5          |
| pin 4 .....   | pin 4          |
| pin 2 .....   | pin 2          |
| pin 1 .....   | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-12-11).
  - 2) Re-connect connector DB24208.
  - 3) Re-install the computing and communications unit (CCU), M24506, in the P210 panel. To install it, do this task: Computing and Communications Unit - Installation, AMM TASK 24-09-00-400-811-002.

### 831. DFDAF AIMS-L No Input from DFDAF in AIMS-R 629 Bus 1 and 2 - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-21011.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Make these selections on the MAT to put the right CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO RIGHT.
  - (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Make these selections on the MAT to put the right CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO RIGHT.
  - (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, Right AIMS Cabinet Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Make these selections on the MAT to put the left CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO LEFT.
  - (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, Left AIMS Cabinet Reset.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 832. DFDAF AIMS-R No Input from DFDAF in AIMS-L 629 Bus 1 and 2 - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-21012.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.  
NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Make these selections on the MAT to put the left CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO LEFT.
  - (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Make these selections on the MAT to put the left CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO LEFT.
  - (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, Left AIMS Cabinet Reset.  
NOTE: The Left AIMS Cabinet Reset ground test must be started by the PMAT.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Make these selections on the MAT to put the right CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO RIGHT.
  - (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, Right AIMS Cabinet Reset.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 833. Flight Recorder Status Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-20080.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the flight data recorder, M31035, in the E7 equipment rack.  
These are the tasks:  
Flight Data Recorder Removal, AMM TASK 31-31-01-000-801,  
Flight Data Recorder Installation, AMM TASK 31-31-01-400-801.
  - (a) Do this ground test on the MAT: 31 AIMS Flight Data Recorder System, System Test, Flight Data Recorder System.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the flight data recorder, M31035. To remove it, do this task: Flight Data Recorder Removal, AMM TASK 31-31-01-000-801.
  - (b) Remove the IOM (M003) in the left AIMS cabinet, M31101. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Remove the IOM (M004) in the left AIMS cabinet, M31101. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (d) Remove the IOM (M003) in the right AIMS cabinet, M31201. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (e) Remove the IOM (M004) in the right AIMS cabinet, M31201. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (f) Do a wiring check between these pins of connector J240-A at the left AIMS cabinet, M31101, in the E3-1 shelf and connector DM31035AA at the flight data recorder (WDM 31-31-11):

**J240-A**

**DM31035AA**

pin E6 . . . . . pin 21

- (g) Do a wiring check between these pins of connector J250-A at the left AIMS cabinet, M31101, in the E3-1 shelf and connector DM31035AA at the flight data recorder (WDM 31-31-11):

EFFECTIVITY  
ARO ALL

## 31-31 TASK 833

D633W103-ARO

Page 227  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (2) If the OPC software P/Ns are different for the left and right AIMS cabinets, install OPC software, do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.
  - (a) Make sure the OPC software to be installed supports the dataframe rate of the flight data recorder installed.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 835. DFDAF in Left AIMS has Incorrect OPC Configuration - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-20046.

#### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS.
  - (a) Find this line replaceable module (LRM) on the display and check the part number.
    - 1) CPM/Comm (M001) in Left AIMS
    - 2) Make sure the CPM/Comm installed supports the dataframe rate of the flight data recorder as listed in the table:

| FDR dataframe rate | CPM/Comm P/N               |
|--------------------|----------------------------|
| 128 wps            | 4075450-902<br>4075450-903 |
| 256 wps            | 4075450-903                |
| 1024 wps           | 4089450-901                |

- (2) If the CPM/Comm installed do not support the FDR dataframe rate, then replace the CPM/Comm (M001) in the left AIMS, M31101.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 836. DFDAF in Right AIMS has Incorrect OPC Configuration - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-20047.

#### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Right AIMS.
  - (a) Find this line replaceable module (LRM) on the display and check the part number.
    - 1) CPM/Comm (M001) in Right AIMS

## 777-200/300 FAULT ISOLATION MANUAL

### 801. Printer Output Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-31891.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the flight compartment printer, M31004.

These are the tasks:

Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801,

Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring between the printer and the left AIMS cabinet:
  - (a) Remove the flight compartment printer, M31004. To remove it, do this task: Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801.
  - (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of connector DM31004A in the aisle stand (WDM 31-33-11) and IOM connector J420-B in the E3-1 shelf (SSM 31-41-03):

#### DM31004A

pin S . . . . . pin A4  
pin T . . . . . pin B4

#### J420-B

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the flight compartment printer, M31004. To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.
  - 3) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (e) If you do not find a problem with the wiring, then re-install the IOM(M009) in the left AIMS cabinet and continue. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

EFFECTIVITY

D633W103-ARO

Page 201  
Jan 05/2013

## 777-200/300 FAULT ISOLATION MANUAL

- (3) Do this check of the wiring between the printer and the right AIMS cabinet:
- Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - Do a wiring check between these pins of connector DM31004A in the aisle stand (WDM 31-33-11) and IOM connector J420-B in the E2-1 shelf (SSM 31-41-06):

| DM31004A        | J420-B |
|-----------------|--------|
| pin S . . . . . | pin A4 |
| pin T . . . . . | pin B4 |

- If you find a problem with the wiring, then do these steps:
  - Repair the wiring.
  - Re-install the flight compartment printer, M31004. To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.
  - Re-install the IOM(M009) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

## 802. Printer No Input from AIMS-L on DCMF-L 429 BUS - Fault Isolation

### A. Maintenance Messages

- This task is for maintenance message: 31-39903.

### B. Initial Evaluation

- If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- Replace the flight compartment printer, M31004. These are the tasks:
  - Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801
  - Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801
  - If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - If the MAT shows ACTIVE for the maintenance message, then continue.
- Replace the IOM (M009) module in the left AIMS cabinet. These are the tasks:
  - Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the flight compartment printer, M31004. To remove it, do this task: Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801.
  - (b) Remove the IOM (M009) module from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of connector J420-A at the left AIMS cabinet on the E3-1 shelf (SSM 31-41-03) and connector DM31004A at the flight compartment printer (WDM 45-45-11).

#### J420-A

|         |       |       |
|---------|-------|-------|
| pin F11 | ..... | pin K |
| pin G12 | ..... | pin M |

#### DM31004A

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM (M009) module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the flight compartment printer, M31004. To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.

Page 205  
Jan 05/2013

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 805. Printer Configuration Problem - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-30003.

#### B. Fault Isolation Procedure

##### ARO 001-014

- (1) Do a check of the part number for the software that is loaded in the flight compartment printer:
  - (a) Push the TEST button on the flight compartment printer.
  - (b) Look at the printed page.
    - 1) Make sure that the software part numbers for OPSA and DB are correct.
  - (c) If the software part numbers are not there or are not correct, do this task: Flight Compartment Printer Software Installation, AMM TASK 31-33-01-400-802.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
  - (d) If the software part numbers are correct, then continue.

##### ARO ALL

- (2) Replace the flight compartment printer, M31004.

These are the tasks:  
Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801,  
Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 806. Printer Internal Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-30001.

#### B. Possible Causes

- (1) Printer, M31004.

#### C. Initial Evaluation

NOTE: This message can occur when there is no failure of the printer.

- (1) Push the RESET switch on the printer.
  - (a) Wait for approximately 1 minute.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Examine the MAT for maintenance message 31-30001

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure that follows.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then no maintenance action is necessary.

### D. Fault Isolation Procedure

- (1) Replace the flight compartment printer, M31004. These are the tasks: (Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801, and Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801).
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

## 807. Flight Deck Printer Fault - Fault Isolation

### A. Description

#### ARO 001-010; ARO 011-013 PRE SB 777-46-0066

- (1) Use this task when Fault Code 46-120 (Flight Deck Printer Fault) shows on the NFS MESSAGE page.

#### ARO 014-999; ARO 011-013 POST SB 777-46-0066

- (2) Use this task when ONS EXISTING FAULTS shows Maintenance Message 46120.

#### ARO ALL

- (3) This fault is sensed when the Flight Deck Printer cannot communicate with the Onboard Network System (ONS). Also, it is possible that you cannot print from the Flight Deck Printer.

### B. Possible Causes

- (1) Flight Deck Printer, M31004.

### C. Initial Evaluation

- (1) Do this task: Onboard Network System NFS Message Check, AMM TASK 46-13-00-720-801.

#### ARO 001-010; ARO 011-013 PRE SB 777-46-0066

- (a) If Fault Code 46-120 Fault Code (Flight Deck Printer Fault message) does not show, then the fault was intermittent. No action is necessary.
- (b) If Fault Code 46-120 Fault Code (Flight Deck Printer Fault message) shows, then do the Fault Isolation Procedure below.

#### ARO 014-999; ARO 011-013 POST SB 777-46-0066

- (c) If Maintenance Message 46120 does not show, then the fault was intermittent. No action is necessary.
- (d) If Maintenance Message 46120 shows, then do the Fault Isolation Procedure below.

#### ARO ALL

### D. Fault Isolation Procedure

- (1) Replace the Flight Deck Printer, M31004.
- (2) These are the tasks:
  - Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801
  - Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801

## 777-200/300 FAULT ISOLATION MANUAL

### 801. AIMS-L Software Configuration Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-40001.

#### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS.
  - (a) Find these line replaceable modules (LRM) on the display and make sure that the software part numbers are correct:
    - 1) CPM/Comm(M001) in Left AIMS
    - 2) CPM/STD (M002) in Left AIMS
- (2) If any of the part numbers are incorrect, install software in the applicable LRM in the left AIMS cabinet:
  - (a) Do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.
  - (b) Do this task: Core Processor Module/Standard Software Installation, AMM TASK 31-41-05-420-801.
- (3) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.

NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/STD (M002) in Left AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 802. ACMF Internal Fault in AIMS-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-40081, 31-51301.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/STD(M002) in the left AIMS.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), you corrected the fault.

————— END OF TASK —————

### 807. ACMF Internal Fault in AIMS-L - Fault Isolation

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

- (1) Replace the CPM/GG(M011) in the left AIMS.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), you corrected the fault.

————— END OF TASK —————

### 827. ACMF/QARF Internal Fault in AIMS-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-40021, 31-51231.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/Comm(M001) in the left AIMS.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), you corrected the fault.

————— END OF TASK —————

### 828. Quick Access Recorder Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-40031.

#### B. Possible Causes

##### **ARO 001-010; AIRPLANES WITH TELEDYNE 2243800-61/-73/-79/-81**

- (1) Quick Access Recorder (QAR) Airplane Condition And Monitoring System (ACMS) Recording Rate

##### **ARO ALL**

- (2) Recording Media in the Wireless Groundlink QAR
- (3) QAR

#### C. Fault Isolation Procedure

##### **ARO 001-010; AIRPLANES WITH TELEDYNE 2243800-61/-73/-79/-81**

- (1) If the Wireless Groundlink QAR will not transfer recorder data after changing the QAR ACMS dataframe to a different recording rate than the rate set by the QAR program pin, then do this task: WGL-QAR Verify and Set the bipolar\_rate Parameter to AUTO, AMM  
TASK 31-35-02-800-801.

- (a) If the QAR works as intended, then you corrected the fault.

### ARO ALL

- (3) Replace the CPM/STD (M002) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the left AIMS cabinet, M31101. These are the tasks:
- AIMS Cabinet Removal, AMM TASK 31-41-21-000-802
  - AIMS Cabinet Installation, AMM TASK 31-41-21-400-801
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 833. ACMF AIMS-L No Input from CMCF in AIMS-R 629 Bus 3 and 4 - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-40211.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Make these selections on the MAT to put the right CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO RIGHT.
- (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
- 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- 2) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Make these selections on the MAT to put the right CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO RIGHT.
- (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
- 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- 2) If the MAT shows ACTIVE for the maintenance message, then continue.

**FAULT ISOLATION MANUAL**

- (4) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, Right AIMS Cabinet Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Make these selections on the MAT to put the left CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO LEFT.
  - (a) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, Left AIMS Cabinet Reset.

NOTE: The Left AIMS Cabinet Reset ground test must be started by the PMAT.

    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**834. ACMF Internal Fault in AIMS-L - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-51101.

**B. Fault Isolation Procedure**

- (1) Replace the CPM/Comm(M001) in the left AIMS.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), you corrected the fault.

————— **END OF TASK** —————

**835. ACMF Internal Fault in AIMS-R - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-51102.

**B. Fault Isolation Procedure**

- (1) Replace the CPM/Comm(M001) in the right AIMS.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

## 777-200/300 FAULT ISOLATION MANUAL

### 836. ACMF Internal Software Fault in AIMS-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51104.

#### B. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 837. ACMF/QARF Internal Fault in AIMS-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51232.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/Comm(M001) in the right AIMS.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), you corrected the fault.

————— END OF TASK —————

### 838. ACMF/QARF Internal Software Fault in AIMS-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51233.

#### B. Fault Isolation Procedure

- (1) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.

NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 840. ACMF Internal Fault in AIMS-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-40082, 31-51302.

#### B. Fault Isolation Procedure

- (1) Replace the module that is installed in the M002 slot in the right AIMS cabinet: the CPM/STD(M002).

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,  
Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), you corrected the fault.

————— END OF TASK —————

### 841. ACMF Internal Software Fault in AIMS-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-40092, 31-51304.

#### B. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/STD(M002) in Right AIMS Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 842. ACMF/QARF Internal Fault in AIMS-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51432.

#### B. Fault Isolation Procedure

#### C. Fault Isolation Procedure

- (1) Replace the module that is installed in the M002 slot in the right AIMS cabinet: the CPM/STD(M002).

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,  
Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

- (1) Replace the CPM/GG(M011) in the right AIMS.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or the message does not show), you corrected the fault.

————— END OF TASK —————

### 855. ACMF/QARF Internal Software Fault in AIMS-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51833.

#### B. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/GG(M011) in Left AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 856. ACMF/QARF Internal Software Fault in AIMS-R - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51834.

#### B. Fault Isolation Procedure

- (1) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/GG(M011) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 857. ACMS Engine Stable Report Problems - Fault Isolation

#### A. Fault Isolation Procedure

NOTE: A given set of parameters must have good data for a given time during a flight before an Engine Stable report is made. The data must stay between limits set by Modifiable Constants. If the data does not stay between the limits during the flight, then the report cannot be made. If one or more parameters has bad data, the report cannot be made. Bad data can be caused by a defective LRU or a bad LRU connection.

- (1) Make sure that the Modifiable Constants for the Engine Stable report are set to their default values:
  - (a) Make these selections on a maintenance access terminal (MAT):
    - 1) CONDITION MONITORING
    - 2) ACMS
    - 3) MODIFIABLE CONSTANTS

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 214  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (b) When the list of Modifiable Constants shows, make sure that the CURRENT value is the same as the DEFAULT value for each of these parameters:
  - 1) LOGIC\_STABLE
  - 2) N1DELTA\_ACMF
  - 3) MINBCALT\_STABLE
  - 4) MAXBCALT\_STABLE
  - 5) MINBCMACH\_STABLE
  - 6) MAXBCMACH\_STABLE
  - 7) MINBCN1\_STABLE
  - 8) MAXBCN1\_STABLE
  - 9) MINBCGWT\_STABLE
  - 10) MAXBCGWT\_STABLE
  - 11) MINBCTAT\_STABLE
  - 12) MAXBCTAT\_STABLE
  - 13) MINBCTFQTY\_STABLE
  - 14) MAXBCTFQTY\_STABLE
  - 15) TBALT\_STABLE
  - 16) TBMACH\_STABLE
  - 17) TBN1\_STABLE
  - 18) TBSAT\_STABLE
  - 19) TBCAS\_STABLE
- (c) If the CURRENT value of a parameter is not the same as the DEFAULT value, then do this:
  - 1) Select the parameter.
  - 2) Select MODIFY CONSTANT.
  - 3) Type the DEFAULT value in the MODIFY VALUE dialog box.
  - 4) Select ACCEPT.
  - 5) If the automatic Engine Stable report is available after the next flight, you corrected the problem.
- (2) Look for bad data in the values of the parameters that are used by the Engine Stable report:
  - (a) Make sure that the engines are running. To start the engines, do this task: Engine Start (Selection), AMM TASK 71-00-00-800-835-H00.
  - (b) Make these selections on a maintenance access terminal (MAT):
    - 1) CONDITION MONITORING
    - 2) ACMS
    - 3) MNEMONIC DATA
    - 4) SEARCH PARAMETER
  - (c) For each group of parameters in the list below, do this:
    - 1) Type the group name in the SIGNAL NAME field (include the asterisk; it is a wildcard).

EFFECTIVITY  
ARO ALL

# 31-35 TASK 857

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- 3) If you find a related maintenance message in Existing Faults, then do these steps:
  - a) Find the maintenance message in the applicable FIM Maintenance Message Index.
  - b) Do the specified task for the maintenance message.
- (3) If none of the parameters had a symbol for bad data, then look in Fault History for maintenance messages related to the LRUs that are used by the Engine Stable report:
  - (a) Make these selections on a MAT:
    - 1) ACMS
    - 2) EXIT ACMS
    - 3) ONBOARD MAINTENANCE
    - 4) EXTENDED MAINTENANCE
    - 5) FAULT HISTORY
    - 6) SELECT FDE BY LEG
  - (b) For each of the first five legs that show, do this:
    - 1) Select the leg.
    - 2) Select CONTINUE.
    - 3) Look for maintenance messages related to the LRUs in the list below:
      - a) Fuel quantity processor unit (FQPU)
      - b) ARINC signal gateway (ASG) card, left or right
      - c) CPM/ACMF in left AIMS
      - d) IOM in left AIMS
      - e) Air data inertial reference unit (ADIRU)
      - f) Secondary attitude air data reference unit (SAARU)
      - g) FMCF in left AIMS
      - h) Air supply & cabin pressure controller (ASCPC), left or right
      - i) Electronic engine control (EEC), left or right engine
    - 4) Select SELECT NEW LEG.
  - (c) If you find a related maintenance message in Fault History, then do these steps:
    - 1) Find the maintenance message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
- (4) Set ACMS to make a manual Engine Stable report while the airplane is in the air:
  - (a) Before take-off make these selections on the MAT to make sure that an Engine Stable report is made during the flight:
    - 1) CONDITION MONITORING
    - 2) ENGINE REPORTS
    - 3) ENGINE STABLE
    - 4) MANUALLY INITIATED
  - (b) After the flight, look at the report or reports.

## 777-200/300 FAULT ISOLATION MANUAL

- 1) If there are two reports, one manual and one automatic, you corrected the problem.  
**NOTE:** On manual reports, the value of parameter QR is 99.999. On automatic reports, the value of QR is less than 99.999.
- 2) If there is only a manual report, and no automatic report, then continue.
- (c) Find these parameters on the manual report and look at the value below the parameter name for bad data (bad data has symbols . ( ) : - adjacent to or in place of the parameter value).
  - 1) Use this list:

| PARAMETER | APPLICABLE LRU                                |
|-----------|-----------------------------------------------|
| PALT      | ADIRU and SAARU                               |
| TAT       | ADIRU                                         |
| CAS       | ADIRU                                         |
| MACH      | ADIRU and SAAR                                |
| PKWD      | ASCP, left and right, and CTC, left and right |
| NAI       | ASG Card, left and right                      |
| WAI       | ASG Card, left and right                      |
| N1        | EEC, left and right                           |

- (d) If any data is bad, look in ONBOARD MAINTENANCE, LINE MAINTENANCE, PRESENT LEG FAULTS for maintenance messages related to the applicable LRU above.
- (e) If you find a related maintenance message in Present Leg Faults, then do these steps:
  - 1) Find the maintenance message in the applicable FIM Maintenance Message Index.
  - 2) Do the specified task for the maintenance message.
    - a) If the automatic Engine Stable report is available after the next flight, you corrected the problem.

————— **END OF TASK** —————

### 858. ACMS Data Printing Problems - Fault Isolation

#### A. Initial Evaluation

- (1) In the air, if the Flight Deck Printer Inhibited indication shows and ACMS data does not come out of the printer, do this:
  - (a) If the flight crew tries to print ACMS data during takeoff, they must wait until the airplane is above 10,000 feet.
  - (b) If the flight crew tries to print ACMS data during landing, they must wait until after landing when the speed is less than 40 knots.
  - (c) If the ACMS data comes out of the printer after takeoff or landing, there is no problem.  
**NOTE:** ACMS data cannot come out of the printer during takeoff and landing. If you try to send ACMS data to the printer during those times, a dialog box will show this: Flight Deck Printer Inhibited. The ACMS keeps the data until the airplane is above 10,000 feet or after landing when ground speed is less than 40 knots. The data can then come out of the printer.
- (2) On the ground, if the Flight Deck Printer Inhibited indication shows and ACMS data does not come out of the printer, do this:
  - (a) Set the parking brake and make sure it stays set.
  - (b) Shut down both engines (in either sequence).

#### **859. AIMS-R Software Configuration Problems - Fault Isolation**

##### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-40002.

##### **B. Fault Isolation Procedure**

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Right AIMS.
  - (a) Find these line replaceable modules (LRM) on the display and make sure that the software part numbers are correct:
    - 1) CPM/Comm(M001) in Right AIMS
    - 2) CPM/STD (M002) in Right AIMS
- (2) If any of the part numbers are incorrect, install software in the applicable LRM in the Right AIMS cabinet. These are the tasks:
  - Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804
  - Core Processor Module/Standard Software Installation, AMM TASK 31-41-05-420-801
- (3) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/STD (M002) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### 868. ACMF in Right AIMS has no input from Network File Server (Left) on the PlaneNet

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-40312.

#### B. Description

- (1) The NFS shows this Maintenance Message when PlaneNet communication between the ACMF in the AIMS-R, and the NFS is unserviceable.
- (2) Use this task when AIMS EXISTING FAULTS shows Maintenance Message.
  - (a) The fault data for Maintenance Message is: ACMF in Right AIMS has no input from Network File Server (Left) on the PlaneNet.

#### C. Possible Causes

- (1) CPM/Comm(M001) in Right AIMS
- (2) CPM/STD(M002) in Right AIMS
- (3) NFS
- (4) Software

#### D. Initial Evaluation

- (1) Do a check of the AIMS EXISTING FAULTS for ATA 31 AIMS - Right AIMS (How to Find Active or Latched Maintenance Messages in One ATA System, AMM TASK 45-10-00-740-818).
  - (a) If the Maintenance Message does not show, then the fault is intermittent.
  - (b) If the Maintenance Message still shows, then continue.
- (2) Do a check of ONS EXISTING FAULTS (Onboard Network System NFS Message Check, AMM TASK 46-13-00-720-801).

NOTE: ONS is serviceable only when the EXISTING FAULTS page shows no Maintenance Messages.

- (a) Set the browser to show EXTENDED MAINTENANCE > EXISTING FAULTS > ATA SYSTEM > "46 Onboard Network System" > FAULTS.
  - 1) If you find active Maintenance Messages, then do the FIM Tasks for the messages that show.
    - a) After you correct the ONS related problems, exit and re-enter the AIMS EXISTING FAULTS page.
    - b) If the Maintenance Message still shows, then do the Fault Isolation Procedure.

#### E. Fault Isolation Procedure

- (1) Make sure that these circuit breakers are closed:

- (a) If you closed the breaker, do a check of the AIMS EXISTING FAULTS for ATA 31 AIMS - Right AIMS (How to Find Active or Latched Maintenance Messages in One ATA System, AMM TASK 45-10-00-740-818).
  - 1) If the Maintenance Message does not show, then you corrected the problem.
  - 2) If the Maintenance Message still shows, then continue.
- (2) Make these selections on the MAT to make sure that the Left CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.

**NOTE:** You must reset the IOM(M003) from the off-side CMCF and AIMS Interface.

  - (a) If the display shows that the Right CMCF is in control, select SWITCH TO LEFT, YES, CONTINUE.
    - 1) On the MATA AIMS Main Menu, select Interface L\_AIMS.
    - 2) Select ONBOARD MAINTENANCE.
  - (b) If the display shows that the Left CMCF is in control, then select GO BACK.
    - 1) Select LINE MAINTENANCE, EXIT MAINTENANCE, Interface L\_AIMS.
    - 2) Select ONBOARD MAINTENANCE.
- (3) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
  - (a) Do the Repair Confirmation procedure at the end of this task.
- (4) Replace the CPM/Comm(M001) module in the Right AIMS cabinet. These are the tasks:
  - Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802

- Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802
  - (a) Do the Repair Confirmation at the end of this task.
- (5) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/STD(M002) in Right AIMS Module Reset.
  - (a) Do the Repair Confirmation procedure at the end of this task.
- (6) Replace the CPM/Comm(M001) module in the Right AIMS cabinet. These are the tasks:
  - Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801
  - Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801
  - (a) Do the Repair Confirmation at the end of this task.
- (7) Do a check of CPM/Comm Software in the Right AIMS cabinet. This is the task: Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802
  - (a) Make sure that OPS is serviceable.
  - (b) Make sure that OPC is serviceable.
  - (c) Make sure the two parts agree with your airline's required software record.

NOTE: At this step in the process, it is very likely that at least one of the two parts is unserviceable.

    - 1) If you find a problem, then install the correct software part (Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804).
  - (d) Do the Repair Confirmation at the end of this task.
- (8) Do a check of CPM/STD Software in the Right AIMS cabinet. This is the task: Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801
  - (a) Make sure that OPS is serviceable.
  - (b) Make sure that OPC is serviceable.
  - (c) Make sure the two parts agree with your airline's required software record.

NOTE: At this step in the process, it is very likely that at least one of the two parts is unserviceable.

    - 1) If you find a problem, then install the correct software part (Core Processor Module/Standard Software Installation, AMM TASK 31-41-05-420-801).
  - (d) Do the Repair Confirmation at the end of this task.
- (9) Do a check of ONS Software. This is the task: Network File Server Software Check, AMM TASK 46-13-01-860-801
  - (a) Make sure that 46 NED OPC is serviceable.
  - (b) Make sure that 46 NFS OPC is serviceable.
  - (c) Make sure the two parts agree with your airline's required software record.

NOTE: At this step in the process, it is very likely that at least one of the two parts is unserviceable.

    - 1) If you find a problem, then install the correct software part (Network File Server Software Installation, AMM TASK 46-13-01-470-801).
  - (d) Do the Repair Confirmation at the end of this task.
- (10) Replace the NFS. These are the tasks:
  - Network File Server Removal, AMM TASK 46-13-01-000-801-001

## 777-200/300 FAULT ISOLATION MANUAL

### 801. Left and Right AIMS have Incorrect Software Configuration - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-50303, 31-50304.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do these steps:
- (a) Do these ground tests on the MAT: 31 AIMS - Left AIMS, System Test:
    - 1) IOM(M003) in Left AIMS Module Reset
    - 2) IOM(M004) in Left AIMS Module Reset
    - 3) IOM(M008) in Left AIMS Module Reset
    - 4) IOM(M009) in Left AIMS Module Reset
  - (b) If the maintenance message shows on the ground test display, then continue.
  - (c) If the maintenance message does not show on the ground test display, then there was an intermittent fault.
- (2) If the MAT still shows LATCHED for the maintenance message, then do these steps:
- (a) Do these ground tests on the MAT: 31 AIMS - Right AIMS, System Test:
    - 1) IOM(M003) in Right AIMS Module Reset
    - 2) IOM(M004) in Right AIMS Module Reset
    - 3) IOM(M008) in Right AIMS Module Reset
    - 4) IOM(M009) in Right AIMS Module Reset
  - (b) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (c) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS.
- (a) Find these line replaceable modules (LRM) on the display and make sure that the software part numbers are correct:
    - 1) CPM/Comm(M001) in Left AIMS
    - 2) CPM/STD (M002) in Left AIMS
    - 3) IOM(M003) in Left AIMS
    - 4) IOM(M004) in Left AIMS
    - 5) IOM(M008) in Left AIMS
    - 6) IOM(M009) in Left AIMS
    - 7) CPM/GG(M010) in Left AIMS
    - 8) CPM/GG(M011) in Left AIMS
- (2) If any of the part numbers are incorrect, install software in the applicable LRM in the left AIMS cabinet:
- (a) To install software in the CPM/Comm(M001), do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.
  - (b) To install software in the CPM/STD (M002), do this task: Core Processor Module/Standard Software Installation, AMM TASK 31-41-05-420-801.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (c) To install software in an IOM, do this task: Input/Output Module (IOM) Software Installation, AMM TASK 31-41-11-420-806.
- (d) To install software in an CPM/GG, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
- (3) Use a MAT to do a ground test of the module that got software:
  - (a) If the module is a CPM/Comm, make these selections on the MAT to make sure the right CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.  
NOTE: You must reset the CPM/Comm from the off-side CMCF.
    - 1) If the display shows that the left CMCF is in control, select SWITCH TO RIGHT.
    - 2) If the display shows that the right CMCF is in control, then select GO BACK.
  - (b) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test:
  - (c) Select the ground test for the module that got software:
    - 1) CPM/Comm(M001) in Left AIMS Module Reset  
NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.
    - 2) CPM/STD (M002) in Left AIMS Module Reset
    - 3) IOM(M003) in Left AIMS Module Reset
    - 4) IOM(M004) in Left AIMS Module Reset
    - 5) IOM(M008) in Left AIMS Module Reset
    - 6) IOM(M009) in Left AIMS Module Reset
    - 7) CPM/GG(M010) in Left AIMS Module Reset
    - 8) CPM/GG(M011) in Left AIMS Module Reset
  - (d) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (4) Do a check of the system configuration for this system on the MAT: 31 AIMS - Right AIMS.
  - (a) Find these line replaceable modules (LRM) on the display and make sure that the software part numbers are correct:
    - 1) CPM/Comm(M001) in Right AIMS
    - 2) CPM/STD (M002) in Right AIMS
    - 3) IOM(M003) in Right AIMS
    - 4) IOM(M004) in Right AIMS
    - 5) IOM(M008) in Right AIMS
    - 6) IOM(M009) in Right AIMS
    - 7) CPM/GG(M010) in Right AIMS
    - 8) CPM/GG(M011) in Right AIMS
- (5) If any of the part numbers are incorrect, install software in the applicable LRM in the right AIMS cabinet:
  - (a) To install software in the CPM/Comm(M001), do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.
  - (b) To install software in the CPM/STD (M002), do this task: Core Processor Module/Standard Software Installation, AMM TASK 31-41-05-420-801.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

- (1) Replace the CPM/Comm(M001) in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 808. Left AIMS CPM/ACMF or CPM/STD(M002) Module Internal Problems - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Replace the CPM/STD (M002) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 809. Right AIMS CPM/Basic or CPM/STD(M002) Module Internal Problems - Fault Isolation

#### A. Fault Isolation Procedure

- (1) Replace the CPM/STD (M002) in the right AIMS cabinet.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 812. Left AIMS CPM/Comm(M001) Internal S/W Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51133.

#### B. Fault Isolation Procedure

- (1) Make these selections on the MAT to make sure the right CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.

NOTE: You must reset the CPM/Comm from the off-side CMCF.

- (a) If the display shows that the left CMCF is in control, select SWITCH TO RIGHT.
- (b) If the display shows that the right CMCF is in control, then select GO BACK.

- (2) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.

NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.

- (3) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

### 817. Left AIMS IOM(M003) to Flt Ctrl 629 Bus-C Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-52101.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31309, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the IOM(M003) to the Flt Ctrl 629 Bus-C.

- (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M003) to the coupler:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31309 from the coupler, B31309.
  - (c) Do a wiring check between these pins of the IOM connector P3 and connector DB31309 at the P311 panel (WDM 31-41-25) (SSM 31-41-02):

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the IOM(M003) from the right AIMS cabinet and the IOM(M008) from the left AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Do a wiring check between these pins of IOM(M003) connector J240-A in the right AIMS cabinet and IOM(M008) connector J410-A in the left AIMS cabinet (SSM 31-41-27)(WDM 31-41-27):

| J240-A (R-AIMS)   | J410-A (L-AIMS) |
|-------------------|-----------------|
| pin G6 . . . . .  | pin G9          |
| pin G7 . . . . .  | pin G10         |
| pin G9 . . . . .  | pin G6          |
| pin G10 . . . . . | pin G7          |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) in the right AIMS cabinet and the IOM(M008) in the left AIMS cabinet. To install them, do this step: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) If the maintenance message does not show on the ground test display, you corrected the fault.

### — END OF TASK —

#### 819. Left AIMS IOM(M003) to AIMS Intercabinet Bus-2 Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-52111.

##### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do these checks of the wiring:
    - (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (b) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (c) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (d) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (e) Remove the left radio altimeter, M34112. To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
    - (f) Remove the right radio altimeter, M34212. To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
    - (g) Remove the center radio altimeter, M34312. To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
    - (h) Do a wiring check between these pins of the IOM connectors J240 and J250 in the left AIMS cabinet (SSM 31-41-05):

**J240-B**

pin C5 . . . . .

**J250-B**

pin C5

- (i) Do a wiring check between these pins of the IOM connectors J240 and J250 in the right AIMS cabinet (SSM 31-41-08):

**J240-B**

pin C5 . . . . .

**J250-B**

pin C5

- (j) Do a wiring check between these pins of the IOM connector J240 in the right AIMS cabinet and connector DM34312AB (WDM 31-61-41) (SSM 31-41-08):

AROUND ALL

## 31-41 TASKS 825-826

D633W103-ARO

Page 216  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the start switch solenoid:
  - (a) Remove the cargo fire/engine control panel, M80001. To remove it, do this task: APU Fire Switch Removal, AMM TASK 26-22-03-000-801.
  - (b) Do a check for a short between pins 7 and 8 on connector DS80200 of the start switch solenoid (WDM 80-11-21).
  - (c) If you find a short, replace the start switch solenoid, S80200.
    - 1) Re-install the cargo fire/engine control panel, M80001. To install it, do this task: APU Fire Switch Installation, AMM TASK 26-22-03-400-801.
    - 2) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
    - 3) If the maintenance message does not show on the ground test display, you corrected the fault.
    - 4) If the maintenance message shows on the ground test display, then continue.
  - (d) If you do not find a short, then continue.
- (3) Do these checks of the wiring:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J240 and J250 in the left AIMS cabinet (SSM 31-41-05):

|                  |               |

## 777-200/300 FAULT ISOLATION MANUAL

- (m) Do a wiring check between these pins of the IOM connector J250 in the left AIMS cabinet and connector DM34112AB (WDM 31-61-41) (SSM 31-41-05):

| <b>J250-B</b>    | <b>DM34112AB</b> |
|------------------|------------------|
| pin C5 . . . . . | pin K6           |

- (n) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the left radio altimeter, M34112. To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - 3) Re-install the right radio altimeter, M34212. To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - 4) Re-install the center radio altimeter, M34312. To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - 5) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 6) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 7) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 8) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 9) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 830. Left AIMS IOM(M004) Discrete Output 06 Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-55251.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M004) in the left AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Do this check of the start switch solenoid:
- (a) Remove the cargo fire/engine control panel, M80001. To remove it, do this task: APU Fire Switch Removal, AMM TASK 26-22-03-000-801.
  - (b) Do a check for a short between pins 7 and 8 on connector DS80200 of the start switch solenoid (WDM 80-11-21).
  - (c) If you find a short, replace the start switch solenoid, S80200.
    - 1) Re-install the cargo fire/engine control panel, M80001. To install it, do this task: APU Fire Switch Installation, AMM TASK 26-22-03-400-801.
    - 2) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
    - 3) If the maintenance message does not show on the ground test display, you corrected the fault.
    - 4) If the maintenance message shows on the ground test display, then continue.
  - (d) If you do not find a short, then continue.
- (3) Do these checks of the wiring:
- (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J240 and J250 in the left AIMS cabinet (SSM 31-41-05):

|                  |               |
|------------------|---------------|
| <b>J240-B</b>    | <b>J250-B</b> |
| pin C6 . . . . . | pin C6        |
  - (d) Do a wiring check between these pins of the IOM connector J250 in the left AIMS cabinet and connector DS80200 (WDM 31-41-38), (WDM 80-11-21), (SSM 31-41-05):

|                  |                |
|------------------|----------------|
| <b>J250-B</b>    | <b>DS80200</b> |
| pin C6 . . . . . | pin 7          |
  - (e) If you find a problem with the wiring, then repair the wiring.
  - (f) Re-install the cargo fire/engine control panel, M80001. To install it, do this task: APU Fire Switch Installation, AMM TASK 26-22-03-400-801.
  - (g) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (h) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (i) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

——— END OF TASK ———

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the start switch solenoid:
  - (a) Remove the cargo fire/engine control panel, M80001. To remove it, do this task: APU Fire Switch Removal, AMM TASK 26-22-03-000-801.
  - (b) Do a check for a short between pins 7 and 8 on connector DS80200 of the start switch solenoid (WDM 80-11-21).
  - (c) If you find a short, replace the start switch solenoid, S80200.
    - 1) Re-install the cargo fire/engine control panel, M80001. To install it, do this task: APU Fire Switch Installation, AMM TASK 26-22-03-400-801.
    - 2) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
    - 3) If the maintenance message does not show on the ground test display, you corrected the fault.
    - 4) If the maintenance message shows on the ground test display, then continue.
  - (d) If you do not find a short, then continue.
- (3) Do these checks of the wiring:
  - (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J240 and J250 in the right AIMS cabinet (SSM 31-41-08):

|               |               |
|---------------|---------------|
| <b>J240-B</b> | <b>J250-B</b> |
| pin C6        | pin C6        |
  - (d) Do a wiring check between these pins of the IOM connector J250 in the right AIMS cabinet and connector DS80200 (WDM 31-41-38), (WDM 80-11-21), (SSM 31-41-08):

- (e) If you find a problem with the wiring, then repair the wiring.
- (f) Re-install the cargo fire/engine control panel, M80001. To install it, do this task: APU Fire Switch Installation, AMM TASK 26-22-03-400-801.
- (g) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (h) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (i) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

## 832. Left AIMS IOM(M003) Module Input/Output Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-52601, 31-53401, 31-53701, 31-53711, 31-53721, 31-53731.

### B. Description

The Left Airplane Information Management System (AIMS) Input/Output Module (IOM) (M003) input/output problems can be caused by a faulty IOM or a faulty EOQ sensor.

### C. Possible Causes

- (1) IOM (M003), M31101M003.
- (2) Engine Oil Quantity sensor/transmitter, M79001

### D. Circuit Breakers

- (1) These are the primary circuit breakers related to the fault:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |

## 777-200/300 FAULT ISOLATION MANUAL

### E. Related Data

- (1) WDM 79-31-11
- (2) SSM 31-41-05
- (3) SSM 31-41-07

### F. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do the ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### G. Fault Isolation Procedure

- (1) Replace the IOM(M003), M31101M003, in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) Do the Repair Confirmation at the end of this task.
- (2) Do these steps to do an AIMS Cabinet Reset test for the AIMS cabinet:
  - (a) Use the MAT or PMAT to do the left AIMS Cabinet Reset Test. (Airplane Information Management System (AIMS) - Operational Test, AMM TASK 31-41-00-710-801)
  - (b) Check the existing fault in the Left AIMS. If there is no fault. Check the existing fault in the Right AIMS. If maintenance messages toggled, then the fault is in the Oil quantity sensor.
    - 1) Proceed to the next step to replace the oil quantity sensor.
- (3) Replace the Left oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.
- (4) Replace the Right oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.

### H. Repair Confirmation

- (1) Do the ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message, then you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue the Fault Isolation Procedure at the subsequent step.

————— END OF TASK —————

## 833. Right AIMS IOM(M003) Module Input/Output Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-52602, 31-53402, 31-53702, 31-53712, 31-53722, 31-53732.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Use the MAT or PMAT to do the right AIMS Cabinet Reset Test. (Airplane Information Management System (AIMS) - Operational Test, AMM TASK 31-41-00-710-801)
- (b) Check the existing fault in the Right AIMS. If there is no fault. Check the existing fault in the Left AIMS. If maintenance messages toggled, then the fault is in the Oil quantity sensor.
  - 1) Proceed to the next step to replace the oil quantity sensor.
- (3) Replace the Right oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.
- (4) Replace the Left oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.

### H. Repair Confirmation

- (1) Do the ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message, then you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue the Fault Isolation Procedure at the subsequent step.

### — END OF TASK —

## 834. Left AIMS IOM(M004) to Flt Ctrl 629 Bus-R Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-54101.

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31206, in the P212 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the IOM(M004) to the Flt Ctrl 629 Bus-R.

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
- (b) If the maintenance message does not show on the ground test display, you corrected the fault.
- (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M004) to the coupler:
  - (a) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31206 from the coupler, B31206.
  - (c) Do a wiring check between these pins of the IOM connector P4 and connector DB31206 at the P212 panel (WDM 31-41-25):

| P4-B   | DB31206 |
|--------|---------|
| pin A5 | pin 5   |
| pin A6 | pin 4   |
| pin A2 | pin 2   |
| pin A3 | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31206.
  - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.

### END OF TASK

#### 835. Right AIMS IOM(M004) to Flt Ctrl 629 Bus-R Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-54102.

##### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31208, in the P212 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE:** This coupler connects the IOM(M004) to the Flt Ctrl 629 Bus-R.
- (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
- (b) If the maintenance message does not show on the ground test display, you corrected the fault.
- (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M004) to the coupler:
- (a) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Disconnect connector DB31208 from the coupler, B31208.
- (c) Do a wiring check between these pins of the IOM connector P4 and connector DB31208 at the P212 panel (WDM 31-41-26):

| P4-B   | DB31208 |
|--------|---------|
| pin A5 | pin 5   |
| pin A6 | pin 4   |
| pin A2 | pin 2   |
| pin A3 | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31208.
  - 3) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

### 836. Left AIMS IOM(M004) to AIMS Intercabinet Bus-3 Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-54111.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

EFFECTIVITY  
ARO ALL

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the IOM(M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.

- (b) If the maintenance message shows on the ground test display, then continue.

- (2) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.

- (b) If the maintenance message shows on the ground test display, then continue.

- (3) Do this check of the wiring from the IOM(M004) (left AIMS) to IOM(M004) (right AIMS):

- (a) Remove the IOM(M004) from the left and right AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.

- (b) Do a wiring check between these pins of the IOM(M004) connector J250-A in the left AIMS cabinet and IOM(M004) connector J250-A in the right AIMS cabinet (SSM 31-41-27)(WDM 31-41-27):

#### J250-A (L-AIMS)

pin G9 .....  
pin G10 .....  
pin G6 .....  
pin G7 .....

#### J250-A (R-AIMS)

pin G6  
pin G7  
pin G9  
pin G10

- (c) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.

- 2) Re-install the IOM(M004) into the left and right AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- 3) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

### 837. Right AIMS IOM(M004) to AIMS Intercabinet Bus-3 Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-54112.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM (M004) in Right AIMS Module Reset.

- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.

- (b) If the maintenance message shows on the ground test display, then continue.

- (2) Replace the IOM(M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.

- (b) If the maintenance message shows on the ground test display, then continue.

- (3) Do this check of the wiring from the IOM(M004) (left AIMS) to IOM(M004) (right AIMS):

- (a) Remove the IOM(M004) from the left and right AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.

- (b) Do a wiring check between these pins of the IOM(M004) connector J250-A in the left AIMS cabinet and IOM(M004) connector J250-A in the right AIMS cabinet (SSM 31-41-27)(WDM 31-41-27):

#### J250-A (L-AIMS)

pin G9 ..... pin G6  
pin G10 ..... pin G7  
pin G6 ..... pin G9  
pin G7 ..... pin G10

#### J250-A (R-AIMS)

- (c) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the IOM(M004) into the left and right AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 838. Left AIMS IOM(M004) to System 629 Bus-R Problems - Fault Isolation

#### A. Maintenance Messages

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM (M004) in Left AIMS Module Reset (Airplane Information Management System (AIMS) - Operational Test, AMM TASK 31-41-00-710-801).
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM (M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31211, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the IOM (M004) to the System 629 Bus-R.

- (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM (M004) in Left AIMS Module Reset (Airplane Information Management System (AIMS) - Operational Test, AMM TASK 31-41-00-710-801).
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM (M004) to the coupler:
  - (a) Remove the IOM (M004) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31211 from the coupler, B31211.
  - (c) Do a wiring check between these pins of the IOM connector J250 and connector DB31211 at the P211 panel (WDM 31-41-25):

| J250-A | DB31211 |
|--------|---------|
| pin B2 | pin 5   |
| pin A3 | pin 4   |
| pin E2 | pin 2   |
| pin E3 | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
    - 2) Re-connect connector DB31211.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the IOM (M004) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

### 839. Right AIMS IOM(M004) to System 629 Bus-R Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-54122.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31214, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the IOM(M004) to the System 629 Bus-R.

- (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M004) to the coupler:
  - (a) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31214 from the coupler, B31214.
  - (c) Do a wiring check between these pins of the IOM connector J250 and connector DB31214 at the P211 panel (WDM 31-41-26):

| pin E3 ..... | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31214.
  - 3) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.

### — END OF TASK —

#### 840. Left AIMS IOM(M004) Module Input/Output Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-54601, 31-55401, 31-55701, 31-55711, 31-55721, 31-55731.

##### B. Description

The Left AIMS IOM (M004) input/output problems can be caused by a faulty IOM or a faulty EOQ sensor.

##### C. Possible Causes

- (1) IOM (M004), M31101M004
- (2) Engine Oil Quantity sensor/transmitter, M79001

##### D. Circuit Breakers

- (1) These are the primary circuit breakers related to the fault:

##### Overhead Circuit Breaker Panel, P11

## 777-200/300 FAULT ISOLATION MANUAL

### E. Related Data

- (1) WDM 79-31-11
- (2) SSM 31-41-05
- (3) SSM 31-41-07

### F. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do the ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
  - (a) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### G. Fault Isolation Procedure

- (1) Replace the IOM(M004), M31101M004, in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) Do the Repair Confirmation at the end of this task.
- (2) Do these steps to do an AIMS Cabinet Reset test for the AIMS cabinet:
  - (a) Use the MAT or PMAT to do the left AIMS Cabinet Reset Test. (Airplane Information Management System (AIMS) - Operational Test, AMM TASK 31-41-00-710-801)
  - (b) Check the existing fault in the Left AIMS. If there is no fault. Check the existing fault in the Right AIMS. If maintenance messages toggled, then the fault is in the Oil quantity sensor.
    - 1) Proceed to the next step to replace the oil quantity sensor.
- (3) Replace the Left oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.
- (4) Replace the Right oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.

### H. Repair Confirmation

- (1) Do the ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message, then you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue the Fault Isolation Procedure at the subsequent step.

————— END OF TASK —————

## 841. Right AIMS IOM(M004) Module Input/Output Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-54602, 31-55402, 31-55702, 31-55712, 31-55722, 31-55732.

| J          | 7          | C31650        | AIMS R      |

### E. Related Data

- (1) WDM 79-31-11
- (2) SSM 31-41-05
- (3) SSM 31-41-07

### F. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do the ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### G. Fault Isolation Procedure

- (1) Replace the IOM(M004), M31201M004, in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (2) Do these steps to do an AIMS Cabinet Reset test for the AIMS cabinet:

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Use the MAT or PMAT to do the right AIMS Cabinet Reset Test. (Airplane Information Management System (AIMS) - Operational Test, AMM TASK 31-41-00-710-801)
- (b) Check the existing fault in the Right AIMS. If there is no fault. Check the existing fault in the Left AIMS. If maintenance messages toggled, then the fault is in the Oil quantity sensor.
  - 1) Proceed to the next step to replace the oil quantity sensor.
- (3) Replace the Right oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.
- (4) Replace the Left oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.

### H. Repair Confirmation

- (1) Do the ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message, then you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue the Fault Isolation Procedure at the subsequent step.

### — END OF TASK —

## 842. Left AIMS IOM(M008) Module Input/Output Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-56601, 31-57401, 31-57701, 31-57711, 31-57721, 31-57731.

### B. Description

The Left AIMS IOM (M008) input/output problems can be caused by a faulty IOM or a faulty EOQ sensor.

### C. Possible Causes

- (1) IOM (M008), M31101M008
- (2) Engine Oil Quantity sensor/transmitter, M79001

### D. Circuit Breakers

- (1) These are the primary circuit breakers related to the fault:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

### Standby Power Management Panel, P310

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| J          | 6          | C31651        | AIMS L      |
| J          | 7          | C31650        | AIMS R      |

#### E. Related Data

- (1) WDM 79-31-11
- (2) SSM 31-41-05
- (3) SSM 31-41-07

#### F. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do the ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (a) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### G. Fault Isolation Procedure

- (1) Replace the IOM(M008), M31101M008, in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) Do the Repair Confirmation at the end of this task.
- (2) Do these steps to do an AIMS Cabinet Reset test for the AIMS cabinet:
  - (a) Use the MAT or PMAT to do the left AIMS Cabinet Reset Test. (Airplane Information Management System (AIMS) - Operational Test, AMM TASK 31-41-00-710-801)
  - (b) Check the existing fault in the Left AIMS. If there is no fault. Check the existing fault in the Right AIMS. If maintenance messages toggled, then the fault is in the Oil quantity sensor.
    - 1) Proceed to the next step to replace the oil quantity sensor.
- (3) Replace the Left oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.
- (4) Replace the Right oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.

#### H. Repair Confirmation

- (1) Do the ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message, then you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue the Fault Isolation Procedure at the subsequent step.

## 777-200/300 FAULT ISOLATION MANUAL

### 843. Right AIMS IOM(M008) Module Input/Output Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-56602, 31-57402, 31-57702, 31-57712, 31-57722, 31-57732.

#### B. Description

The Right AIMS IOM (M008) input/output problems can be caused by a faulty IOM or a faulty EOQ sensor.

#### C. Possible Causes

- (1) IOM (M008), M31201M008
- (2) Engine Oil Quantity sensor/transmitter, M79001

#### D. Circuit Breakers

- (1) These are the primary circuit breakers related to the fault:

##### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

##### Standby Power Management Panel, P310

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| J          | 6          | C31651        | AIMS L      |
| J          | 7          | C31650        | AIMS R      |

#### E. Related Data

- (1) WDM 79-31-11
- (2) SSM 31-41-05
- (3) SSM 31-41-07

#### F. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do the ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### G. Fault Isolation Procedure

- (1) Replace the IOM(M008), M31201M008, in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) Do the Repair Confirmation at the end of this task.
- (2) Do these steps to do an AIMS Cabinet Reset test for the AIMS cabinet:
  - (a) Use the MAT or PMAT to do the right AIMS Cabinet Reset Test. (Airplane Information Management System (AIMS) - Operational Test, AMM TASK 31-41-00-710-801)
  - (b) Check the existing fault in the Right AIMS. If there is no fault. Check the existing fault in the Left AIMS. If maintenance messages toggled, then the fault is in the Oil quantity sensor.
    - 1) Proceed to the next step to replace the oil quantity sensor.
- (3) Replace the Right oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.
- (4) Replace the Left oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.

### H. Repair Confirmation

- (1) Do the ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message, then you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue the Fault Isolation Procedure at the subsequent step.

### END OF TASK

## 844. Left AIMS IOM(M008) to AIMS Intercabinet Bus-4 Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-56101.

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
- (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the IOM(M003) in the right AIMS cabinet.

These are the tasks:

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
- (b) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from IOM(M003) to IOM(M008):
  - (a) Remove the IOM(M003) from the right AIMS cabinet and the IOM(M008) from the left AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Do a wiring check between these pins of IOM(M003) connector J240-A in the right AIMS cabinet and IOM(M008) connector J410-A in the left AIMS cabinet (SSM 31-41-27)(WDM 31-41-27):

### J240-A (R-AIMS)

|         |       |         |
|---------|-------|---------|
| pin G6  | ..... | pin G9  |
| pin G7  | ..... | pin G10 |
| pin G9  | ..... | pin G6  |
| pin G10 | ..... | pin G7  |

### J410-A (L-AIMS)

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) in the right AIMS cabinet and the IOM(M008) in the left AIMS cabinet. To install them, do this step: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

## 845. Right AIMS IOM(M008) to Flt Ctrl 629 Bus-C Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-56102.

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31310, in the P312 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE:** This coupler connects the IOM(M008) to the Flt Ctrl 629 Bus-C.
- (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
- (b) If the maintenance message does not show on the ground test display, you corrected the fault.
- (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M008) to the coupler:
- (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Disconnect connector DB31310 from the coupler, B31310.
- (c) Do a wiring check between these pins of the IOM connector J410 and connector DB31310 at the P312 panel (WDM 31-41-26):

| J410-A       | DB31310 |
|--------------|---------|
| pin G3 ..... | pin 5   |
| pin G4 ..... | pin 4   |
| pin G1 ..... | pin 2   |
| pin G2 ..... | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31310.
  - 3) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

### 846. Left AIMS IOM(M008) to Flt Ctrl 629 Bus-L Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-56111.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
- (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31108, in the P112 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the IOM(M008) to the Flt Ctrl 629 Bus-L.

- (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
- (b) If the maintenance message does not show on the ground test display, you corrected the fault.
- (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M008) to the coupler:
- (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Disconnect connector DB31108 from the coupler, B31108.
- (c) Do a wiring check between these pins of the IOM connector J410 and connector DB31108 at the P112 panel (WDM 31-41-25):

| J410-A | DB31108 |
|--------|---------|
| pin G3 | pin 5   |
| pin G4 | pin 4   |
| pin G1 | pin 2   |
| pin G2 | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
- 2) Re-connect connector DB31108.
- 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

## 777-200/300 FAULT ISOLATION MANUAL

### 848. Left AIMS IOM(M008) to System 629 Bus-C1 Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-56121.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31312, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the IOM(M008) to the System 629 Bus-C1.

- (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M008) to the coupler:
  - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31312 from the coupler, B31312.
  - (c) Do a wiring check between these pins of the IOM connector J410 and connector DB31312 at the P311 panel (WDM 31-41-25):

| J410-B | DB31312 |
|--------|---------|
| pin G3 | pin 5   |
| pin G4 | pin 4   |
| pin G1 | pin 2   |
| pin G2 | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Replace the ARINC 629 wiring (SWPM 20-13-00).

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Re-connect connector DB31312.
- 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 849. Right AIMS IOM(M008) to System 629 Bus-C1 Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-56122.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31317, in the P311 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the IOM(M008) to the System 629 Bus-C1.

- (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M008) to the coupler:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31317 from the coupler, B31317.
  - (c) Do a wiring check between these pins of the IOM connector J410 and connector DB31317 at the P311 panel (WDM 31-41-26):

## 777-200/300 FAULT ISOLATION MANUAL

| J410-B       | DB31317 |
|--------------|---------|
| pin G3 ..... | pin 5   |
| pin G4 ..... | pin 4   |
| pin G1 ..... | pin 2   |
| pin G2 ..... | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31317.
  - 3) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.

### — END OF TASK —

#### 850. Left AIMS IOM(M008) Discrete Output 06 Fault - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-57251.

##### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the start switch solenoid:
- (a) Remove the cargo fire/engine control panel, M80001. To remove it, do this task: APU Fire Switch Removal, AMM TASK 26-22-03-000-801.
- (b) Do a check for a short between pins 7 and 8 on connector DS80100 of the start switch solenoid (WDM 80-11-11).
- (c) If you find a short, replace the start switch solenoid, S80100.
- 1) Re-install the cargo fire/engine control panel, M80001. To install it, do this task: APU Fire Switch Installation, AMM TASK 26-22-03-400-801.
  - 2) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.

Page 251  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (i) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 852. Left AIMS IOM(M009) to Flt Ctrl 629 Bus-L Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-58101.

##### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31107, in the P112 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the IOM(M009) to the Flt Ctrl 629 Bus-L.

  - (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M009) to the coupler:
  - (a) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31107 from the coupler, B31107.
  - (c) Do a wiring check between these pins of the IOM connector J420 and connector DB31107 at the P112 panel (WDM 31-41-25):

## 777-200/300 FAULT ISOLATION MANUAL

| J420-A       | DB31107 |
|--------------|---------|
| pin G3 ..... | pin 5   |
| pin G4 ..... | pin 4   |
| pin G1 ..... | pin 2   |
| pin G2 ..... | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31107.
  - 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.

### — END OF TASK —

#### 853. Right AIMS IOM(M009) to Flt Ctrl 629 Bus-L Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-58102.

##### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M009) in Right AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
- (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31111, in the P112 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the IOM(M009) to the Flt Ctrl 629 Bus-L.

- (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M009) in Right AIMS Module Reset.
- (b) If the maintenance message does not show on the ground test display, you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
- (b) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M009) (left AIMS) to IOM(M009) (right AIMS):
  - (a) Remove the IOM(M009) from the left and right AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Do a wiring check between these pins of the IOM(M009) connector J420-A in the left AIMS cabinet and IOM(M009) connector J420-A in the right AIMS cabinet (SSM 31-41-27)(WDM 31-41-27):

### J420-A (L-AIMS)

pin G9 .....  
pin G10 .....  
pin G6 .....  
pin G7 .....

### J420-A (R-AIMS)

pin G6  
pin G7  
pin G9  
pin G10

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) into the left and right AIMS cabinet. To install them, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) If the maintenance message does not show on the ground test display, you corrected the fault.

### END OF TASK

## 856. Left AIMS IOM(M009) to System 629 Bus-L Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-58121.

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31112, in the P111 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE:** This coupler connects the IOM(M009) to the System 629 Bus-L.
- (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
- (b) If the maintenance message does not show on the ground test display, you corrected the fault.
- (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M009) to the coupler:
- (a) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Disconnect connector DB31112 from the coupler, B31112.
- (c) Do a wiring check between these pins of the IOM connector J420 and connector DB31112 at the P111 panel (WDM 31-41-25):
- | <b>J420-B</b> | <b>DB31112</b> |
|---------------|----------------|
| pin G3 .....  | pin 5          |
| pin G4 .....  | pin 4          |
| pin G1 .....  | pin 2          |
| pin G2 .....  | pin 1          |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31112.
  - 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
- (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31116, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the IOM(M009) to the System 629 Bus-L.

- (a) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M009) in Right AIMS Module Reset.
- (b) If the maintenance message does not show on the ground test display, you corrected the fault.
- (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M009) to the coupler:
- (a) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Disconnect connector DB31116 from the coupler, B31116.
- (c) Do a wiring check between these pins of the IOM connector J420 and connector DB31116 at the P111 panel (WDM 31-41-25):

| J420-B | DB31116 |
|--------|---------|
| pin G3 | pin 5   |
| pin G4 | pin 4   |
| pin G1 | pin 2   |
| pin G2 | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
- 2) Re-connect connector DB31116.
- 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

### 858. Left AIMS IOM(M009) Module Input/Output Problems - Fault Isolation

#### A. Maintenance Messages

**860. Left AIMS IOM(M009) Discrete Output 06 Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-59251.

**B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the start switch solenoid:
  - (a) Remove the cargo fire/engine control panel, M80001. To remove it, do this task: APU Fire Switch Removal, AMM TASK 26-22-03-000-801.

### 863. Left AIMS IOM(M003) Discrete Output 09 Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-53281.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J240 and J250 in the left AIMS cabinet (SSM 31-41-05):

**J240-B**

**J250-B**

pin D3 . . . . . pin D3

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows ACTIVE for the maintenance message, then continue.
- (e) If you do not find a problem with the wiring, then continue.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of the IOM connectors J240 and J250 in the right AIMS cabinet (SSM 31-41-08):

| <b>J240-B</b>    | <b>J250-B</b> |
|------------------|---------------|
| pin D3 . . . . . | pin D3        |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows ACTIVE for the maintenance message, then continue.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
  - (a) Remove the right VHF communication transceiver, M23203. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J240 in the right AIMS cabinet and connector DM23203AB (WDM 23-12-31) (SSM 31-41-08):

| <b>J240-B</b>    | <b>DM23203AB</b> |
|------------------|------------------|
| pin D3 . . . . . | pin C7           |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the right VHF communication transceiver, M23203. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 3) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 5) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do these checks of the wiring:
    - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (c) Remove the right air supply and cabin pressure controller, M36112. To remove it, do this task: ASCPC Removal, AMM TASK 36-11-20-000-801.
    - (d) Remove the left air supply and cabin pressure controller, M36111. To remove it, do this task: ASCPC Removal, AMM TASK 36-11-20-000-801.
    - (e) Do a wiring check between these pins of the IOM connectors J240 and J250 in the left AIMS cabinet (SSM 31-41-05):

**J240-B**

pin D4 . . . . .

**J250-B**

pin D4

- (f) Do a wiring check between these pins of the IOM connector J240 in the left AIMS cabinet and connector DM36112AA (WDM 31-41-37) (SSM 31-41-05):

**J240-B**

pin D4 . . . . .

**DM36112AA**

pin C7

- (g) Do a wiring check between these pins of the IOM connector J240 in the left AIMS cabinet and the connector DM36111AA (WDM 31-41-37) (SSM 31-41-05):

**J240-B**

pin D4 . . . . .

**DM36111AA**

pin D7

- (h) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the left air supply and cabin pressure controller, M36111. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 1) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
  - (a) Remove the left air supply and cabin pressure controller, M36111. To remove it, do this task: ASCPC Removal, AMM TASK 36-11-20-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J250 in the left AIMS cabinet and connector DM36111AA (WDM 31-41-37) (SSM 31-41-05):

|                  |                  |
|------------------|------------------|
| <b>J250-B</b>    | <b>DM36111AA</b> |
| pin D4 . . . . . | pin D7           |
  - (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the left air supply and cabin pressure controller, M36111. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.
    - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
    - 1) Re-install the left air supply and cabin pressure controller, M36111. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the right air supply and cabin pressure controller, M36112. To remove it, do this task: ASCPC Removal, AMM TASK 36-11-20-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J250 in the left AIMS cabinet and connector DM36112AA (WDM 31-41-37) (SSM 31-41-05):

|                  |                  |
|------------------|------------------|
| <b>J250-B</b>    | <b>DM36112AA</b> |
| pin D4 . . . . . | pin C7           |
  - (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the right air supply and cabin pressure controller, M36112. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.
    - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 871. Right AIMS IOM(M004) Discrete Output 10 Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-55292.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J240 and J250 in the right AIMS cabinet (SSM 31-41-08):

|                  |               |
|------------------|---------------|
| <b>J240-B</b>    | <b>J250-B</b> |
| pin D4 . . . . . | pin D4        |
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
  - (a) Remove the left air supply and cabin pressure controller, M36111. To remove it, do this task: ASCPC Removal, AMM TASK 36-11-20-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J250 in the right AIMS cabinet and connector DM36111AA (WDM 31-41-37) (SSM 31-41-08):

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do these checks of the wiring:
- (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Remove the left weather radar transceiver, M34116. To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
- (d) Do a wiring check between these pins of the IOM connectors J410 and J420 in the left AIMS cabinet (SSM 31-41-04):

**J410-B**

**J420-B**

pin C1 . . . . . pin C1

- (e) Do a wiring check between these pins of the IOM connector J410 in the left AIMS cabinet and connector DM34116AB (WDM 31-61-43) (SSM 31-41-04):

**J410-B**

**DM34116AB**

pin C1 . . . . . pin G14

- (f) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the left weather radar transceiver, M34116. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
  - 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 5) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J410 and J420 in the left AIMS cabinet (SSM 31-41-04):

|                  |               |
|------------------|---------------|
| <b>J410-B</b>    | <b>J420-B</b> |
| pin E3 . . . . . | pin E3        |
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
  - (a) Remove the left air supply and cabin pressure controller, M36111. To remove it, do this task: ASCPC Removal, AMM TASK 36-11-20-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J410 in the left AIMS cabinet and connector DM36111AA (WDM 31-41-37) (SSM 31-41-04):

|                  |                  |
|------------------|------------------|
| <b>J410-B</b>    | <b>DM36111AA</b> |
| pin E3 . . . . . | pin C7           |
- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the left air supply and cabin pressure controller, M36111. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.
  - 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.

Page 281  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- 1) Re-install the left air supply and cabin pressure controller, M36111. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the right air supply and cabin pressure controller, M36111. To remove it, do this task: ASCPC Removal, AMM TASK 36-11-20-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J410 in the left AIMS cabinet and connector DM36112AA (WDM 31-41-37) (SSM 31-41-04):

| J410-B | DM36112AA |
|--------|-----------|
| pin E3 | pin D7    |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the right air supply and cabin pressure controller, M36112. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.
  - 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

## 878. Right AIMS IOM(M008) Discrete Output 14 Fault - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-57332.

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.

### 882. Left AIMS IOM(M009) Discrete Output 14 Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-59331.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J410 and J420 in the left AIMS cabinet (SSM 31-41-04):

  - 1) Repair the wiring.

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Re-install the right air supply and cabin pressure controller, M36112. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.
- 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 883. **Right AIMS IOM(M009) Discrete Output 14 Fault - Fault Isolation**

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-59332.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M009) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J410 and J420 in the right AIMS cabinet (SSM 31-41-07):

**J410-B**

pin E3 . . . . .

**J420-B**

pin E3

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

**777-200/300**  
**FAULT ISOLATION MANUAL**

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
  - (a) Remove the left air supply and cabin pressure controller, M36111. To remove it, do this task: ASCPC Removal, AMM TASK 36-11-20-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J420 in the right AIMS cabinet and connector DM36111AA (WDM 31-41-37) (SSM 31-41-07):

| <b>J420-B</b>    | <b>DM36111AA</b> |
|------------------|------------------|
| pin E3 . . . . . | pin C7           |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the left air supply and cabin pressure controller, M36111. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.
    - 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
    - 1) Re-install the left air supply and cabin pressure controller, M36111. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the right air supply and cabin pressure controller, M36112
  - (b) Do a wiring check between these pins of the IOM connector J420 in the right AIMS cabinet and connector DM36112AA (WDM 31-41-37) (SSM 31-41-07):

| <b>J420-B</b>    | <b>DM36112AA</b> |
|------------------|------------------|
| pin E3 . . . . . | pin D7           |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the right air supply and cabin pressure controller, M36112. To install it, do this task: ASCPC Installation, AMM TASK 36-11-20-400-801.
    - 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 891. Data Conversion Gateway #1 in Right AIMS has a Hardware Problem - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-61032.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the CPM/GG(M010) in the right AIMS cabinet.  
These are the tasks:  
Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,  
Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the CPM/GG(M011) in the right AIMS cabinet.  
These are the tasks:  
Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,  
Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the IOM(M009) in the right AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 906. Right AIMS CPM/Comm(M001) Internal S/W Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-51134.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

- (1) Make these selections on the MAT to make sure the left central maintenance computing function (CMCF) is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.

NOTE: You must reset the CPM/Comm from the off-side CMCF.

- (a) If the display shows that the right CMCF is in control, select SWITCH TO LEFT.
  - (b) If the display shows that the left CMCF is in control, then select GO BACK.
- (2) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
- (3) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 910. Right AIMS IOM(M003) Discrete Output 16 Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-53352.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 911. Left AIMS IOM(M004) Discrete Output 16 Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-55351.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the IOM(M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do these checks of the wiring:
  - (a) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the center VHF communication transceiver. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - (c) Do a wiring check between these pins of the IOM connector J250 in the left AIMS cabinet and connector DM23303AB (WDM 23-27-23):

#### J250-B

pin E5 . . . . . pin A2  
pin E5 . . . . . pin B14

#### DM23303AB

- (d) If you find a problem with the wiring, then do these steps:
      - 1) Repair the wiring.
      - 2) Re-install the center VHF communication transceiver. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
      - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
      - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 912. Left AIMS IOM(M008) Discrete Output 04 Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-57231.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do these checks of the wiring:
  - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the flight compartment printer. To remove it, do this task: Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801.
  - (c) Do a wiring check between these pins of the IOM connector J410 in the left AIMS cabinet and connector DM31004A: (WDM 31-33-11)

|                  |                 |
|------------------|-----------------|
| <b>J410-B</b>    | <b>DM31004A</b> |
| pin C4 . . . . . | pin J-          |
  - (d) Do a wiring check between these pins of connector DM34421 and connector DM34510AA (WDM 34-58-21).

|                  |                |
|------------------|----------------|
| <b>DM34421</b>   | <b>DM34421</b> |
| pin A1 . . . . . | pin 2          |
| pin C1 . . . . . | pin C2         |
  - (e) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the flight compartment printer. To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.
    - 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 913. Right AIMS IOM(M008) Discrete Output 04 Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-57232.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M008) in the right AIMS cabinet.

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 914. **IOM(M003) in AIMS-L No Input from LRU on 429 Bus - Fault Isolation**

#### **A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-52201, 31-52221, 31-52231, 31-52241, 31-52261, 31-52271, 31-52301, 31-52311, 31-52331, 31-52341, 31-52351, 31-52361, 31-52371, 31-52381, 31-52391, 31-52401, 31-52411, 31-52421, 31-52431, 31-52441, 31-52451, 31-52461.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) in the left AIMS cabinet.
- These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring (SSM 31-41-03):
- (a) In the list below, find the source LRU, connector numbers, and pin numbers for the applicable maintenance message.

| MAINT MESSAGE | SOURCE LRU        | WDM REFERENCE | AIMS IOM CONNECTOR | SOURCE LRU CONNECTOR |
|---------------|-------------------|---------------|--------------------|----------------------|
| 31-52201      | L-Clock<br>N31002 | 31-25-11      | P3-A               | DN31002              |

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (c) Remove the applicable source LRU:
- 1) RTP-R (Radio Tuning Panel-R). To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
  - 2) ATC XPDR-L (ATC/Mode S Transponder). To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - 3) ATC XPDR-L (ATC/Mode S Transponder). To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - 4) DU-R INBD (Display Unit-Right Inboard). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 5) VHF XCVR-R (VHF Communication Transceiver-R). To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - 6) MCP-B (Mode Control Panel). To remove it, do this task: Mode Control Panel Removal, AMM TASK 22-11-02-000-801.
  - 7) DME-R (Distance Measuring Equipment-R). To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
  - 8) MMR-R (Multi-Mode Receiver-R). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 9) ADF-R (Automatic Direction Finder-R). To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - 10) RA-C (Radio Altimeter-C). To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - 11) RA-L (Radio Altimeter-L). To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - 12) A/T S-R (Autothrottle Servo Motor-R). To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - 13) GPWC (Ground Proximity Warning Computer). To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
  - 14) DU-C UPR (Display Unit-Center Upper). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 15) DU-L INBD (Display Unit-Left Inboard). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 16) VOR-R (VHF Omnidirectional Range-R). To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
  - 17) MMR-L (Multi-Mode Receiver-L). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 18) CCD-L (Cursor Control Device-L). To remove it, do this task: Cursor Control Device Removal, AMM TASK 31-61-07-000-801.
- (d) Do a wiring check between the specified pins of the applicable connectors.
- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the applicable source LRU:
    - a) RTP-R (Radio Tuning Panel-R). To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- b) ATC XPDR-L (ATC/Mode S Transponder). To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
  - c) ATC XPDR-L (ATC/Mode S Transponder). To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
  - d) DU-R INBD (Display Unit-Right Inboard). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - e) VHF XCVR-R (VHF Communication Transceiver-R). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - f) MCP-B (Mode Control Panel). To install it, do this task: Mode Control Panel Installation, AMM TASK 22-11-02-400-801.
  - g) DME-R (Distance Measuring Equipment-R). To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801.
  - h) MMR-R (Multi-Mode Receiver-R). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - i) ADF-R (Automatic Direction Finder-R). To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
  - j) RA-C (Radio Altimeter-C). To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - k) RA-L (Radio Altimeter-L). To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - l) A/T S-R (Autothrottle Servo Motor-R). To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
  - m) GPWC (Ground Proximity Warning Computer). To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
  - n) DU-C UPR (Display Unit-Center Upper). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - o) DU-L INBD (Display Unit-Left Inboard). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - p) VOR-R (VHF Omnidirectional Range-R). To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
  - q) MMR-L (Multi-Mode Receiver-L). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - r) CCD-L (Cursor Control Device-L). To install it, do this task: Cursor Control Device Installation, AMM TASK 31-61-07-400-801.
- 3) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### 915. IOM(MOO3) in AIMS-R No Input from LRU on 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-52202, 31-52222, 31-52232, 31-52262, 31-52272, 31-52292, 31-52302, 31-52312, 31-52332, 31-52342, 31-52352, 31-52362, 31-52372, 31-52382, 31-52392, 31-52402, 31-52412, 31-52422, 31-52432, 31-52442, 31-52462.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring (SSM 31-41-06):
  - (a) In the list below, find the source LRU, connector numbers, and pin numbers for the applicable maintenance message.

| MAINT MESSAGE | SOURCE LRU           | WDM REFERENCE | AIMS IOM CONNECTOR | SOURCE LRU CONNECTOR |
|---------------|----------------------|---------------|--------------------|----------------------|
| 31-52202      | R-Clock<br>N31003    | 31-25-21      | P3-A               | DN31003              |
|               |                      |               | pin A4             | pin 24               |
|               |                      |               | pin A5             | pin 23               |

## 777-200/300 FAULT ISOLATION MANUAL

- 9) CCD-R (Cursor Control Device-R). To remove it, do this task: Cursor Control Device Removal, AMM TASK 31-61-07-000-801.
  - 10) RA-L (Radio Altimeter-L). To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - 11) ADF-R (Automatic Direction Finder-R). To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - 12) DME-R (Distance Measuring Equipment-R). To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
  - 13) MMR-R (Multi-Mode Receiver-R). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 14) MCP-B (Mode Control Panel). To remove it, do this task: Mode Control Panel Removal, AMM TASK 22-11-02-000-801.
  - 15) GPWC (Ground Proximity Warning Computer). To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
  - 16) DU-C UPR (Display Unit-Center Upper). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 17) DU-R INBD (Display Unit-Right Inboard). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 18) MMR-R (Multi-Mode Receiver-R). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 19) VOR-R (VHF Omnidirectional Range-R). To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
- (d) Do a wiring check between the specified pins of the applicable connectors.
- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the applicable source LRU:
    - a) RTP-L (Radio Tuning Panel-L). To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
    - b) ATC XPDR-R (ATC/Mode S Transponder). To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
    - c) ATC XPDR-R (ATC/Mode S Transponder). To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
    - d) VHF XCVR-R (VHF Communication Transceiver-R). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - e) DU-L INBD (Display Unit-Left Inboard). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
    - f) VHF XCVR-R (VHF Communication Transceiver-R). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - g) RA-C (Radio Altimeter-C). To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
    - h) ASM-R (Autothrottle Servo Motor-R). To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.

## 777-200/300 FAULT ISOLATION MANUAL

- i) CCD-R (Cursor Control Device-R). To install it, do this task: Cursor Control Device Installation, AMM TASK 31-61-07-400-801.
  - j) RA-L (Radio Altimeter-L). To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - k) ADF-R (Automatic Direction Finder-R). To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
  - l) DME-R (Distance Measuring Equipment-R). To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801.
  - m) MMR-R (Multi-Mode Receiver-R). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - n) MCP2-B (Mode Control Panel). To install it, do this task: Mode Control Panel Installation, AMM TASK 22-11-02-400-801.
  - o) GPWC (Ground Proximity Warning Computer). To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
  - p) DU-C UPR (Display Unit-Center Upper). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - q) DU-R INBD (Display Unit-Right Inboard). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - r) MMR-R (Multi-Mode Receiver-R). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - s) VOR-R (VHF Omnidirectional Range-R). To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
- 3) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 916. IOM(M004) in AIMS-L No Input from LRU on 429 Bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-54201, 31-54211, 31-54221, 31-54231, 31-54241, 31-54271, 31-54281, 31-54291, 31-54311, 31-54321, 31-54331, 31-54341, 31-54351, 31-54361, 31-54371, 31-54381, 31-54391, 31-54401, 31-54411, 31-54421, 31-54431, 31-54441, 31-54451, 31-54461.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring (SSM 31-41-03):
- (a) In the list below, find the source LRU, connector numbers, and pin numbers for the applicable maintenance message.

| MAINT MESSAGE | SOURCE LRU           | WDM REFERENCE | AIMS IOM CONNECTOR | SOURCE LRU CONNECTOR |
|---------------|----------------------|---------------|--------------------|----------------------|
| 31-54201      | ATC XPDR-R<br>M34207 | 34-53-22      | P4-A               | DM34207AB            |

- (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
- (c) Remove the applicable source LRU:
  - 1) ATC XPDR-R (ATC/Mode S Transponder-R). To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - 2) ATC XPDR-R (ATC/Mode S Transponder-R). To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - 3) HF XCVR-R (HF Communication Transceiver-R). To remove it, do this task: HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801.
  - 4) RTP-L (Radio Tuning Panel-L). To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
  - 5) WHCU-R (Window Heat Control Unit). To remove it, do this task: Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801.
  - 6) EFIS CP-R (EFIS Control Panel-R). To remove it, do this task: EFIS Control Panel Removal, AMM TASK 31-61-02-000-801.
  - 7) WXR XCVR-R (Weather Radar Transceiver-R). To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
  - 8) VHF XCVR-R (VHF Communication Transceiver-R). To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 9) TCAS (Traffic Alert and Collision Avoidance System). To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - 10) ATC XPDR-R (ATC/Mode S Transponder-R). To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - 11) MCP-B (Mode Control Panel). To remove it, do this task: Mode Control Panel Removal, AMM TASK 22-11-02-000-801.
  - 12) DME-R (Distance Measuring Equipment-R). To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
  - 13) MMR-R (Multi-Mode Receiver-R). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 14) ADF-R (Automatic Direction Finder-R). To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - 15) RA-C (Radio Altimeter-C). To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - 16) RA-L (Radio Altimeter-L). To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - 17) ASM-R (Autothrottle Servo Motor-R). To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - 18) GPWC (Ground Proximity Warning Computer). To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
  - 19) DU-C UPR (Display Unit-Center Upper). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 20) DU-L INBD (Display Unit-Left Inboard). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 21) VOR-R (VHF Omnidirectional Range-R). To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
  - 22) MMR-L (Multi-Mode Receiver-L). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 23) CCD-L (Cursor Control Device-L). To remove it, do this task: Cursor Control Device Removal, AMM TASK 31-61-07-000-801.
- (d) Do a wiring check between the specified pins of the applicable connectors.
- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the applicable source LRU:
    - a) ATC XPDR-R (ATC/Mode S Transponder-R). To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
    - b) ATC XPDR-R (ATC/Mode S Transponder-R). To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
    - c) HF XCVR-R (HF Communication Transceiver-R). To install it, do this task: HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801.
    - d) RTP-L (Radio Tuning Panel-L). To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
    - e) WHCU-R (Window Heat Control Unit). To install it, do this task: Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801.

- f) EFIS CP-R (EFIS Control Panel-R). To install it, do this task: EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.
  - g) WXR XCVR-R (Weather Radar Transceiver-R). To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
  - h) VHF XCVR-R (VHF Communication Transceiver-R). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - i) TCAS (Traffic Alert and Collision Avoidance System). To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801.
  - j) ATC XPDR-R (ATC/Mode S Transponder-R). To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
  - k) MCP-B (Mode Control Panel). To install it, do this task: Mode Control Panel Installation, AMM TASK 22-11-02-400-801.
  - l) DME-R (Distance Measuring Equipment-R). To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801.
  - m) MMR-R (Multi-Mode Receiver-R). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - n) ADF-R (Automatic Direction Finder-R). To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
  - o) RA-C (Radio Altimeter-C). To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - p) RA-L (Radio Altimeter-L). To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - q) ASM-R (Autothrottle Servo Motor-R). To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
  - r) GPWC (Ground Proximity Warning Computer). To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
  - s) DU-C UPR (Display Unit-Center Upper). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - t) DU-L INBD (Display Unit-Left Inboard). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - u) VOR-R (VHF Omnidirectional Range-R). To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
  - v) MMR-L (Multi-Mode Receiver-L). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - w) CCD-L (Cursor Control Device-L). To install it, do this task: Cursor Control Device Installation, AMM TASK 31-61-07-400-801.
- 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 917. IOM(MOO4) in AIMS-R No Input from LRU on 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-54202, 31-54222, 31-54232, 31-54242, 31-54252, 31-54262, 31-54272, 31-54282, 31-54292, 31-54332, 31-54342, 31-54352, 31-54362, 31-54372, 31-54382, 31-54392, 31-54402, 31-54412, 31-54422, 31-54432, 31-54442, 31-54462.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring (SSM 31-41-06):
  - (a) In the list below, find the source LRU, connector numbers, and pin numbers for the applicable maintenance message.

| MAINT MESSAGE | SOURCE LRU           | WDM REFERENCE | AIMS IOM CONNECTOR | SOURCE LRU CONNECTOR |
|---------------|----------------------|---------------|--------------------|----------------------|
| 31-54202      | ATC XPDR-R<br>M34207 | 34-53-22      | P4-A               | DM34207AB            |
|               |                      |               | pin A4             | pin C6               |
|               |                      |               | pin A5             | pin D6               |
| 31-54222      | HF XCVR-R<br>M23201  | 23-11-21      | P4-A               | DM23201AB            |
|               |                      |               | pin A8             | pin C4               |
|               |                      |               | pin A9             | pin D4               |
| 31-54232      | RTP-R<br>M23006      | 23-12-21      | P4-A               | DM23006              |

- (b) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
- (c) Remove the applicable source LRU:
- 1) ATC XPDR-R (ATC/Mode S Transponder-R). To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - 2) HF XCVR-R (HF Communication Transceiver-R). To remove it, do this task: HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801.
  - 3) RTP-R (Radio Tuning Panel-R). To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
  - 4) WHCU-R (Window Heat Control Unit). To remove it, do this task: Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801.

**777-200/300**  
**FAULT ISOLATION MANUAL**

- 5) VHF XCVR-R (VHF Communication Transceiver-R). To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - 6) EFIS CP-L (EFIS Control Panel-L). To remove it, do this task: EFIS Control Panel Removal, AMM TASK 31-61-02-000-801.
  - 7) TCAS (Traffic Alert and Collision Avoidance System). To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - 8) WXR XCVR-R (Weather Radar Transceiver-R). To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
  - 9) RA-C (Radio Altimeter-C). To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - 10) ASM-R (Autothrottle Servo Motor-R). To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - 11) CCD-R (Cursor Control Device-R). To remove it, do this task: Cursor Control Device Removal, AMM TASK 31-61-07-000-801.
  - 12) RA-L (Radio Altimeter-L). To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - 13) ADF-R (Automatic Direction Finder-R). To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - 14) DME-R (Distance Measuring Equipment-R). To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
  - 15) MMR-R (Multi-Mode Receiver-R). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 16) MCP-B (Mode Control Panel). To remove it, do this task: Mode Control Panel Removal, AMM TASK 22-11-02-000-801.
  - 17) GPWC (Ground Proximity Warning Computer). To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
  - 18) DU-C UPR (Display Unit-Center Upper). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 19) DU-R INBD (Display Unit-Right Inboard). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 20) MMR-R (Multi-Mode Receiver-R). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 21) VOR-R (VHF Omnidirectional Range-R). To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
- (d) Do a wiring check between the specified pins of the applicable connectors.
- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the applicable source LRU:
    - a) ATC XPDR-R (ATC/Mode S Transponder-R). To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
    - b) HF XCVR-R (HF Communication Transceiver-R). To install it, do this task: HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801.
    - c) RTP-R (Radio Tuning Panel-R). To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- d) WHCU-R (Window Heat Control Unit). To install it, do this task: Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801.
  - e) VHF XCVR-R (VHF Communication Transceiver-R). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - f) EFIS CP-L (EFIS Control Panel-L). To install it, do this task: EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.
  - g) TCAS (Traffic Alert and Collision Avoidance System). To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801.
  - h) WXR XCVR-R (Weather Radar Transceiver-R). To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
  - i) RA-C (Radio Altimeter-C). To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - j) ASM-R (Autothrottle Servo Motor-R). To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
  - k) CCD-R (Cursor Control Device-R). To install it, do this task: Cursor Control Device Installation, AMM TASK 31-61-07-400-801.
  - l) RA-L (Radio Altimeter-L). To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - m) ADF-R (Automatic Direction Finder-R). To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
  - n) DME-R (Distance Measuring Equipment-R). To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801.
  - o) MMR-R (Multi-Mode Receiver-R). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - p) MCP-B (Mode Control Panel). To install it, do this task: Mode Control Panel Installation, AMM TASK 22-11-02-400-801.
  - q) GPWC (Ground Proximity Warning Computer). To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
  - r) DU-C UPR (Display Unit-Center Upper). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - s) DU-R INBD (Display Unit-Right Inboard). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - t) MMR-R (Multi-Mode Receiver-R). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - u) VOR-R (VHF Omnidirectional Range-R). To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
- 3) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 918. IOM in AIMS has a 429 Bus Fault on an Unused Input - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-52211, 31-52212, 31-52242, 31-52251, 31-52252, 31-52281, 31-52282, 31-52291, 31-52321, 31-52322, 31-52452, 31-54212, 31-54251, 31-54261, 31-54301, 31-54302, 31-54312, 31-54322, 31-54452, 31-56212, 31-56221, 31-56222, 31-56262, 31-56292, 31-56301, 31-56311, 31-56322, 31-56382, 31-56441, 31-56451, 31-58231, 31-58271, 31-58292, 31-58321, 31-58382, 31-58441, 31-58451.

#### B. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the applicable IOM.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 919. IOM(M008) in AIMS-L No Input from LRU on 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-56201, 31-56211, 31-56231, 31-56241, 31-56251, 31-56261, 31-56271, 31-56281, 31-56291, 31-56321, 31-56331, 31-56341, 31-56351, 31-56361, 31-56371, 31-56381, 31-56391, 31-56401, 31-56411, 31-56421, 31-56431, 31-56461.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
- (c) Remove the applicable source LRU:
- 1) RTP-C (Radio Tuning Panel-C). To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
  - 2) TCAS (Traffic Alert and Collision Avoidance System). To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - 3) MMR-R (Multi-Mode Receiver-R). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 4) VHF XCVR-C (VHF Communication Transceiver-C). To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - 5) DU-R OUTBD (Display Unit-Right Outboard). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 6) VHF XCVR-C (VHF Communication Transceiver-C). To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - 7) RA-R (Radio Altimeter-R). To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - 8) MMR-L (Multi-Mode Receiver-L). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 9) DU-L OUTBD (Display Unit-Left Outboard). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 10) ASM-L (Autothrottle Servo Motor-L). To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - 11) ADF-L (Automatic Direction Finder-L). To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - 12) DME-L (Distance Measuring Equipment-L). To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
  - 13) TCAS (Traffic Alert and Collision Avoidance System). To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - 14) MCP-A (Mode Control Panel). To remove it, do this task: Mode Control Panel Removal, AMM TASK 22-11-02-000-801.
  - 15) MMR-C (Multi-Mode Receiver-C). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 16) DU-C LWR (Display Unit-Center Lower). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 17) EFIS CP-L (EFIS Control Panel-L). To remove it, do this task: EFIS Control Panel Removal, AMM TASK 31-61-02-000-801.

- 18) VOR-L (VHF Omnidirectional Range-L). To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
- (d) Do a wiring check between the specified pins of the applicable connectors.
- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the applicable source LRU:
    - a) RTP-C (Radio Tuning Panel-C). To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
    - b) TCAS (Traffic Alert and Collision Avoidance System). To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801.
    - c) MMR-R (Multi-Mode Receiver-R). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
    - d) VHF XCVR-C (VHF Communication Transceiver-C). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - e) DU-R OUTBD (Display Unit-Right Outboard). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
    - f) VHF XCVR-C (VHF Communication Transceiver-C). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - g) RA-R (Radio Altimeter-R). To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
    - h) MMR-L (Multi-Mode Receiver-L). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
    - i) DU-L OUTBD (Display Unit-Left Outboard). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
    - j) ASM-L (Autothrottle Servo Motor-L). To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
    - k) ADF-L (Automatic Direction Finder-L). To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
    - l) DME-L (Distance Measuring Equipment-L). To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801.
    - m) TCAS (Traffic Alert and Collision Avoidance System). To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801.
    - n) MCP-A (Mode Control Panel). To install it, do this task: Mode Control Panel Installation, AMM TASK 22-11-02-400-801.
    - o) MMR-C (Multi-Mode Receiver-C). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
    - p) DU-C LWR (Display Unit-Center Lower). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
    - q) EFIS CP-L (EFIS Control Panel-L). To install it, do this task: EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.
    - r) VOR-L (VHF Omnidirectional Range-L). To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.

Page 298.21  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 920. IOM(M008) in AIMS-R No Input from LRU on 429 Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-56202, 31-56232, 31-56242, 31-56252, 31-56272, 31-56282, 31-56302, 31-56312, 31-56332, 31-56342, 31-56352, 31-56362, 31-56372, 31-56392, 31-56402, 31-56412, 31-56422, 31-56432, 31-56442, 31-56452, 31-56462.

##### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring (SSM 31-41-06):
  - (a) In the list below, find the source LRU, connector numbers, and pin numbers for the applicable maintenance message.

| MAINT MESSAGE | SOURCE LRU      | WDM REFERENCE | AIMS IOM CONNECTOR | SOURCE LRU CONNECTOR |
|---------------|-----------------|---------------|--------------------|----------------------|
| 31-56202      | RTP-C<br>M23007 | 23-12-31      | P8-A               | DM23007              |
|               |                 |               | pin A4<br>pin A5   | pin 2<br>pin 3       |
|               |                 |               | pin A4<br>pin A5   | pin 2<br>pin 3       |

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- 4) VHF XCVR-C (VHF Communication Transceiver-C). To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - 5) VHF XCVR-C (VHF Communication Transceiver-C). To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - 6) ADF-L (Automatic Direction Finder-L). To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - 7) ASM-L (Autothrottle Servo Motor-L). To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - 8) MMR-L (Multi-Mode Receiver-L). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 9) DME-L (Distance Measuring Equipment-L). To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
  - 10) MMR-C (Multi-Mode Receiver-C). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 11) TCAS (Traffic Alert and Collision Avoidance System). To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - 12) MCP-A (Mode Control Panel). To remove it, do this task: Mode Control Panel Removal, AMM TASK 22-11-02-000-801.
  - 13) VOR-L (VHF Omnidirectional Range-L). To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
  - 14) DU-R OUTBD (Display Unit-Right Outboard). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 15) EFIS CP-R (EFIS Control Panel-R). To remove it, do this task: EFIS Control Panel Removal, AMM TASK 31-61-02-000-801.
  - 16) RA-R (Radio Altimeter-R). To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - 17) DU-C LWR (Display Unit-Center Lower). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 18) SDU-L (Satellite Data Unit-L). To remove it, do this task: Satellite Data Unit Removal, AMM TASK 23-15-10-000-801.
- (d) Do a wiring check between the specified pins of the applicable connectors.
- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the applicable source LRU:
    - a) RTP-C (Radio Tuning Panel-C). To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
    - b) VHF XCVR-C (VHF Communication Transceiver-C). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - c) DU-L OUTBD (Display Unit-Left Outboard). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
    - d) VHF XCVR-C (VHF Communication Transceiver-C). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - e) VHF XCVR-C (VHF Communication Transceiver-C). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.

  - n) DU-R OUTBD (Display Unit-Right Outboard). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - o) EFIS CP-R (EFIS Control Panel-R). To install it, do this task: EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.
  - p) RA-R (Radio Altimeter-R). To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - q) DU-C LWR (Display Unit-Center Lower). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - r) SDU-L (Satellite Data Unit-L). To install it, do this task: Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.
- 3) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 921. IOM(M009) in AIMS-L No Input from LRU on 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-58201, 31-58211, 31-58221, 31-58241, 31-58251, 31-58261, 31-58281, 31-58291, 31-58301, 31-58311, 31-58331, 31-58341, 31-58351, 31-58361, 31-58371, 31-58381, 31-58391, 31-58401, 31-58411, 31-58421, 31-58431, 31-58461.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring (SSM 31-41-03):
- (a) In the list below, find the source LRU, connector numbers, and pin numbers for the applicable maintenance message.

| MAINT MESSAGE | SOURCE LRU           | WDM REFERENCE | AIMS IOM CONNECTOR | SOURCE LRU CONNECTOR |

|               |                     |               | pin D15            | pin B4               |

- (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
- (c) Remove the applicable source LRU:
- 1) HF XCVR-L (HF Communication Transceiver-L). To remove it, do this task: HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801.
  - 2) CCD-R (Cursor Control Device-R). To remove it, do this task: Cursor Control Device Removal, AMM TASK 31-61-07-000-801.
  - 3) TCAS (Traffic Alert and Collision Avoidance System). To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - 4) WHCU-L (Window Heat Control Unit-L). To remove it, do this task: Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801.
  - 5) WXR XCVR-L (Weather Radar Transceiver-L). To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
  - 6) VHF XCVR-L (VHF Communication Transceiver-L). To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - 7) ATC XPDR-L (ATC/Mode S Transponder-L). To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - 8) VHF XCVR-L (VHF Communication Transceiver-L). To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - 9) FCP (Flight Compartment Printer). To remove it, do this task: Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801.
  - 10) RA-R (Radio Altimeter-R). To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 11) MMR-L (Multi-Mode Receiver-L). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 12) DU-L OUTBD (Display Unit-Left Outboard). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 13) ASM-L (Autothrottle Servo Motor-L). To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - 14) ADF-L (Automatic Direction Finder-L). To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - 15) DME-L (Distance Measuring Equipment-L). To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
  - 16) TCAS (Traffic Alert and Collision Avoidance System). To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - 17) MCP-A (Mode Control Panel). To remove it, do this task: Mode Control Panel Removal, AMM TASK 22-11-02-000-801.
  - 18) MMR-C (Multi-Mode Receiver-C). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 19) DU-C LWR (Display Unit-Center Lower). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 20) EFIS CP-L (EFIS Control Panel-L). To remove it, do this task: EFIS Control Panel Removal, AMM TASK 31-61-02-000-801.
  - 21) VOR-L (VHF Omnidirectional Range-L). To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
- (d) Do a wiring check between the specified pins of the applicable connectors.
- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the applicable source LRU:
    - a) HF XCVR-L (HF Communication Transceiver-L). To install it, do this task: HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801.
    - b) CCD-R (Cursor Control Device-R). To install it, do this task: Cursor Control Device Installation, AMM TASK 31-61-07-400-801.
    - c) TCAS (Traffic Alert and Collision Avoidance System). To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801.
    - d) WHCU-L (Window Heat Control Unit-L). To install it, do this task: Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801.
    - e) WXR XCVR-L (Weather Radar Transceiver-L). To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
    - f) VHF XCVR-L (VHF Communication Transceiver-L). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - g) ATC XPDR-L (ATC/Mode S Transponder-L). To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
    - h) VHF XCVR-L (VHF Communication Transceiver-L). To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - i) FCP (Flight Compartment Printer). To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- j) RA-R (Radio Altimeter-R). To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - k) MMR-L (Multi-Mode Receiver-L). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - l) DU-L OUTBD (Display Unit-Left Outboard). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - m) ASM-L (Autothrottle Servo Motor-L). To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
  - n) ADF-L (Automatic Direction Finder-L). To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
  - o) DME-L (Distance Measuring Equipment-L). To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801.
  - p) TCAS (Traffic Alert and Collision Avoidance System). To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801.
  - q) MCP-A (Mode Control Panel). To install it, do this task: Mode Control Panel Installation, AMM TASK 22-11-02-400-801.
  - r) MMR-C (Multi-Mode Receiver-C). To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - s) DU-C LWR (Display Unit-Center Lower). To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - t) EFIS CP-L (EFIS Control Panel-L). To install it, do this task: EFIS Control Panel Installation, AMM TASK 31-61-02-400-801.
  - u) VOR-L (VHF Omnidirectional Range-L). To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
- 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

## 922. IOM(M009) in AIMS-R No Input from LRU on 429 Bus - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-58202, 31-58212, 31-58222, 31-58232, 31-58242, 31-58252, 31-58262, 31-58272, 31-58282, 31-58302, 31-58312, 31-58322, 31-58332, 31-58342, 31-58352, 31-58362, 31-58372, 31-58392, 31-58402, 31-58412, 31-58422, 31-58432, 31-58442, 31-58452, 31-58462.

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M009) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring (SSM 31-41-06):
- (a) In the list below, find the source LRU, connector numbers, and pin numbers for the applicable maintenance message.

| MAIN MESSAGE | SOURCE LRU           | WDM REFERENCE | AIMS IOM CONNECTOR | SOURCE LRU CONNECTOR |
|--------------|----------------------|---------------|--------------------|----------------------|
| 31-58202     | HF XCVR-L<br>M23101  | 23-11-11      | P9-A               | DM23101AB            |
|              |                      |               | pin A4             | pin C4               |
|              |                      |               | pin A5             | pin D4               |

(b) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801

(c) Remove the applicable source LRU:

- 1) HF XCVR-L (HF Communication Transceiver-L). To remove it, do this task: HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801.
- 2) CCD-L (Cursor Control Device-L). To remove it, do this task: Cursor Control Device Removal, AMM TASK 31-61-07-000-801.
- 3) TCAS (Traffic Alert and Collision Avoidance System). To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
- 4) ATC XPDR-L (ATC/Mode S Transponder-L). To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
- 5) WHCU-L (Window Heat Control Unit-L). To remove it, do this task: Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801.
- 6) WXR XCVR-L (Weather Radar Transceiver-L). To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 7) VHF XCVR-L (VHF Communication Transceiver-L). To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - 8) MMR-L (Multi-Mode Receiver-L). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 9) FCP (Flight Compartment Printer). To remove it, do this task: Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801.
  - 10) ATC XPDR-L (ATC/Mode S Transponder-L). To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - 11) ATC XPDR-L (ATC/Mode S Transponder-L). To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - 12) ADF-L (Automatic Direction Finder-L). To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - 13) ASM-L (Autothrottle Servo Motor-L). To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - 14) MMR-L (Multi-Mode Receiver-L). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 15) DME-L (Distance Measuring Equipment-L). To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
  - 16) MMR-C (Multi-Mode Receiver-C). To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - 17) TCAS (Traffic Alert and Collision Avoidance System). To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - 18) MCP-A (Mode Control Panel). To remove it, do this task: Mode Control Panel Removal, AMM TASK 22-11-02-000-801.
  - 19) VOR-L (VHF Omnidirectional Range-L). To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
  - 20) DU-R OUTBD (Display Unit-Right Outboard). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 21) EFIS CP-R (EFIS Control Panel-R). To remove it, do this task: EFIS Control Panel Removal, AMM TASK 31-61-02-000-801.
  - 22) RA-R (Radio Altimeter-R). To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - 23) DU-C LWR (Display Unit-Center Lower). To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - 24) SDU-L (Satellite Data Unit-L). To remove it, do this task: Satellite Data Unit Removal, AMM TASK 23-15-10-000-801.
- (d) Do a wiring check between the specified pins of the applicable connectors.
- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the applicable source LRU:
    - a) HF XCVR-L (HF Communication Transceiver-L). To install it, do this task: HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801.
    - b) CCD-L (Cursor Control Device-L). To install it, do this task: Cursor Control Device Installation, AMM TASK 31-61-07-400-801.

### 31-41 TASK 922

D633W103-ARO

Page 298.37  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 923. IOM in AIMS has a Discrete Fault on an Unused Output - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-53201, 31-53202, 31-53212, 31-53221, 31-53222, 31-53231, 31-53232, 31-53261, 31-53262, 31-53271, 31-53272, 31-53301, 31-53302, 31-53311, 31-53341, 31-53342, 31-55201, 31-55202, 31-55212, 31-55221, 31-55222, 31-55231, 31-55232, 31-55261, 31-55262, 31-55271, 31-55272, 31-55301, 31-55302, 31-55311, 31-55312, 31-55341, 31-55342, 31-57211, 31-57212, 31-57222, 31-57241, 31-57242, 31-57262, 31-57281, 31-57282, 31-57301, 31-57302, 31-57312, 31-57341, 31-57342, 31-59211, 31-59212, 31-59221, 31-59222, 31-59232, 31-59241, 31-59242, 31-59261, 31-59262, 31-59281, 31-59282, 31-59301, 31-59302, 31-59312, 31-59341, 31-59342.

##### B. Fault Isolation Procedure

- (1) Do these steps to replace the applicable LRM:
  - (a) In the list below, find the AIMS LRM for the applicable maintenance message (xx is any number from 20 to 35).

| MAINT MESSAGE | AIMS LRM       |
|---------------|----------------|
| 31-53xx1      | L-AIMS<br>M003 |
| 31-53xx2      | R-AIMS<br>M003 |
| 31-55xx1      | L-AIMS<br>M004 |
| 31-55xx2      | R-AIMS<br>M004 |
| 31-57xx1      | L-AIMS<br>M008 |
| 31-57xx2      | R-AIMS<br>M008 |
| 31-59xx1      | L-AIMS<br>M009 |
| 31-59xx2      | R-AIMS<br>M009 |

- (b) Replace the applicable LRM.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 924. Left AIMS IOM(M008) Discrete Output 10 Fault - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-57291.

##### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Disconnect the connector DM22105 from the left autothrottle servo motor (WDM 22-31-11).
- (c) Do a wiring check between these pins of the IOM connector J410 in the left AIMS cabinet and connector DM22105 (WDM 22-31-11):

| J410-B | DM22105 |
|--------|---------|
| pin D4 | pin 2   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-connect DM22105 connector to the left autothrottle servo motor (WDM 22-31-11).
  - 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-connect DM22105 connector to the left autothrottle servo motor (WDM 22-31-11).

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (3) Do this check of the wiring:
- (a) Disconnect the connector DM22205 from the right autothrottle servo motor (WDM 22-31-12).
  - (b) Do a wiring check between these pins of the IOM connector J410 in the left AIMS cabinet and connector DM22205 (WDM 22-31-12):

| <b>J410-B</b>    | <b>DM22205</b> |
|------------------|----------------|
| pin D4 . . . . . | pin 2          |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-connect DM22205 connector to the right autothrottle servo motor (WDM 22-31-12).
  - 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 925. Right AIMS IOM(M008) Discrete Output 10 Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-57292.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect the connector DM22205 from the right autothrottle servo motor (WDM 22-31-12).
  - (c) Do a wiring check between these pins of the IOM connector J410 in the right AIMS cabinet and connector DM22205 (WDM 22-31-12):

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of the IOM connectors J410 and J420 in the left AIMS cabinet (SSM 31-41-04):

**J420-B (L-AIMS)**

pin E2 . . . . . pin E2

**J410-B (L-AIMS)**

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
- (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Do a wiring check between these pins of the IOM connector J410 in the right and left AIMS cabinet (WDM 31-61-43) (SSM 31-41-04) (SSM 31-41-07):

**J410-B (R-AIMS)**

pin E2 . . . . . pin E2

**J410-B (L-AIMS)**

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

| <b>J420-B (R-AIMS)</b> | <b>J410-B (L-AIMS)</b> |
| pin E2 . . . . .       | pin E2                 |
- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
    - 1) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (5) Do this check of the wiring:
    - (a) Remove the weather radar control panel, M34025. To remove it, do this task: WXR Control Panel Removal, AMM TASK 34-43-01-000-801.
    - (b) Do a wiring check between these pins of the IOM connector J410 in the left AIMS cabinet and connector DM34025 (WDM 31-61-43) (WDM 31-41-04):

|                  |                 |
|------------------|-----------------|
| <b>J410-B</b>    | <b>DM34025A</b> |
| pin E2 . . . . . | pin G           |

|                  |                 |
|------------------|-----------------|
| <b>J410-B</b>    | <b>DM34025B</b> |
| pin E2 . . . . . | pin G           |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the weather radar control panel. To install it, do this task: WXR Control Panel Installation, AMM TASK 34-43-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 927. Right AIMS IOM(M008) Discrete Output 13 Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-57322.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connector J420 and J410 in the right AIMS cabinet (SSM 31-41-07):

**J420-B (R-AIMS)**

**J410-B (R-AIMS)**

pin E2 . . . . . pin E2

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) If you did not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:

**31-41 TASK 927**

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the weather radar control panel. To install it, do this task: WXR Control Panel Installation, AMM TASK 34-43-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### ————— END OF TASK —————

#### 928. Left AIMS IOM(M008) Discrete Output 08 Fault - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-57271.

##### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do these checks of the wiring:
  - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the left VHF communication transceiver. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - (c) Do a wiring check between these pins of the IOM connector J410 in the left AIMS cabinet and connector DM23103AB (WDM 23-27-21):

#### J410-B

#### DM23103AB

pin D2 . . . . . pin B8

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the left VHF communication transceiver. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.

**FAULT ISOLATION MANUAL**

- 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**929. Right AIMS IOM(M008) Discrete Output 08 Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-57272.

**B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do these checks of the wiring:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the center VHF communication transceiver. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - (c) Do a wiring check between these pins of the IOM connector J410 in the right AIMS cabinet and connector DM23303AB (WDM 23-27-23):

**J410-B**

**DM23303AB**

pin D2 . . . . . pin B8

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the center VHF communication transceiver. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 3) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do these checks of the wiring:
  - (a) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J420 in the left AIMS cabinet and connector DM23106AB (WDM 23-27-51):

|                  |                  |
|------------------|------------------|
| <b>J420-B</b>    | <b>DM23106AB</b> |
| pin C4 . . . . . | pin A8           |
- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

## 932. Left AIMS IOM(M009) Discrete Output 08 Fault - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-59271.

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 949. Left AIMS IOM(M009) Discrete Output 10 Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-59291.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
    - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (c) Do a wiring check between these pins of the IOM connectors J410 and J420 in the left AIMS cabinet (SSM 31-41-04):

|               |               |
|---------------|---------------|
| <b>J410-B</b> | <b>J420-B</b> |
| pin D4        | pin D4        |
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
  - (f) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
- (a) Disconnect the connector DM22105 from the left autothrottle servo motor (WDM 22-31-11).
  - (b) Do a wiring check between these pins of the IOM connector J420 in the left AIMS cabinet and connector DM22105 (WDM 22-31-11) (SSM 31-41-04):

| <b>J420-B</b>    | <b>DM22105</b> |
|------------------|----------------|
| pin D4 . . . . . | pin 2          |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-connect DM22105 connector to the left autothrottle servo motor (WDM 22-31-11).
    - 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (d) If you do not find a problem with the wiring, then continue.
  - (e) Re-connect DM22105 connector to the left autothrottle servo motor (WDM 22-31-11).
- (4) Do this check of the wiring:
- (a) Disconnect the connector DM22205 from the right autothrottle servo motor (WDM 22-31-12).
  - (b) Do a wiring check between these pins of the IOM connector J420 in the left AIMS cabinet and connector DM22205 (WDM 22-31-12) (SSM 31-41-04):

| <b>J420-B</b>    | <b>DM22205</b> |
|------------------|----------------|

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M009) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

    - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - (b) If the MAT shows LATCHED for the maintenance message, then continue.
  - (2) Do this check of the wiring:
    - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (b) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (c) Do a wiring check between these pins of the IOM connectors J410 and J420 in the right AIMS cabinet (SSM 31-41-07):

|                  |               |
|------------------|---------------|
| <b>J410-B</b>    | <b>J420-B</b> |
| pin D4 . . . . . | pin D4        |
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
  - (f) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
    - (a) Disconnect the connector DM22105 from the left autothrottle servo motor (WDM 22-31-11).
    - (b) Do a wiring check between these pins of the IOM connector J420 in the right AIMS cabinet and connector DM22105 (WDM 22-31-11) (SSM 31-41-07):

## 777-200/300 FAULT ISOLATION MANUAL

- 1) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J240 in the right AIMS cabinet and P9 in the left AIMS cabinet (SSM 31-41-03) (SSM 31-41-08):

|                        |                        |
|------------------------|------------------------|
| <b>J240-B (R-AIMS)</b> | <b>J420-B (L-AIMS)</b> |
| pin E1 . . . . .       | pin E5                 |
  - (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
    - 1) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (5) Do these checks of the wiring:
  - (a) Remove the TCAS computer, M34006. To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J240 in the right AIMS cabinet and connector DM34006AE (WDM 31-61-45):

|                  |                  |
|------------------|------------------|
| <b>J240-B</b>    | <b>DM34006AE</b> |
| pin E1 . . . . . | pin C14          |

|                  |                  |
|------------------|------------------|
| <b>J240-B</b>    | <b>DM34006AE</b> |
| pin E1 . . . . . | pin E13          |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the TCAS computer, M34006. To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801.
  - 3) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

**777-200/300**  
**FAULT ISOLATION MANUAL**

**952. Left AIMS IOM(M003) Discrete Output 16 Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-53351.

**B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the IOM(M003) in the left AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of the IOM connectors J240 and J420 in the left AIMS cabinet (WDM 31-61-45) (SSM 31-41-04) (SSM 31-41-05):

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- 1) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
- (a) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J410 and J420 in the left AIMS cabinet (SSM 31-41-04):

**J410-B (L-AIMS)**

**J420-B (L-AIMS)**

pin E2 . . . . . pin E2

- (d) If you find a problem with the wiring, then do these steps:
      - 1) Repair the wiring.
      - 2) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
      - 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
      - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - (e) If you do not find a problem with the wiring, then continue.
      - 1) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (3) Do this check of the wiring:
    - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (b) Do a wiring check between these pins of the IOM connector J410 in the right AIMS cabinet and J420 in the left AIMS cabinet (WDM 31-61-43) (SSM 31-41-04) (SSM 31-41-07):

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (5) Do these checks of the wiring:
  - (a) Remove the TCAS computer, M34006. To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J420 in the left AIMS cabinet and connector DM34006AE (WDM 31-61-45):

**J420-B**

pin E5 . . . . .

**DM34006AE**

pin C14

**J420-B**

pin E5 . . . . .

**DM34006AE**

pin E13

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the TCAS computer, M34006. To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801.
  - 3) Re-install the IOM(M009) from the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

———— **END OF TASK** ————

**956. Right AIMS IOM(M009) Discrete Output 16 Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-59352.

**B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M009) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J240 and J420 in the right AIMS cabinet (SSM 31-41-08):

**J240-B (R-AIMS)**

**J420-B (R-AIMS)**

pin E1 . . . . . pin E5

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Do a wiring check between these pins of the IOM connector J240 in the left AIMS cabinet and J420 in the right AIMS cabinet (SSM 31-41-03) (SSM 31-41-08):

**J240-B (L-AIMS)**

**J420-B (R-AIMS)**

pin E5 . . . . . pin E5

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 959. Left AIMS IOM(M003) Discrete Output 13 Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-53321.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connector J240 and J250 in the left AIMS cabinet (SSM 31-41-05):

|                        |                        |
|------------------------|------------------------|
| <b>J240-B (L-AIMS)</b> | <b>J250-B (L-AIMS)</b> |
| pin E2 . . . . .       | pin E2                 |
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) If you did not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the captain's master caution/warning switch, L31101.
- (b) Remove the first officer's master caution/warning switch, L31201.
- (c) Do a wiring check between these pins of the IOM connector J240 in the right AIMS cabinet and connector DL31101 (WDM 22-31-31):

| <b>J240-B</b>    | <b>DL31101</b> |
|------------------|----------------|
| pin E2 . . . . . | pin 16         |

- (d) Do a wiring check between these pins of the IOM connector J240 in the left AIMS cabinet and connector DL31201 (WDM 22-31-31):

| <b>J240-B</b>    | <b>DL31201</b> |
|------------------|----------------|
| pin E2 . . . . . | pin 16         |

- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the captain's master caution/warning switch, L31101.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 961. Left AIMS IOM(M003) Discrete Output 14 Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-53331.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of the IOM connector J240 and J250 in the left AIMS cabinet (SSM 31-41-08):

|                        |                        |
|------------------------|------------------------|
| <b>J240-B (L-AIMS)</b> | <b>J250-B (L-AIMS)</b> |
| pin E3 . . . . .       | pin E3                 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) If you did not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Do a wiring check between these pins of the IOM connectors J240 in the left and right AIMS cabinet (SSM 31-41-03) (SSM 31-41-08):

|                        |                        |
|------------------------|------------------------|
| <b>J240-B (L-AIMS)</b> | <b>J240-B (R-AIMS)</b> |
| pin E3 . . . . .       | pin E3                 |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (d) If you did not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Do a wiring check between these pins of the IOM connectors J240 in the left AIMS cabinet and J250 in the right AIMS cabinet (SSM 31-41-03) (SSM 31-41-08):

|                        |                        |
|------------------------|------------------------|
| <b>J240-B (L-AIMS)</b> | <b>J250-B (R-AIMS)</b> |
| pin E3 . . . . .       | pin E3                 |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.

## 777-200/300 FAULT ISOLATION MANUAL

### J250-B (L-AIMS)

pin E2 . . . . . pin E2

### J250-B (R-AIMS)

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (d) If you did not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (5) Do this check of the wiring:
  - (a) Remove the captain's master caution/warning switch, L31101.
  - (b) Remove the first officer's master caution/warning switch, L31101.
  - (c) Do a wiring check between these pins of the IOM connector J250 in the left AIMS cabinet and connector DL31101 (WDM 22-31-31):

### J250-B

pin E2 . . . . . pin 16

### DL31101

- (d) Do a wiring check between these pins of the IOM connector J250 in the left AIMS cabinet and connector DL31201 (WDM 22-31-31):

### J250-B

pin E2 . . . . . pin 16

### DL31201

- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the captain's master caution/warning switch, L31101.
  - 4) Re-install the first officer's master caution/warning switch, L31101.
  - 5) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

## 964. Right AIMS IOM(M004) Discrete Output 13 Fault - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-55322.

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connector J240 and J250 in the right AIMS cabinet (SSM 31-41-08):

**J250-B (R-AIMS)**

**J240-B (R-AIMS)**

pin E2 . . . . . pin E2

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) If you did not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Do a wiring check between these pins of the IOM connectors J250 in the right AIMS cabinet and J240 in the left AIMS cabinet (SSM 31-41-03) (SSM 31-41-08):

**J250-B (R-AIMS)**

**J240-B (L-AIMS)**

pin E2 . . . . . pin E2

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (d) If you did not find a problem with the wiring, then continue.
- 1) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (4) Do this check of the wiring:
- (a) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Do a wiring check between these pins of the IOM connectors J250 in the left and right AIMS cabinet (SSM 31-41-03) (SSM 31-41-08):
- | <b>J250-B (R-AIMS)</b> | <b>J250-B (L-AIMS)</b> |
|------------------------|------------------------|
| pin E2 . . . . .       | pin E2                 |
- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (d) If you did not find a problem with the wiring, then continue.
- 1) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (5) Do this check of the wiring:
- (a) Remove the captain's master caution/warning switch, L31101.
  - (b) Remove the first officer's master caution/warning switch, L31101.
  - (c) Do a wiring check between these pins of the IOM connector J250 in the right AIMS cabinet and connector DL31101 (WDM 22-31-31):
- | <b>J250-B</b>    | <b>DL31101</b> |
|------------------|----------------|
| pin E2 . . . . . | pin 16         |
- (d) Do a wiring check between these pins of the IOM connector J250 in the right AIMS cabinet and connector DL31201 (WDM 22-31-31):
- | <b>J250-B</b>    | <b>DL31201</b> |
|------------------|----------------|
| pin E2 . . . . . | pin 16         |
- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the captain's master caution/warning switch, L31101.
  - 4) Re-install the first officer's master caution/warning switch, L31101.
  - 5) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

FAULT ISOLATION MANUAL

965. Left AIMS IOM(M004) Discrete Output 14 Fault - Fault Isolation

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-55331.

**B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the IOM(M004) in the left AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of the IOM connector J240 and J250 in the left AIMS cabinet (SSM 31-41-03):

**J250-B (L-AIMS)**

pin E3 . . . . .

**J240-B (L-AIMS)**

pin E3

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) If you did not find a problem with the wiring, then continue.
- 1) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:
- (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Do a wiring check between these pins of the IOM connectors J250 in the left AIMS cabinet and J240 in the right AIMS cabinet (SSM 31-41-03) (SSM 31-41-08):

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 966. Right AIMS IOM(M004) Discrete Output 14 Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-55332.

#### **B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connector J240 and J250 in the right AIMS cabinet (SSM 31-41-08):

**J250-B (R-AIMS)**

**J240-B (R-AIMS)**

pin E3 . . . . . pin E3

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) If you did not find a problem with the wiring, then continue.
  - 1) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (3) Do this check of the wiring:

**777-200/300**  
**FAULT ISOLATION MANUAL**

**976. Right AIMS IOM(M004) Discrete Output 16 Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-55352.

**B. Initial Evaluation**

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the IOM(M004) in the right AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**977. Left AIMS IOM(M003) Module Internal Output Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-52551, 31-52561, 31-52571.

**B. Fault Isolation Procedure**

- (1) Replace the IOM(M003) in the left AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (2) Do this test on the MAT: 31 AIMS - Left AIMS, Operational Test, IOM(M003) in Left AIMS ARINC 429 Relays.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**978. Right AIMS IOM(M003) Module Internal Output Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-52552, 31-52562, 31-52572.

**B. Fault Isolation Procedure**

- (1) Replace the IOM(M003) in the right AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Do this test on the MAT: 31 AIMS - Right AIMS, Operational Test, IOM(M003) in Right AIMS ARINC 429 Relays.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 979. Left AIMS IOM(M004) Module Internal Output Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-54551, 31-54561, 31-54571, 31-54581.

#### B. Fault Isolation Procedure

- (1) Replace the IOM(M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (2) Do this test on the MAT: 31 AIMS - Left AIMS, Operational Test, IOM(M004) in Left AIMS ARINC 429 Relays.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 980. Right AIMS IOM(M004) Module Internal Output Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-54552, 31-54562, 31-54572, 31-54582.

#### B. Fault Isolation Procedure

- (1) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (2) Do this test on the MAT: 31 AIMS - Right AIMS, Operational Test, IOM(M004) in Right AIMS ARINC 429 Relays.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 981. Left AIMS IOM(M008) Module Internal Output Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-56551, 31-56561, 31-56571.

#### B. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

EFFECTIVITY

**983. Left AIMS IOM(M009) Module Internal Output Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-58551, 31-58561, 31-58571.

**B. Fault Isolation Procedure**

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (2) Do this test on the MAT: 31 AIMS - Left AIMS, Operational Test, IOM(M009) in Left AIMS ARINC 429 Relays.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**984. Right AIMS IOM(M009) Module Internal Output Problems - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-58552, 31-58562, 31-58572.

**B. Fault Isolation Procedure**

- (1) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Do this test on the MAT: 31 AIMS - Right AIMS, Operational Test, IOM(M009) in Right AIMS ARINC 429 Relays.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 985. MMR-L to Left AIMS Time Mark #1 Input Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50119.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the left multi-mode receiver (MMR), M34410.

These are the tasks:

Receiver for ILS - Removal, AMM TASK 34-31-01-000-801,

Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the left GPS antenna.

These are the tasks:

GPS Antenna Removal, AMM TASK 34-58-02-000-801,

GPS Antenna Installation, AMM TASK 34-58-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring:
  - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Remove the left MMR, M34410. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - (d) Do a wiring check between these pins of IOM connector J410 and connector DM34410AB (WDM 34-58-11) (SSM 31-41-04):

| J410-B           | DM34410AB |
|------------------|-----------|
| pin E8 . . . . . | pin A2    |
| pin E9 . . . . . | pin B2    |

- (e) Do a wiring check between these pins of IOM connector J420 and connector DM34410AB (WDM 34-58-11) (SSM 31-41-04):

| J420-B           | DM34410AB |
|------------------|-----------|
| pin E8 . . . . . | pin A2    |
| pin E9 . . . . . | pin B2    |

- (f) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) Re-install the left MMR, M34410. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - 5) If the maintenance message does not show on the ground test display, you corrected the fault.

————— **END OF TASK** —————

### 986. MMR-L to Right AIMS Time Mark #2 Input Problems - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-50120.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then there was an intermittent fault.

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the left multi-mode receiver (MMR), M34410.

These are the tasks:

Receiver for ILS - Removal, AMM TASK 34-31-01-000-801,  
Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the left GPS antenna.

These are the tasks:

GPS Antenna Removal, AMM TASK 34-58-02-000-801,  
GPS Antenna Installation, AMM TASK 34-58-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring:

- (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Remove the left MMR, M34410. To remove it, do this task: Receiver for ILS - Removal,  
AMM TASK 34-31-01-000-801.
- (d) Do a wiring check between these pins of IOM connector J410 and connector  
DM34410AB (WDM 34-58-11) (SSM 31-41-07):

| <b>J410-B</b> |       | <b>DM34410AB</b> |

## 777-200/300 FAULT ISOLATION MANUAL

Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the left GPS antenna.

These are the tasks:

GPS Antenna Removal, AMM TASK 34-58-02-000-801,

GPS Antenna Installation, AMM TASK 34-58-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring:
- (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Remove the right MMR, M34510. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - (d) Do a wiring check between these pins of IOM connector J240 and connector DM34510AB (WDM 34-58-21) (SSM 31-41-04):

### J240-B

|        |       |        |
|--------|-------|--------|
| pin E8 | ..... | pin A2 |
| pin E9 | ..... | pin B2 |

### DM34510AB

- (e) Do a wiring check between these pins of IOM connector J250 and connector DM34510AB (WDM 34-58-21) (SSM 31-41-04):

### J250-B

|        |       |        |
|--------|-------|--------|
| pin E8 | ..... | pin A2 |
| pin E9 | ..... | pin B2 |

### DM34510AB

- (f) Do a wiring check between these pins of connector DM34421 and connector DM34510AA (WDM 34-58-21).

### DM34421

|        |       |        |
|--------|-------|--------|
| pin A1 | ..... | pin 2  |
| pin C1 | ..... | pin C2 |

### DM34510AA

- (g) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) Re-install the right MMR, M34510. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 5) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 988. MMR-R to Right AIMS Time Mark #2 Input Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50130.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the right multi-mode receiver (MMR), M34510.

These are the tasks:

Receiver for ILS - Removal, AMM TASK 34-31-01-000-801,

Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the left GPS antenna.

These are the tasks:

GPS Antenna Removal, AMM TASK 34-58-02-000-801,

GPS Antenna Installation, AMM TASK 34-58-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.

## 777-200/300 FAULT ISOLATION MANUAL

- (5) Do this check of the wiring:
- (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Remove the right MMR, M34510. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - (d) Do a wiring check between these pins of IOM connector J240 and connector DM34205A (WDM 34-58-21) (SSM 31-41-07):

**J240-B**

pin E8 ..... pin G2  
pin E9 ..... pin H2

**DM34510AB**

- (e) Do a wiring check between these pins of IOM connector J250 and connector DM34510AB (WDM 34-58-21) (SSM 31-41-07):

**J250-B**

pin E8 ..... pin G2  
pin E9 ..... pin H2

**DM34510AB**

- (f) Do a wiring check between these pins of connector DM34421 and connector DM34510AA (WDM 34-58-21).

**DM34421**

pin A1 ..... pin 2  
pin C1 ..... pin C2

**DM34510AA**

- (g) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) Re-install the right MMR, M34510. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - 5) If the maintenance message does not show on the ground test display, you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the Right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31209, in the P212 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the IOM(M003) to the Flt Ctrl 629 Bus-R.

- (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M003) to the coupler:
  - (a) Remove the IOM(M003) from the right AIMS cabinet, M31201. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31209 from the coupler, B31209.
  - (c) Do a wiring check between these pins of connector J240 at the right AIMS cabinet, M31201, in the E2-1 shelf and connector DB31209 at the P212 panel (WDM 31-41-26) (SSM 31-41-02):

| J240-A       | DB31209 |
|--------------|---------|
| pin G3 ..... | pin 5   |
| pin G4 ..... | pin 4   |
| pin G1 ..... | pin 2   |
| pin G2 ..... | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
    - 2) Re-connect connector DB31209.
    - 3) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

EFFECTIVITY  
ARO ALL

- 4) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 990. Left AIMS IOM(M008) to Flt Ctrl 629 Bus-L Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-56103.

#### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (2) Replace the ARINC 629 coupler, B31108, in the P112 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the IOM(M008) to the Flt Ctrl 629 Bus-L.

- (a) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (b) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (c) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from the IOM(M008) to the coupler:
  - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31108 from the coupler, B31108.
  - (c) Do a wiring check between these pins of connector J410 at the left AIMS cabinet, M31101, in the E3-1 shelf and connector DB31108 at the P112 panel (WDM 31-41-25) (SSM 31-41-02):

| pin G3 ..... | pin 5   |
| pin G4 ..... | pin 4   |
| pin G1 ..... | pin 2   |
| pin G2 ..... | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31108.
  - 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.

### — END OF TASK —

#### 991. Left AIMS IOM(M008) to intercabinet Bus (4) Problems - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-56113.

##### B. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message does not show on the ground test display, then you corrected the fault.
- (2) Replace the IOM(M003) in the right AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the maintenance message does not show on the ground test display, you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (3) Do this check of the wiring from IOM(M003) to IOM(M008):

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the IOM(M003) from the right AIMS cabinet and the IOM(M008) from the left AIMS cabinet. To remove them, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Do a wiring check between these pins of IOM(M003) connector J240-A in the right AIMS cabinet and IOM(M008) connector J410-A in the left AIMS cabinet (SSM 31-41-27)(WDM 31-41-27):

| J240-A (R-AIMS) | J410-A (L-AIMS) |
|-----------------|-----------------|
| pin G6          | pin G9          |
| pin G7          | pin G10         |
| pin G9          | pin G6          |
| pin G10         | pin G7          |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) in the right AIMS cabinet and the IOM(M008) in the left AIMS cabinet. To install them, do this step: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) If the maintenance message does not show on the ground test display, you corrected the fault.

————— END OF TASK —————

### 992. Left AIMS IOM(M009) Module has a Discrete/Analog input or output Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-58601, 31-59401.

#### B. Description

The Left AIMS IOM (M003) input/output problems can be caused by a faulty IOM or a faulty EOQ sensor.

#### C. Possible Causes

- (1) IOM (M009), M31101M009
- (2) Engine Oil Quantity sensor/transmitter, M79001

#### D. Circuit Breakers

- (1) These are the primary circuit breakers related to the fault:

#### Overhead Circuit Breaker Panel, P11

| Row | Col | Number | Name     |
|-----|-----|--------|----------|
| B   | 12  | C31609 | AIMS L-1 |
| B   | 13  | C31611 | AIMS L-2 |
| B   | 14  | C31617 | AIMS L-3 |
| B   | 15  | C31619 | AIMS L-4 |
| F   | 12  | C31610 | AIMS R-1 |
| F   | 13  | C31612 | AIMS R-2 |

## 777-200/300 FAULT ISOLATION MANUAL

### Standby Power Management Panel, P310

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| J          | 6          | C31651        | AIMS L      |
| J          | 7          | C31650        | AIMS R      |

#### E. Related Data

- (1) WDM 79-31-11
- (2) SSM 31-41-05
- (3) SSM 31-41-07

#### F. Initial Evaluation

- (1) If the MAT shows LATCHED for the maintenance message, then do the ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### G. Fault Isolation Procedure

- (1) Replace the IOM(M009), M31101M009, in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801

  - (a) Do the Repair Confirmation at the end of this task.
- (2) Do these steps to do an AIMS Cabinet Reset test for the AIMS cabinet:
  - (a) Use the MAT or PMAT to do the left AIMS Cabinet Reset Test. (Airplane Information Management System (AIMS) - Operational Test, AMM TASK 31-41-00-710-801)
  - (b) Check the existing fault in the Left AIMS. If there is no fault. Check the existing fault in the Right AIMS. If maintenance messages toggled, then the fault is in the Oil quantity sensor.
    - 1) Proceed to the next step to replace the oil quantity sensor.
- (3) Replace the Left oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.
- (4) Replace the Right oil quantity transmitter, M79001 (AMM PAGEBLOCK 79-31-01/401).
  - (a) Do the Repair Confirmation at the end of this task.

#### H. Repair Confirmation

- (1) Do the ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message, then you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue the Fault Isolation Procedure at the subsequent step.

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable ARINC 629 coupler.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 31-41-25) (WDM 31-41-26):
  - (a) Remove the applicable ARINC 629 coupler. To remove it, do this task: ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801.
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between the specified pins of the applicable ARINC 629 coupler connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the applicable ARINC 629 coupler. To install it, do this task: ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 802. AIMS No Input from Autopilot Flight Director Computer (Left) on Flight Controls ARINC 629 Bus (left) - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69103, 31-69104.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULES          | SOURCE LRUS      | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|------------------|----------------|----------------|--------------------|
| 31-69103      | IOM(M008)<br>(AIMS-L) | AFDC-L<br>M22101 | LEFT           | B31107<br>P112 | B22101<br>P112     |

#### 806. AIMS No Input from Air Data Inertial Reference Unit on Flight Controls ARINC 629 Bus (left) - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69117, 31-69118.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULES          | SOURCE LRUS     | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|-----------------|----------------|----------------|--------------------|
| 31-69117      | IOM(M008)<br>(AIMS-L) | ADIRU<br>M34001 | LEFT           | B31107<br>P112 | B34105<br>P112     |
|               | IOM(M009)<br>(AIMS-L) |                 |                | B31108<br>P112 | B34106<br>P112     |
| 31-69118      | IOM(M009)<br>(AIMS-R) | ADIRU<br>M34001 | LEFT           | B31111<br>P112 | B34105<br>P112     |
|               |                       |                 |                |                | B34106<br>P112     |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.

These are the tasks:

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable ARINC 629 coupler.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 31-41-25) (WDM 31-41-26):
  - (a) Remove the applicable ARINC 629 coupler. To remove it, do this task: ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801.
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between the specified pins of the applicable ARINC 629 coupler connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the applicable ARINC 629 coupler. To install it, do this task: ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 810. AIMS No Input from Autopilot Flight Director Computer (Center) on Flight Controls ARINC 629 Bus (center) - Fault Isolation

## 777-200/300 FAULT ISOLATION MANUAL

These are the tasks:

Power Supply Assembly Removal, AMM TASK 24-35-01-000-801,  
Power Supply Assembly Installation, AMM TASK 24-35-01-400-801.

- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Replace the ARINC 629 coupler for the source LRU.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 812. AIMS No Input from Primary Flight Computer (Center) on Flight Controls ARINC 629 Bus (Center) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69209, 31-69210.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULES          | SOURCE LRUS     | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|-----------------|----------------|----------------|--------------------|

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the source LRU.
- (a) Primary Flight Computer (Right), M27306.
- These are the tasks:
- Primary Flight Computer (PFC) Removal, AMM TASK 27-02-01-000-801,  
Primary Flight Computer (PFC) Installation, AMM TASK 27-02-01-400-802.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Replace the ARINC 629 coupler for the source LRU.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable ARINC 629 coupler.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 31-41-25) (WDM 31-41-26):
  - (a) Remove the applicable ARINC 629 coupler. To remove it, do this task: ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801.
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between the specified pins of the applicable ARINC 629 coupler connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the applicable ARINC 629 coupler. To install it, do this task: ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the source LRU.
- (a) Air Data Inertial Reference Unit, M34001.
- These are the tasks:
- Air Data Inertial Reference Unit - Removal, AMM TASK 34-21-01-000-801,  
Air Data Inertial Reference Unit - Installation, AMM TASK 34-21-01-400-801.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

Page 231  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (6) Replace the ARINC 629 coupler for the source LRU.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 823. AIMS No Input from Air Data Module (Right Pitot) on Flight Controls ARINC 629 Bus (right) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69323, 31-69324.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULES          | SOURCE LRUS      | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|------------------|----------------|----------------|--------------------|
| 31-69323      | IOM(M004)<br>(AIMS-L) | ADM-RP<br>M34202 | RIGHT          | B31206<br>P212 | B3420<br>P212      |
| 31-69324      | IOM(M004)<br>(AIMS-R) | ADM-RP<br>M34202 | RIGHT          | B31208<br>P212 | B3420<br>P212      |
|               | IOM(M003)<br>(AIMS-R) |                  |                | B31209<br>P212 |                    |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,
- Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the source LRU.

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the source LRU.
  - (a) Air Data Module (Right Static), M34201.

These are the tasks:

Static Air Data Module Removal, AMM TASK 34-21-03-000-802,  
Static Air Data Module Installation, AMM TASK 34-21-03-400-802.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Replace the ARINC 629 coupler for the source LRU.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

|                  |                                   |                       | pin 5                               | pin E5            |
|                  |                                   |                       | pin 4                               | pin E6            |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M009) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable ARINC 629 coupler.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 31-41-25) (WDM 31-41-26):
  - (a) Remove the applicable ARINC 629 coupler. To remove it, do this task: ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801.

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 828. AIMS No Input from Overhead Panel Bus Controller (L) on System ARINC 629 Bus (left) - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69409, 31-69410.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT<br>MESSAGE | AIMS<br>MODULE        | SOURCE LRU       | SYSTEM<br>629 BUS | AIMS<br>COUPLER | SOURCE LRU<br>COUPLER |
|------------------|-----------------------|------------------|-------------------|-----------------|-----------------------|
| 31-69409         | IOM(M009)<br>(AIMS-L) | OPBC-L<br>M23112 | LEFT              | B31112<br>P111  | B23126<br>P111        |
| 31-69410         | IOM(M009)<br>(AIMS-R) | OPBC-L<br>M23112 | LEFT              | B31116<br>P111  | B23126<br>P111        |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M009) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the source LRU.
- (a) Overhead Panel Bus Controller (L), M23112.
- These are the tasks:
- Left Overhead Panel Bus Controller (OPBC) Removal, AMM TASK 23-93-01-000-801,  
Left Overhead Panel Bus Controller (OPBC) Installation, AMM TASK 23-93-01-400-801.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 835. AIMS No Input from Auxiliary Generator Control Unit on System ARINC 629 Bus (left) - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69427, 31-69428.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULE           | SOURCE LRU     | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|----------------|----------------|----------------|--------------------|
| 31-69427      | IOM(M009)<br>(AIMS-L) | AGCU<br>M24305 | LEFT           | B31112<br>P111 | B24105<br>P111     |
| 31-69428      | IOM(M009)<br>(AIMS-R) | AGCU<br>M24305 | LEFT           | B31116<br>P111 | B24105<br>P111     |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M009) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,
- Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the source LRU.
- (a) Auxiliary Generator Control Unit, M24305.

These are the tasks:

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M009) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable source LRU.
- (a) CCA, Communication in PSEU 1, M32021-A02, or CCA, Communication in PSEU 2, M32025-A17.
- These are the tasks:
- PSEU Circuit Card Removal, AMM TASK 32-08-02-000-801,  
PSEU Circuit Card Installation, AMM TASK 32-08-02-400-801.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

Sep 05/2016

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Replace the ARINC 629 coupler for the applicable source LRU.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

**END OF TASK**

**842. AIMS No Input from Brake System Control Unit (Primary Chan) on System ARINC 629 Bus (left) - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-69447, 31-69448.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULE           | SOURCE LRU     | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|----------------|----------------|----------------|--------------------|
| 31-69447      | IOM(M009)<br>(AIMS-L) | BSCU<br>M32017 | LEFT           | B31112<br>P111 | B32113<br>P115     |

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULE           | SOURCE LRU     | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|----------------|----------------|----------------|--------------------|
| 31-69465      | IOM(M009)<br>(AIMS-L) | APUC<br>M49002 | LEFT           | B31112<br>P111 | B49101<br>P115     |
| 31-69466      | IOM(M009)<br>(AIMS-R) | APUC<br>M49002 | LEFT           | B31116<br>P111 | B49101<br>P115     |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M009) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the source LRU.
- (a) APU Controller, M49002.
- These are the tasks:
- APU Controller (APUC) Removal, AMM TASK 49-61-05-000-801,  
APU Controller (APUC) Installation, AMM TASK 49-61-05-400-801.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Replace the ARINC 629 coupler for the source LRU.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 31-41-25) (WDM 31-41-26):
  - (a) Remove the applicable ARINC 629 coupler. To remove it, do this task: ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801.
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between the specified pins of the applicable ARINC 629 coupler connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the applicable ARINC 629 coupler. To install it, do this task: ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 853. AIMS No Input from Autopilot Flight Director Computer (Center) on System ARINC 629 Bus (center 1) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69507, 31-69508.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULE           | SOURCE LRU       | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|------------------|----------------|----------------|--------------------|
| 31-69507      | IOM(M008)<br>(AIMS-L) | AFDC-C<br>M22301 | CENTER 1       | B31312<br>P311 | B22304<br>P311     |
| 31-69508      | IOM(M008)<br>(AIMS-R) | AFDC-C<br>M22301 | CENTER 1       | B31317<br>P311 | B22304<br>P311     |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M008) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the source LRU.
- (a) AFDC-C, M22301.
- These are the tasks:
- Autopilot Flight Director Computer Removal, AMM TASK 22-11-01-000-801,  
Autopilot Flight Director Computer Installation, AMM TASK 22-11-01-400-801.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Replace the ARINC 629 coupler for the source LRU.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Replace the applicable ARINC 629 coupler.  
These are the tasks:  
ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the applicable AIMS module.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this check of the wiring (WDM 31-41-25) (WDM 31-41-26):
  - (a) Remove the applicable ARINC 629 coupler. To remove it, do this task: ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801.
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between the specified pins of the applicable ARINC 629 coupler connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the applicable ARINC 629 coupler. To install it, do this task: ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 858. AIMS No Input from Cabin Temperature Controller on System ARINC 629 Bus (right) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69603, 31-69604, 31-69605, 31-69606.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULE           | SOURCE LRU      | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|-----------------|----------------|----------------|--------------------|
| 31-69603      | IOM(M004)<br>(AIMS-L) | CTL-L<br>M21631 | RIGHT          | B31211<br>P211 | B21632<br>P211     |
| 31-69604      | IOM(M004)<br>(AIMS-R) | CTL-L<br>M21631 | RIGHT          | B31214<br>P211 | B21632<br>P211     |
| 31-69605      | IOM(M004)<br>(AIMS-L) | CTL-R<br>M21632 | RIGHT          | B31211<br>P211 | B21634<br>P211     |
| 31-69606      | IOM(M004)<br>(AIMS-R) | CTL-R<br>M21632 | RIGHT          | B31214<br>P211 | B21634<br>P211     |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M004) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable source LRU.

- (a) Cabin Temperature Controller (Left), M21631 or Cabin Temperature Controller (Right), M21632.

These are the tasks:

Cabin Temperature Controller (CTC) Removal, AMM TASK 21-61-01-000-801,

Cabin Temperature Controller (CTC) Installation, AMM TASK 21-61-01-400-801.

- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

| MAINT<br>MESSAGE | AIMS<br>MODULE        | SOURCE<br>LRU  | SYSTEM<br>629 BUS | AIMS<br>COUPLER | SOURCE LRU<br>COUPLER |
|------------------|-----------------------|----------------|-------------------|-----------------|-----------------------|
| 31-69627         | IOM(M004)<br>(AIMS-L) | AGCU<br>M24305 | RIGHT             | B31211<br>P211  | B24205<br>P211        |
| 31-69628         | IOM(M004)<br>(AIMS-R) | AGCU<br>M24305 | RIGHT             | B31214<br>P211  | B24205<br>P211        |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M004) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.

- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (3) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (4) Replace the source LRU.

- (a) Auxiliary Generator Control Unit, M24305.

These are the tasks:

Generator Control Unit Removal, AMM TASK 24-22-02-000-801,

Generator Control Unit Installation, AMM TASK 24-22-02-400-801.

- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (c) If the MAT shows ACTIVE for the maintenance message, then continue.

- (5) Replace the applicable ARINC 629 coupler for the AIMS module.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (6) Replace the ARINC 629 coupler for the source LRU.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 866. AIMS No Input from Bus Power Control Unit on System ARINC 629 Bus (right) - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69629, 31-69630.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT<br>MESSAGE | AIMS<br>MODULE        | SOURCE<br>LRU  | SYSTEM<br>629 BUS | AIMS<br>COUPLER | SOURCE LRU<br>COUPLER |
|------------------|-----------------------|----------------|-------------------|-----------------|-----------------------|
| 31-69629         | IOM(M004)<br>(AIMS-L) | BPCU<br>M24002 | RIGHT             | B31211<br>P211  | B24206<br>P211        |
| 31-69630         | IOM(M004)<br>(AIMS-R) | BPCU<br>M24002 | RIGHT             | B31214<br>P211  | B24206<br>P211        |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M004) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the source LRU.
- (a) Bus Power Control Unit, M24002.
- These are the tasks:
- BPCU Removal, AMM TASK 24-41-05-000-801,  
BPCU Installation, AMM TASK 24-41-05-400-801.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If the MAT shows ACTIVE for the maintenance message, then continue.

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M004) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable source LRU.
- (a) CCA, Communication in PSEU 1, M32021-A17 or CCA, Communication in PSEU 2, M32025-A02.
- These are the tasks:
- PSEU Circuit Card Removal, AMM TASK 32-08-02-000-801,  
PSEU Circuit Card Installation, AMM TASK 32-08-02-400-801.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Replace the applicable ARINC 629 coupler for the source LRU.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

## 777-200/300 FAULT ISOLATION MANUAL

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 872. AIMS No Input from Brake System Control Unit (Primary Chan) on System ARINC 629 Bus (right) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69647, 31-69648.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULE           | SOURCE LRU     | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|----------------|----------------|----------------|--------------------|
| 31-69647      | IOM(M004)<br>(AIMS-L) | BSCU<br>M32017 | RIGHT          | B31211<br>P211 | B32213<br>P215     |
| 31-69648      | IOM(M004)<br>(AIMS-R) | BSCU<br>M32017 | RIGHT          | B31214<br>P211 | B32213<br>P215     |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M004) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the source LRU.
- (a) Brake System Control Unit, M32017.
- These are the tasks:
- Brake System Control Unit (BSCU) Removal, AMM TASK 32-42-01-000-801,  
Brake System Control Unit (BSCU) Installation, AMM TASK 32-42-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Replace the ARINC 629 coupler for the source LRU.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 873. AIMS No Input from Control Display Unit on System ARINC 629 Bus (right) - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-69675, 31-69676, 31-69677, 31-69678.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| <b>MAINT MESSAGE</b> | <b>AIMS MODULE</b>    | <b>SOURCE LRU</b> | <b>SYSTEM 629 BUS</b> | <b>AIMS COUPLER</b> | <b>SOURCE LRU COUPLER</b> |
|----------------------|-----------------------|-------------------|-----------------------|---------------------|---------------------------|
| 31-69675             | IOM(M004)<br>(AIMS-L) | EDIU-R<br>M73203  | RIGHT                 | B31211<br>P211      | B73201<br>P211            |
| 31-69676             | IOM(M004)<br>(AIMS-R) | EDIU-R<br>M73203  | RIGHT                 | B31214<br>P211      | B73201<br>P211            |
| 31-69677             | IOM(M004)<br>(AIMS-L) | EDIU-R<br>M73203  | RIGHT                 | B31211<br>P211      | B73203<br>P211            |
| 31-69678             | IOM(M004)<br>(AIMS-R) | EDIU-R<br>M73203  | RIGHT                 | B31214<br>P211      | B73203<br>P211            |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M004) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the source LRU.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Engine Data Interface Unit (R Eng), M73203.  
These are the tasks:  
Engine Data Interface Unit (EDIU) Removal, AMM TASK 73-21-22-000-804-H00,  
Engine Data Interface Unit (EDIU) Installation, AMM TASK 73-21-22-400-808-H00.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.  
These are the tasks:  
ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Replace the applicable ARINC 629 coupler for the source LRU.  
These are the tasks:  
ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 878. AIMS No Input from ARINC Signal Gateway (right) on System ARINC 629 Bus (right) - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69691, 31-69692, 31-69693, 31-69694.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULE           | SOURCE LRU            | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M004) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable source LRU.
  - (a) ARINC Signal Gateway (Right), LSCF, P085A15 or ARINC Signal Gateway (Right), RSCF, P084A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,  
ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Replace the applicable ARINC 629 coupler for the source LRU.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

|                  |                                    |                       | pin 5                              | pin E5            |
|                  |                                    |                       | pin 4                              | pin E6            |
| 31-69702         | B31318                             | IOM(M004)<br>(AIMS-R) | DB31318                            | P3-A              |
|                  |                                    |                       | pin 5                              | pin E5            |
|                  |                                    |                       | pin 4                              | pin E6            |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M004) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable ARINC 629 coupler.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 31-41-25) (WDM 31-41-26):

Page 298.8  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the applicable ARINC 629 coupler. To remove it, do this task: ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801.
- (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between the specified pins of the applicable ARINC 629 coupler connector and the applicable AIMS module connector.
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
  - 3) Re-install the applicable ARINC 629 coupler. To install it, do this task: ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801
- (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 880. AIMS No Input from Engine Data Interface Unit on System ARINC 629 Bus (center 2) - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69771, 31-69772, 31-69773, 31-69774, 31-69775, 31-69776, 31-69779, 31-69780.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULE           | SOURCE LRU       | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |

## 31-42 TASK 880

D633W103-ARO

Page 298.10  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 881. AIMS No Input from Mode Control Panel on MCP Input ARINC 429 Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69903, 31-69904, 31-69905, 31-69906.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the Mode Control Panel, AIMS module, connectors and pin numbers for the applicable maintenance message.

| MAINT MESSAGE | MODE CONTROL PANEL | AIMS MODULE           | MODE CONTROL PANEL CONNECTOR | AIMS CONNECTOR |
|---------------|--------------------|-----------------------|------------------------------|----------------|
| 31-69903      | M22016             | IOM(M008)<br>(AIMS-L) | DM22016A                     | P8-B           |
|               |                    |                       | pin 28                       | pin D2         |
|               |                    |                       | pin 29                       | pin D3         |

|                  |                          |                       | pin 29                             | pin D3            |

- (2) Replace the Mode Control Panel.

These are the tasks:

Mode Control Panel Removal, AMM TASK 22-11-02-000-801,

Mode Control Panel Installation, AMM TASK 22-11-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (4) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 22-11-43) (SSM 31-41-03) (SSM 31-41-06):
- (a) Remove the Mode Control Panel. To remove it, do this task: Mode Control Panel Removal, AMM TASK 22-11-02-000-801.
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between the specified pins of the Mode Control Panel connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801

## 31-42 TASK 881

D633W103-ARO

Page 298.12  
Sep 05/2016

**777-200/300**  
**FAULT ISOLATION MANUAL**

- 3) Re-install the Mode Control Panel. To install it, do this task: Mode Control Panel Installation, AMM TASK 22-11-02-400-801
- (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

———— **END OF TASK** ————

**882. AIMS No Input from Cabin File Server or Passenger Inflight Information Computer on ARINC 429 Bus - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-69907, 31-69908.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M009) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (2) Replace the Audio Video Controller-Digital (AVC-D).

These are the tasks:

Audio Video Controller-Digital (AVC-D) Removal, AMM TASK 44-28-05-000-801,  
Audio Video Controller-Digital (AVC-D) Installation, AMM TASK 44-28-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this check of the AIMS inputs (WDM 23-36-31) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the Audio Video Controller-Digital (AVC-D). To remove it, do this task: Audio Video Controller-Digital (AVC-D) Removal, AMM TASK 44-28-05-000-801

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
- (c) Do a check of the wiring that connects to the applicable AIMS connector D6605 at pins 42 and 43.
- (d) Do a check of the wiring that connects to the applicable AIMS connector D6705 at pins 21 and 22.
- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
  - 3) Re-install the Audio Video Controller-Digital (AVC-D). To install it, do this task: Audio Video Controller-Digital (AVC-D) Installation, AMM TASK 44-28-05-400-801
- (f) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 884. AIMS No Input from HF Communication Transceiver on HF CMC Report ARINC 429 Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69911, 31-69912, 31-69913, 31-69914.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the HF Communication Transceiver, AIMS module, connectors and pin numbers for the applicable maintenance message.

| MAINT MESSAGE | HF COMM XCVR | AIMS MODULE        | HF COMM XCVR CONNECTOR        | AIMS CONNECTOR           |
|---------------|--------------|--------------------|-------------------------------|--------------------------|

  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable HF Communication Transceiver.

These are the tasks:

HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801,  
HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 23-11-11) (WDM 23-11-12) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the applicable HF Communication Transceiver. To remove it, do this task: HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the applicable HF Communication Transceiver connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801

| MAINT MESSAGE | VHF COMM XCVR | AIMS MODULE           | VHF COMM XCVR CONNECTOR | AIMS CONNECTOR |
|---------------|---------------|-----------------------|-------------------------|----------------|
| 31-69920      | M23303 CENTER | IOM(M008)<br>(AIMS-R) | DM23303AB               | P8-A           |
|               |               |                       | pin C14                 | pin A10        |
|               |               |                       | pin D14                 | pin A11        |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable VHF Communication Transceiver.

These are the tasks:

VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801,  
VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 23-12-12) (WDM 23-12-22) (WDM 23-12-32) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the applicable VHF Communication Transceiver. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the applicable VHF Communication Transceiver connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the applicable VHF Communication Transceiver. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801

777-200/300  
FAULT ISOLATION MANUAL

- (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

**886. AIMS No Input from Radio Tuning Panel on RTP ARINC 429 Bus 1 - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-69921, 31-69922, 31-69923, 31-69924, 31-69925, 31-69926.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the Radio Tuning Panel, AIMS module, connectors and pin numbers for the applicable maintenance message.

| MAINT<br>MESSAGE | RADIO<br>TUNING<br>PANEL | AIMS<br>MODULE        | RAD TUN<br>PANEL<br>CONNECTOR | AIMS<br>CONNECTOR |
|------------------|--------------------------|-----------------------|-------------------------------|-------------------|

## 777-200/300 FAULT ISOLATION MANUAL

(Continued)

| MAINT<br>MESSAGE | RADIO<br>TUNING<br>PANEL | AIMS<br>MODULE        | RAD TUN<br>PANEL<br>CONNECTOR     | AIMS<br>CONNECTOR                |
|------------------|--------------------------|-----------------------|-----------------------------------|----------------------------------|
| 31-69926         | M23007<br>CENTER         | IOM(M008)<br>(AIMS-R) | DM23007<br><br>pin 2<br><br>pin 3 | P8-A<br><br>pin A4<br><br>pin A5 |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable Radio Tuning Panel.

These are the tasks:

Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801,  
Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 23-12-11) (WDM 23-12-21) (WDM 23-12-31) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the applicable Radio Tuning Panel. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the applicable Radio Tuning Panel connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the applicable Radio Tuning Panel. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the maintenance message shows on the ground test display, then continue.
- (3) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the left satellite data unit, M23106.

These are the tasks:

Satellite Data Unit Removal, AMM TASK 23-15-10-000-801,  
Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 23-15-15) (SSM 31-41-03, 31-41-06):
  - (a) Remove the left satellite data unit, M23106. To remove it, do this task: Satellite Data Unit Removal, AMM TASK 23-15-10-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the left satellite data unit connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the left satellite data unit, M23106. To install it, do this task: Satellite Data Unit Installation, AMM TASK 23-15-10-400-801
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 888. AIMS No Input from Window Heat Ctrl Unit on Window Heat System Output ARINC 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69935, 31-69936, 31-69937, 31-69938.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 30-41-13) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the applicable Window Heat Ctrl Unit. To remove it, do this task: Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the applicable Window Heat Ctrl Unit connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the applicable Window Heat Ctrl Unit. To install it, do this task: Window Heat Control Unit Installation, AMM TASK 30-41-01-400-801
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 889. AIMS No Input from Clock on Clock Data ARINC 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69939, 31-69940.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the AIMS module, connector and pin numbers for the applicable maintenance message.

Table 201/31-42-00-993-803

| MAINT<br>MESSAGE | CLOCK | AIMS<br>MODULE        | AIMS<br>CONNECTOR       | AIMS<br>CONNECTOR         |

## 777-200/300 FAULT ISOLATION MANUAL

Table 201/31-42-00-993-803 (Continued)

| MAINT<br>MESSAGE | CLOCK         | AIMS<br>MODULE        | AIMS<br>CONNECTOR       | AIMS<br>CONNECTOR         |
|------------------|---------------|-----------------------|-------------------------|---------------------------|
| 31-69940         | FIRST OFFICER | IOM(M003)<br>(AIMS-R) | D6618<br>pin 4<br>pin 5 | D6618<br>pin 58<br>pin 34 |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M003) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do this check of the wiring (WDM 31-25-11) (WDM 31-25-21) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the applicable clock pushbutton, S31100 or S31200 (WDM 31-25-11).
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the applicable clock pushbutton connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the applicable clock pushbutton, S31100 or S31200 (WDM 31-25-11).
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the Printer, AIMS module, connectors and pin numbers for the applicable maintenance message.

| MAINT MESSAGE | PRINTER | AIMS MODULE           | PRINTER CONNECTOR | AIMS CONNECTOR |
|---------------|---------|-----------------------|-------------------|----------------|
| 31-69941      | M31004  | IOM(M009)<br>(AIMS-L) | DM31004A          | P9-A           |
|               |         |                       | pin S             | pin B12        |
|               |         |                       | pin T             | pin B13        |
| 31-69942      | M31004  | IOM(M009)<br>(AIMS-R) | DM31004A          | P9-A           |
|               |         |                       | pin S             | pin B12        |
|               |         |                       | pin T             | pin B13        |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M009) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the Printer. These are the tasks:
  - Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801
  - Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module. These are the tasks:
  - Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring: (WDM 31-33-11) (SSM 31-41-03) (SSM 31-41-06)
  - (a) Remove the Printer. To remove it, do this task: Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801

D633W103-ARO

Page 298.27  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 34-57-11) (WDM 34-57-21) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the applicable ADF Receiver. To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the applicable ADF Receiver connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the applicable ADF Receiver. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### ————— END OF TASK —————

#### 893. AIMS No Input from ATC/Mode S Transponder on ATC XT Coord ARINC 429 Bus - Fault Isolation

##### **A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-69949, 31-69950, 31-69951, 31-69952.

##### **B. Initial Evaluation**

- (1) For the maintenance message 31-69949, if the MAT shows ACTIVE, do the steps that follow:
  - (a) If there are no associated flight deck effects, the message is nuisance and no maintenance action is required.
  - (b) If there are flight deck effects associated with the message, do the Fault Isolation Procedure below.
- (2) For the maintenance messages 31-69950, 31-69951 and 31-69952, if the MAT shows ACTIVE, then do the Fault Isolation Procedure below.
- (3) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable ATC/Mode S Transponder.
- These are the tasks:
- ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801,  
ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.

## 777-200/300 FAULT ISOLATION MANUAL

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 34-53-12) (WDM 34-53-22) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the applicable ATC/Mode S Transponder. To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the applicable ATC/Mode S Transponder connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the applicable ATC/Mode S Transponder. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 894. AIMS No Input from ATC/Mode S Transponder on ATC CMC ARINC 429 Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69953, 31-69954, 31-69955, 31-69956.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the steps below:
  - (a) If there are no associated flight deck effects, the message is nuisance and no maintenance action is required.
  - (b) If there are flight deck effects associated with the message, do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the ATC/Mode S Transponder, AIMS module, connectors and pin numbers for the applicable maintenance message.

D633W103-ARO

Page 298.33  
Sep 05/2016

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (5) Do this check of the wiring (WDM 34-55-11) (WDM 34-55-21) (SSM 31-41-03) (SSM 31-41-06):
- (a) Remove the applicable DME Interrogator. To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the applicable DME Interrogator connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the applicable DME Interrogator. To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**897. AIMS No Input from Ground Proximity Warning Computer on GPWC CMC Input ARINC 429 Bus - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-69965, 31-69966.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the Ground Proximity Warning Computer, AIMS module, connectors and pin numbers for the applicable maintenance message.

| <b>MAINT<br/>MESSAGE</b> | <b>GROUND<br/>PROXIMITY<br/>COMPUTER</b> | <b>AIMS<br/>MODULE</b> | <b>GND PROX<br/>COMPUTER<br/>CONNECTOR</b> | <b>AIMS<br/>CONNECTOR</b> |

|                  |                                 |                       | pin C1                            | pin D4            |
|                  |                                 |                       | pin D1                            | pin D5            |
|                  |                                 | IOM(M004)<br>(AIMS-R) | DM34004AB                         | P4-B              |
|                  |                                 |                       | pin C1                            | pin D4            |
|                  |                                 |                       | pin D1                            | pin D5            |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the Ground Proximity Warning Computer.

These are the tasks:

Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801,  
Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 34-46-12) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the Ground Proximity Warning Computer. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the Ground Proximity Computer connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801

## 31-42 TASK 897

D633W103-ARO

Page 298.35  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the Ground Proximity Warning Computer. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801
- (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 899. AIMS No Input from Radio Altimeter Transceiver on RA Altitude #1 ARINC 429 Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69973, 31-69974, 31-69975, 31-69976, 31-69977, 31-69978.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the Radio Altimeter Transceiver, AIMS module, connectors and pin numbers for the applicable maintenance message.

| MAINT MESSAGE | RADIO ALTITUDE XCVR | AIMS MODULE           | RADIO ALT XCVR CONNECTOR | AIMS CONNECTOR |

|                          |                                    |                        | pin B2                                  | pin D10                   |
|                          |                                    |                        | pin B3                                  | pin D11                   |
|                          |                                    | IOM(M009)<br>(AIMS-R)  | DM34212AB                               | P9-B                      |
|                          |                                    |                        | pin B2                                  | pin D10                   |
|                          |                                    |                        | pin B3                                  | pin D11                   |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable Radio Altitude Transceiver.

These are the tasks:

Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801,  
Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 34-33-12) (WDM 34-33-22) (WDM 34-33-32) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the applicable Radio Altimeter Transceiver. To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the applicable Radio Altimeter Transceiver connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the applicable Radio Altimeter Transceiver. To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 900. AIMS No Input on Standby Attitude CMC ARINC 429 Bus - Fault Isolation

##### A. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### B. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) For an AIMS schematic overview see 31-61 TASK SUPPORT Figure 301.
- (2) In the list below, find the Integrated Standby Flight Display, AIMS module, connectors and pin numbers for the applicable maintenance message.

Table 202/31-42-00-993-805

- (3) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M008) in Left(Right) AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (4) Replace the applicable AIMS module.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the Integrated Standby Flight Display (ISFD). To replace the ISFD,
- These are the tasks:
- Integrated Standby Flight Display Removal, AMM TASK 34-24-02-000-801,  
Integrated Standby Flight Display Installation, AMM TASK 34-24-02-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this check of the wiring (WDM 34-24-15) (SSM 31-41-03) (SSM 31-41-06):
- (a) Remove the Integrated Standby Flight Display. To remove it, do this task: Integrated Standby Flight Display Removal, AMM TASK 34-24-02-000-801
- (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
- (c) Do a wiring check between the specified pins of the Integrated Standby Flight Display connector and the applicable AIMS module connector.
- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
  - 3) Re-install the Integrated Standby Flight Display. To install it, do this task: Integrated Standby Flight Display Installation, AMM TASK 34-24-02-400-801

## 777-200/300 FAULT ISOLATION MANUAL

- (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 901. AIMS No Input on Standby Altitude CMC ARINC 429 Bus - Fault Isolation

##### A. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### B. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the Standby Altimeter, AIMS module, connectors and pin numbers for the applicable maintenance message.

Table 203/31-42-00-993-801

| MAINT MESSAGE | STANDBY ALTIMETER INDICATOR | AIMS MODULE           | STANDBY ALTIMETER CONNECTOR | AIMS CONNECTOR |
|---------------|-----------------------------|-----------------------|-----------------------------|----------------|
| 31-69981      | N34003                      | IOM(M008)<br>(AIMS-L) | DN34003                     | P8-A           |
|               |                             |                       | pin 14                      | pin B8         |
|               |                             |                       | pin 15                      | pin B9         |
| 31-69982      | N34003                      | IOM(M008)<br>(AIMS-R) | DN34003                     | P8-A           |
|               |                             |                       | pin 14                      | pin A14        |
|               |                             |                       | pin 15                      | pin A15        |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M008) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the Integrated Standby Flight Display (ISFD). To replace the ISFD,

### 902. AIMS No Input on Standby Airspeed CMC ARINC 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-69983.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the Standby Airspeed Indicator, AIMS module, connectors and pin numbers for the applicable maintenance message.

| MAINT<br>MESSAGE | STANDBY<br>AIRSPEED<br>INDICATOR | AIMS<br>MODULE        | STANDBY<br>INDICATOR<br>CONNECTOR | AIMS<br>CONNECTOR |
|------------------|----------------------------------|-----------------------|-----------------------------------|-------------------|
| 31-69983         | N34002                           | IOM(M008)<br>(AIMS-L) | DN34002                           | P8-A              |
|                  |                                  |                       | pin 14                            | pin A14           |
|                  |                                  |                       | pin 15                            | pin A15           |
| 31-69984         | N34002                           | IOM(M008)<br>(AIMS-R) | DN34002                           | P8-A              |
|                  |                                  |                       | pin 14                            | pin A12           |
|                  |                                  |                       | pin 15                            | pin A13           |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M008) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the Integrated Standby Flight Display (ISFD). To replace the ISFD, These are the tasks:  
Integrated Standby Flight Display Removal, AMM TASK 34-24-02-000-801,  
Integrated Standby Flight Display Installation, AMM TASK 34-24-02-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 34-13-11) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the Integrated Standby Flight Display (ISFD). To remove it, do this task: Integrated Standby Flight Display Removal, AMM TASK 34-24-02-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the Integrated Standby Flight Display (ISFD) connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the Integrated Standby Flight Display (ISFD). To install it, do this task: Integrated Standby Flight Display Installation, AMM TASK 34-24-02-400-801
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 34-45-13) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the TCAS Computer. To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the TCAS Computer connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the TCAS Computer. To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 904. AIMS No Input from TCAS Computer on TCAS CMCS ARINC 429 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69989, 31-69990.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the TCAS Computer, AIMS module, connectors and pin numbers for the applicable maintenance message.

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M009) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the TCAS Computer.

These are the tasks:

TCAS Computer Removal, AMM TASK 34-45-01-000-801,  
TCAS Computer Installation, AMM TASK 34-45-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 34-45-13) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the TCAS Computer. To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the TCAS Computer connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the TCAS Computer. To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801

## 777-200/300 FAULT ISOLATION MANUAL

- (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 905. AIMS No Input from VOR/MB Receiver on VOR Omnibearing ARINC 429 Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69991, 31-69992, 31-69993, 31-69994.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the VOR/MB Receiver, AIMS module, connectors and pin numbers for the applicable maintenance message.

| MAINT MESSAGE | VOR/MB RECEIVER | AIMS MODULE           | VOR/MB RECEIVER CONNECTOR | AIMS CONNECTOR |
|---------------|-----------------|-----------------------|---------------------------|----------------|
| 31-69991      | M34115<br>LEFT  | IOM(M008)<br>(AIMS-L) | DM34115AB                 | P8-B           |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable VOR/MB Receiver.

These are the tasks:

VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801,  
VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 34-51-11) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the applicable VOR/MB Receiver. To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801

## 777-200/300 FAULT ISOLATION MANUAL

(Continued)

### Standby Power Management Panel, P310

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>     |
|------------|------------|---------------|-----------------|
| K          | 5          | C24633        | P310 PSU A ALTN |

#### E. Related Data

- (1) WDM 31-41-25
- (2) WDM 31-41-26

#### F. Initial Evaluation

- (1) If the MAT shows ACTIVE for the Maintenance Message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the Maintenance Message, then there was an intermittent fault.

#### G. Fault Isolation Procedure

- (1) In the list below, find the coupler, AIMS module, connectors and pin numbers for the applicable Maintenance Message.

| MAINT<br>MESSAGE | ARINC 629<br>SYSTEM<br>COUPLER | AIMS<br>MODULE        | ARINC 629<br>COUPLER<br>CONNECTOR | AIMS<br>CONNECTOR          |
|------------------|--------------------------------|-----------------------|-----------------------------------|----------------------------|
| 31-68811         | B31107                         | IOM(M009) (AIMS-L)    | DB31107<br>pin 2<br>pin 1         | J420-A<br>pin G1<br>pin G2 |
| 31-68811         | B31108<br>LEFT                 | IOM(M008)<br>(AIMS-L) | DB31108<br>pin 2<br>pin 1         | J420-A<br>pin G1<br>pin G2 |
| 31-68832         | B31208<br>RIGHT                | IOM(M004)<br>(AIMS-R) | DB31208<br>pin 2<br>pin 1         | J250-A<br>pin G1<br>pin G2 |
| 31-68832         | B31209<br>RIGHT                | IOM(M003)<br>(AIMS-R) | DB31209<br>pin 2<br>pin 1         | J240-A<br>pin G1<br>pin G2 |

- (2) Do the applicable ground test on the MAT: 31 AIMS - L (R) AIMS, System Test, IOM (M00X) in L (R) AIMS Module Reset.
  - (a) If the Maintenance Message shows on the ground test display, then do the Fault Isolation Procedure below.
- (3) Replace the applicable ARINC 629 Coupler. These are the tasks:
  - ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801
  - ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801
- (4) Replace the applicable AIMS module. These are the tasks:
  - Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801

EFFECTIVITY  
ARO ALL

## 31-42 TASK 908

D633W103-ARO

Page 298.51  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (5) Do this check of the wiring (WDM 31-41-25) (WDM 31-41-26) (SSM 31-41-02):
  - (a) Remove the applicable ARINC 629 Coupler. This is the task: ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801.
  - (b) Remove the applicable AIMS module. This is the task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between the specified pins of the applicable ARINC 629 Coupler connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. This is the task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the applicable ARINC 629 Coupler. This is the task: ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

### H. PFCS Interface Recovery Procedure - Configuration Check

**NOTE:** Sometimes the condition that causes the 31-68811 maintenance message also causes the Primary Flight Computers (PFCs) to stop communicating with the AIMS. When this condition is present, the Flight Deck Effect symptoms include the PFCS INTERFACE EICAS message and the THRUST ASYM COMP EICAS message, along with maintenance messages 31-68811, 27-10804, and 27-10805. If these symptoms were present, the following procedure can be used to determine if the PFCs have stopped communicating with the AIMS and to recover from that condition. Maintenance message 31-68811 must be cleared before performing the following procedure.

- (1) Do a configuration Check on the Primary Flight Computers.

**NOTE:** A maintenance access terminal (MAT) is necessary for this procedure. For instructions on how to use a maintenance access terminal refer to ( AMM TASK 45-10-00-740-808).

- (a) Do this task : Supply Electrical Power, AMM TASK 24-22-00-860-805.
- (b) Use a maintenance access terminal (MAT) to do the configuration check of the PFCs:
  - 1) Make these selections on the MAT:
    - a) ONBOARD MAINTENANCE.
    - b) LINE MAINTENANCE.
    - c) SYSTEM CONFIGURATION.
    - d) 27 Primary Flight Control System.
    - e) CONTINUE.
  - 2) Find Primary Flight Computer (left, center and right) on the display and make sure that the software part number (OPS) is displayed.

**NOTE:** An example of the display looks like:

Primary Flight Computer (Left) Hardware Part Number:

xx-xxx-xx

Serial Number:

xxxxxxxx

Options:

777-x00 LEFT##01FALSE

EFFECTIVITY  
ARO ALL

## 31-42 TASK 908

D633W103-ARO

Page 298.52  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

### PFC OPS:

xxxx-PFC-xxx-xx

Primary Flight Computer (Center)

Hardware Part Number:

xx-xxx-xx

Serial Number:

xxxxxxxx

Options:

777-x00 CENTER01TRUE#

### PFC OPS:

xxxx-PFC-xxx-xx

Primary Flight Computer (Right)

Hardware Part Number:

xx-xxx-xx

Serial Number:

xxxxxxxx

Options:

777-x00 RIGHT#01TRUE#

### PFC OPS:

xxxx-PFC-xxx-xx

For this example, the parity pins for the center and right PFC are set (TRUE) while the parity pins on the left PFC are not set (FALSE). Each model of 777 airplane may have different parity pin requirements.

- 3) Select GO BACK to remove the configuration display.
- (c) If the OPS part number shows on all three PFCs, then the communication between the PFCs and AIMS is operating normally and no further action is needed. If "CONFIGURATION DATA NOT AVAILABLE" shows on the left and center PFCs, then communication between the PFCs and AIMS is latched out, and must be restored. To restore the interface, continue with SUBTASK 31-42-00-810-475.

### I. PFCS Interface Recovery Procedure - Software Reload

- (1) Make sure that these circuit breakers for the Left Primary Flight Computer are open and attach DO-NOT-CLOSE tags:
  - (a) On the left power supply assembly (PSA-L) in the E1-6 rack:

#### Power Supply Assembly Left, M24101

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>   |
|------------|------------|---------------|---------------|
| D          | 2          | CBD2-L        | PFC LANE 1    |
| D          | 4          | CBD4-L        | PFC LANE 2    |
| D          | 6          | CBD6-L        | PFC LANE 3    |
| D          | 8          | CBD8-L        | PFC BAT INTLK |

- (2) Make sure that these circuit breakers for Center Primary Flight Computer are open and attach DO-NOT-CLOSE tags:

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 298.53  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (a) On the center power supply assembly (PSA-C) in the E2-6 rack

### Power Supply Assembly Center, M24301

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>   |
|------------|------------|---------------|---------------|
| D          | 2          | CBD2-C        | PFC LANE 1    |
| D          | 4          | CBD4-C        | PFC LANE 2    |
| D          | 6          | CBD6-C        | PFC LANE 3    |
| D          | 8          | CBD8-C        | PFC BAT INTLK |

- (3) Make sure that these circuit breakers for the Right Primary Flight Computer are open and attach DO-NOT-CLOSE tags:

- (a) On the right power supply assembly (PSA-R) in the E5-1 rack:

### Power Supply Assembly Right, M24201

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>   |
|------------|------------|---------------|---------------|
| D          | 2          | CBD2-R        | PFC LANE 1    |
| D          | 4          | CBD4-R        | PFC LANE 2    |
| D          | 6          | CBD6-R        | PFC LANE 3    |
| D          | 8          | CBD8-R        | PFC BAT INTLK |

NOTE: The E5-1 rack is immediately aft of the forward cargo door.

- (4) Remove the DO-NOT-CLOSE tags and close these circuit breakers for the Center Primary Flight Computer:

- (a) On the center power supply assembly (PSA-C) in the E2-6 racks:

### Power Supply Assembly Center, M24301

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>   |
|------------|------------|---------------|---------------|
| D          | 2          | CBD2-C        | PFC LANE 1    |
| D          | 4          | CBD4-C        | PFC LANE 2    |
| D          | 6          | CBD6-C        | PFC LANE 3    |
| D          | 8          | CBD8-C        | PFC BAT INTLK |

- (5) Reload software into the Primary Flight Computer:

- (a) Use a maintenance access terminal (MAT) to install software in the PFC.
- (b) If the software is on a diskette set, put the disk No. 1 in the disk drive.
- (c) Make these selections on the MAT:
- 1) ONBOARD MAINTENANCE.
  - 2) EXTENDED MAINTENANCE.
  - 3) DATA LOAD.
- (d) Make these selections to select the component that will receive the software:
- 1) SELECT DESTINATION.
  - 2) 27 PRIMARY FLIGHT CONTROL SYSTEM.
  - 3) Primary Flight Computer (left, center, or right).
  - 4) CONTINUE.
- (e) Make these selections to select the source of the software:
- 1) SELECT SOURCE.

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Select the source of the software (if Disk Drive is the only selection, it is automatically selected).
- 3) Select the software part number from the display.  
NOTE: NOTE: PFC has only one software part number.
- 4) CONTINUE.
- (f) Select START to start the software installation.
- (g) When the software installation is completed, make sure the correct software part number shows on the display.
  - 1) Observe the MAT display for any messages which indicate that the load is stopped.
  - 2) Also observe that the indicator bar (which displays load percentage completed) on the MAT increases approximately once every two minutes.
  - 3) If the data load is stopped before it is completed, then you must install the PFC software again with the first diskette.  
NOTE: You should exit the MAT and then re-enter to start the data load.
- (h) Select CONTINUE to remove the configuration display.
- (i) If the software does not load, replace the Primary Flight Computer. These are the tasks:
  - Primary Flight Computer (PFC) Removal, AMM TASK 27-02-01-000-801.
  - Primary Flight Computer (PFC) Installation, AMM TASK 27-02-01-400-802.NOTE: After replacing the PFC, power down all three PFCs before continuing.
- (6) Make sure that these circuit breakers for the Center Primary Flight Computer are open and attach DO-NOT-CLOSE tags:
  - (a) On the center power supply assembly (PSA-C) in the E2-6 racks:

### Power Supply Assembly Center, M24301

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>   |
|------------|------------|---------------|---------------|
| D          | 2          | CBD2-C        | PFC LANE 1    |
| D          | 4          | CBD4-C        | PFC LANE 2    |
| D          | 6          | CBD6-C        | PFC LANE 3    |
| D          | 8          | CBD8-C        | PFC BAT INTLK |

- (7) Remove the DO-NOT-CLOSE tags and close these circuit breakers for the Right Primary Flight Computer:
  - (a) On the right power supply assembly (PSA-R) in the E5-1 racks:

### Power Supply Assembly Right, M24201

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>   |
|------------|------------|---------------|---------------|
| D          | 2          | CBD2-R        | PFC LANE 1    |
| D          | 4          | CBD4-R        | PFC LANE 2    |
| D          | 6          | CBD6-R        | PFC LANE 3    |
| D          | 8          | CBD8-R        | PFC BAT INTLK |

- (8) Do SUBTASK 31-42-00-810-474 to reload software into the Right Primary Flight Computer.
- (9) Make sure that these circuit breakers for the Right Primary Flight Computer are open and attach DO-NOT-CLOSE tags:

EFFECTIVITY  
ARO ALL

## 31-42 TASK 908

Page 298.55  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (a) On the right power supply assembly (PSA-R) in the E5-1 racks:

### Power Supply Assembly Right, M24201

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>   |
|------------|------------|---------------|---------------|
| D          | 2          | CBD2-R        | PFC LANE 1    |
| D          | 4          | CBD4-R        | PFC LANE 2    |
| D          | 6          | CBD6-R        | PFC LANE 3    |
| D          | 8          | CBD8-R        | PFC BAT INTLK |

NOTE: The E5-1 rack is immediately aft of the forward cargo door.

- (10) Swap the Left PFC (M27106) and the Right PFC (M27206). These are the tasks:

- Primary Flight Computer (PFC) Removal, AMM TASK 27-02-01-000-801
- Primary Flight Computer (PFC) Installation, AMM TASK 27-02-01-400-802.

NOTE: After swapping the PFCs, power down all three PFCs before continuing.

- (11) Remove the DO-NOT-CLOSE tags and close these circuit breakers for the Right Primary Flight Computer:

- (a) On the right power supply assembly (PSA-R) in the E5-1 racks:

### Power Supply Assembly Right, M24201

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>   |
|------------|------------|---------------|---------------|
| D          | 2          | CBD2-R        | PFC LANE 1    |
| D          | 4          | CBD4-R        | PFC LANE 2    |
| D          | 6          | CBD6-R        | PFC LANE 3    |
| D          | 8          | CBD8-R        | PFC BAT INTLK |

NOTE: The E5-1 rack is immediately aft of the forward cargo door.

- (12) Do SUBTASK 31-42-00-810-474 to reload software into the Right Primary Flight Computer.

NOTE: This is the PFC that was originally in the Left PFC position.

- (13) Make sure that these circuit breakers for the Right Primary Flight Computer are open and attach DO-NOT-CLOSE tags:

- (a) On the right power supply assembly (PSA-R) in the E5-1 racks:

### Power Supply Assembly Right, M24201

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u>   |
|------------|------------|---------------|---------------|
| D          | 2          | CBD2-R        | PFC LANE 1    |
| D          | 4          | CBD4-R        | PFC LANE 2    |
| D          | 6          | CBD6-R        | PFC LANE 3    |
| D          | 8          | CBD8-R        | PFC BAT INTLK |

NOTE: The E5-1 rack is immediately aft of the forward cargo door.

- (14) Remove the DO-NOT-CLOSE tags and close these circuit breakers for the Left Primary Flight Computer:

- (a) On the left power supply assembly (PSA-L) in the E1-6 racks:

### Power Supply Assembly Left, M24101

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|

## 909. AIMS No Output on System ARINC 629 Bus - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-68841, 31-68842, 31-68851, 31-68852, 31-68861, 31-68862, 31-68871, 31-68872.

### B. Initial Evaluation

- (1) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.
- (2) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do one of these steps to see if the maintenance message shows a failure:
- (a) Make sure that the ADIRU is on and aligned.
- 1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- 2) If the MAT shows NOT ACTIVE for the maintenance message, then no corrective action is necessary.
- (b) Make sure that the EEC switches are set to the TEST position.

May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable ARINC 629 coupler.  
These are the tasks:  
ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable AIMS module.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring (WDM 31-41-25) (WDM 31-41-26):
  - (a) Remove the applicable ARINC 629 coupler. To remove it, do this task: ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801.
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between the specified pins of the applicable ARINC 629 coupler connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the applicable ARINC 629 coupler. To install it, do this task: ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M00X) in Left(Right) AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable MMR.

These are the tasks:

Receiver for ILS - Removal, AMM TASK 34-31-01-000-801,  
Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable GPS antenna.

These are the tasks:

GPS Antenna Removal, AMM TASK 34-58-02-000-801,  
GPS Antenna Installation, AMM TASK 34-58-02-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this check of the wiring (WDM 34-58-11) (WDM 34-58-21) (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the applicable MMR. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801
  - (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (c) Do a wiring check between the specified pins of the applicable MMR connector and the applicable AIMS module connector.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 3) Re-install the applicable MMR. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801

D633W103-ARO

Page 298.63  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Remove the applicable AIMS module. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
- (c) Do a wiring check between the specified pins of the applicable MMR connector and the applicable AIMS module connector.
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the applicable AIMS module. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
  - 3) Re-install the applicable MMR. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801
- (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 915. AIMS No Input from ELMS Electronics Unit on System ARINC 629 Bus (left) - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-69496, 31-69497, 31-89417, 31-89418, 31-89421, 31-89422.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULES          | SOURCE LRUS   | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|---------------|----------------|----------------|--------------------|
| 31-89417      | IOM(M009)<br>(AIMS-L) | CCU<br>M24502 | LEFT           | B31112<br>P111 | B24107<br>P111     |
| 31-89418      | IOM(M009)<br>(AIMS-R) | CCU<br>M24502 | LEFT           | B31116<br>P111 | B24107<br>P111     |
| 31-69496      | IOM(M009)<br>(AIMS-L) | CCU<br>M24506 | LEFT           | B31112<br>P111 | B24108<br>P111     |
| 31-69497      | IOM(M009)<br>(AIMS-R) | CCU<br>M24506 | LEFT           | B31116<br>P111 | B24108<br>P111     |
| 31-89421      | IOM(M009)<br>(AIMS-L) | CCU<br>M24510 | LEFT           | B31112<br>P111 | B24109<br>P111     |
| 31-89422      | IOM(M009)<br>(AIMS-R) | CCU<br>M24510 | LEFT           | B31116<br>P111 | B24109<br>P111     |

- (2) Do the applicable ground test on the MAT: 31 AIMS - Left(Right) AIMS, System Test, IOM(M009) in Left(Right) AIMS Module Reset.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Replace the applicable AIMS module.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Do a check of the applicable source LRU.
  - (a) CCU in P110, M24502, CCU in P210, M24506, CCU in P310, M24510.  
This is the task:  
Computing and Communication Unit - Exchange Check, AMM TASK 24-09-00-700-802-002.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the applicable ARINC 629 coupler for the AIMS module.  
These are the tasks:  
ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Replace the ARINC 629 coupler for the applicable source LRU.  
These are the tasks:  
ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 916. AIMS No Input from ELMS Electronics Unit on System ARINC 629 Bus (right) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-89617, 31-89618, 31-89619, 31-89620, 31-89621, 31-89622.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS module, source LRU, and ARINC 629 couplers for the applicable maintenance message.

| MAINT MESSAGE | AIMS MODULES          | SOURCE LRUS   | SYSTEM 629 BUS | AIMS COUPLER   | SOURCE LRU COUPLER |
|---------------|-----------------------|---------------|----------------|----------------|--------------------|
| 31-89617      | IOM(M004)<br>(AIMS-L) | CCU<br>M24502 | RIGHT          | B31211<br>P211 | B24207<br>P211     |
| 31-89618      | IOM(M004)<br>(AIMS-R) | CCU<br>M24506 | RIGHT          | B31214<br>P211 | B24207<br>P211     |
| 31-89619      | IOM(M004)<br>(AIMS-L) | CCU<br>M24506 | RIGHT          | B31211<br>P211 | B24208<br>P211     |
| 31-89620      | IOM(M004)<br>(AIMS-R) | CCU<br>M24506 | RIGHT          | B31214<br>P211 | B24208<br>P211     |
| 31-89621      | IOM(M004)<br>(AIMS-L) | CCU<br>M24510 | RIGHT          | B31211<br>P211 | B24209<br>P211     |
| 31-89622      | IOM(M004)<br>(AIMS-R) | CCU<br>M24510 | RIGHT          | B31214<br>P211 | B24209<br>P211     |

- (2) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do a check of the applicable source LRU.
  - (a) CCU in P110, M24502, CCU in P210, M24506, or CCU in P310, M24510.

This is the task:

Computing and Communication Unit - Exchange Check, AMM TASK 24-09-00-700-802-002.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable ARINC 629 coupler for the AIMS module.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

### **918. Left AIMS has no input from Network File Server (Left) on the PlaneNet**

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-70001.

#### **B. Description**

- (1) The Network File Server (NFS) shows this Maintenance Message when PlaneNet communication between the Airplane Information Management System (AIMS)-L, and the NFS is unserviceable.
- (2) Use this task when AIMS EXISTING FAULTS shows Maintenance Message.
  - (a) The fault data for Maintenance Message is: Left AIMS has no input from Network File Server (Left) on the PlaneNet.

#### **C. Possible Causes**

- (1) CPM/Comm(M001) in Left AIMS
- (2) NFS
- (3) Wiring
- (4) Software

#### **D. Related Data**

- (1) WDM 31-41-21
- (2) WDM 46-13-11
- (3) SSM 46-13-11

#### **E. Initial Evaluation**

- (1) Do a check of the AIMS EXISTING FAULTS for ATA 31 AIMS - Left AIMS (How to Find Active or Latched Maintenance Messages in One ATA System, AMM TASK 45-10-00-740-818).
  - (a) If the Maintenance Message does not show, then the fault is intermittent.
  - (b) If the Maintenance Message still shows, then continue.
- (2) Do a check of ONS EXISTING FAULTS (Onboard Network System NFS Message Check, AMM TASK 46-13-00-720-801).

**NOTE:** ONS is serviceable only when the EXISTING FAULTS page shows no Maintenance Messages.

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

ARO 001, 002, 004-999; ARO 003 POST SB 777-31-0263 OR POST SB 777-31-0264 OR POST SB 777-31-0218  
(Continued)

- (2) Make these selections on the MAT to make sure that the Right CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.  
NOTE: You must reset the IOM(M003) from the off-side CMCF and AIMS Interface.
  - (a) If the display shows that the Left CMCF is in control, select SWITCH TO RIGHT, YES, CONTINUE.
    - 1) On the MATA AIMS Main Menu, select Interface R\_AIMS.
    - 2) Select ONBOARD MAINTENANCE.
  - (b) If the display shows that the Right CMCF is in control, then select GO BACK.
    - 1) Select LINE MAINTENANCE, EXIT MAINTENANCE, Interface R\_AIMS.
    - 2) Select ONBOARD MAINTENANCE.
- (3) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.
  - (a) Do the Repair Confirmation procedure at the end of this task.
- (4) Replace the CPM/Comm(M001) module in the Left AIMS cabinet. These are the tasks:
  - Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802
  - Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802
  - (a) Do the Repair Confirmation at the end of this task.

DO NOT TOUCH THE CONNECTOR PINS, OR OTHER CONDUCTORS. IF YOU TOUCH THESE CONDUCTORS, ELECTROSTATIC DISCHARGE CAN CAUSE DAMAGE TO THE COMPONENTS.

- (5) Do this check of the wiring (WDM 46-13-11):  
NOTE: You must remove or electrically disconnect all LRUs on the QAR AUX Data Bus before you do a continuity check. Use the Wiring Diagram Manual (WDM) to tell which LRUs are on the bus. After the check, then re-install or connect the LRUs.
  - (a) Remove the NFS. This is the task: Network File Server Removal, AMM TASK 46-13-01-000-801-001.
  - (b) Isolate the QAR AUX Data Bus at the AIMS-L Cabinet, M31101, at connector D6629.
  - (c) Remove the EFB EU-L, N46102, and EFB EU-R, N46202. This is the task: Electronic Unit Removal, AMM TASK 46-11-03-000-801.
  - (d) Remove the Left Satellite Data Unit, SDU-L, M23106. This is the task: Satellite Data Unit Removal, AMM TASK 23-15-10-000-801.
  - (e) Remove the Ground Proximity Warning Computer (GPWC), M34004. This is the task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

ARO 001, 002, 004-999; ARO 003 POST SB 777-31-0263 OR POST SB 777-31-0264 OR POST SB 777-31-0218  
(Continued)

- (d) Do the Repair Confirmation at the end of this task.
- (7) Do a check of ONS Software. This is the task: Network File Server Software Check, AMM TASK 46-13-01-860-801
  - (a) Make sure that 46 NED OPC is serviceable.
  - (b) Make sure that 46 NFS OPC is serviceable.
  - (c) Make sure the two parts agree with your airline's required software record.  
NOTE: At this step in the process, it is very likely that at least one of the two parts is unserviceable.
    - 1) If you find a problem, then install the correct software part (Network File Server Software Installation, AMM TASK 46-13-01-470-801).
  - (d) Do the Repair Confirmation at the end of this task.
- (8) Replace the NFS. These are the tasks:
  - Network File Server Removal, AMM TASK 46-13-01-000-801-001
  - Network File Server Installation, AMM TASK 46-13-01-400-801-001
- (a) Do the Repair Confirmation at the end of this task.

### G. Repair Confirmation

- (1) Do a check of the AIMS EXISTING FAULTS for ATA 31 AIMS - Left AIMS (How to Find Active or Latched Maintenance Messages in One ATA System, AMM TASK 45-10-00-740-818).
  - (a) If the Maintenance Message does not show, then you corrected the problem.
  - (b) If the Maintenance Message still shows, continue the Fault Isolation Procedure at the subsequent step.

————— END OF TASK —————

### 919. Right AIMS has no input from Network File Server (Left) on the PlaneNet

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-70002.

#### B. Description

- (1) The NFS shows this Maintenance Message when PlaneNet communication between the AIMS-R, and the NFS is unserviceable.
- (2) Use this task when AIMS EXISTING FAULTS shows Maintenance Message.
  - (a) The fault data for Maintenance Message is: Right AIMS has no input from Network File Server (Left) on the PlaneNet.

#### C. Possible Causes

- (1) CPM/Comm(M001) in Right AIMS
- (2) NFS
- (3) Wiring
- (4) Software

## 777-200/300 FAULT ISOLATION MANUAL

ARO 001, 002, 004-999; ARO 003 POST SB 777-31-0263 OR POST SB 777-31-0264 OR POST SB 777-31-0218  
(Continued)

### D. Related Data

- (1) WDM 31-41-21
- (2) WDM 46-13-11
- (3) SSM 46-13-11

### E. Initial Evaluation

- (1) Do a check of the AIMS EXISTING FAULTS for ATA 31 AIMS - Right AIMS (How to Find Active or Latched Maintenance Messages in One ATA System, AMM TASK 45-10-00-740-818).
  - (a) If the Maintenance Message does not show, then the fault is intermittent.
  - (b) If the Maintenance Message still shows, then continue.
- (2) Do a check of ONS EXISTING FAULTS (Onboard Network System NFS Message Check, AMM TASK 46-13-00-720-801).

**NOTE:** ONS is serviceable only when the EXISTING FAULTS page shows no Maintenance Messages.

- (a) Set the browser to show EXTENDED MAINTENANCE > EXISTING FAULTS > ATA SYSTEM > "46 Onboard Network System" > FAULTS.
  - 1) If you find active Maintenance Messages, then do the FIM Tasks for the messages that show.
    - a) After you correct the ONS related problems, exit and re-enter the AIMS EXISTING FAULTS page.
    - b) If the Maintenance Message still shows, then do the Fault Isolation Procedure.

### F. Fault Isolation Procedure

- (1) Make sure that these circuit breakers are closed:

Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

ARO 001, 002, 004-999; ARO 003 POST SB 777-31-0263 OR POST SB 777-31-0264 OR POST SB 777-31-0218  
(Continued)

This circuit breaker is inoperative and should remain open:

### Right Power Management Panel, P210

| Row | Col | Number | Name |
|-----|-----|--------|------|
|-----|-----|--------|------|

ARO 014-999

|   |    |        |                |
|---|----|--------|----------------|
| B | 11 | C46419 | NFS - R (INOP) |
|---|----|--------|----------------|

ARO 001, 002, 004-999; ARO 003 POST SB 777-31-0263 OR POST SB 777-31-0264 OR POST SB 777-31-0218

- (a) If you closed the breaker, do a check of the AIMS EXISTING FAULTS for ATA 31 AIMS - Right AIMS (How to Find Active or Latched Maintenance Messages in One ATA System, AMM TASK 45-10-00-740-818).
  - 1) If the Maintenance Message does not show, then you corrected the problem.
  - 2) If the Maintenance Message still shows, then continue.
- (2) Make these selections on the MAT to make sure that the Left CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.

**NOTE:** You must reset the IOM(M003) from the off-side CMCF and AIMS Interface.

  - (a) If the display shows that the Right CMCF is in control, select SWITCH TO LEFT, YES, CONTINUE.
    - 1) On the MATA AIMS Main Menu, select Interface L\_AIMS.
    - 2) Select ONBOARD MAINTENANCE.
  - (b) If the display shows that the Left CMCF is in control, then select GO BACK.
    - 1) Select LINE MAINTENANCE, EXIT MAINTENANCE, Interface L\_AIMS.
    - 2) Select ONBOARD MAINTENANCE.
- (3) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
  - (a) Do the Repair Confirmation procedure at the end of this task.
- (4) Replace the CPM/Comm(M001) module in the Right AIMS cabinet. These are the tasks:
  - Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802
  - Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802
  - (a) Do the Repair Confirmation at the end of this task.

**CAUTION**

DO NOT TOUCH THE CONNECTOR PINS, OR OTHER CONDUCTORS. IF YOU TOUCH THESE CONDUCTORS, ELECTROSTATIC DISCHARGE CAN CAUSE DAMAGE TO THE COMPONENTS.

- (5) Do this check of the wiring (WDM 46-13-11):

**NOTE:** You must remove or electrically disconnect all LRUs on the QAR AUX Data Bus before you do a continuity check. Use the WDM to tell which LRUs are on the bus. After the check, then re-install or connect the LRUs.

**777-200/300**  
**FAULT ISOLATION MANUAL**

**801. CPM/Comm(M001) In AIMS-L Internal Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51015, 31-51017.

**B. Fault Isolation Procedure**

- (1) Replace the CPM/Comm(M001) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**802. CPM/Comm(M001) In AIMS-R Internal Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51016, 31-51018.

**B. Fault Isolation Procedure**

- (1) Replace the CPM/Comm(M001) in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**803. CPM/ACMF(M002) or CPM/STD(M002) In AIMS-L Internal Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51025, 31-51027.

**B. Fault Isolation Procedure**

- (1) Replace the CPM/STD(M002) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

**805. CPM/GG(M010) In AIMS-L Internal Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51035, 31-51037.

**B. Fault Isolation Procedure**

- (1) Replace the CPM/GG(M010) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**806. CPM/GG(M010) In AIMS-R Internal Fault - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-51036, 31-51038.

**B. Fault Isolation Procedure**

- (1) Replace the CPM/GG(M010) in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 807. CPM/GG(M011) In AIMS-L Internal Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51045, 31-51047.

#### B. Fault Isolation Procedure

- (1) Replace the CPM/GG(M011) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 808. CPM/GG(M011) In AIMS-R Internal Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-51046, 31-51048.

#### B. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the CPM/GG(M011) in the right AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM  
TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 809. AIMS-L Output Fault On Left General Purpose #1 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-52501.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.

EFFECTIVITY  
ARO ALL

## 31-43 TASKS 807-809

D633W103-ARO

Page 203  
May 05/2013

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the ground proximity warning computer (GPWC), M34004. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
- (c) Do a wiring check between these pins of connector DM34004AB at the E1-4 shelf and connector J240-Bin the left AIMS cabinet (WDM 31-41-21) (SSM 31-41-03):

| <b>DM34004AB</b>  | <b>J240-B</b> |
|-------------------|---------------|
| pin C12 . . . . . | pin F11       |
| pin D12 . . . . . | pin G12       |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
- (4) Do this check of the wiring:
- (a) Remove the left satellite data unit (SDU), M23106. To remove it, do this task: Satellite Data Unit Removal, AMM TASK 23-15-10-000-801.
- (b) Do a wiring check between these pins of connector DM23106AB at the E11-1 shelf and connector J240-B in the left AIMS cabinet (WDM 31-41-21) (SSM 31-41-03):

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
    - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
    - (b) Remove the left radio tuning panel (RTP), M23005. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
    - (c) Do a wiring check between these pins of connector DM23005 at the aisle stand panel, P8 and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

| DM23005      | J240-A  |
|--------------|---------|
| pin 14 ..... | pin F13 |
| pin 15 ..... | pin G14 |

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the left RTP, M23005. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
    - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the left RTP, M23005. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
  - (4) Do this check of the wiring:
    - (a) Remove the right RTP, M23006. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
    - (b) Do a wiring check between these pins of connector DM23006 at the P8 panel and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

## 777-200/300 FAULT ISOLATION MANUAL

|                |               |
|----------------|---------------|
| <b>DM23006</b> | <b>J240-A</b> |
| pin 14 .....   | pin F13       |
| pin 15 .....   | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the right RTP, M23006. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the right RTP, M23006. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
- (6) Do this check of the wiring:
  - (a) Remove the center RTP, M23007. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
  - (b) Do a wiring check between these pins of connector DM23007 at the P8 panel and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

|                |               |
|----------------|---------------|
| <b>DM23007</b> | <b>J240-A</b> |
| pin 14 .....   | pin F13       |
| pin 15 .....   | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the center RTP, M23007. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (7) Re-install the center RTP, M23007. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
- (8) Do this check of the wiring:
  - (a) Remove the rudder trim indicator, N27003. To remove it, do this task: Rudder Trim Indicator Removal, AMM TASK 27-21-09-000-801.
  - (b) Do a wiring check between these pins of connector DN27003 at the P8 panel and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

|                |               |
|----------------|---------------|

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the rudder trim indicator, N27003. To install it, do this task: Rudder Trim Indicator Installation, AMM TASK 27-21-09-400-801.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (9) Re-install the rudder trim indicator, N27003. To install it, do this task: Rudder Trim Indicator Installation, AMM TASK 27-21-09-400-801.
- (10) Do this check of the wiring:
- (a) Remove the left stabilizer position indicator, N27001. To remove it, do this task: Stabilizer Position Indicator Removal, AMM TASK 27-48-02-000-801.
  - (b) Do a wiring check between these pins of connector DN27001 at the P10 panel and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

| <b>DN27001</b>  | <b>J240-A</b> |
|-----------------|---------------|
| pin 8 . . . . . | pin F13       |
| pin 9 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the left stabilizer position indicator, N27001. To install it, do this task: Stabilizer Position Indicator Installation, AMM TASK 27-48-02-400-801.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (11) Re-install the left stabilizer position indicator, N27001. To install it, do this task: Stabilizer Position Indicator Installation, AMM TASK 27-48-02-400-801.
- (12) Do this check of the wiring:
- (a) Remove the left autothrottle servo motor (ASM), M22105. To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - (b) Do a wiring check between these pins of connector DM22105 at the P10 panel and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

| <b>DM22105</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 6 . . . . .  | pin F13       |
| pin 16 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.

## 777-200/300 FAULT ISOLATION MANUAL

- (17) Do this check of the wiring:
- Remove the cockpit voice recorder (VCR), M23001. To remove it, do this task: Cockpit Voice Recorder Removal, AMM TASK 23-71-01-000-801.
  - Do a wiring check between these pins of connector DM23001 and connector J240-A in the left AIMS cabinet (SSM 31-41-03) (WDM 31-41-22):

| <b>DM23001</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 26 . . . . . | pin F13       |
| pin 25 . . . . . | pin G14       |
  - If you find a problem with the wiring, then do these steps:
    - Repair the wiring.
    - Re-install the CVR, M23001. To install it, do this task: Cockpit Voice Recorder Installation, AMM TASK 23-71-01-400-801.
    - Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - If you do not find a problem with the wiring, then continue.
- (18) Re-install the CVR, M23001. To install it, do this task: Cockpit Voice Recorder Installation, AMM TASK 23-71-01-400-801.
- (19) Do this check of the wiring:
- Remove the left weather radar transceiver (WXR xcvr), M34116. To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
  - Do a wiring check between these pins of connector DM34116AB at STA 142, WL 168, BL 0 and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

| <b>DM34116AB</b> | <b>J240-A</b> |
|------------------|---------------|
| pin B3 . . . . . | pin F13       |
| pin B4 . . . . . | pin G14       |
  - If you find a problem with the wiring, then do these steps:
    - Repair the wiring.
    - Re-install the left WXR xcvr, M34116. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
    - Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - If you do not find a problem with the wiring, then continue.
- (20) Re-install the left WXR xcvr, M34116. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
- (21) Do this check of the wiring:
- Remove the right WXR xcvr, M34216. To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.

D633W103-ARO

Page 213  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Do a wiring check between these pins of connector DM34216AB at STA 155, WL 168, RBL 21 and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

| <b>DM34216AB</b> | <b>J240-A</b> |
|------------------|---------------|
| pin B3 .....     | pin F13       |
| pin B4 .....     | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the right WXR xcvr, M34216. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (22) Re-install the right WXR xcvr, M34216. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.

### — END OF TASK —

#### 814. AIMS-R Output Fault On Right General Purpose #2 Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-52532.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

EFFECTIVITY  
ARO ALL

Page 214  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Do this check of the wiring:
- (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the left radio tuning panel (RTP), M23005. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
  - (c) Do a wiring check between these pins of connector DM23005 at the aisle stand panel, P8 and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| <b>DM23005</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 16 . . . . . | pin F13       |
| pin 17 . . . . . | pin G14       |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the left RTP, M23005. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
  - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the left RTP, M23005. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the right RTP, M23006. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
  - (b) Do a wiring check between these pins of connector DM23006 at the P8 panel and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| <b>DM23006</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 16 . . . . . | pin F13       |
| pin 17 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the right RTP, M23006. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
  - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the right RTP, M23006. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
- (6) Do this check of the wiring:

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the right stabilizer position indicator, N27002. To install it, do this task: Stabilizer Position Indicator Installation, AMM TASK 27-48-02-400-801.
  - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (11) Re-install the right stabilizer position indicator, N27002. To install it, do this task: Stabilizer Position Indicator Installation, AMM TASK 27-48-02-400-801.
- (12) Do this check of the wiring:
- (a) Remove the left autothrottle servo motor (ASM), M22105. To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - (b) Do a wiring check between these pins of connector DM22105 at the P10 panel and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

### DN22105

### J240-A

pin 4 ..... pin F13  
pin 14 ..... pin G14

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the left ASM, M22105. To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
  - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (13) Re-install the left ASM, M22105. To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
- (14) Do this check of the wiring:
- (a) Remove the right ASM, M22205. To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - (b) Do a wiring check between these pins of connector DM22205 at the P10 panel and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the left ATC/Mode S transponder (ATC transponder), M34107. To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
- (c) Do a wiring check between these pins of connector DM34107AA at the E1-3 shelf and connector J240-A in the left AIMS cabinet (WDM 31-41-21) (SSM 31-41-03):

| <b>DM34107AA</b> | <b>J240-A</b> |
|------------------|---------------|
| pin H7 . . . . . | pin F11       |
| pin J7 . . . . . | pin G12       |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the left ATC transponder, M34107. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
- 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the left ATC transponder, M34107. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
- (4) Do this check of the wiring:
- (a) Remove the right ATC/Mode S transponder (ATC transponder), M34207. To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
- (b) Do a wiring check between these pins of connector DM34207AB at the E2-3 shelf and connector J240-A in the left AIMS cabinet (WDM 31-41-21) (SSM 31-41-03):

| <b>DM34207AB</b> | <b>J240-A</b> |

| pin 18       | ..... | pin F13       |
| pin 19       | ..... | pin G14       |
    - (d) Repair any wiring problems you find.
    - (e) Re-connect connector D6617.
    - (f) Re-install the IOM(M004) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - (g) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 819. AIMS-R Output Fault On Spare Bus (Connector D6717, Pins 18 and 19) - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-54532.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Disconnect connector D6717 at the right AIMS cabinet.
- (c) Do a wiring check between these pins of connector D6717 at the E2-1 shelf and connector J250-A in the right AIMS cabinet:
- | <b>D6717</b>     | <b>J250-A</b> |
|------------------|---------------|
| pin 18 . . . . . | pin F13       |
| pin 19 . . . . . | pin G14       |
- (d) Repair any wiring problems you find.
- (e) Re-connect connector D6717.
- (f) Re-install the IOM(M004) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (g) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 820. AIMS-L Output Fault On CMCS-R Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-54541.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the left VHF communication transceiver (VHF comm xcvr), M23103. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
- (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of connector DM23103AB at the E1-3 shelf and connector J250-A in the left AIMS cabinet (WDM 45-45-21) (SSM 31-41-03):

| <b>DM23103AB</b> | <b>J250-A</b> |
|------------------|---------------|
| pin C6 . . . . . | pin F11       |
| pin D6 . . . . . | pin G12       |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the IOM(M004) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the left VHF comm xcvr, M23103. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (e) If you do not find a problem with the wiring, then continue.

- (3) Re-install the left VHF comm xcvr, M23103. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.

- (4) Do this check of the wiring:

- (a) Remove the center VHF comm xcvr, M23303. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
- (b) Do a wiring check between these pins of connector DM23303AB at the E1-2 shelf and connector J250-A in the left AIMS cabinet (WDM 45-45-21) (SSM 31-41-03):

| <b>DM23303AB</b> | <b>J250-A</b> |
|------------------|---------------|
| pin C6 . . . . . | pin F11       |
| pin D6 . . . . . | pin G12       |

Page 227  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M004) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the center VHF comm xcvr, M23303. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the center VHF comm xcvr, M23303. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- (6) Do this check of the wiring:
- (a) Remove the right VHF comm xcvr, M23203. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - (b) Do a wiring check between these pins of connector DM23203AB at the E2-3 shelf and connector J250-A in the left AIMS cabinet (WDM 45-45-21) (SSM 31-41-03):

| <b>DM23203AB</b> |       | <b>J250-A</b> |  |
|------------------|-------|---------------|--|
| pin C6           | ..... | pin F11       |  |
| pin D6           | ..... | pin G12       |  |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M004) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right VHF comm xcvr, M23203. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (7) Re-install the right VHF comm xcvr, M23203. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- (8) Do this check of the wiring:
- (a) Remove the right VOR/MB receiver, M34215. To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34215AB at the E2-3 shelf and connector J250-A in the left AIMS cabinet (WDM 45-45-21) (SSM 31-41-03):

| <b>DM34215AB</b> |       | <b>J250-A</b> |  |
|------------------|-------|---------------|--|
| pin B14          | ..... | pin F11       |  |
| pin C14          | ..... | pin G12       |  |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (a) Remove the right HF communication transceiver (HF comm xcvr), M23201. To remove it, do this task: HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801.
- (b) Do a wiring check between these pins of connector DM23201AB at the E6-1 shelf and connector J250-A in the left AIMS cabinet (WDM 45-45-21) (SSM 31-41-03):

| <b>DM23201AB</b> | <b>J250-A</b> |
|------------------|---------------|
| pin A4 . . . . . | pin F11       |
| pin B4 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M004) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right HF comm xcvr, M23201. To install it, do this task: HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (23) Re-install the right HF comm xcvr, M23201 To install it, do this task: HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801.
- (24) Do this check of the wiring:
  - (a) Remove the right weather radar transceiver (WXR xcvr), M34216. To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
  - (b) Do a wiring check between these pins of connector DM34116AB at STA 155, WL 168, RBL 21 and connector J250-A in the left AIMS cabinet (WDM 45-45-21) (SSM 31-41-03):

| <b>DM34216AB</b> | <b>J250-A</b> |

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace IOM(M004) in the right AIMS cabinet.

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the right VOR/MB receiver, M34215. To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
  - (c) Do a wiring check between these pins of connector DM34215AB at the E2-3 shelf and connector J250-A in the right AIMS cabinet (WDM 34-61-12) (SSM 31-41-06):

| <b>DM34215AB</b>  | <b>J250-A</b> |
|-------------------|---------------|
| pin B11 . . . . . | pin F11       |
| pin C11 . . . . . | pin G12       |
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M004) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right VOR/MB receiver, M34215. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the right VOR/MB receiver, M34215. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (4) Do this check of the wiring:
- Remove the right multi-mode receiver (MMR), M34510. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - Do a wiring check between these pins of connector DM34510AB at the E2-3 shelf and connector J250-A in the right AIMS cabinet (WDM 34-61-12) (SSM 31-41-06):

| <b>DM34510AB</b> | <b>J250-A</b> |
|------------------|---------------|
| pin J1 . . . . . | pin F11       |
| pin K1 . . . . . | pin G12       |
  - If you find a problem with the wiring, then do these steps:
    - Repair the wiring.
    - Re-install the IOM(M004) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - Re-install the right MMR, M34510. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
    - If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - If you do not find a problem with the wiring, then continue.
- (5) Re-install the right MMR, M34510. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
- (6) Do this check of the wiring:
- Remove the right ADF receiver, M34208. To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - Do a wiring check between these pins of connector DM34208AB at the E2-3 shelf and connector J250-A in the right AIMS cabinet (WDM 34-61-12) (SSM 31-41-06):

| <b>DM34208AB</b> | <b>J250-A</b> |
|------------------|---------------|
| pin B7 . . . . . | pin F11       |
| pin B8 . . . . . | pin G12       |
  - If you find a problem with the wiring, then do these steps:
    - Repair the wiring.
    - Re-install the IOM(M004) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - Re-install the right ADF receiver, M34208. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
    - If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - If you do not find a problem with the wiring, then continue.
- (7) Re-install the right ADF receiver, M34208. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
- (8) Do this check of the wiring:
- Remove the right DME interrogator, M34209. To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.

| pin C2           | pin A19       |
| pin D2           | pin B19       |

- (d) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the left VHF comm xcvr, M23103. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (e) If you do not find a problem with the wiring, then continue.

- (3) Re-install the left VHF comm xcvr, M23103. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.

- (4) Do this check of the wiring:

- (a) Remove the TCAS computer, M34006. To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.

- (b) Do a wiring check between these pins of connector DM34006AE at the E1-2 shelf and connector J410-B in the left AIMS cabinet (WDM 31-41-33) (SSM 31-41-03):

| <b>DM34006AE</b> | <b>J410-B</b> |

These are the tasks:

WXR Transceiver Removal, AMM TASK 34-43-02-000-801,

WXR Transceiver Installation, AMM TASK 34-43-02-400-801.

- (b) Do a wiring check between these pins of connector DM34116AB at the STA 142, WL 168, BL 0 and connector J410-A in the left AIMS cabinet (WDM 31-41-31) (SSM 31-41-03):

| <b>DM34116AB</b>  | <b>J410-A</b> |
|-------------------|---------------|
| pin J11 . . . . . | pin F13       |
| pin J12 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the left WEATHER RADAR Transceiver, M34116. To install it,

These are the tasks:

WXR Transceiver Installation, AMM TASK 34-43-02-400-801,

WXR Transceiver Removal, AMM TASK 34-43-02-000-801.

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (d) If you do not find a problem with the wiring, then continue.

- (7) Re-install the left WEATHER RADAR Transceiver, M34116. To install it,

These are the tasks:

WXR Transceiver Installation, AMM TASK 34-43-02-400-801,

WXR Transceiver Removal, AMM TASK 34-43-02-000-801.

- (8) Do this check of the wiring:

- (a) Remove the left satellite data unit (SDU), M23106. To remove it, do this task: Satellite Data Unit Removal, AMM TASK 23-15-10-000-801.

- (b) Do a wiring check between these pins of connector DM23106AB at the E11-1 shelf and connector J410-A in the left AIMS cabinet (WDM 31-41-31) (SSM 31-41-03):

| <b>DM23106AB</b> | <b>J410-A</b> |
|------------------|---------------|
| pin A6 . . . . . | pin F13       |
| pin B6 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the left SDU, M23106. To install it, do this task: Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (d) If you do not find a problem with the wiring, then continue.

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 241  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (9) Re-install the left SDU, M23106. To install it, do this task: Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.
- (10) Do this check of the wiring:
- (a) Remove the left multi-mode receiver (MMR), M34410. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
- (b) Do a wiring check between these pins of connector DM34410AB on shelf E1-2 and connector J410-A in the left AIMS cabinet (WDM 31-41-31) (SSM 31-41-03):

| <b>DM34410AB</b> | <b>J410-A</b> |
|------------------|---------------|
| pin A8 . . . . . | pin F13       |
| pin B8 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left MMR, M34410. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (11) Re-install the left MMR, M34410. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
- (12) Do this check of the wiring:
- (a) Remove the right WEATHER RADAR Transceiver, M34216. To remove it, These are the tasks:  
WXR Transceiver Removal, AMM TASK 34-43-02-000-801,  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
- (b) Do a wiring check between these pins of connector DM34216AB at the STA 155, WL 168, RBL 21 and connector J410-A in the left AIMS cabinet (WDM 31-41-31) (SSM 31-41-03):

| <b>DM34216AB</b>  | <b>J410-A</b> |
|-------------------|---------------|
| pin G13 . . . . . | pin F13       |
| pin G12 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right WEATHER RADAR Transceiver, M34216. To install it, These are the tasks:  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801,  
WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (d) If you do not find a problem with the wiring, then continue.
- (13) Re-install the right WEATHER RADAR Transceiver, M34216. To install it, These are the tasks:  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801,  
WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
- (14) Do this check of the wiring:
- (a) Remove the right multi-mode receiver (MMR), M34510. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
- (b) Do a wiring check between these pins of connector DM34510AB on shelf E2-3 and connector J410-A in the left AIMS cabinet (WDM 31-41-31) (SSM 31-41-03):
- | DM34510AB        | J410-A  |
|------------------|---------|
| pin A8 . . . . . | pin F13 |
| pin B8 . . . . . | pin G14 |
- (c) Repair any wiring problems you find.
- (d) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) Re-install the right MMR, M34510. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
- (f) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### ———— END OF TASK ————

## 825. AIMS-R Output Fault On Right Inertial Reference Bus - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-56532.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the ground proximity warning computer (GPWC), M34004. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
  - (c) Do a wiring check between these pins of connector DM34004AB at the E1-4 shelf and connector J410-A in the right AIMS cabinet (WDM 31-41-31) (SSM 31-41-06):

| <b>DM34004AB</b> | <b>J410-A</b> |
|------------------|---------------|
| pin C10 .....    | pin F13       |
| pin D10 .....    | pin G14       |

- (d) If you find a problem with the wiring, then do these steps:
      - 1) Repair the wiring.
      - 2) Re-install the IOM(M008) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
      - 3) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
      - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - (e) If you do not find a problem with the wiring, then continue.
  - (3) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
  - (4) Do this check of the wiring:

- (a) Do a wiring check between these pins of connector DM23080AA at the E2-4 shelf and connector J410-A in the right AIMS cabinet (WDM 31-41-32) (SSM 31-41-06):

| <b>DM23080AA</b> | <b>J410-A</b> |
|------------------|---------------|
| pin 34 .....     | pin F13       |
| pin 35 .....     | pin G14       |

- (b) If you find a problem with the wiring, then do these steps:
        - 1) Repair the wiring.
        - 2) Re-install the IOM(M008) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
        - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
      - (c) If you do not find a problem with the wiring, then continue.
    - (5) Do this check of the wiring:
      - (a) Remove the left satellite data unit (SDU), M23106. To remove it, do this task: Satellite Data Unit Removal, AMM TASK 23-15-10-000-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (c) Repair any wiring problems you find.
- (d) Re-install the IOM(M008) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) Re-install the right MMR, M34510. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
- (f) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 826. AIMS-L Output Fault On Center CMCS Cabinet Bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-56541.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M008) in the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the center radio altimeter transceiver (RA xcvr), M34312. To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - (c) Do a wiring check between these pins of connector DM34312AB at the E5-3 shelf and connector J410-A in the left AIMS cabinet (WDM 45-45-31) (SSM 31-41-03):

## 777-200/300 FAULT ISOLATION MANUAL

### DM34004AA

pin A9 ..... pin F11  
pin B9 ..... pin G12

### J410-A

- (d) Repair any wiring problems you find.
- (e) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (f) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
- (g) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

## 827. AIMS-R Output Fault On Center NAV Tuning Cross Cabinet Bus - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-56542.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M008) in the right AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the center multi-mode receiver (MMR), M34610. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.

- 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the center VHF comm xcvr, M23303. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the center VHF comm xcvr, M23303. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- (6) Do this check of the wiring:
- (a) Remove the left satellite data unit (SDU), M23106. To remove it, do this task: Satellite Data Unit Removal, AMM TASK 23-15-10-000-801.
  - (b) Do a wiring check between these pins of connector DM23106AB at the E11-1 shelf and connector J420-A in the right AIMS cabinet (WDM 23-27-12) (SSM 31-41-06):

### DM23106AB

### J420-A

|        |       |         |
|--------|-------|---------|
| pin G3 | ..... | pin F13 |
| pin H3 | ..... | pin G14 |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left SDU, M23106. To install it, do this task: Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (7) Re-install the left SDU, M23106. To install it, do this task: Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.
- (8) Do this check of the wiring:
- (a) Remove the right ATC/Mode S transponder (ATC transponder), M34207. To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34207AA at the E2-3 shelf and connector J420-A in the right AIMS cabinet (WDM 23-27-12) (SSM 31-41-06):

### DM34207AA

**777-200/300  
FAULT ISOLATION MANUAL**

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right ATC transponder, M34207. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (9) Re-install the right ATC transponder, M34207. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
- (10) Do this check of the wiring:
  - (a) Remove the flight deck printer, M31004. To remove it, do this task: Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801.
  - (b) Do a wiring check between these pins of connector DM31004A at STA 198, WL 217, BL 0 in the flight compartment and connector J420-A in the right AIMS cabinet (WDM 23-27-12) (SSM 31-41-06):

| <b>DM31004A</b> | <b>J420-A</b> |
|-----------------|---------------|
| pin Z . . . . . | pin F13       |
| pin Y . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the flight deck printer, M31004. To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (11) Re-install the flight deck printer, M31004. To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.
- (12) Do this check of the wiring:
  - (a) Do a wiring check between these pins of connector DM23443AA at the E15 shelf and connector J420-A in the right AIMS cabinet (WDM 23-27-12) (SSM 31-41-06):

| <b>DM23443AA</b> | <b>J420-A</b> |
|------------------|---------------|
| pin 56 . . . . . | pin F13       |
| pin 57 . . . . . | pin G14       |

- (b) Repair any wiring problems you find.
- (c) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (d) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 833. AIMS-L Output Fault On CMCS-L Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-58541.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the left VHF communication transceiver (VHF comm xcvr), M23103. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
- (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (c) Do a wiring check between these pins of connector DM23103AB at the P1-3 panel and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):
- | DM23103AB | J420-A  |
|-----------|---------|
| pin A6    | pin F11 |
| pin B6    | pin G12 |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

Sep 05/2016

**777-200/300  
FAULT ISOLATION MANUAL**

- 3) Re-install the left VHF comm xcvr, M23103. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the left VHF comm xcvr, M23103. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the right VHF comm xcvr, M23203. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - (b) Do a wiring check between these pins of connector DM23203AB at the E2-3 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| <b>DM23203AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin A6 . . . . . | pin F11       |
| pin B6 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right VHF comm xcvr, M23203. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the right VHF comm xcvr, M23203. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- (6) Do this check of the wiring:
  - (a) Remove the center VHF comm xcvr, M23303. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - (b) Do a wiring check between these pins of connector DM23303AB at the E1-2 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| <b>DM23303AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin A6 . . . . . | pin F11       |
| pin B6 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the center VHF comm xcvr, M23303. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

D633W103-ARO

Page 261  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

(12) Do this check of the wiring:

- (a) Remove the flight deck printer, M31004. To remove it, do this task: Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801.
- (b) Do a wiring check between these pins of connector DM31004A at STA 198, WL 217, BL 0 in the flight compartment and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| <b>DM31004A</b> | <b>J420-A</b> |
|-----------------|---------------|
| pin K . . . . . | pin F11       |
| pin M . . . . . | pin G12       |

(c) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the flight deck printer, M31004. To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

(d) If you do not find a problem with the wiring, then continue.

(13) Re-install the flight deck printer, M31004. To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.

(14) Do this check of the wiring:

- (a) Remove the left window heat control unit (WHCU), M30101. To remove it, do this task: Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801.
- (b) Do a wiring check between these pins of connector DM30101AB at the E1-1 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| <b>DM30101AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin 25 . . . . . | pin F11       |
| pin 26 . . . . . | pin G14       |

(c) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the left WHCU, M30101. To install it, do this task: Window Heat Control Unit Installation, AMM TASK 30-41-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

(d) If you do not find a problem with the wiring, then continue.

(15) Re-install the left WHCU, M30101. To install it, do this task: Window Heat Control Unit Installation, AMM TASK 30-41-01-400-801.

(16) Do this check of the wiring:

- (a) Remove the left radio altimeter transceiver (RA xcvr), M34112. To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.

### J420-A

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left VOR/MB receiver, M34115. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (23) Re-install the left VOR/MB receiver, M34115. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
- (24) Do this check of the wiring:
- (a) Remove the left multi-mode receiver (MMR), M34410. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34410AB at the E1-2 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

### DM34410AB

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left MMR, M34410. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (25) Re-install the left MMR, M34410. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
- (26) Do this check of the wiring:
- (a) Remove the left ADF receiver, M34108. To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34108AB at the E1-2 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| <b>DM34108AB</b>  | <b>J420-A</b> |
|-------------------|---------------|
| pin A14 . . . . . | pin F11       |
| pin A15 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left ADF receiver, M34108. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (27) Re-install the left ADF receiver, M34108. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
- (28) Do this check of the wiring:
- (a) Remove the left DME interrogator, M34109. To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34109AB at the E1-2 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| <b>DM34109AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin E6 . . . . . | pin F11       |
| pin F6 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left DME interrogator, M34109. To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (29) Re-install the left DME interrogator, M34109. To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801.
- (30) Do this check of the wiring:
- (a) Remove the left ATC/Mode S transponder (ATC transponder), M34107. To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34107AB at the E1-3 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| DM34107AB        | J420-A  |
|------------------|---------|
| pin A6 . . . . . | pin F11 |
| pin B6 . . . . . | pin G12 |

- (c) Repair any wiring problems you find.
- (d) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (e) Re-install the left ATC transponder, M34107. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
- (f) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 834. AIMS-R Output Fault On Left Nav Tuning Bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-58542.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M009) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

## 777-200/300 FAULT ISOLATION MANUAL

- (1) Replace IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (2) Do this check of the wiring:

- (a) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.

- (b) Remove the left VOR/MB receiver, M34115. To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.

- (c) Do a wiring check between these pins of connector DM34115AB at the E1-3 shelf and connector J420-A in the right AIMS cabinet (WDM 34-61-11) (SSM 31-41-06):

| <b>DM34115AB</b>  | <b>J420-A</b> |
|-------------------|---------------|
| pin B11 . . . . . | pin F11       |
| pin C11 . . . . . | pin G12       |

- (d) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the IOM(M009) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the left VOR/MB receiver, M34115. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (e) If you do not find a problem with the wiring, then continue.

- (3) Re-install the left VOR/MB receiver, M34115. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.

- (4) Do this check of the wiring:

- (a) Remove the left multi-mode receiver (MMR), M34410. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.

- (b) Do a wiring check between these pins of connector DM34410AB at the E1-2 shelf and connector J420-A in the right AIMS cabinet (WDM 34-61-11) (SSM 31-41-06):

| <b>DM34410AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin J1 . . . . . | pin F11       |
| pin K1 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the IOM(M009) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

### 835. AIMS-L (M008, M010, M011) Internal Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-61041.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the CPM/GG(M010) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the CPM/GG(M011) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### **841. DCGF In AIMS-L Internal Software Fault - Fault Isolation**

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-61071.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Do this ground test on the MAT:
  - (a) 31 AIMS - Left AIMS, System Test, CPM/GG(M010) in Left AIMS Module Reset.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this ground test on the MAT:
  - (a) 31 AIMS - Left AIMS, System Test, CPM/GG(M011) in Left AIMS Module Reset.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### **842. DCGF In AIMS-R Internal Software Fault - Fault Isolation**

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-61072.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Do this ground test on the MAT:
  - (a) 31 AIMS - Right AIMS, System Test, CPM/GG(M010) in Right AIMS Module Reset.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (c) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this ground test on the MAT:
  - (a) 31 AIMS - Right AIMS, System Test, CPM/GG(M011) in Right AIMS Module Reset.

### 843. DCGF-2 In AIMS-L Incorrect Software Configuration - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-62011.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS
- (a) Find CPM/STD (M002) in Left AIMS on the display and make sure that the software part numbers are correct.
- (b) If a part number is incorrect, install software in the CPM/STD (M002) in the left AIMS cabinet. To install the software, do this task: Core Processor Module/Standard Software Installation, AMM TASK 31-41-05-420-801.
- (2) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS
- (a) Find CPM/Comm(M001) in Left AIMS on the display and make sure that the software part numbers are correct.
- (b) If a part number is incorrect, install software in the CPM/Comm(M001) in the left AIMS cabinet. To install the software, do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.

————— END OF TASK —————

### 844. DCGF-2 In AIMS-R Incorrect Software Configuration - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-62012.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Right AIMS
- (a) Find CPM/STD in Right AIMS on the display and make sure that the software part numbers are correct.
- (b) If a part number is incorrect, install software in the CPM/STD (M002) in the Right AIMS cabinet. To install the software, do this task: Core Processor Module/Standard Software Installation, AMM TASK 31-41-05-420-801.
- (2) Do a check of the system configuration for this system on the MAT: 31 AIMS - Right AIMS

### 846. AIMS-L (M001, M002, M004) Internal Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-62031.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the CPM/STD (M002) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the CPM/Comm (M001) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the IOM (M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

- (1) Do this ground test on the MAT:
  - (a) Make these selections on the MAT to make sure the left CMCF is in control: OTHER FUNCTIONS, MAINTENANCE COMPUTER SWITCH CONTROL.  
NOTE: You must reset the CPM/Comm from the off-side CMCF.
    - 1) If the display shows that the right CMCF is in control, select SWITCH TO LEFT.
    - 2) If the display shows that the left CMCF is in control, then select GO BACK.
  - (b) 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this ground test on the MAT:
  - (a) 31 AIMS - Right AIMS, System Test, CPM/STD (M002) in Right AIMS Reset.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 852. AIMS-L Internal Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-50201, 31-50203.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Do these steps to isolate the CPM/Comm(M001) in the left AIMS cabinet.
  - (a) Remove the CPM/Comm(M001) in the left AIMS cabinet. To remove it, do this task: Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802.
  - (b) Remove the safety tags and close these circuit breakers:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

NOTE: Other maintenance messages related to the CPM/Comm(M001) will show.

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then do these steps:

- 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

- 2) Install a new CPM/Comm(M001) in the left AIMS cabinet. To install it, do this task: Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.
- 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (d) If the MAT shows ACTIVE for the maintenance message, then do these steps:

- 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

- 2) Re-install the CPM/Comm(M001) in the left AIMS cabinet. To install it, do this task: Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.

- (2) Do these steps to isolate the CPM/STD (M002) in the left AIMS cabinet.

- (a) Remove the CPM/STD (M002) in the left AIMS cabinet. To remove it, do this task: Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801.
- (b) Remove the safety tags and close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

NOTE: Other maintenance messages related to the CPM/STD (M002) will show.

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then do these steps:

- 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|

## 777-200/300 FAULT ISOLATION MANUAL

(Continued)

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

- 2) Install a new CPM/STD (M002) in the left AIMS cabinet. To install it, do this task: Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If the MAT shows ACTIVE for the maintenance message, then do these steps:
- 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

- 2) Re-install the CPM/STD (M002) in the left AIMS cabinet. To install it, do this task: Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.
- (3) Do these steps to isolate the IOM(M003) in the left AIMS cabinet.
- (a) Remove the IOM(M003) in the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the safety tags and close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

**NOTE:** Other maintenance messages related to the IOM(M003) will show.

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then do these steps:
- 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

- 2) Install a new IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

NOTE: Other maintenance messages related to the CPM/GG(M011) will show.

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then do these steps:

- 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

- 2) Install a new CPM/GG(M011) in the left AIMS cabinet. To install it, do this task: Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.
- 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (d) If the MAT shows ACTIVE for the maintenance message, then do these steps:

- 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

- 2) Re-install the CPM/GG(M011) in the left AIMS cabinet. To install it, do this task: Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (9) Replace the left AIMS cabinet, M31101.

These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

————— **END OF TASK** —————

## 853. AIMS-R Internal Fault - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-50202, 31-50204.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

EFFECTIVITY  
ARO ALL

## 31-43 TASKS 852-853

D633W103-ARO

Page 288  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Do these steps to isolate the CPM/Comm(M001) in the right AIMS cabinet.
  - (a) Remove the CPM/Comm(M001) in the right AIMS cabinet. To remove it, do this task:  
Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802.
  - (b) Remove the safety tags and close these circuit breakers:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

**NOTE:** Other maintenance messages related to the CPM/Comm(M001) will show.

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then do these steps:
  - 1) Open these circuit breakers and install safety tags:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- 2) Install a new CPM/Comm(M001) in the right AIMS cabinet. To install it, do this task:  
Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If the MAT shows ACTIVE for the maintenance message, then do these steps:
  - 1) Open these circuit breakers and install safety tags:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- 2) Re-install the CPM/Comm(M001) in the right AIMS cabinet. To install it, do this task:  
Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.
- (2) Do these steps to isolate the CPM/STD (M002) in the right AIMS cabinet.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the CPM/STD (M002) in the right AIMS cabinet. To remove it, do this task: Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801.
- (b) Remove the safety tags and close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

**NOTE:** Other maintenance messages related to the CPM/STD (M002) will show.

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then do these steps:
  - 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- 2) Install a new CPM/STD (M002) in the right AIMS cabinet. To install it, do this task: Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If the MAT shows ACTIVE for the maintenance message, then do these steps:
  - 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- 2) Re-install the CPM/STD (M002) in the right AIMS cabinet. To install it, do this task: Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.
- (3) Do these steps to isolate the IOM(M003) in the right AIMS cabinet.
  - (a) Remove the IOM(M003) in the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the safety tags and close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |

## 777-200/300 FAULT ISOLATION MANUAL

(Continued)

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 15         | C31620        | AIMS R-4    |

**NOTE:** Other maintenance messages related to the IOM(M003) will show.

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then do these steps:

- 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- 2) Install a new IOM(M003) in the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (d) If the MAT shows ACTIVE for the maintenance message, then do these steps:

- 1) Remove the safety tags and close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- 2) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (4) Do these steps to isolate the IOM(M004) in the right AIMS cabinet.

- (a) Remove the IOM(M004) in the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.

- (b) Remove the safety tags and close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

**NOTE:** Other maintenance messages related to the IOM(M004) will show.

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then do these steps:

## 777-200/300 FAULT ISOLATION MANUAL

- 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- 2) Re-install the IOM(M009) in the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (7) Do these steps to isolate the CPM/GG(M010) in the right AIMS cabinet.
- (a) Remove the CPM/GG(M010) in the right AIMS cabinet. To remove it, do this task: Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801
  - (b) Remove the safety tags and close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

**NOTE:** Other maintenance messages related to the CPM/GG(M010) will show.

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then do these steps:
  - 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- 2) Install a new CPM/GG(M010) in the right AIMS cabinet. To install it, do this task:  
Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If the MAT shows ACTIVE for the maintenance message, then do these steps:
- 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |

## 777-200/300 FAULT ISOLATION MANUAL

(Continued)

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 15         | C31620        | AIMS R-4    |

- 2) Re-install the CPM/GG(M010) in the right AIMS cabinet. To install it, do this task: Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.
- (8) Do these steps to isolate the CPM/GG(M011) in the right AIMS cabinet.
  - (a) Remove the CPM/GG(M010) in the right AIMS cabinet. To remove it, do this task: Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801
  - (b) Remove the safety tags and close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

**NOTE:** Other maintenance messages related to the CPM/GG(M011) will show.

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), then do these steps:
  - 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- 2) Install a new CPM/GG(M011) in the right AIMS cabinet. To install it, do this task: Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.
- 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If the MAT shows ACTIVE for the maintenance message, then do these steps:
  - 1) Open these circuit breakers and install safety tags:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |

Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- 2) Re-install the CPM/GG(M011) in the right AIMS cabinet. To install it, do this task:  
Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM  
TASK 31-41-02-400-801.
- (9) Replace the right AIMS cabinet, M31201.  
These are the tasks:  
AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,  
AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

### END OF TASK

#### 854. AIMS ARINC 429 Offside Output Problem - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-52511, 31-52512, 31-54501, 31-54502, 31-54512, 31-54521, 31-54522, 31-56501, 31-56502, 31-56521, 31-56522, 31-58511, 31-58521, 31-58522.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) In the list below, find the AIMS offside IOM and pins and the AIMS onside module and pins for the applicable maintenance message.

| MAINT MESSAGE | OFFSIDE MODULE   | OFFSIDE PINS             | ONSIDE PINS                | ONSIDE MODULE    | 429 BUS NAME                 |
|---------------|------------------|--------------------------|----------------------------|------------------|------------------------------|
| 31-52511      | M003<br>(L-AIMS) | P3-A<br>pin B2<br>pin B3 | P9-B<br>pin A16<br>pin A17 | M009<br>(L-AIMS) | DCMF-L                       |

D633W103-ARO

Page 297  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (b) Remove the applicable onside AIMS IOM.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (c) Do a wiring check between the specified pins of the applicable connectors.

- (d) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the offside IOM. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the onside IOM. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) Do the ARINC 429 Relays test for the applicable IOM on the MAT: 31 AIMS - Left(Right) AIMS, OPERATIONAL TEST, Left(Right) AIMS ARINC 429 Relays
- 5) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

D633W103-ARO

Page 298.1  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Do the ARINC 429 Relays test for the applicable IOM on the MAT: 31 AIMS - Left(Right) AIMS, OPERATIONAL TEST, Left(Right) AIMS ARINC 429 Relays
- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring (SSM 31-41-03) (SSM 31-41-06):
  - (a) Remove the applicable onside AIMS IOM.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (b) Remove the applicable offside AIMS IOM.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (c) Do a wiring check between the specified pins of the applicable connectors.
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the onside IOM. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the offside IOM. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) Do the ARINC 429 Relays test for the applicable IOM on the MAT: 31 AIMS - Left(Right) AIMS, OPERATIONAL TEST, Left(Right) AIMS ARINC 429 Relays
    - 5) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 856. IOM in Left or Right AIMS Internal Fault - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-61111, 31-61112, 31-61113, 31-61114, 31-61115, 31-61116, 31-61117, 31-61118.

##### B. Fault Isolation Procedure

- (1) In the list below, find the AIMS Module for the applicable maintenance message.

| MAINT<br>MESSAGE | AIMS<br>Module        | ARINC<br>629 BUSES                      |

| 31-61117         | IOM(M003)<br>(AIMS-L) | Flt Cntl C,<br>Systems C2,<br>Intr Cab 2 |
| 31-61118         | IOM(M003)<br>(AIMS-R) | Flt Cntl R,<br>Systems C2,<br>Intr Cab 4 |

- (2) Replace the applicable AIMS module.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Look at the Extended Maintenance, Existing Faults display on the MAT for a different maintenance message that is related to the problem:
- (a) In the list above, find the AIMS module and the three ARINC 629 buses for the applicable maintenance message.
  - (b) Look in one of these ATA systems:
    - 1) 31 AIMS - Left AIMS
    - 2) 31 AIMS - Right AIMS
  - (c) Look for a maintenance messages that shows a problem with the applicable AIMS module or an ARINC 629 bus.
  - (d) If a maintenance message for the applicable module or bus shows in Existing Faults, then do these steps:
    - 1) Find the maintenance message in the applicable FIM Maintenance Message Index.
    - 2) Do the specified task for the maintenance message.
    - 3) Look at the maintenance message that this task is for.

Page 298.3  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 857. Left AIMS No Input from Left CMCF on AIMS Backplane - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50115.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Do this AIMS module reset:
  - (a) Make these selections on the MAT to put the right CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO RIGHT.
  - (b) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.

NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.

- 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Open and then close these circuit breakers on the P11 panel:
  - (a) Open these circuit breakers:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- (b) Close these circuit breakers:

#### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 12         | C31609        | AIMS L-1    |
| B          | 13         | C31611        | AIMS L-2    |
| B          | 14         | C31617        | AIMS L-3    |
| B          | 15         | C31619        | AIMS L-4    |

## 777-200/300 FAULT ISOLATION MANUAL

- (c) Close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- (3) Replace the CPM/Comm(M001) in the left AIMS cabinet.

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

## 858. Right AIMS No Input from Right CMCF on AIMS Backplane - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50126.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Do this AIMS module reset:
- (a) Make these selections on the MAT to put the left CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO LEFT.
- (b) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, CPM/Comm(M001) in Right AIMS Module Reset.
- 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- 2) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Open and close these circuit breakers:

### Overhead Circuit Breaker Panel, P11

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| F          | 12         | C31610        | AIMS R-1    |
| F          | 13         | C31612        | AIMS R-2    |
| F          | 14         | C31618        | AIMS R-3    |
| F          | 15         | C31620        | AIMS R-4    |

- (3) Replace the CPM/Comm(M001) in the right AIMS cabinet.

## 777-200/300 FAULT ISOLATION MANUAL

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM  
TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM  
TASK 31-41-04-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 859. Left AIMS No Input from Right CMCF on Intercabinet Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50125.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Look at the Extended Maintenance, Existing Faults display on the MAT.
  - (a) Look in ATA system 31 AIMS - Right AIMS for these types of maintenance messages:
    - 1) One of these modules has no output on the AIMS backplane:
      - a) IOM(M003) in Right AIMS
      - b) IOM(M004) in Right AIMS
    - 2) An IOM has an ARINC 629 fault on one of these busses:
      - a) AIMS Intercabinet ARINC 629 Bus (3)
      - b) AIMS Intercabinet ARINC 629 Bus (4)
  - (b) Look in ATA system 31 AIMS - Left AIMS for these types of maintenance messages:
    - 1) One of these modules has no output on the AIMS backplane:
      - a) IOM(M004) in Left AIMS
      - b) IOM(M008) in Left AIMS
    - 2) An IOM has an ARINC 629 fault on one of these busses:
      - a) AIMS Intercabinet ARINC 629 Bus (3)
      - b) AIMS Intercabinet ARINC 629 Bus (4)
    - 3) The left AIMS has no input from the right AIMS on one of these busses:
      - a) AIMS Intercabinet ARINC 629 Bus (3)
      - b) AIMS Intercabinet ARINC 629 Bus (4)
    - 4) The left AIMS has no input from the right AIMS on any AIMS Intercabinet ARINC 629 Bus.
  - (c) If one of the maintenance messages given above shows in Existing Faults, then do these steps:
    - 1) Find the maintenance message in the applicable FIM Maintenance Message Index.

EFFECTIVITY

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (d) If none of the maintenance messages given above show in Existing Faults, then continue.
- (2) Do these AIMS module resets:
  - (a) Make these selections on the MAT to put the right CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO RIGHT.
  - (b) Do this ground test on the PMAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.

NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.

    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
  - (c) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
  - (d) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
  - (e) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
  - (f) Do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
    - 1) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - 2) If the MAT shows ACTIVE for the maintenance message, then continue.
  - (g) Make these selections on the MAT to put the left CMCF in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL, SWITCH TO LEFT.
  - (h) Do these ground tests on the MAT:
    - 1) 31 AIMS - Left AIMS, System Test, CPM/STD (M002) in Left AIMS Module Reset.
    - 2) 31 AIMS - Left AIMS, System Test, CPM/GG(M010) in Left AIMS Module Reset.
    - 3) 31 AIMS - Left AIMS, System Test, CPM/GG(M011) in Left AIMS Module Reset.

## 777-200/300 FAULT ISOLATION MANUAL

- (i) Make these selections on the MAT to make sure the right CMCF is in control: OTHER FUNCTIONS, MAINTENANCE COMPUTER SWITCH CONTROL.  
NOTE: You must reset the CPM/Comm from the off-side CMC.
  - 1) If the display shows that the left CMCF is in control, SWITCH TO RIGHT.
  - 2) If the display shows that the right CMCF is in control, select GO BACK.
- (j) Do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, CPM/Comm(M001) in Left AIMS Module Reset.  
NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.
- (k) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 861. DCGF-1 In AIMS-L Incorrect Software Configuration - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-61011.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS
  - (a) Find CPM/GG(M010) in Left AIMS on the display and make sure that the software part numbers are correct.
  - (b) If a part number is incorrect, install software in the CPM/GG(M010) in the left AIMS cabinet. To install the software, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
- (2) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS
  - (a) Find CPM/GG(M011) in Left AIMS on the display and make sure that the software part numbers are correct.
  - (b) If a part number is incorrect, install software in the CPM/GG(M011) in the left AIMS cabinet. To install the software, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.

- (b) If a part number is incorrect, install software in the CPM/GG(M011) in the Right AIMS cabinet. To install the software, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.

### END OF TASK

#### 864. CPM in Left or Right AIMS Internal Fault - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-61211, 31-61213, 31-61216, 31-61218, 31-62211, 31-62213, 31-62216, 31-62218.

##### B. Fault Isolation Procedure

##### C. Fault Isolation Procedure

- (1) In the list below, find the AIMS Module for the applicable maintenance message.

| MAINT<br>MESSAGE | AIMS<br>Module               |
|------------------|------------------------------|
| 31-61211         | CPM/GG<br>(M010)<br>AIMS-L   |
| 31-61213         | CPM/GG<br>(M011)<br>AIMS-L   |
| 31-61216         | CPM/GG<br>(M010)<br>AIMS-R   |
| 31-61218         | CPM/GG<br>(M011)<br>AIMS-R   |
| 31-62211         | CPM/Comm<br>(M001)<br>AIMS-L |
| 31-62213         | CPM/STD<br>(M002)<br>AIMS-L  |
| 31-62216         | CPM/Comm<br>(M001)<br>AIMS-R |
| 31-62218         | CPM/STD<br>(M002)<br>AIMS-R  |

- (2) Replace the applicable AIMS module:

- (a) CPM/GG (M010, M011).

These are the tasks:

## 777-200/300 FAULT ISOLATION MANUAL

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (b) CPM/Comm (M001).

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.

- (c) CPM/STD (M002).

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (d) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 865. Left or Right AIMS Intercabinet Bus Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-50101, 31-50102, 31-50111, 31-50112, 31-50121, 31-50122, 31-50131, 31-50132.

#### B. Fault Isolation Procedure

- (1) In the list below, find the AIMS intercabinet bus for the applicable maintenance message.

| MAINT<br>MESSAGE      | INTERCABINET<br>BUSES |
|-----------------------|-----------------------|
| 31-50101,<br>31-50102 | Intr Cab 1            |
| 31-50111,<br>31-50112 | Intr Cab 2            |
| 31-50121,<br>31-50122 | Intr Cab 3            |
| 31-50131,<br>31-50132 | Intr Cab 4            |

- (2) Repair the applicable AIMS intercabinet bus (WDM 31-41-27).

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 866. Left AIMS IOM(M003) Module has No Output on the Backplane - Fault Isolation

#### A. Maintenance Messages

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Remove and re-install the IOM(M003) in the left AIMS cabinet. These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) Replace the ARINC 629 coupler, B31327, in the P311 panel.  
These are the tasks:  
ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.  
NOTE: This coupler connects the IOM(M003) to the AIMS Intercabinet 629 Bus-2.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the IOM(M003) in the left AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the left AIMS cabinet, M31101.  
These are the tasks:  
AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,  
AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 867. Right AIMS IOM(M003) Module has No Output on the Backplane - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-52014.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Remove and re-install the IOM(M003) in the right AIMS cabinet. These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) Replace the ARINC 629 coupler, B31311, in the P311 panel.  
These are the tasks:  
ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.  
NOTE: This coupler connects the IOM(M003) to the AIMS Intercabinet 629 Bus-4.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the IOM(M003) in the right AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the right AIMS cabinet, M31201.  
These are the tasks:  
AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,  
AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Remove and re-install the IOM(M009) in the right AIMS cabinet. These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) Replace the ARINC 629 coupler, B31126, in the P111 panel.  
These are the tasks:  
ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.  
**NOTE:** This coupler connects the IOM(M009) to the AIMS Intercabinet 629 Bus-1.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the IOM(M009) in the right AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the right AIMS cabinet, M31201.

These are the tasks:

AIMS Cabinet Removal, AMM TASK 31-41-21-000-802,

AIMS Cabinet Installation, AMM TASK 31-41-21-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 874. DCGF No Input From Offside DCGF Problem - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-61212, 31-61214, 31-61215, 31-61217, 31-62212, 31-62214, 31-62215, 31-62217.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) In the list below, find the offside IOM and CPM, the onside IOM and CPM and the 629 couplers for the applicable maintenance message.

| MAINT MESSAGE                                | OFFSIDE IOM AND COUPLER              | ONSIDE IOM AND COUPLER               | OFFSIDE CPM (MASTER) | OFFSIDE CPM (SLAVE) | ONSIDE CPM       |

- (2) Replace one of the applicable offside IOMs.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (3) Replace the other applicable offside IOM.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (4) Replace one of the applicable onside IOMs.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (5) Replace the other applicable onside IOM.

## 777-200/300 FAULT ISOLATION MANUAL

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this check of the wiring from the IOM(M003) to the coupler:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31314 from the coupler, B31314.
  - (c) Do a wiring check between these pins of the IOM connector J240 and connector DB31314 at the P313 panel (WDM 31-41-25) (SSM 31-41-02):

| J240-B | DB31314 |
|--------|---------|
| pin G3 | pin 5   |
| pin G4 | pin 4   |
| pin G1 | pin 2   |
| pin G2 | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31314.
  - 3) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.
- (7) Do this check of the wiring from the IOM(M008) to the coupler:
  - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31312 from the coupler, B31312.
  - (c) Do a wiring check between these pins of the IOM connector J410 and connector DB31312 at the P311 panel (WDM 31-41-25) (SSM 31-41-02):

| J410-B | DB31312 |
|--------|---------|
| pin G3 | pin 5   |
| pin G4 | pin 4   |
| pin G1 | pin 2   |
| pin G2 | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31312.
  - 3) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the maintenance message does not show on the ground test display, you corrected the fault.
- (8) Do this check of the wiring from the IOM(M003) to the coupler:
- (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31318 from the coupler, B31318.
  - (c) Do a wiring check between these pins of the IOM connector J240 and connector DB31318 at the P313 panel (WDM 31-41-26) (SSM 31-41-02):
- | <b>J240-B</b> | <b>DB31318</b> |
|---------------|----------------|
| pin G3 .....  | pin 5          |
| pin G4 .....  | pin 4          |
| pin G1 .....  | pin 2          |
| pin G2 .....  | pin 1          |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31318.
  - 3) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.
- (9) Do this check of the wiring from the IOM(M008) to the coupler:
- (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Disconnect connector DB31317 from the coupler, B31317.
  - (c) Do a wiring check between these pins of the IOM connector J410 and connector DB31317 at the P311 panel (WDM 31-41-26) (SSM 31-41-02):
- | <b>J410-B</b> | <b>DB31317</b> |
|---------------|----------------|
| pin G3 .....  | pin 5          |
| pin G4 .....  | pin 4          |
| pin G1 .....  | pin 2          |
| pin G2 .....  | pin 1          |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-13-00).
  - 2) Re-connect connector DB31317.
  - 3) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the maintenance message does not show on the ground test display, you corrected the fault.
- (10) Replace the applicable AIMS offside (master) CPM:
- (a) CPM/GG(M010, M011).
- These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (b) CPM/Comm(M001).

These are the tasks:

Core Processor Module/Communication (CPM/Comm) Removal, AMM TASK 31-41-04-000-802,

Core Processor Module/Communication (CPM/Comm) Installation, AMM TASK 31-41-04-400-802.

- (c) CPM/STD (M002).

These are the tasks:

Core Processor Module/STD Removal, AMM TASK 31-41-05-000-801,

Core Processor Module/STD Installation, AMM TASK 31-41-05-400-801.

- (d) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 875. Left or Right AIMS All Intercabinet Buses Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-50191, 31-50192.

#### B. Fault Isolation Procedure

- (1) Repair all four intercabinet buses (SWPM 20-11-11) (WDM 31-41-27).  
(a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 876. AIMS-L No Output On Left General Purpose #1 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-68891.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.  
(2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the ground proximity warning computer (GPWC), M34004. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
  - (c) Do a wiring check between these pins of connector DM34004AB at the E1-4 shelf and connector J240-B in the left AIMS cabinet (WDM 31-41-21) (SSM 31-41-03):

| <b>DM34004AB</b>  | <b>J240-B</b> |
|-------------------|---------------|
| pin C12 . . . . . | pin F11       |
| pin D12 . . . . . | pin G12       |

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
    - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the left satellite data unit (SDU), M23106. To remove it, do this task: Satellite Data Unit Removal, AMM TASK 23-15-10-000-801.
  - (b) Do a wiring check between these pins of connector DM23106AB at the E11-1 shelf and connector J240-B in the left AIMS cabinet (WDM 31-41-21) (SSM 31-41-03):

| <b>DM23106AB</b> | <b>J240-B</b> |
|------------------|---------------|
| pin A4 . . . . . | pin F11       |
| pin B4 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the left SDU, M23106. To install it, do this task: Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.
    - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-68893.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the left radio tuning panel (RTP), M23005. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (c) Do a wiring check between these pins of connector DM23005 at the aisle stand panel, P8 and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

| <b>DM23005</b> | <b>J240-A</b> |
|----------------|---------------|
| pin 14 .....   | pin F13       |
| pin 15 .....   | pin G14       |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the left RTP, M23005. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the left RTP, M23005. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
- (4) Do this check of the wiring:
- (a) Remove the right RTP, M23006. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
- (b) Do a wiring check between these pins of connector DM23006 at the P8 panel and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

| <b>DM23006</b> | <b>J240-A</b> |
|----------------|---------------|
| pin 14 .....   | pin F13       |
| pin 15 .....   | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the right RTP, M23006. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the right RTP, M23006. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
- (6) Do this check of the wiring:
- (a) Remove the center RTP, M23007. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
- (b) Do a wiring check between these pins of connector DM23007 at the P8 panel and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

Page 298.31  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the left stabilizer position indicator, N27001. To install it, do this task: Stabilizer Position Indicator Installation, AMM TASK 27-48-02-400-801.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (11) Re-install the left stabilizer position indicator, N27001. To install it, do this task: Stabilizer Position Indicator Installation, AMM TASK 27-48-02-400-801.
- (12) Do this check of the wiring:
  - (a) Remove the left autothrottle servo motor (ASM), M22105. To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - (b) Do a wiring check between these pins of connector DM22105 at the P10 panel and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

| <b>DM22105</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 6 . . . . .  | pin F13       |
| pin 16 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the left ASM, M22105. To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (13) Re-install the left ASM, M22105. To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
- (14) Do this check of the wiring:
  - (a) Remove the right ASM, M22205. To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
  - (b) Do a wiring check between these pins of connector DM22205 at the P10 panel and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

| <b>DM22205</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 6 . . . . .  | pin F13       |
| pin 16 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.

May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (19) Do this check of the wiring:
- (a) Remove the right WXR xcvr, M34216. To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
  - (b) Do a wiring check between these pins of connector DM34216AB at STA 155, WL 168, RBL 21 and connector J240-A in the left AIMS cabinet (WDM 31-41-22) (SSM 31-41-03):

| <b>DM34216AB</b> | <b>J240-A</b> |
|------------------|---------------|
| pin B3 . . . . . | pin F13       |
| pin B4 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the right WXR xcvr, M34216. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
    - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (20) Re-install the right WXR xcvr, M34216. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
- (21) Look at the message in existing faults and find the LRU that detected the fault.
- (a) Replace the applicable LRU.
    - 1) If the left RTP detected the fault, replace the left RTP, M23005.  
These are the tasks:  
Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801,  
Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
    - 2) If the right RTP detected the fault, replace the right RTP, M23006.  
These are the tasks:  
Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801,  
Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
    - 3) If the center RTP detected the fault, replace the center RTP, M23007.  
These are the tasks:  
Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801,  
Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
    - 4) If the rudder trim indicator detected the fault, replace the rudder trim indicator, DN27003.  
These are the tasks:  
Rudder Trim Indicator Removal, AMM TASK 27-21-09-000-801,  
Rudder Trim Indicator Installation, AMM TASK 27-21-09-400-801.
    - 5) If the left stabilizer position indicator detected the fault, replace the left stabilizer position indicator, DN27001.  
These are the tasks:

## 777-200/300 FAULT ISOLATION MANUAL

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the left radio tuning panel (RTP), M23005. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
  - (c) Do a wiring check between these pins of connector DM23005 at the aisle stand panel, P8 and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| <b>DM23005</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 16 . . . . . | pin F13       |
| pin 17 . . . . . | pin G14       |

- (d) If you find a problem with the wiring, then do these steps:
      - 1) Repair the wiring.
      - 2) Re-install the left RTP, M23005. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
      - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
      - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - (e) If you do not find a problem with the wiring, then continue.
  - (3) Re-install the left RTP, M23005. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
  - (4) Do this check of the wiring:
    - (a) Remove the right RTP, M23006. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
    - (b) Do a wiring check between these pins of connector DM23006 at the P8 panel and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| <b>DM23006</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 16 . . . . . | pin F13       |
| pin 17 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
      - 1) Repair the wiring.
      - 2) Re-install the right RTP, M23006. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
      - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
      - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the right RTP, M23006. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
- (6) Do this check of the wiring:
  - (a) Remove the center RTP, M23007. To remove it, do this task: Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801.
  - (b) Do a wiring check between these pins of connector DM23007 at the P8 panel and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| <b>DM23007</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 16 . . . . . | pin F13       |
| pin 17 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the center RTP, M23007. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
  - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (7) Re-install the center RTP, M23007. To install it, do this task: Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
- (8) Do this check of the wiring:
  - (a) Remove the rudder trim indicator, N27003. To remove it, do this task: Rudder Trim Indicator Removal, AMM TASK 27-21-09-000-801.
  - (b) Do a wiring check between these pins of connector DN27003 at the P8 panel and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| <b>DN27003</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 11 . . . . . | pin F13       |
| pin 12 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the rudder trim indicator, N27003. To install it, do this task: Rudder Trim Indicator Installation, AMM TASK 27-21-09-400-801.
  - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (9) Re-install the rudder trim indicator, N27003. To install it, do this task: Rudder Trim Indicator Installation, AMM TASK 27-21-09-400-801.

May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

(10) Do this check of the wiring:

- (a) Remove the right stabilizer position indicator, N27002. To remove it, do this task: Stabilizer Position Indicator Removal, AMM TASK 27-48-02-000-801.
- (b) Do a wiring check between these pins of connector DN27002 at the P10 panel and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| <b>DN27002</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 11 . . . . . | pin F13       |
| pin 12 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the right stabilizer position indicator, N27002. To install it, do this task: Stabilizer Position Indicator Installation, AMM TASK 27-48-02-400-801.
    - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (11) Re-install the right stabilizer position indicator, N27002. To install it, do this task: Stabilizer Position Indicator Installation, AMM TASK 27-48-02-400-801.

(12) Do this check of the wiring:

- (a) Remove the left autothrottle servo motor (ASM), M22105. To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.
- (b) Do a wiring check between these pins of connector DM22105 at the P10 panel and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| <b>DN22105</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 4 . . . . .  | pin F13       |
| pin 14 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the left ASM, M22105. To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
    - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (13) Re-install the left ASM, M22105. To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
- (14) Do this check of the wiring:
- (a) Remove the right ASM, M22205. To remove it, do this task: Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00.

**777-200/300  
FAULT ISOLATION MANUAL**

- (b) Do a wiring check between these pins of connector DM22205 at the P10 panel and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| <b>DN22205</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 4 . . . . .  | pin F13       |
| pin 14 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the right ASM, M22205. To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
  - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (15) Re-install the right ASM, M22205. To install it, do this task: Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
- (16) Do this check of the wiring:

- (a) Do a wiring check between these pins of connector DN31003 at the P1 panel and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| <b>DN31003</b>   | <b>J240-A</b> |
|------------------|---------------|
| pin 19 . . . . . | pin F13       |
| pin 20 . . . . . | pin G14       |

- (b) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If you do not find a problem with the wiring, then continue.
- (17) Do this check of the wiring:
- (a) Remove the left weather radar transceiver (WXR xcvr), M34116. To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
- (b) Do a wiring check between these pins of connector DM34116AB at STA 142, WL 168, BL 0 and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| <b>DM34116AB</b> | <b>J240-A</b> |
|------------------|---------------|
| pin J3 . . . . . | pin F13       |
| pin J4 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the left WXR xcvr, M34116. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (18) Re-install the left WXR xcvr, M34116. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
- (19) Do this check of the wiring:
  - (a) Remove the right weather radar transceiver (WXR xcvr), M34216. To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
  - (b) Do a wiring check between these pins of connector DM34216AB at STA 155, WL 168, RBL 21 and connector J240-A in the right AIMS cabinet (WDM 31-41-24) (SSM 31-41-06):

| DM34216AB        | J240-A  |
|------------------|---------|
| pin J3 . . . . . | pin F13 |
| pin J4 . . . . . | pin G14 |
- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the right WXR xcvr, M34216. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
  - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (20) Re-install the right WXR xcvr, M34216. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
- (21) Look at the message in existing faults and find the LRU that detected the fault.
  - (a) Replace the applicable LRU.
    - 1) If the left RTP detected the fault, replace the left RTP, M23005.  
These are the tasks:  
Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801,  
Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
    - 2) If the right RTP detected the fault, replace the right RTP, M23006.  
These are the tasks:  
Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801,  
Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.
    - 3) If the center RTP detected the fault, replace the center RTP, M23007.  
These are the tasks:  
Radio Tuning Panel (RTP) Removal, AMM TASK 23-12-02-000-801,  
Radio Tuning Panel (RTP) Installation, AMM TASK 23-12-02-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the rudder trim indicator detected the fault, replace the rudder trim indicator, DN27003.  
These are the tasks:  
Rudder Trim Indicator Removal, AMM TASK 27-21-09-000-801,  
Rudder Trim Indicator Installation, AMM TASK 27-21-09-400-801.
  - 5) If the right stabilizer position indicator detected the fault, replace the right stabilizer position indicator, DN27002.  
These are the tasks:  
Stabilizer Position Indicator Removal, AMM TASK 27-48-02-000-801,  
Stabilizer Position Indicator Installation, AMM TASK 27-48-02-400-801.
  - 6) If the left ASM detected the fault, replace the left ASM, M22105.  
These are the tasks:  
Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00,  
Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
  - 7) If the right ASM detected the fault, replace the right ASM, M22205.  
These are the tasks:  
Autothrottle Servomotor (ASM) and Gearbox Removal, AMM TASK 76-12-01-000-805-H00,  
Autothrottle Servomotor (ASM) and Gearbox Installation, AMM TASK 76-12-01-400-804-H00.
  - 8) If the left WXR xcvr detected the fault, replace the left WXR xcvr, M34116.  
These are the tasks:  
WXR Transceiver Removal, AMM TASK 34-43-02-000-801,  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
  - 9) If the right WXR xcvr detected the fault, replace the right WXR xcvr, M34216.  
These are the tasks:  
WXR Transceiver Removal, AMM TASK 34-43-02-000-801,  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the left ATC/Mode S transponder (ATC transponder\_, M34107. To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
- (c) Do a wiring check between these pins of connector DM34107AA at the E1-3 shelf and connector J240-A in the left AIMS cabinet (WDM 31-41-21) (SSM 31-41-03):

| <b>DM34107AA</b> | <b>J240-A</b> |
|------------------|---------------|
| pin H7 . . . . . | pin F11       |
| pin J7 . . . . . | pin G12       |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the left ATC transponder, M34107. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
- 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the left ATC transponder, M34107. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
- (4) Do this check of the wiring:
- (a) Remove the right ATC transponder, M34207. To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
- (b) Do a wiring check between these pins of connector DM34207AB at the E2-3 shelf and connector J240-A in the left AIMS cabinet (WDM 31-41-21) (SSM 31-41-03):

| <b>DM34207AB</b> | <b>J240-A</b> |
|------------------|---------------|
| pin A5 . . . . . | pin F11       |
| pin B5 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:

## 777-200/300 FAULT ISOLATION MANUAL

- 1) Repair the wiring.
  - 2) Re-install the right ATC transponder, M34207. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the right ATC transponder, M34207. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
  - (6) Do this check of the wiring:
    - (a) Remove the ground proximity warning computer (GPWC), M34004. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
    - (b) Do a wiring check between these pins of connector DM34004AB at the E1-4 shelf and connector J240-A in the left AIMS cabinet (WDM 31-41-21) (SSM 31-41-03):

| <b>DM34004AB</b>  | <b>J240-A</b> |
|-------------------|---------------|
| pin A11 . . . . . | pin F11       |
| pin B11 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
  - 3) Re-install the IOM(M003) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (7) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
  - (8) Look at the message in existing faults and find the LRU that detected the fault.
    - (a) Replace the applicable LRU.
      - 1) If the GPWC detected the fault, replace the GPWC, M34004.  
These are the tasks:  
Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801,  
Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
      - 2) If the left ATC transponder detected the fault, replace the left ATC transponder, M34107.  
These are the tasks:  
ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801,  
ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
      - 3) If the right ATC transponder detected the fault, replace the right ATC transponder, M34207.

## 777-200/300 FAULT ISOLATION MANUAL

These are the tasks:

ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801,

ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.

- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 880. AIMS-R No Output On Right General Purpose #3 Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-68896.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the left ATC/Mode S transponder (ATC transponder), M34107. To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
- (c) Do a wiring check between these pins of connector DM34107AB at the E1-3 shelf and connector J240-A in the right AIMS cabinet (WDM 31-41-23) (SSM 31-41-03):

#### **DM34107AB**

pin A5 . . . . . pin F11  
pin B5 . . . . . pin G12

#### **J240-A**

- (d) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the left ATC transponder, M34107. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the left ATC transponder, M34107. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the right ATC transponder, M34207. To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34207AA at the E2-3 shelf and connector J240-A in the right AIMS cabinet (WDM 31-41-23) (SSM 31-41-03):

| DM34207AA        | J240-A  |
|------------------|---------|
| pin H7 . . . . . | pin F11 |
| pin J7 . . . . . | pin G12 |
- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the right ATC transponder, M34207. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
  - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the right ATC transponder, M34207. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
- (6) Do this check of the wiring:
  - (a) Remove the ground proximity warning computer (GPWC), M34004. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34004AB at the E1-4 shelf and connector J240-A in the right AIMS cabinet (WDM 31-41-23) (SSM 31-41-03):

| DM34004AB         | J240-A  |
|-------------------|---------|
| pin A10 . . . . . | pin F11 |
| pin B10 . . . . . | pin G12 |
- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
  - 3) Re-install the IOM(M003) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

Page 298.45  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (d) If you do not find a problem with the wiring, then continue.
- (7) Look at the message in existing faults and find the LRU that detected the fault.
  - (a) Replace the applicable LRU.
    - 1) If the GPWC detected the fault, replace the GPWC, M34004.  
These are the tasks:  
Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801,  
Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
    - 2) If the left ATC transponder detected the fault, replace the left ATC transponder, M34107.  
These are the tasks:  
ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801,  
ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
    - 3) If the right ATC transponder detected the fault, replace the right ATC transponder, M34207.  
These are the tasks:  
ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801,  
ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
  - (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 881. AIMS-L No Output On Left Inertial Reference Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-68897.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M008) in the left AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the ground proximity warning computer (GPWC), M34004. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
- (c) Do a wiring check between these pins of connector DM34004AB at the E1-4 shelf and connector J410-A in the left AIMS cabinet (WDM 31-41-31) (SSM 31-41-03):

| <b>DM34004AB</b> | <b>J410-A</b> |
|------------------|---------------|
| pin A6 . . . . . | pin F13       |
| pin B6 . . . . . | pin G14       |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the TCAS computer, M34006. To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34006AE at the E1-4 shelf and connector J410-A in the left AIMS cabinet (WDM 31-41-31) (SSM 31-41-03):

| <b>DM34006AE</b> | <b>J410-A</b> |
|------------------|---------------|
| pin A7 . . . . . | pin F13       |
| pin B7 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the TCAS computer, M34006. To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the TCAS computer, M34006. To install it, do this task: TCAS Computer Installation, AMM TASK 34-45-01-400-801.
- (6) Do this check of the wiring:
  - (a) Remove the left satellite data unit (SDU), M23106. To remove it, do this task: Satellite Data Unit Removal, AMM TASK 23-15-10-000-801.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the ground proximity warning computer (GPWC), M34004. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
- (c) Do a wiring check between these pins of connector DM34004AB at the E1-4 shelf and connector J410-A in the right AIMS cabinet (WDM 31-41-31) (SSM 31-41-06):

| <b>DM34004AB</b>  | <b>J410-A</b> |
|-------------------|---------------|
| pin C10 . . . . . | pin F13       |
| pin D10 . . . . . | pin G14       |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the IOM(M008) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
- (4) Do this check of the wiring:
- (a) Do a wiring check between these pins of connector DM23080AA at the E2-4 shelf and connector J410-A in the right AIMS cabinet (WDM 31-41-32) (SSM 31-41-06):

| <b>DM23080AA</b> | <b>J410-A</b> |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M008) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right WXR xcvr, M34216. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (10) Re-install the right WXR xcvr, M34216. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
- (11) Do this check of the wiring:
- (a) Remove the left multi-mode receiver (MMR), M34410. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34410AB at shelf E1-2 and connector J410-A in the right AIMS cabinet (WDM 31-41-32) (SSM 31-41-06):
- | <b>DM34410AB</b> | <b>J410-A</b> |
|------------------|---------------|
| pin G8 . . . . . | pin F13       |
| pin H8 . . . . . | pin G14       |
- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M008) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left MMR, M34410. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (12) Re-install the left MMR, M34410. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
- (13) Do this check of the wiring:

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the right multi-mode receiver (MMR), M34510. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
- (b) Do a wiring check between these pins of connector DM34510AB at shelf E2-3 and connector J410-A in the right AIMS cabinet (WDM 31-41-32) (SSM 31-41-06):

| <b>DM34510AB</b> | <b>J410-A</b> |
|------------------|---------------|
| pin G8 .....     | pin F13       |
| pin H8 .....     | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M008) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the right MMR, M34510. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (14) Look at the message in existing faults and find the LRU that detected the fault.
- (a) Replace the applicable LRU.
    - 1) If the GPWC detected the fault, replace the GPWC, M34004.  
These are the tasks:  
Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801,  
Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
    - 2) If the left SDU detected the fault, replace the left SDU, M23106.  
These are the tasks:  
Satellite Data Unit Removal, AMM TASK 23-15-10-000-801,  
Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.
    - 3) If the left WXR xcvr detected the fault, replace the left WXR xcvr, M34116.  
These are the tasks:  
WXR Transceiver Removal, AMM TASK 34-43-02-000-801,  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
    - 4) If the right WXR xcvr detected the fault, replace the right WXR xcvr, M34216.  
These are the tasks:  
WXR Transceiver Removal, AMM TASK 34-43-02-000-801,  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
    - 5) If the left MMR detected the fault, replace the left MMR, M34410.  
These are the tasks:  
Receiver for ILS - Removal, AMM TASK 34-31-01-000-801,  
Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
    - 6) If the right MMR detected the fault, replace the right MMR, M34510.  
These are the tasks:

## 777-200/300 FAULT ISOLATION MANUAL

Receiver for ILS - Removal, AMM TASK 34-31-01-000-801,

Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.

- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 883. AIMS-L No Output On DCMF-L Bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-68899.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the right VHF communication transceiver (VHF comm xcvr), M23203. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
- (c) Do a wiring check between these pins of connector DM23203AB at the E2-3 shelf and connector J420-A in the left AIMS cabinet (WDM 23-27-11) (SSM 31-41-03):

#### **DM23203AB**

#### **J420-A**

pin A12 . . . . . pin F13

pin B12 . . . . . pin G14

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
- 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the right VHF comm xcvr, M23203. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the right VHF comm xcvr, M23203. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the center VHF comm xcvr, M23303. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - (b) Do a wiring check between these pins of connector DM23303AB at the E1-2 shelf and connector J420-A in the left AIMS cabinet (WDM 23-27-11) (SSM 31-41-03):

| <b>DM23303AB</b>  | <b>J420-A</b> |
|-------------------|---------------|
| pin A12 . . . . . | pin F13       |
| pin B12 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the center VHF comm xcvr, M23303. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the center VHF comm xcvr, M23303. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- (6) Do this check of the wiring:
  - (a) Remove the left satellite data unit (SDU), M23106. To remove it, do this task: Satellite Data Unit Removal, AMM TASK 23-15-10-000-801.
  - (b) Do a wiring check between these pins of connector DM23106AB at the E11-1 shelf and connector J420-A in the left AIMS cabinet (WDM 23-27-11) (SSM 31-41-03):

| <b>DM23106AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin G1 . . . . . | pin F13       |
| pin H1 . . . . . | pin G14       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left SDU, M23106. To install it, do this task: Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

(12) Do this check of the wiring:

- (a) Do a wiring check between these pins of connector DM23443AA at the E15 shelf and connector J420-A in the left AIMS cabinet (WDM 23-27-11) (SSM 31-41-03):

| <b>DM23443AA</b> | <b>J420-A</b> |
|------------------|---------------|
| pin 58 .....     | pin F13       |
| pin 59 .....     | pin G14       |

(b) If you find a problem with the wiring, then do these steps:

- 1) Repair the wiring.
- 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- 3) Re-install the flight deck printer, M31004. To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

(c) If you do not find a problem with the wiring, then continue.

(13) Look at the message in existing faults and find the LRU that detected the fault.

(a) Replace the applicable LRU.

- 1) If the right VHF comm xcvr detected the fault, replace the right VHF xcvr, M23203.

These are the tasks:

VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801,  
VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.

- 2) If the center VHF comm xcvr detected the fault, replace the center VHF xcvr, M23303.

These are the tasks:

VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801,  
VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.

- 3) If the left SDU detected the fault, replace the left SDU, M23106.

These are the tasks:

Satellite Data Unit Removal, AMM TASK 23-15-10-000-801,  
Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.

- 4) If the left ATC transponder detected the fault, replace the left ATC transponder, M34107.

These are the tasks:

ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801,  
ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.

- 5) If the flight deck printer detected the fault, replace the flight deck printer, M31004.

These are the tasks:

WXR Transceiver Removal, AMM TASK 34-43-02-000-801,  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801.

  - (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M009) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the right ATC transponder, M34207. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (9) Re-install the right ATC transponder, M34207. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
- (10) Do this check of the wiring:
- (a) Remove the flight deck printer, M31004. To remove it, do this task: Flight Compartment Printer Removal, AMM TASK 31-33-01-000-801.
  - (b) Do a wiring check between these pins of connector DM31004A at STA 198, WL 217, BL 0 in the flight compartment and connector J420-A in the right AIMS cabinet (WDM 23-27-12) (SSM 31-41-06):

|                 |               |
|-----------------|---------------|
| <b>DM31004A</b> | <b>J420-A</b> |
| pin Z . . . . . | pin F13       |
| pin Y . . . . . | pin G14       |
  - (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M009) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the flight deck printer, M31004. To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (11) Re-install the flight deck printer, M31004. To install it, do this task: Flight Compartment Printer Installation, AMM TASK 31-33-01-400-801.
- (12) Do this check of the wiring:
- (a) Do a wiring check between these pins of connector DM23443AA at the E15 shelf and connector J420-A in the right AIMS cabinet (WDM 23-27-12) (SSM 31-41-06):

pin 56 ..... pin F13

pin 57 ..... pin G14

- (b) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the right AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (c) If you do not find a problem with the wiring, then continue.
- (13) Look at the message in existing faults and find the LRU that detected the fault.
- (a) Replace the applicable LRU.
- 1) If the right VHF comm xcvr detected the fault, replace the right VHF xcvr, M23203.  
These are the tasks:  
VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801,  
VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 2) If the center VHF comm xcvr detected the fault, replace the center VHF xcvr, M23303.  
These are the tasks:  
VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801,  
VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 3) If the left SDU detected the fault, replace the left SDU, M23106.  
These are the tasks:  
Satellite Data Unit Removal, AMM TASK 23-15-10-000-801,  
Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.
  - 4) If the right ATC transponder detected the fault, replace the right ATC transponder, M34207.  
These are the tasks:  
ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801,  
ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
  - 5) If the flight deck printer detected the fault, replace the flight deck printer, M31004.  
These are the tasks:  
WXR Transceiver Removal, AMM TASK 34-43-02-000-801,  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 885. AIMS-L No Output On CMCS-L Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-68901.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the left VHF communication transceiver (VHF comm xcvr), M23103. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of connector DM23103AB at the P1-3 panel and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

#### DM23103AB

pin A6 . . . . . pin F11  
pin B6 . . . . . pin G12

#### J420-A

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left VHF comm xcvr, M23103. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the left VHF comm xcvr, M23103. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the right VHF comm xcvr, M23203. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the right VHF comm xcvr, M23203. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- (6) Do this check of the wiring:
- (a) Remove the center VHF comm xcvr, M23303. To remove it, do this task: VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801.
  - (b) Do a wiring check between these pins of connector DM23303AB at the E1-2 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| <b>DM23303AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin A6 . . . . . | pin F11       |
| pin B6 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the center VHF comm xcvr, M23303. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (7) Re-install the center VHF comm xcvr, M23303. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- (8) Do this check of the wiring:
- (a) Remove the left HF communication transceiver (HF comm xcvr), M23101. To remove it, do this task: HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left RA xcvr, M34112. To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (17) Re-install the left RA xcvr, M34112. To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
- (18) Do this check of the wiring:
  - (a) Remove the left weather radar transceiver (WXR xcvr), M34116. To remove it, do this task: WXR Transceiver Removal, AMM TASK 34-43-02-000-801.
  - (b) Do a wiring check between these pins of connector DM34116AB at STA 142, WL 168, BL 0 and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| DM34116AB | J420-A  |
|-----------|---------|
| pin A1    | pin F11 |
| pin B1    | pin G12 |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left WXR xcvr, M34116. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (19) Re-install the left WXR xcvr, M34116. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
- (20) Do this check of the wiring:
  - (a) Remove the TCAS computer, M34006. To remove it, do this task: TCAS Computer Removal, AMM TASK 34-45-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34006AF at the E1-2 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| DM34006AF | J420-A  |
|-----------|---------|
| pin G6    | pin F11 |
| pin H6    | pin G12 |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.

| pin B14 . . . . . | pin F11       |
| pin C14 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left VOR/MB receiver, M34115. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (23) Re-install the left VOR/MB receiver, M34115. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
- (24) Do this check of the wiring:
- (a) Remove the left multi-mode receiver (MMR), M34410. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34410AB at the E1-2 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| <b>DM34410AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin E1 . . . . . | pin F11       |
| pin F1 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left MMR, M34410. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.

May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (25) Re-install the left MMR, M34410. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
- (26) Do this check of the wiring:
  - (a) Remove the left ADF receiver, M34108. To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34108AB at the E1-2 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| <b>DM34108AB</b>  | <b>J420-A</b> |
|-------------------|---------------|
| pin A14 . . . . . | pin F11       |
| pin A15 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left ADF receiver, M34108. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (27) Re-install the left ADF receiver, M34108. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
- (28) Do this check of the wiring:
  - (a) Remove the left DME interrogator, M34109. To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34109AB at the E1-2 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| <b>DM34109AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin E6 . . . . . | pin F11       |
| pin F6 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the left DME interrogator, M34109. To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.

May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (29) Re-install the left DME interrogator, M34109. To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801.
- (30) Do this check of the wiring:
- (a) Remove the left ATC/Mode S transponder (ATC transponder), M34107. To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34107AB at the E1-3 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-11) (SSM 31-41-03):

| <b>DM34107AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin A6 . . . . . | pin F11       |
| pin B6 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M009) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the left ATC transponder, M34107. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (31) Look at the message in existing faults and find the LRU that detected the fault.
- (a) Replace the applicable LRU.
    - 1) If the left VHF comm xcvr detected the fault, replace the left VHF comm xcvr, M23103.  
These are the tasks:  
VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801,  
VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - 2) If the right VHF comm xcvr detected the fault, replace the right VHF comm xcvr, M23203.  
These are the tasks:  
VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801,  
VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - 3) If the center VHF comm xcvr detected the fault, replace the center VHF comm xcvr, M23303.  
These are the tasks:  
VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801,  
VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
    - 4) If the left HF comm xcvr detected the fault, replace the left HF comm xcvr, M23101.  
These are the tasks:  
HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801,  
HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801.
    - 5) If the left SDU detected the fault, replace the left SDU, M23106.

## 777-200/300 FAULT ISOLATION MANUAL

These are the tasks:

Satellite Data Unit Removal, AMM TASK 23-15-10-000-801,  
Satellite Data Unit Installation, AMM TASK 23-15-10-400-801.

- 6) If the flight deck printer detected the fault, replace the flight deck printer, M31004.

These are the tasks:

WXR Transceiver Removal, AMM TASK 34-43-02-000-801,  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801.

- 7) If the left WHCU detected the fault, replace the left WHCU, M30101.

These are the tasks:

Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801,  
Window Heat Control Unit Installation, AMM TASK 30-41-01-400-801.

- 8) If the left RA xcvr detected the fault, replace the left RA xcvr, M34112.

These are the tasks:

Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801,  
Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.

- 9) If the left WXR xcvr detected the fault, replace the left WXR xcvr, M34116.

These are the tasks:

WXR Transceiver Removal, AMM TASK 34-43-02-000-801,  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801.

- 10) If the TCAS computer detected the fault, replace the TCAS computer, M34006.

These are the tasks:

TCAS Computer Removal, AMM TASK 34-45-01-000-801,  
TCAS Computer Installation, AMM TASK 34-45-01-400-801.

- 11) If the left VOR/MB receiver detected the fault, replace the left VOR/MB receiver, M34115.

These are the tasks:

VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801,  
VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.

- 12) If the left multi-mode receiver (MMR) detected the fault, replace the left MMR, M34410.

These are the tasks:

Receiver for ILS - Removal, AMM TASK 34-31-01-000-801,  
Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.

- 13) If the left ADF receiver detected the fault, replace the left ADF receiver, M34108.

These are the tasks:

ADF Receiver Removal, AMM TASK 34-57-01-000-801,  
ADF Receiver Installation, AMM TASK 34-57-01-400-801.

- 14) If the left DME interrogator detected the fault, replace the left DME interrogator, M34109.

These are the tasks:

## 777-200/300 FAULT ISOLATION MANUAL

DME Interrogator Removal, AMM TASK 34-55-01-000-801,  
DME Interrogator Installation, AMM TASK 34-55-01-400-801.

- 15) If the left ATC transponder detected the fault, replace the left ATC transponder, M34107.

These are the tasks:

ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801,  
ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.

- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 886. AIMS-R No Output On Left Nav Tuning Bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-68902.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (b) Remove the left VOR/MB receiver, M34115. To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
- (c) Do a wiring check between these pins of connector DM34115AB at the E1-3 shelf and connector J420-A in the right AIMS cabinet (WDM 34-61-11) (SSM 31-41-06):

#### **DM34115AB**

pin B11 ..... pin F11  
pin C11 ..... pin G12

#### **J420-A**

May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the right VHF comm xcvr, M23203. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (7) Re-install the right VHF comm xcvr, M23203. To install it, do this task: VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
- (8) Do this check of the wiring:
  - (a) Remove the right VOR/MB receiver, M34215. To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34215AB at the E2-3 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-21) (SSM 31-41-03):

| DM34215AB | J420-A  |
|-----------|---------|
| pin B14   | pin F11 |
| pin C14   | pin G12 |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M004) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right VOR/MB receiver, M34215. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (9) Re-install the right VOR/MB receiver, M34215. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
- (10) Do this check of the wiring:
  - (a) Remove the right multi-mode receiver, M34510. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34510AB at the E2-3 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-21) (SSM 31-41-03):

| DM34510AB | J420-A  |
|-----------|---------|
| pin E1    | pin F11 |
| pin F1    | pin G12 |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M004) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right MMR, M34510. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (d) If you do not find a problem with the wiring, then continue.
- (11) Re-install the right MMR, M34510. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
- (12) Do this check of the wiring:
- (a) Remove the right ADF receiver, M34208. To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34208AB at the E2-3 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-21) (SSM 31-41-03):

| <b>DM34208AB</b>  | <b>J420-A</b> |
|-------------------|---------------|
| pin A14 . . . . . | pin F11       |
| pin A15 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M004) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the right ADF receiver, M34208. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (13) Re-install the right ADF receiver, M34208. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
- (14) Do this check of the wiring:
- (a) Remove the right DME interrogator, M34209. To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34209AB at the E2-3 shelf and connector J420-A in the left AIMS cabinet (WDM 34-61-15) (SSM 31-41-03):

| <b>DM34209AB</b> | <b>J420-A</b> |

**777-200/300  
FAULT ISOLATION MANUAL**

- (16) Do this check of the wiring:
- (a) Remove the right ATC/Mode S transponder (ATC transponder), M34207. To remove it, do this task: ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801.
  - (b) Do a wiring check between these pins of connector DM34207AB at the E2-3 shelf and connector J420-A in the left AIMS cabinet (WDM 45-35-53) (SSM 31-41-03):

| <b>DM34207AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin A6 . . . . . | pin F11       |
| pin B6 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M004) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the right ATC transponder, M34207. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (17) Re-install the right ATC transponder, M34207. To install it, do this task: ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.

- (18) Do this check of the wiring:
- (a) Remove the right window heat control unit (WHCU), M30201. To remove it, do this task: Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801.
  - (b) Do a wiring check between these pins of connector DM30101AB at the E2-2 shelf and connector J420-A in the left AIMS cabinet (WDM 45-45-21) (SSM 31-41-03):

| <b>DM30201AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin 25 . . . . . | pin F11       |
| pin 26 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M004) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the right WHCU, M30201. To install it, do this task: Window Heat Control Unit Installation, AMM TASK 30-41-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If you do not find a problem with the wiring, then continue.
- (19) Re-install the right WHCU, M30201. To install it, do this task: Window Heat Control Unit Installation, AMM TASK 30-41-01-400-801.
- (20) Do this check of the wiring:
- (a) Remove the right radio altimeter transceiver (RA xcvr), M34212. To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.

### DM34216AB

pin A1 ..... pin F11  
pin B1 ..... pin G12

### J420-A

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M004) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right WXR xcvr, M34216. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (25) Re-install the right WXR xcvr, M34216. To install it, do this task: WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
- (26) Look at the message in existing faults and find the LRU that detected the fault.
- (a) Replace the applicable LRU.
- 1) If the left VHF comm xcvr detected the fault, replace the left VHF comm xcvr, M23103.  
These are the tasks:  
VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801,  
VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 2) If the right VHF comm xcvr detected the fault, replace the right VHF comm xcvr, M23203.  
These are the tasks:  
VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801,  
VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 3) If the center VHF comm xcvr detected the fault, replace the center VHF comm xcvr, M23303.  
These are the tasks:  
VHF Communication Transceiver Removal, AMM TASK 23-12-01-000-801,  
VHF Communication Transceiver Installation, AMM TASK 23-12-01-400-801.
  - 4) If the right VOR/MB receiver detected the fault, replace the right VOR/MB receiver, M34215.  
These are the tasks:  
VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801,  
VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
  - 5) If the right multi-mode receiver (MMR) detected the fault, replace the right MMR, M34510.  
These are the tasks:  
Receiver for ILS - Removal, AMM TASK 34-31-01-000-801,  
Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- 6) If the right ADF receiver detected the fault, replace the right ADF receiver, M34208.  
These are the tasks:  
ADF Receiver Removal, AMM TASK 34-57-01-000-801,  
ADF Receiver Installation, AMM TASK 34-57-01-400-801.
  - 7) If the right DME interrogator detected the fault, replace the right DME interrogator, M34209.  
These are the tasks:  
DME Interrogator Removal, AMM TASK 34-55-01-000-801,  
DME Interrogator Installation, AMM TASK 34-55-01-400-801.
  - 8) If the right ATC transponder detected the fault, replace the right ATC transponder, M34207.  
These are the tasks:  
ATC/Mode S Transponder Removal, AMM TASK 34-53-01-000-801,  
ATC/Mode S Transponder Installation, AMM TASK 34-53-01-400-801.
  - 9) If the right WHCU detected the fault, replace the right WHCU, M30201.  
These are the tasks:  
Window Heat Control Unit Removal, AMM TASK 30-41-01-000-801,  
Window Heat Control Unit Installation, AMM TASK 30-41-01-400-801.
  - 10) If the right RA xcvr detected the fault, replace the right RA xcvr, M34212.  
These are the tasks:  
Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801,  
Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
  - 11) If the right HF comm xcvr detected the fault, replace the right HF comm xcvr, M23201.  
These are the tasks:  
HF Communication Transceiver Removal, AMM TASK 23-11-05-000-801,  
HF Communication Transceiver Installation, AMM TASK 23-11-05-400-801.
  - 12) If the right WXR xcvr detected the fault, replace the right WXR xcvr, M34216.  
These are the tasks:  
WXR Transceiver Removal, AMM TASK 34-43-02-000-801,  
WXR Transceiver Installation, AMM TASK 34-43-02-400-801.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 888. AIMS-R No Output On Right Nav Tuning Bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-68904.

## 31-43 TASKS 887-888

D633W103-ARO

Page 298.81  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the right VOR/MB receiver, M34215. To remove it, do this task: VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801.
  - (c) Do a wiring check between these pins of connector DM34215AB at the E2-3 shelf and connector J420-A in the right AIMS cabinet (WDM 34-61-12) (SSM 31-41-06):

| <b>DM34215AB</b>  | <b>J420-A</b> |
|-------------------|---------------|
| pin B11 . . . . . | pin F11       |
| pin C11 . . . . . | pin G12       |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M004) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right VOR/MB receiver, M34215. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the right VOR/MB receiver, M34215. To install it, do this task: VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
- (4) Do this check of the wiring:
  - (a) Remove the right multi-mode receiver (MMR), M34510. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 298.82  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Do a wiring check between these pins of connector DM34510AB at the E2-3 shelf and connector J420-A in the right AIMS cabinet (WDM 34-61-12) (SSM 31-41-06):

| <b>DM34510AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin J1 .....     | pin F11       |
| pin K1 .....     | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M004) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right MMR, M34510. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the right MMR, M34510. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
- (6) Do this check of the wiring:
- (a) Remove the right ADF receiver, M34208. To remove it, do this task: ADF Receiver Removal, AMM TASK 34-57-01-000-801.
- (b) Do a wiring check between these pins of connector DM34208AB at the E2-3 shelf and connector J420-A in the right AIMS cabinet (WDM 34-61-12) (SSM 31-41-06):

| <b>DM34208AB</b> | <b>J420-A</b> |
|------------------|---------------|
| pin B7 .....     | pin F11       |
| pin B8 .....     | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M004) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right ADF receiver, M34208. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (7) Re-install the right ADF receiver, M34208. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
- (8) Do this check of the wiring:
- (a) Remove the right DME interrogator, M34209. To remove it, do this task: DME Interrogator Removal, AMM TASK 34-55-01-000-801.
- (b) Do a wiring check between these pins of connector DM34209AB at the E2-3 shelf and connector J420-A in the right AIMS cabinet (WDM 34-61-12) (SSM 31-41-06):

### DM34209AB

pin D3 ..... pin F11  
pin E3 ..... pin G12

### J420-A

- (c) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M004) in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the right DME interrogator, M34209. To install it, do this task: DME Interrogator Installation, AMM TASK 34-55-01-400-801.
  - 4) Re-install the right ADF receiver, M34208. To install it, do this task: ADF Receiver Installation, AMM TASK 34-57-01-400-801.
  - 5) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (9) Look at the message in existing faults and find the LRU that detected the fault.
- (a) Replace the applicable LRU.
- 1) If the right VOR/MB receiver detected the fault, replace the right VOR/MB receiver, M34215.  
These are the tasks:  
VOR/MB Receiver Removal, AMM TASK 34-51-01-000-801,  
VOR/MB Receiver Installation, AMM TASK 34-51-01-400-801.
  - 2) If the right multi-mode receiver (MMR) detected the fault, replace the right MMR, M34510.  
These are the tasks:  
Receiver for ILS - Removal, AMM TASK 34-31-01-000-801,  
Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - 3) If the right ADF receiver detected the fault, replace the right ADF receiver, M34208.  
These are the tasks:  
ADF Receiver Removal, AMM TASK 34-57-01-000-801,  
ADF Receiver Installation, AMM TASK 34-57-01-400-801.
  - 4) If the right DME interrogator detected the fault, replace the right DME interrogator, M34209.  
These are the tasks:  
DME Interrogator Removal, AMM TASK 34-55-01-000-801,  
DME Interrogator Installation, AMM TASK 34-55-01-400-801.
- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 889. AIMS-L No Output On Center CMCS Cabinet Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-68905.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M008) in the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the center radio altimeter transceiver (RA xcvr), M34312. To remove it, do this task: Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801.
  - (c) Do a wiring check between these pins of connector DM34112AB at the E5-3 shelf and connector J410-A in the left AIMS cabinet (WDM 45-45-31) (SSM 31-41-03):

| DM34112AB | J410-A  |
|-----------|---------|
| pin A1    | pin F11 |
| pin A2    | pin G12 |
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the center RA xcvr, M34312. To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
- (3) Re-install the center RA xcvr, M34312. To install it, do this task: Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.
- (4) Do this check of the wiring:

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the center multi-mode receiver (MMR), M34610. To remove it, do this task: Receiver for ILS - Removal, AMM TASK 34-31-01-000-801.
- (b) Do a wiring check between these pins of connector DM34610AB at the E1-3 shelf and connector J410-A in the left AIMS cabinet (WDM 45-45-31) (SSM 31-41-03):

| <b>DM34610AB</b> | <b>J410-A</b> |
|------------------|---------------|
| pin E1 . . . . . | pin F11       |
| pin F1 . . . . . | pin G12       |

- (c) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the center MMR, M34610. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If you do not find a problem with the wiring, then continue.
- (5) Re-install the center MMR, M34610. To install it, do this task: Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.
- (6) Do this check of the wiring:
  - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the ground proximity warning computer (GPWC), M34004. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
  - (c) Do a wiring check between these pins of connector DM34004AA at the E1-4 shelf and connector J410-A in the left AIMS cabinet (WDM 31-41-32) (SSM 31-41-03):

| <b>DM34004AA</b> | <b>J410-A</b> |
|------------------|---------------|
| pin A9 . . . . . | pin F11       |
| pin B9 . . . . . | pin G12       |

- (d) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.
    - 2) Re-install the IOM(M008) in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
    - 3) Re-install the GPWC, M34004. To install it, do this task: Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
  - (7) Look at the message in existing faults and find the LRU that detected the fault.
    - (a) Replace the applicable LRU.
      - 1) If the center RA xcvr detected the fault, replace the center RA xcvr, M34312.
- These are the tasks:

## 777-200/300 FAULT ISOLATION MANUAL

Radio Altimeter Transceiver Removal, AMM TASK 34-33-01-000-801,  
Radio Altimeter Transceiver Installation, AMM TASK 34-33-01-400-801.

- 2) If the center multi-mode receiver (MMR) detected the fault, replace the center MMR, M34610.

These are the tasks:

Receiver for ILS - Removal, AMM TASK 34-31-01-000-801,  
Receiver for ILS - Installation, AMM TASK 34-31-01-400-801.

- 3) If the GPWC detected the fault, replace the GPWC, M34004.

These are the tasks:

Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801,  
Ground Proximity Warning Computer Installation, AMM TASK 34-46-01-400-801.

- (b) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### ———— END OF TASK ————

## 890. AIMS-R No Output On Right General Purpose #1 Bus - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-68906.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the IOM(M003) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
  - (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the ground proximity warning computer (GPWC), M34004. To remove it, do this task: Ground Proximity Warning Computer Removal, AMM TASK 34-46-01-000-801.
  - (c) Do a wiring check between these pins of connector DM34004AA at the E1-4 shelf and connector J240-B in the right AIMS cabinet (WDM 31-41-23) (SSM 31-41-06):

D633W103-ARO

Page 298.88  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

**NOTE:** A loose coaxial cable connection at a coaxial coupler is a known cause of faults. For multiple faults, look for a common coupler.

**NOTE:** A loose coaxial cable connection at a coaxial coupler and intermittent GG can cause blinking of the display units. If there is an intermittent coax connection or an intermittent GG fault, the flight crew might see a DU blink 3 to six times, and then the redundancy logic takes effect and the blinking stop.

- (1) Start the applicable MAT test, found in chapter 31 AIMS - Display Systems, Special Functions, for the maintenance message.

**NOTE:** The tests will loop continuously so you can fault isolate the applicable display system. Stop the test when you are done with the fault isolation.

- (2) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (3) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**NOTE:** A loose coaxial cable connection at a coaxial coupler can cause an intermittent fault.

### C. Fault Isolation Procedure

- (1) In the list below, find the MAT test, display unit (DU), AIMS module, connector numbers for the applicable maintenance message.

| MAINT MESSAGE | MAT TEST (LOOP TEST FORMAT)                  | DISPLAY UNIT(DU)     | AIMS MODULE                 | DU COAX CONNECTOR              | COUPLER COAX CONNECTOR       |

## 31-43 TASK 891

D633W103-ARO

Page 298.92  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

These are the tasks:

Display Unit Removal, AMM TASK 31-61-01-000-801,

Display Unit Installation, AMM TASK 31-61-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the applicable CPM/GG(M010 or M011) in the applicable AIMS cabinet.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do these steps to check the coaxial connections.

### WARNING

REMOVE ELECTRICAL POWER FROM THE CAPTAIN'S (FIRST OFFICER'S) SEAT. YOU CAN ACCIDENTALLY CAUSE A SEAT TO MOVE AND CAUSE INJURIES TO PERSONS AND DAMAGE TO EQUIPMENT.

- (a) Open these circuit breakers and install safety tags:

#### Left Power Management Panel, P110

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| D          | 18         | C25323        | CAPT SEAT   |

#### Right Power Management Panel, P210

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 13         | C25324        | F/O SEAT    |

- (b) Open the forward access panel that is outboard of the rudder pedals.
- (c) Make sure the coaxial cable connection is OK (WDM 31-61-14) (WDM 31-61-15).
- (d) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 1) Close the forward access panel that is outboard of the rudder pedals.
  - 2) Remove the safety tags and close these circuit breakers:

#### Left Power Management Panel, P110

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| D          | 18         | C25323        | CAPT SEAT   |

#### Right Power Management Panel, P210

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 13         | C25324        | F/O SEAT    |

## 777-200/300 FAULT ISOLATION MANUAL

- (e) If the MAT shows ACTIVE for the maintenance message, then continue.
- (6) Do this check of the applicable coaxial cable:
  - (a) Remove the applicable DU. To remove it, do this task: Display Unit Removal, AMM TASK 31-61-01-000-801.
  - (b) Disconnect the applicable coaxial connector from the applicable coaxial coupler (WDM 31-61-14) (WDM 31-61-15).
  - (c) Do an electrical check of the applicable coaxial cable (AMM TASK 20-10-32-210-801).
  - (d) If you find a problem with the coaxial cable, then do these steps:
    - 1) Replace the coaxial cable (WDM 31-61-14) (WDM 31-61-15).
    - 2) Re-install the applicable DU. To install it, do this task: Display Unit Installation, AMM TASK 31-61-01-400-801.
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (f) If the MAT shows ACTIVE for the maintenance message, then continue.
- (7) Replace the applicable coaxial coupler.

**NOTE:** A loose coaxial cable connection at a coaxial coupler and intermittent GG can cause blinking of the display units.

These are the tasks:

Coaxial Coupler Removal, AMM TASK 31-61-11-000-801,

Coaxial Coupler Installation, AMM TASK 31-61-11-400-801.

- (a) Close the forward access panel that is outboard of the rudder pedals.
- (b) Remove the safety tags and close these circuit breakers:

### Left Power Management Panel, P110

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| D          | 18         | C25323        | CAPT SEAT   |

### Right Power Management Panel, P210

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| B          | 13         | C25324        | F/O SEAT    |

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (d) If the MAT shows ACTIVE for the maintenance message, then continue.
- (8) Replace the applicable CPM/GG.

These are the tasks:

Core Processor Module/Graphics Generator (CPM/GG) Removal, AMM TASK 31-41-02-000-801,

Core Processor Module/Graphics Generator (CPM/GG) Installation, AMM TASK 31-41-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### 892. AIMS-L No Output On Any Bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-68801.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P11 Overhead Circuit Breaker Panel.
  - (b) Do a check for 28V DC between terminal 1 of these circuit breakers at the P11 panel and structure ground (WDM 31-41-11):
    - 1) C31609, 11B12, AIMS L-1
    - 2) C31611, 11B13, AIMS L-2
    - 3) C31617, 11B14, AIMS L-3
    - 4) C31619, 11B15, AIMS L-4
  - (c) Open the P310 standby power management Panel.
  - (d) Do a check for 28V DC between terminal 1 of this circuit breaker at the P310 panel and structure ground (WDM 31-41-11):
    - 1) C31651, 310J6, AIMS STANDBY-L
  - (e) If there is not 28V DC at terminal 1 of C31609, C31611, C31617, C31619, and C31651, then do these steps:
    - 1) Close the P11, and P310 Panels.
    - 2) Look in chapter 24 of existing faults on the MAT for any messages related to the 28 VDC Captain's Flight Instrument bus, the 28 VDC First Officer's Flight Instrument bus, or the 28 VDC Hot Battery bus.
    - 3) If you find any messages related to the 28 VDC Captain's Flight Instrument bus, the 28 VDC First Officer's Flight Instrument bus, or the 28 VDC Hot Battery bus, then do the fault isolation steps for those messages.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (f) If there is 28V DC at terminal 1 of C31609, C31611, C31617, C31619, and C31651, then continue.
- (2) Do this check for 28V DC at the circuit breaker:
  - (a) Do a check for 28V DC between terminal 2 of these circuit breakers at the P11 panel and structure ground (WDM 31-41-11):
    - 1) C31609, 11B12, AIMS L-1
    - 2) C31611, 11B13, AIMS L-2
    - 3) C31617, 11B14, AIMS L-3
    - 4) C31619, 11B15, AIMS L-4

D633W103-ARO

Page 298.95  
May 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Do a check for 28V DC between terminal 2 of this circuit breaker at the P310 panel and structure ground (WDM 31-41-11).
    - 1) C31651, 310J6, AIMS STANDBY-L
  - (c) If there is not 28V DC at terminal 2 of C31609, C31611, C31617, C31619, or C31651, then do these steps:
    - 1) Replace the applicable circuit breaker (WDM 31-41-11):
    - 2) Close the P11, and P310 Panels.
    - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If there is 28V DC at terminal 2 of C31609, C31611, C31617, C31619, and C31651, then continue.
- (3) Do these checks of the wiring:
- (a) Remove the IOM(M004). To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Check the wiring between circuit breaker C31609, terminal 2 and connector P4-C, pin A17 in the L-AIMS cabinet, M31101 (WDM 31-41-11).
  - (c) Check the wiring between circuit breaker C31611, terminal 2 and connector P4-C, pin H17 in the L-AIMS cabinet, M31101 (WDM 31-41-11).
  - (d) Check the wiring between circuit breaker C31617, terminal 2 and connector P4-C, pin H13 in the L-AIMS cabinet, M31101 (WDM 31-41-11).
  - (e) Check the wiring between circuit breaker C31619, terminal 2 and connector P4-C, pin A13 in the L-AIMS cabinet, M31101 (WDM 31-41-11).
  - (f) Check the wiring between circuit breaker C31651, terminal 2 and connector P4-C, pin A15 in the L-AIMS cabinet, M31101 (WDM 31-41-11).
  - (g) Repair any wiring problems you find.
  - (h) Re-install the IOM(M004). To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (i) Close the P11, and P310 Panels.
  - (j) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 893. AIMS-R No Output On Any Bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-68802.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Do this check for 28V DC at the circuit breaker:
  - (a) Open the P11 Overhead Circuit Breaker Panel.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) Do a check for 28V DC between terminal 1 of these circuit breakers at the P11 panel and structure ground (WDM 31-41-11):
    - 1) C31610, 11F12, AIMS R-1
    - 2) C31612, 11FB13, AIMS R-2
    - 3) C31618, 11F14, AIMS R-3
    - 4) C31620, 11F15, AIMS R-4
  - (c) Open the P310 standby power management Panel.
  - (d) Do a check for 28V DC between terminal 1 of this circuit breaker at the P310 panel and structure ground (WDM 31-41-11):
    - 1) C31650, 310J7, AIMS STANDBY-R
  - (e) If there is not 28V DC at terminal 1 of C31610, C31612, C31618, C31620, and C31650, then do these steps:
    - 1) Close the P11, and P310 Panels.
    - 2) Look in chapter 24 of existing faults on the MAT for any messages related to the 28 VDC Left bus, 28 VDC Right bus, or the 28 VDC Hot Battery bus.
    - 3) If you find any messages related to the 28 VDC Left bus, 28 VDC Right bus, or the 28 VDC Hot Battery bus, then do the fault isolation steps for those messages.
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (f) If there is 28V DC at terminal 1 of C31610, C31612, C31618, C31620, and C31650, then continue.
- (2) Do this check for 28V DC at the circuit breaker:
- (a) Do a check for 28V DC between terminal 2 of these circuit breakers at the P11 panel and structure ground (WDM 31-41-11):
    - 1) C31610, 11F12, AIMS R-1
    - 2) C31612, 11FB13, AIMS R-2
    - 3) C31618, 11F14, AIMS R-3
    - 4) C31620, 11F15, AIMS R-4
  - (b) Do a check for 28V DC between terminal 2 of this circuit breaker at the P310 panel and structure ground (WDM 31-41-11).
    - 1) C31650, 310J7, AIMS STANDBY-R
  - (c) If there is not 28V DC at terminal 2 of C31610, C31612, C31618, C31620, or C31650, then do these steps:
    - 1) Replace the applicable circuit breaker (WDM 31-41-11).
    - 2) Close the P11, and P310 Panels.
    - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (d) If there is 28V DC at terminal 2 of C31610, C31612, C31618, C31620, and C31650, then continue.
- (3) Do these checks of the wiring:
- (a) Remove the IOM(M004). To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.

May 05/2017

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (b) Check the wiring between circuit breaker C31610, terminal 2 and Connector P4-C, pin A17 in the R-AIMS cabinet, M31201 (WDM 31-41-11).
- (c) Check the wiring between circuit breaker C31612, terminal 2 and Connector P4-C, pin H17 in the R-AIMS cabinet, M31201 (WDM 31-41-11).
- (d) Check the wiring between circuit breaker C31618, terminal 2 and Connector P4-C, pin H13 in the R-AIMS cabinet, M31201 (WDM 31-41-11).
- (e) Check the wiring between circuit breaker C31620, terminal 2 and Connector P4-C, pin A13 in the R-AIMS cabinet, M31201 (WDM 31-41-11).
- (f) Check the wiring between circuit breaker C31650, terminal 2 and Connector P4-C, pin A15 in the R-AIMS cabinet, M31201 (WDM 31-41-11).
- (g) Repair any wiring problems you find.
- (h) Re-install the IOM(M004). To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (i) Close the P11, and P310 Panels.
- (j) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**894. Display Unit Database in Left AIMS CPM/GG(M010) and Display Unit are Not Compatible - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance messages: 31-82211, 31-82221, 31-82231, 31-82241, 31-82251, 31-82261.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Use a maintenance access terminal (MAT) to do a software configuration check of the CPM/GG(M010):
  - (a) Make these selections on the MAT:
    - 1) ONBOARD MAINTENANCE
    - 2) LINE MAINTENANCE
    - 3) SYSTEM CONFIGURATION
    - 4) 31 AIMS - Left AIMS, CPM/GG(M010) in Left AIMS
    - 5) CONTINUE
  - (b) Find CPM/GG(M010) on the display and make sure that the software part number for the Display Unit Database (DU DB) is correct.
  - (c) Select GO BACK to remove the configuration display.
- (2) If the software part number is incorrect, install the correct DU DB. To install it, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) If the software part number is correct, replace the applicable display unit. To replace it, These are the tasks:  
Display Unit Removal, AMM TASK 31-61-01-000-801,  
Display Unit Installation, AMM TASK 31-61-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 895. Display Unit Database in Right AIMS CPM/GG(M010) and Display Unit are Not Compatible - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-82212, 31-82222, 31-82232, 31-82242, 31-82252, 31-82262.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Use a maintenance access terminal (MAT) to do a software configuration check of the CPM/GG(M010):
  - (a) Make these selections on the MAT:
    - 1) ONBOARD MAINTENANCE
    - 2) LINE MAINTENANCE
    - 3) SYSTEM CONFIGURATION
    - 4) 31 AIMS - Right AIMS, CPM/GG(M010) in Right AIMS
    - 5) CONTINUE
  - (b) Find CPM/GG(M010) on the display and make sure that the software part number for the Display Unit Database (DU DB) is correct.
  - (c) Select GO BACK to remove the configuration display.
- (2) If the software part number is incorrect, install the correct DU DB. To install it, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) If the software part number is correct, replace the applicable display unit. To replace it, These are the tasks:  
Display Unit Removal, AMM TASK 31-61-01-000-801,  
Display Unit Installation, AMM TASK 31-61-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

### 801. Left AIMS Software Configuration Problem - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-50011, 31-50311.

#### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Left AIMS.
  - (a) Find these line replaceable modules (LRM) on the display and make sure that the software part numbers are correct:
    - 1) CPM/Comm(M001) in Left AIMS
    - 2) CPM/STD (M002) in Left AIMS
    - 3) IOM(M003) in Left AIMS
    - 4) IOM(M004) in Left AIMS
    - 5) IOM(M008) in Left AIMS
    - 6) IOM(M009) in Left AIMS
    - 7) CPM/GG(M010) in Left AIMS
    - 8) CPM/GG(M011) in Left AIMS
- (2) If any of the part numbers are incorrect, install software in the applicable LRM in the left AIMS cabinet:
  - (a) To install software in the CPM/Comm(M001), do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.
  - (b) To install software in the CPM/STD (M002), do this task: Core Processor Module/Standard Software Installation, AMM TASK 31-41-05-420-801.
  - (c) To install software in an IOM, do this task: Input/Output Module (IOM) Software Installation, AMM TASK 31-41-11-420-806.
  - (d) To install software in an CPM/GG, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
  - (e) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Use a MAT to do a ground test of the module that got software:
  - (a) If the module is a CPM/Comm, make these selections on the MAT to make sure the right CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.  
NOTE: You must reset the CPM/Comm from the off-side CMCF.
    - 1) If the display shows that the left CMCF is in control, select SWITCH TO RIGHT.
    - 2) If the display shows that the right CMCF is in control, then select GO BACK.
  - (b) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (c) Select the ground test for the module that got software:
    - 1) CPM/COMM (M001) in Left AIMS Module Reset  
NOTE: The CPM/Comm (M001) in Left AIMS Module Reset ground test must be started by the PMAT.
    - 2) CPM/STD (M002) in Left AIMS Module Reset
    - 3) IOM(M003) in Left AIMS Module Reset
    - 4) IOM(M004) in Left AIMS Module Reset

## 802. Right AIMS Software Configuration Problem - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-50012, 31-50312.

### B. Fault Isolation Procedure

- (1) Do a check of the system configuration for this system on the MAT: 31 AIMS - Right AIMS.
- (a) Find these line replaceable modules (LRM) on the display and make sure that the software part numbers are correct:
    - 1) CPM/Comm(M001) in Right AIMS
    - 2) CPM/STD (M002) in Right AIMS
    - 3) IOM(M003) in Right AIMS
    - 4) IOM(M004) in Right AIMS
    - 5) IOM(M008) in Right AIMS
    - 6) IOM(M009) in Right AIMS
    - 7) CPM/GG(M010) in Right AIMS
    - 8) CPM/GG(M011) in Right AIMS
  - (2) If any of the part numbers are incorrect, install software in the applicable LRM in the right AIMS cabinet:
    - (a) To install software in the CPM/Comm(M001), do this task: Core Processor Module/COMM Software Installation, AMM TASK 31-41-04-420-804.
    - (b) To install software in the CPM/STD (M002), do this task: Core Processor Module/Standard Software Installation, AMM TASK 31-41-05-420-801.
    - (c) To install software in an IOM, do this task: Input/Output Module (IOM) Software Installation, AMM TASK 31-41-11-420-806.
    - (d) To install software in an CPM/GG, do this task: Core Processor Module/GG Software Installation, AMM TASK 31-41-02-420-804.
  - (3) Use a MAT to do a ground test of the module that got software:
    - (a) If the module is a CPM/Comm, make these selections on the MAT to make sure the left CMCF is in control: OTHER FUNCTIONS, CENTRAL MAINTENANCE COMPUTER SWITCH CONTROL.  
NOTE: You must reset the CPM/Comm from the off-side CMCF.
      - 1) If the display shows that the right CMCF is in control, select SWITCH TO LEFT.
      - 2) If the display shows that the left CMCF is in control, then select GO BACK.
    - (b) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
    - (c) Select the ground test for the module that got software:

### — END OF TASK —

#### 804. Left AIMS (M009) Program Pin Problem - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50021.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Left AIMS Module Reset
    - 2) CPM/GG(M011) in Left AIMS Module Reset

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Do this check of the wiring between the connectors for the AIMS IOM modules M008 and M009:
  - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J410-B and J420-B (WDM 31-41-15):

| <b>J410-B</b>    | <b>J420-B</b> |
|------------------|---------------|
| pin C8 . . . . . | pin C8        |
| pin E3 . . . . . | pin E3        |

- (d) Do a wiring check between these pins of the IOM connectors J410-A and J420-A(WDM 31-41-15):

| <b>J410-A</b>    | <b>J420-A</b> |
|------------------|---------------|
| pin D2 . . . . . | pin D2        |

- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (4) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Left AIMS Module Reset
    - 2) CPM/GG(M011) in Left AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M009) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Right AIMS Module Reset
    - 2) CPM/GG(M011) in Right AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Do this check of the wiring between the connectors for the AIMS IOM M008 and M009:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J410-B and J420-B (WDM 31-41-15):

| <b>J410-B</b> |       | <b>J420-B</b> |
|---------------|-------|---------------|
| pin D8        | ..... | pin D8        |
| pin E3        | ..... | pin E3        |

- (d) Do a wiring check between these pins of the IOM connectors J410-A and J420-A(WDM 31-41-15):

| <b>J410-A</b> |       | <b>J420-A</b> |
|---------------|-------|---------------|
| pin D2        | ..... | pin D2        |

- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

D633W103-ARO

Page 207  
Jan 05/2014

## 777-200/300 FAULT ISOLATION MANUAL

- (4) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Right AIMS Module Reset
    - 2) CPM/GG(M011) in Right AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 806. Left and Right AIMS Program Pin Compatability Problem - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-50023, 31-50024.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the PMAT to unlatch the fault: 31 AIMS - Left AIMS, System Test, Left AIMS Cabinet Reset.

NOTE: The Left AIMS Cabinet Reset ground test must be started by the PMAT.

- (a) If the maintenance message shows on the ground test display, then continue.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.
- (3) If the MAT still shows LATCHED for the maintenance message, then do this ground test on the MAT to unlatch the fault: 31 AIMS - Right AIMS, System Test, Right AIMS Cabinet Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### ARO 003 POST SB 777-31-0227 AND PRE SB 777-31-0263 AND PRE SB 777-31-0264 AND PRE SB 777-31-0218

- (4) Enter the airplane tail number on the System Information page to establish Controller-Pilot Data Link Communications (CPDLC).
  - (a) Make these selections on the MFD to access the System Information page.
    - 1) Press COMM on the DSP to display the FDCF MAIN MENU on the MFD.
    - 2) Press MANAGER on the FDCF MAIN MENU to display the FDCF MANAGER MENU.
    - 3) Press SYSTEM INFORMATION on the FDCF MANAGER MENU to display the SYSTEM INFORMATION Sub-menu.

ARO 003 POST SB 777-31-0227 AND PRE SB 777-31-0263 AND PRE SB 777-31-0264 AND PRE SB 777-31-0218 (Continued)

- (b) Enter the airplane tail number.

**NOTE:** The tail number is lost and needs to be re-entered to re-establish CPDLC if the AIMS L or AIMS R circuit breakers are cycled, the AIMS CPM/COMM module is re-racked, new CMCF AMI software is loaded, or new COMM software is loaded. The tail number must be entered before engine start, since the field is inhibited after engine start.

### ARO ALL

#### C. Fault Isolation Procedure

- (1) Use a Maintenance Access Terminal (MAT) to do a check of the program pin configuration of each AIMS cabinet:
    - (a) Make these selections on the MAT to see the program pin configuration of the left AIMS cabinet:
      - 1) ONBOARD MAINTENANCE
      - 2) LINE MAINTENANCE
      - 3) SYSTEM CONFIGURATION
      - 4) 31 AIMS - Left AIMS
      - 5) CONTINUE
    - (b) Look at the IOM Program Pins for each IOM in left AIMS and find those that are different from these correct values:
      - 1) IOM(M003) & (M004) in Left AIMS
        - a) BFDF-FF40-2000
      - 2) IOM(M008) & (M009) in Left AIMS
        - a) 3B7D-FFC4-8200
    - (c) Make these selections on the MAT to see the program pin configuration of the right AIMS cabinet:
      - 1) SELECT NEW ATA
      - 2) 31 AIMS - Right AIMS
      - 3) CONTINUE
    - (d) Look at the IOM Program Pins for each IOM in right AIMS and find those that are different from these correct values:
      - 1) IOM(M003) & (M004) in Right AIMS
        - a) DFDF-FF20-2000
      - 2) IOM(M008) & (M009) in Right AIMS
        - a) 5B7D-FFA4-8200
  - (2) Find the applicable wiring for the incorrect program pins and do a wiring check:
    - (a) Use the table below to find the bit that is incorrect:
      - 1) Write the first four hex characters of the incorrect program pin value from the System Configuration display under G, H, J, and K on the "HEX IS NOW" line.
- NOTE:** Given the program pins in the format GHJK-LMNP-WXYZ, positions L, M, N, P, W, X, Y, and Z can be ignored for this fault isolation procedure.

D633W103-ARO

Page 209  
Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

| POSITION         | G       | H       | J         | K           |
|------------------|---------|---------|-----------|-------------|
| HEX IS NOW       | —       | —       | —         | —           |
| HEX SHOULD BE    | —       | —       | —         | —           |
| BINARY IS NOW    | -----   | -----   | -----     | -----       |
| BINARY SHOULD BE | -----   | -----   | -----     | -----       |
| BIT              | 0 1 2 3 | 4 5 6 7 | 8 9 10 11 | 12 13 14 15 |

- 2) Write the first four hex characters of the correct program pin value from the FIM on the "HEX SHOULD BE" line.
- 3) Compare the "HEX IS NOW" line with the "HEX SHOULD BE" line and find the incorrect hex character.
- 4) Under the incorrect hex character, write the binary equivalent of the incorrect hex character on the "BINARY IS NOW" line. (Refer to the table below for the binary equivalent of each hex character.)
- 5) Write the binary equivalent of the correct hex character on the "BINARY SHOULD BE" line.
- 6) Compare the binary values and find the number of the incorrect bit on the "BIT" line.

| HEX | BINARY |
|-----|--------|
| 0   | 0000   |
| 1   | 0001   |
| 2   | 0010   |
| 3   | 0011   |
| 4   | 0100   |
| 5   | 0101   |
| 6   | 0110   |
| 7   | 0111   |
| 8   | 1000   |
| 9   | 1001   |
| A   | 1010   |
| B   | 1011   |
| C   | 1100   |
| D   | 1101   |
| E   | 1110   |
| F   | 1111   |

- (b) If IOM(M003) or IOM(M004) in left AIMS has incorrect program pins, find the incorrect bit in the table below.

| BIT | DEFINITION    | CONNECTOR | PIN | IOM(M003) | IOM(M004) |
|-----|---------------|-----------|-----|-----------|-----------|
| 1   | CABINET LEFT  | D6623     | 35  | P3B-G12   | P4B-G12   |
| 2   | CABINET RIGHT | D6623     | 40  | P3B-F12   | P4B-F12   |

- (f) Find the definition of the bit and the connectors
- (g) Remove the applicable IOM from the AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
- (h) Do a check of the program pin wiring (WDM 31-41-15).
- (i) Repair the problems that you find.
- (j) Re-install the applicable IOM. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (k) If IOM(M003) in left AIMS had incorrect program pins, do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M003) in Left AIMS Module Reset.
- (l) If IOM(M003) in right AIMS had incorrect program pins, do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M003) in Right AIMS Module Reset.
- (m) If IOM(M004) in left AIMS had incorrect program pins, do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
- (n) If IOM(M004) in right AIMS had incorrect program pins, do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
- (o) If IOM(M008) in left AIMS had incorrect program pins, do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
- (p) If IOM(M008) in right AIMS had incorrect program pins, do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
- (q) If IOM(M009) in left AIMS had incorrect program pins, do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
- (r) If IOM(M009) in right AIMS had incorrect program pins, do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M009) in Right AIMS Module Reset.
- (s) If the left AIMS had incorrect program pins, do these ground tests on the MAT:
  - 1) 31 AIMS - Left AIMS, System Test, CPM/GG(M010) in Left AIMS Module Reset.
  - 2) 31 AIMS - Left AIMS, System Test, CPM/GG(M011) in Left AIMS Module Reset.
- (t) If the right AIMS had incorrect program pins, do this ground test on the MAT:
  - 1) 31 AIMS - Right AIMS, System Test, CPM/GG(M010) in Right AIMS Module Reset.
  - 2) 31 AIMS - Right AIMS, System Test, CPM/GG(M011) in Right AIMS Module Reset.
- (u) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

Page 212  
Sep 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

### 807. Left AIMS (M008) Program Pin Problem - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50031.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Left AIMS Module Reset
    - 2) CPM/GG(M011) in Left AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Do this check of the wiring between the connectors for the AIMS IOM M008 and M009:
  - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J410-B and J420-B (WDM 31-41-15):

| J410-B |       | J420-B |
|--------|-------|--------|
| pin C8 | ..... | pin C8 |
| pin E3 | ..... | pin E3 |
  - (d) Do a wiring check between these pins of the IOM connectors J410-A and J420-A (WDM 31-41-15):

## 777-200/300 FAULT ISOLATION MANUAL

### J410-A

pin D2 . . . . . pin D2

### J420-A

- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (4) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Left AIMS Module Reset
    - 2) CPM/GG(M011) in Left AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

## 808. Right AIMS (M008) Program Pin Problem - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50032.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M008) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.

- (b) Select the reset for the appropriate module:
  - 1) CPM/GG(M010) in Right AIMS Module Reset
  - 2) CPM/GG(M011) in Right AIMS Module Reset
- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Do this check of the wiring between the connectors for the AIMS IOM M008 and M009:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J410-B and J420-B (WDM 31-41-15):

| <b>J410-B</b>    | <b>J420-B</b> |
|------------------|---------------|
| pin D8 . . . . . | pin D8        |
| pin E3 . . . . . | pin E3        |

- (d) Do a wiring check between these pins of the IOM connectors J410-A and J420-A(WDM 31-41-15):

| <b>J410-A</b>    | <b>J420-A</b> |
|------------------|---------------|
| pin D2 . . . . . | pin D2        |

- (e) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (4) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Right AIMS Module Reset
    - 2) CPM/GG(M011) in Right AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M004) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the IOM(M004) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Left AIMS Module Reset
    - 2) CPM/GG(M011) in Left AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Do this check of the wiring between the connectors for the AIMS IOM M003 and M004:
  - (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J240-B and J250-B(WDM 31-41-15):

|               |               |
|---------------|---------------|
| <b>J240-B</b> | <b>J250-B</b> |
| pin C8        | pin C8        |
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task:  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### 810. Right AIMS (M004) Program Pin Problem - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-50042.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Right AIMS, System Test, IOM(M004) in Right AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the IOM(M004) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Right AIMS Module Reset
    - 2) CPM/GG(M011) in Right AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (3) Do this check of the wiring between the connectors for the AIMS IOM M003 and M004:
  - (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.

D633W103-ARO

Page 220  
Jan 05/2017

## 777-200/300 FAULT ISOLATION MANUAL

- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 813. Left AIMS (M003, M004, M008, M009) Program Pin Problem - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50061.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, do these steps:
- (a) Do these ground tests on the MAT: 31 AIMS - Left AIMS, System Test:
- 1) IOM(M003) in Left AIMS Module Reset
  - 2) IOM(M004) in Left AIMS Module Reset
  - 3) IOM(M008) in Left AIMS Module Reset
  - 4) IOM(M009) in Left AIMS Module Reset
- (b) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
- (c) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### ARO 003 POST SB 777-31-0227 AND PRE SB 777-31-0263 AND PRE SB 777-31-0264 AND PRE SB 777-31-0218

- (3) Enter the airplane tail number on the System Information page to establish Controller-Pilot Data Link Communications (CPDLC).
- (a) Make these selections on the MFD to access the System Information page.
- 1) Press COMM on the DSP to display the FDCF MAIN MENU on the MFD.
  - 2) Press MANAGER on the FDCF MAIN MENU to display the FDCF MANAGER MENU.
  - 3) Press SYSTEM INFORMATION on the FDCF MANAGER MENU to display the SYSTEM INFORMATION Sub-menu.
- (b) Enter the airplane tail number.

**NOTE:** The tail number is lost and needs to be re-entered to re-establish CPDLC if the AIMS L or AIMS R circuit breakers are cycled, the AIMS CPM/COMM module is re-racked, new CMCF AMI software is loaded, or new COMM software is loaded. The tail number must be entered before engine start, since the field is inhibited after engine start.

#### ARO ALL

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Replace the IOM(M004) in the left AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the IOM(M008) in the left AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the IOM(M009) in the left AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Left AIMS Module Reset
    - 2) CPM/GG(M011) in Left AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (6) Do this check of the wiring:
  - (a) Remove the IOM(M008) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the left AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J410-B and J420-B (WDM 31-41-15):

**J410-B**  
pin C8 . . . . .

- (d) Do a wiring check between these pins of the IOM connectors J410-A and J420-A(WDM 31-41-15):

| <b>J410-A</b> | <b>J420-A</b> |
|---------------|---------------|
| pin D2        | pin D2        |

- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (7) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
- (a) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Left AIMS Module Reset
    - 2) CPM/GG(M011) in Left AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (8) Do this check of the wiring:
- (a) Remove the IOM(M003) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J240-B and J250-B(WDM 31-41-15):

| <b>J240-B</b> | <b>J250-B</b> |
|---------------|---------------|
| pin C8        | pin C8        |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (9) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
- (a) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Left AIMS Module Reset

## 777-200/300 FAULT ISOLATION MANUAL

- 2) CPM/GG(M011) in Left AIMS Module Reset
- (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 814. Right AIMS (M003, M004, M008, M009) Program Pin Problem - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50062.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, do these steps:
  - (a) Do these ground tests on the MAT: 31 AIMS - Right AIMS, System Test:
    - 1) IOM(M003) in Right AIMS Module Reset
    - 2) IOM(M004) in Right AIMS Module Reset
    - 3) IOM(M008) in Right AIMS Module Reset
    - 4) IOM(M009) in Right AIMS Module Reset
  - (b) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (c) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

#### **ARO 003 POST SB 777-31-0227 AND PRE SB 777-31-0263 AND PRE SB 777-31-0264 AND PRE SB 777-31-0218**

- (3) Enter the airplane tail number on the System Information page to establish Controller-Pilot Data Link Communications (CPDLC).
  - (a) Make these selections on the MFD to access the System Information page.
    - 1) Press COMM on the DSP to display the FDCF MAIN MENU on the MFD.
    - 2) Press MANAGER on the FDCF MAIN MENU to display the FDCF MANAGER MENU.
    - 3) Press SYSTEM INFORMATION on the FDCF MANAGER MENU to display the SYSTEM INFORMATION Sub-menu.
  - (b) Enter the airplane tail number.

**NOTE:** The tail number is lost and needs to be re-entered to re-establish CPDLC if the AIMS L or AIMS R circuit breakers are cycled, the AIMS CPM/COMM module is re-racked, new CMCF AMI software is loaded, or new COMM software is loaded. The tail number must be entered before engine start, since the field is inhibited after engine start.

#### **ARO ALL**

#### C. Fault Isolation Procedure

- (1) Replace the IOM(M003) in the right AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,

Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Replace the IOM(M004) in the right AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the IOM(M008) in the right AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the IOM(M009) in the right AIMS cabinet.  
These are the tasks:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Right AIMS Module Reset
    - 2) CPM/GG(M011) in Right AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (6) Do this check of the wiring:
  - (a) Remove the IOM(M008) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M009) from the right AIMS cabinet. To remove it, do this task:  
Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J410-B and J420-B (WDM 31-41-15):

**J410-B**

pin D8

pin E3

**J420-B**

pin D8

pin E3

## 777-200/300 FAULT ISOLATION MANUAL

- (d) Do a wiring check between these pins of the IOM connectors J410-A and J420-A(WDM 31-41-15):

| <b>J410-A</b> | <b>J420-A</b> |
|---------------|---------------|
| pin D2        | pin D2        |

- (e) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M008) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M009) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 5) If the MAT shows ACTIVE for the maintenance message, then continue.
- (7) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
- (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Right AIMS Module Reset
    - 2) CPM/GG(M011) in Right AIMS Module Reset
  - (c) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (8) Do this check of the wiring:
- (a) Remove the IOM(M003) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (b) Remove the IOM(M004) from the right AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801.
  - (c) Do a wiring check between these pins of the IOM connectors J240-B and J250-B(WDM 31-41-15):

| <b>J240-B</b> | <b>J250-B</b> |
|---------------|---------------|
| pin D8        | pin D8        |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the IOM(M003) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 3) Re-install the IOM(M004) into the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (9) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
- (a) Make these selections on the MAT: 31 AIMS - Right AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Right AIMS Module Reset

#### 815. Left AIMS (M008, M009) Program Pin Problem - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-50071.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M008) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then continue.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.
- (3) If the MAT shows LATCHED for the maintenance message, then do this ground test on the MAT: 31 AIMS - Left AIMS, System Test, IOM(M009) in Left AIMS Module Reset.
  - (a) If the maintenance message shows on the ground test display, then do the Fault Isolation Procedure below.
  - (b) If the maintenance message does not show on the ground test display, then there was an intermittent fault.

##### C. Fault Isolation Procedure

- (1) Replace the IOM(M008) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows LATCHED for the maintenance message, then continue.
- (2) Replace the IOM(M009) in the left AIMS cabinet.

These are the tasks:

Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Use a MAT to reset the CPM/GG modules in the AIMS you repaired:
  - (a) Make these selections on the MAT: 31 AIMS - Left AIMS, System Test.
  - (b) Select the reset for the appropriate module:
    - 1) CPM/GG(M010) in Left AIMS Module Reset
    - 2) CPM/GG(M011) in Left AIMS Module Reset
