## 777-200/300 FAULT ISOLATION MANUAL

### ASSUMED CONDITIONS AT START OF TASK

- External electrical power is ON
- Hydraulic power and pneumatic power are OFF
- Engines are shut down
- No equipment in the system is deactivated

### INITIAL EVALUATION PARAGRAPH

- The Initial Evaluation paragraph at the start of the task helps you determine whether you can detect the fault right now.
- If you cannot detect the fault right now, then the task cannot isolate the fault and the Initial Evaluation paragraph will say that there was an intermittent fault.
- If you have an intermittent fault, you must use your judgement (and follow your airline's policy) to decide which components to replace. Then monitor the airplane to see if the fault happens again on subsequent flights.

### FAULT ISOLATION STEPS

- The FIM task steps are presented in a specified order. "The If... then" statements will guide you along a logical path. But if you do not plan to follow the FIM task exactly, make sure that you read it before you start to isolate the fault. Some FIM procedures start with important steps that have an effect on the other steps in the procedure.
- When you are at the endpoint of the path, the step says "You corrected the fault." Complete the step and exit the procedure.
- The Recommended Maintenance Action that shows on the MAT for the maintenance message gives a list of possible causes in order by probability of failure. In the FIM procedure, the possible causes can be in a different order from the MAT.

### WIRING CHECKS

When a step says "Do a wiring check", do these three types of electrical checks for the specified contacts (pins):

- continuity from contact to contact
- shorts between the contacts
- shorts from each contact to ground

| MAINT MESSAGE | MESSAGE TEXT                                                                       | GO TO FIM TASK |
|---------------|------------------------------------------------------------------------------------|----------------|
| 31-51323      | DCMF in Left AIMS has an internal software fault.                                  | 23-27 TASK 867 |
| 31-51324      | DCMF in Right AIMS has an internal software fault.                                 | 23-27 TASK 868 |
| 31-51327      | CPM/ACMF(M002) in Left AIMS 28V DC FO Flt Inst Bus power is not available.         | 31-44 TASK 859 |
| 31-51328      | CPM/Basic or CPM/ACMF(M002) in Right AIMS 28V DC Right Bus power is not available. | 31-44 TASK 860 |
| 31-51331      | DCGF in Left AIMS has an internal fault.                                           | 31-44 TASK 910 |
| 31-51332      | DCGF in Right AIMS has an internal fault.                                          | 31-44 TASK 911 |
| 31-51333      | DCGF in Left AIMS has an internal software fault.                                  | 31-44 TASK 914 |
| 31-51334      | DCGF in Right AIMS has an internal software fault.                                 | 31-44 TASK 915 |
| 31-51341      | DCGF in Left AIMS has an internal fault.                                           | 31-44 TASK 833 |
| 31-51342      | DCGF in Right AIMS has an internal fault.                                          | 31-44 TASK 834 |
| 31-51343      | DCGF in Left AIMS has an internal software fault.                                  | 31-44 TASK 835 |
| 31-51344      | DCGF in Right AIMS has an internal software fault.                                 | 31-44 TASK 836 |
| 31-51351      | DFDAF in Left AIMS has an internal fault.                                          | 31-31 TASK 805 |
| 31-51352      | DFDAF in Right AIMS has an internal fault.                                         | 31-31 TASK 812 |
| 31-51353      | DFDAF in Left AIMS has an internal software fault.                                 | 31-31 TASK 806 |
| 31-51354      | DFDAF in Right AIMS has an internal software fault.                                | 31-31 TASK 816 |
| 31-51361      | Display Function in Left AIMS has an internal fault.                               | 31-61 TASK 936 |
| 31-51362      | Display Function in Right AIMS has an internal fault.                              | 31-61 TASK 937 |
| 31-51363      | Display Function in Left AIMS has an internal software fault.                      | 31-61 TASK 938 |
| 31-51364      | Display Function in Right AIMS has an internal software fault.                     | 31-61 TASK 939 |
| 31-51371      | Display Function in Left AIMS has an internal fault.                               | 31-61 TASK 936 |
| 31-51372      | Display Function in Right AIMS has an internal fault.                              | 31-61 TASK 937 |
| 31-51373      | Display Function in Left AIMS has an internal software fault.                      | 31-61 TASK 938 |
| 31-51374      | Display Function in Right AIMS has an internal software fault.                     | 31-61 TASK 939 |
| 31-51381      | FDCF in Left AIMS has an internal fault.                                           | 23-27 TASK 859 |
| 31-51382      | FDCF in Right AIMS has an internal fault.                                          | 23-27 TASK 860 |
| 31-51383      | FDCF in Left AIMS has an internal software fault.                                  | 23-27 TASK 848 |
| 31-51384      | FDCF in Right AIMS has an internal software fault.                                 | 23-27 TASK 852 |
| 31-51391      | FDCF in Left AIMS has an internal fault.                                           | 23-27 TASK 859 |
| 31-51392      | FDCF in Right AIMS has an internal fault.                                          | 23-27 TASK 860 |
| 31-51393      | FDCF in Left AIMS has an internal software fault.                                  | 23-27 TASK 848 |
| 31-51394      | FDCF in Right AIMS has an internal software fault.                                 | 23-27 TASK 852 |
| 31-51401      | FDO in Left AIMS has an internal fault.                                            | 31-44 TASK 833 |

\*If the MAT shows LATCHED for the correlated EICAS message, then you must erase the EICAS message after you complete the FIM task.

## 777-200/300 FAULT ISOLATION MANUAL

### 801. LSCF ASG-L No Input from HYDIM-C on HYDIM data out-04 429 bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17905.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the center hydraulic interface module (HYDIM) card, P85A4.

These are the tasks:

Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801,

Hydraulic Interface Module (HYDIM) Cards Installation, AMM TASK 29-11-50-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the left ASG card, P85A12. To remove it, do this task: Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801.
  - (b) Remove the center HYDIM card, P85A4. To remove it, do this task: Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801.
  - (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector XA4 at the P85A4 slot (SSM 29-11-33):

| XA12             | XA4     |
|------------------|---------|
| pin 84 . . . . . | pin 134 |
| pin 87 . . . . . | pin 137 |

- (d) If you find a problem with the wiring, then do these steps:

- 1) Replace the SYSTEMS CARDFILES, P85.

These are the tasks:

Systems Card Files Removal, AMM TASK 31-09-00-000-801,

Systems Card Files Installation, AMM TASK 31-09-00-400-801.

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### 802. RSCF ASG-L No Input from HYDIM-C on HYDIM data out-04 429 bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17906.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left ARINC Signal Gateway (ASG) card, P84A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the center hydraulic interface module (HYDIM) card, P84A4.

These are the tasks:

Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801,

Hydraulic Interface Module (HYDIM) Cards Installation, AMM TASK 29-11-50-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the left ASG card, P84A12. To remove it, do this task: Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801.
  - (b) Remove the center HYDIM card, P84A4. To remove it, do this task: Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801.
  - (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector XA4 at the P84A4 slot (SSM 29-11-34):

#### **XA12**

pin 84 . . . . . pin 134  
pin 87 . . . . . pin 137

#### **XA4**

- (d) If you find a problem with the wiring, then do these steps:

- 1) Replace the SYSTEMS CARDFILES, P84.

These are the tasks:

Systems Card Files Removal, AMM TASK 31-09-00-000-801,

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

Systems Card Files Installation, AMM TASK 31-09-00-400-801.

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### END OF TASK

#### 803. LSCF ASG-R No Input from HYDIM-C on HYDIM data out-04 429 bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17907.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the center hydraulic interface module (HYDIM) card, P85A4.

These are the tasks:

Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801,

Hydraulic Interface Module (HYDIM) Cards Installation, AMM TASK 29-11-50-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the right ASG card, P85A15. To remove it, do this task: Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801.
  - (b) Remove the center HYDIM card, P85A4. To remove it, do this task: Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801.
  - (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector XA4 at the P85A4 slot (SSM 29-11-33):

#### XA15

pin 84 ..... pin 134

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17914.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left ARINC Signal Gateway (ASG) card, P84A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right Airfoil and Cowl Ice Protection System (ACIPS) Control Card, P84A6.  
These are the tasks:  
Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Removal, AMM TASK 30-21-01-000-801,  
Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Installation, AMM TASK 30-21-01-400-801.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
    - (a) Remove the left ASG card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
    - (b) Remove the right ACIPS Control Card, P84A6. To remove it, do this task: Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Removal, AMM TASK 30-21-01-000-801.
    - (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector XA6 at the P84A6 slot (SSM 30-21-12):

| XA12             | XA6     |
|------------------|---------|
| pin 85 . . . . . | pin 134 |
| pin 88 . . . . . | pin 137 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the SYSTEMS CARDFILES, P84.

Page 211  
Jan 05/2013

## 777-200/300 FAULT ISOLATION MANUAL

These are the tasks:

Systems Card Files Removal, AMM TASK 31-09-00-000-801,  
Systems Card Files Installation, AMM TASK 31-09-00-400-801.

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 811. LSCF ASG-R No Input from ACIPS-L on ACIPS 429 bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17915.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,  
ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left Airfoil and Cowl Ice Protection System (ACIPS) Control Card, P85A6.  
These are the tasks:  
Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Removal, AMM TASK 30-21-01-000-801,  
Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Installation, AMM TASK 30-21-01-400-801.
    - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
    - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
  - (3) Do this check of the wiring:
    - (a) Remove the right ASG card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
    - (b) Remove the left ACIPS Control Card, P85A6. To remove it, do this task: Airfoil and Cowl Ice Protection System Control Card - Engine Anti-Ice - Removal, AMM TASK 30-21-01-000-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the right ASG card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Remove the APU Fire Detection card, P85A9. To remove it, do this task: APU Fire Control Card Removal, AMM TASK 26-15-03-000-801.
- (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector XA9 at the P85A9 slot (SSM 26-15-11):

| XA15             | XA9     |
|------------------|---------|
| pin 74 . . . . . | pin 134 |
| pin 77 . . . . . | pin 137 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the SYSTEMS CARDFILES, P84.  
These are the tasks:  
Systems Card Files Removal, AMM TASK 31-09-00-000-801,  
Systems Card Files Installation, AMM TASK 31-09-00-400-801.
  - 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 819. LSCF ASG-L No Input from left Engine Fire Detection Card on EFDC 429 bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-17929.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.  
These are the tasks:  
ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,  
ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left Engine Fire Detection card, P85A10.  
These are the tasks:  
Engine Fire Detection Card Removal, AMM TASK 26-11-03-000-801,  
Engine Fire Detection Card Installation, AMM TASK 26-11-03-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the right ASG card, P84A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Remove the right ECS card, P84A14. To remove it, do this task: ECS Miscellaneous Card (ECSCMC) Removal, AMM TASK 21-00-10-000-801.
- (c) Do a wiring check between these pins of connector XA15 at the P84A15 slot and connector XA14 at the P84A14 slot (SSM 21-24-11):

| XA15             | XA14    |
|------------------|---------|
| pin 28 . . . . . | pin 134 |
| pin 32 . . . . . | pin 137 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the SYSTEMS CARDFILES, P84.  
These are the tasks:  
Systems Card Files Removal, AMM TASK 31-09-00-000-801,  
Systems Card Files Installation, AMM TASK 31-09-00-400-801.
  - 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### ————— END OF TASK —————

## 827. LSCF ASG-L No Input from WOW-L on ARINC 429 bus - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17937.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.  
These are the tasks:  
ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,  
ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left Weight-on-Wheels (WOW) Card, P85A16.  
These are the tasks:  
Weight-on-Wheels (WOW) Card Removal, AMM TASK 32-09-02-000-801,  
Weight-on-Wheels (WOW) Card Installation, AMM TASK 32-09-02-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Interchange the A3 and A18 Linear Monitor (Lin/Mon) cards in the Left Systems Card file P85 or the Right Systems Cardfile P84, if necessary.

Do these tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801

- (a) If the fault continues after the Left and the Right Cardfile interchange, replace the applicable Lin/Mon Card.
- (4) Do this check of the wiring:
  - (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Remove the left WOW card, P85A16. To remove it, do this task: Weight-on-Wheels (WOW) Card Removal, AMM TASK 32-09-02-000-801.
  - (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector XA16 at the P85A16 slot (SSM 32-09-11):

| XA12             | XA16    |
|------------------|---------|
| pin 24 . . . . . | pin 134 |
| pin 27 . . . . . | pin 137 |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the SYSTEMS CARDFILES, P85.  
These are the tasks:  
Systems Card Files Removal, AMM TASK 31-09-00-000-801,  
Systems Card Files Installation, AMM TASK 31-09-00-400-801.
  - 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 828. RSCF ASG-L No Input from WOW-R on ARINC 429 bus - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-17938.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (2) Replace the left Weight-on-Wheels (WOW) Card, P85A16.

These are the tasks:

Weight-on-Wheels (WOW) Card Removal, AMM TASK 32-09-02-000-801,

Weight-on-Wheels (WOW) Card Installation, AMM TASK 32-09-02-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (3) Interchange the A3 and A18 Linear Monitor (Lin/Mon) cards in the Left Systems Card file P85 or the Right Systems Cardfile P84, if necessary.

Do these tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801

- (a) If the fault continues after the Left and the Right Cardfile interchange, replace the applicable Lin/Mon Card.

- (4) Do this check of the wiring:

- (a) Remove the right ASG card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.

- (b) Remove the left WOW card, P85A16. To remove it, do this task: Weight-on-Wheels (WOW) Card Removal, AMM TASK 32-09-02-000-801.

- (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector XA16 at the P85A16 slot (SSM 32-09-11):

| <b>XA15</b>      | <b>XA16</b> |
|------------------|-------------|
| pin 24 . . . . . | pin 134     |
| pin 27 . . . . . | pin 137     |

- (d) If you find a problem with the wiring, then do these steps:

- 1) Replace the SYSTEMS CARDFILES, P85.

These are the tasks:

Systems Card Files Removal, AMM TASK 31-09-00-000-801,

Systems Card Files Installation, AMM TASK 31-09-00-400-801.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A15.  
These are the tasks:  
ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,  
ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Replace the right hydraulic interface module (HYDIM) card, P84A17.
- These are the tasks:
- Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801,  
Hydraulic Interface Module (HYDIM) Cards Installation, AMM TASK 29-11-50-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
- (a) Remove the right ASG card, P84A15. To remove it, do this task: Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801.
- (b) Remove the right HYDIM card, P84A17. To remove it, do this task: Hydraulic Interface Module (HYDIM) Cards Removal, AMM TASK 29-11-50-000-801.
- (c) Do a wiring check between these pins of connector XA15 at the P84A15 slot and connector XA17 at the P84A17 slot (SSM 29-11-21):
- | <b>XA15</b>  | <b>XA17</b> |
|--------------|-------------|
| pin 30 ..... | pin 134     |
| pin 33 ..... | pin 137     |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the SYSTEMS CARDFILES, P84.
- These are the tasks:
- Systems Card Files Removal, AMM TASK 31-09-00-000-801,  
Systems Card Files Installation, AMM TASK 31-09-00-400-801.
- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (2) Replace the aft Cargo Smoke Detector, M26061.

These are the tasks:

Lower Cargo Smoke Detector Removal, AMM TASK 26-16-01-000-801,

Lower Cargo Smoke Detector Installation, AMM TASK 26-16-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (3) Do this check of the wiring:

- (a) Remove the right ASG card, P84A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.

- (b) Remove the aft Cargo Smoke Detector, M26061. To remove it, do this task: Lower Cargo Smoke Detector Removal, AMM TASK 26-16-01-000-801.

- (c) Do a wiring check between these pins of connector XA15 at the P84A15 slot and connector DM26061A at the aft cargo smoke detector, M26061 (SSM 31-09-22):

| XA15             | DM26061A |
|------------------|----------|
| pin 38 . . . . . | pin 32   |
| pin 41 . . . . . | pin 33   |

- (d) If you find a problem with the wiring, then do these steps:

- 1) Replace the SYSTEMS CARDFILES, P84.

These are the tasks:

Systems Card Files Removal, AMM TASK 31-09-00-000-801,

Systems Card Files Installation, AMM TASK 31-09-00-400-801.

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- 3) If the MAT shows ACTIVE for the maintenance message, then continue.

————— **END OF TASK** —————

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Nitrogen Generation System Controller, M47001.

These are the tasks:

Nitrogen Generation System (NGS) Controller Removal, AMM TASK 47-31-01-000-801,

Nitrogen Generation System (NGS) Controller Installation, AMM TASK 47-31-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the right ASG card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Remove the Nitrogen Generation System Controller, M47001. To remove it, do this task: Nitrogen Generation System (NGS) Controller Removal, AMM TASK 47-31-01-000-801.
  - (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector DM47001B at the Nitrogen Generation System Controller, M47001.(SSM 31-09-12):

| <b>XA15</b>      | <b>DM47001B</b> |
|------------------|-----------------|
| pin 75 . . . . . | pin 55          |
| pin 78 . . . . . | pin 37          |

- (d) If you find a problem with the wiring, then do these steps:

- 1) Replace the SYSTEMS CARDFILES, P85.

These are the tasks:

Systems Card Files Removal, AMM TASK 31-09-00-000-801,

Systems Card Files Installation, AMM TASK 31-09-00-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

### 801. LSCF ASG-L No Input from EDIU-L Channel A on System 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-18401.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left Engine Data Interface Unit (EDIU), M73103.

These are the tasks:

Engine Data Interface Unit (EDIU) Removal, AMM TASK 73-21-22-000-804-H00,

Engine Data Interface Unit (EDIU) Installation, AMM TASK 73-21-22-400-808-H00.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B73101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects left EDIU to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:

EFFECTIVITY  
ARO ALL

## 31-08 TASK 801

D633W103-ARO

Page 201  
Jan 05/2013

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31101 from the coupler B31101.
- (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector DB31101 at the P111 panel (SSM 31-09-12):

| XA12             | DB31101 |
|------------------|---------|
| pin 10 . . . . . | pin 5   |
| pin 7 . . . . .  | pin 4   |
| pin 9 . . . . .  | pin 2   |
| pin 6 . . . . .  | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31101.
- (g) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the left Engine Data Interface Unit (EDIU) to the coupler:
  - (a) Disconnect connector DM73103 from the EDIU, M73103.
  - (b) Disconnect connector DB73101 from the coupler B73103.
  - (c) Do a wiring check between these pins of connector DM73103AF at the EDIU and connector DB73101 at the P111 panel (SSM 23-91-11):

| DM73103AF         | DB73101 |
|-------------------|---------|
| pin 6T . . . . .  | pin 2   |
| pin 6TR . . . . . | pin 1   |
| pin 4T . . . . .  | pin 5   |
| pin 4TR . . . . . | pin 4   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM73103 and DB73101.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P84A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left Engine Data Interface Unit (EDIU), M73103.

These are the tasks:

Engine Data Interface Unit (EDIU) Removal, AMM TASK 73-21-22-000-804-H00,

Engine Data Interface Unit (EDIU) Installation, AMM TASK 73-21-22-400-808-H00.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B73101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects left EDIU to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
  - (a) Remove the left ASG card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31201 from the coupler B31201.

## 777-200/300 FAULT ISOLATION MANUAL

- (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector DB31201 at the P111 panel (SSM 31-09-12):

| <b>XA12</b>  | <b>DB31201</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31201.
  - 3) Re-install the left ASG card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31201.
- (g) Re-install the left ASG card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the left Engine Data Interface Unit (EDIU) to the coupler:
- (a) Disconnect connector DM73103 from the EDIU, M73103.
- (b) Disconnect connector DB73101 from the coupler B73101.
- (c) Do a wiring check between these pins of connector DM73103AF at the EDIU and connector DB73101 at the P111 panel (SSM 23-91-11):

| <b>DM73103AF</b> | <b>DB73101</b> |
|------------------|----------------|
| pin 6T .....     | pin 2          |
| pin 6TR .....    | pin 1          |
| pin 4T .....     | pin 5          |
| pin 4TR .....    | pin 4          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM73103 and DB73101.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left Engine Data Interface Unit (EDIU), M73103.

These are the tasks:

Engine Data Interface Unit (EDIU) Removal, AMM TASK 73-21-22-000-804-H00,

Engine Data Interface Unit (EDIU) Installation, AMM TASK 73-21-22-400-808-H00.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B73103, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects left EDIU to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
  - (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31101 from the coupler B31101.

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector DB31101 at the P111 panel (SSM 31-09-12):

| <b>XA12</b>  | <b>DB31101</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31101.
- (g) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the left Engine Data Interface Unit (EDIU) to the coupler:
- (a) Disconnect connector DM73103 from the EDIU, M73103.
  - (b) Disconnect connector DB73103 from the coupler B73103.
  - (c) Do a wiring check between these pins of connector DM73103AC at the EDIU and connector DB73103 at the P111 panel (SSM 23-91-11):

| <b>DM73103AC</b> | <b>DB73101</b> |
|------------------|----------------|
| pin 5T .....     | pin 2          |
| pin 5TR .....    | pin 1          |
| pin 4T .....     | pin 5          |
| pin 4TR .....    | pin 4          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM73103 and DB73103.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P84A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left Engine Data Interface Unit (EDIU), M73103.

These are the tasks:

Engine Data Interface Unit (EDIU) Removal, AMM TASK 73-21-22-000-804-H00,

Engine Data Interface Unit (EDIU) Installation, AMM TASK 73-21-22-400-808-H00.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B73101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects left EDIU to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
  - (a) Remove the left ASG card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31201 from the coupler B31201.

## 777-200/300 FAULT ISOLATION MANUAL

- (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector DB31201 at the P111 panel (SSM 31-09-12):

| <b>XA12</b>  | <b>DB31201</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31201.
  - 3) Re-install the left ASG card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31201.
- (g) Re-install the left ASG card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the left Engine Data Interface Unit (EDIU) to the coupler:
- (a) Disconnect connector DM73103 from the EDIU, M73103.
  - (b) Disconnect connector DB73103 from the coupler B73103.
  - (c) Do a wiring check between these pins of connector DM73103AC at the EDIU and connector DB73103 at the P111 panel (SSM 23-91-11):

| <b>DM73103AC</b> | <b>DB73101</b> |
|------------------|----------------|
| pin 5T .....     | pin 2          |
| pin 5TR .....    | pin 1          |
| pin 4T .....     | pin 5          |
| pin 4TR .....    | pin 4          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM73103 and DB73103.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right Warning Electronic Unit (WEU), M31207.

These are the tasks:

Warning Electronic Unit Removal, AMM TASK 31-51-01-000-801,

Warning Electronic Unit Installation, AMM TASK 31-51-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the right ASG card to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31222, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects right WEU to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-R to the coupler:
  - (a) Remove the right ASG card, P84A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31202 from the coupler B31202.

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (c) Do a wiring check between these pins of connector XA15 at the P84A15 slot and connector DB31202 at the P211 panel (SSM 31-09-22):

| <b>XA15</b>  | <b>DB31202</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the right ASG card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31202.
- (g) Re-install the right ASG card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the right Warning Electronic Unit (WEU) to the coupler:
- (a) Disconnect connector DM31207 from the right WEU, M31207.
  - (b) Disconnect connector DB31222 from the coupler B31222.
  - (c) Do a wiring check between these pins of connector DM31207AB at the right WEU and connector DB31222 at the P211 panel (SSM 31-51-23):

| <b>DM31207AB</b> | <b>DB31222</b> |
|------------------|----------------|
| pin 5T .....     | pin 5          |
| pin 5TR .....    | pin 4          |
| pin 2T .....     | pin 2          |
| pin 2TR .....    | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM31207 and DB31222.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right Engine Data Interface Unit (EDIU), M73203.

These are the tasks:

Engine Data Interface Unit (EDIU) Removal, AMM TASK 73-21-22-000-804-H00,

Engine Data Interface Unit (EDIU) Installation, AMM TASK 73-21-22-400-808-H00.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the right ASG card to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B73201, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects right EDIU to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-R to the coupler:
  - (a) Remove the right ASG card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31102 from the coupler B31102.

**777-200/300  
FAULT ISOLATION MANUAL**

- (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector DB31102 at the P111 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31102</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the right ASG card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31102.
- (g) Re-install the right ASG card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the right Engine Data Interface Unit (EDIU) to the coupler:
- (a) Disconnect connector DM73203 from the EDIU, M73203.
  - (b) Disconnect connector DB73201 from the coupler B73201.
  - (c) Do a wiring check between these pins of connector DM73203AF at the EDIU and connector DB73201 at the P211 panel (SSM 23-91-11):

| <b>DM73203AF</b>  | <b>DB73201</b> |
|-------------------|----------------|
| pin 6T . . . . .  | pin 2          |
| pin 6TR . . . . . | pin 1          |
| pin 4T . . . . .  | pin 5          |
| pin 4TR . . . . . | pin 4          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM73203 and DB73201.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right Engine Data Interface Unit (EDIU), M73203.

These are the tasks:

Engine Data Interface Unit (EDIU) Removal, AMM TASK 73-21-22-000-804-H00,

Engine Data Interface Unit (EDIU) Installation, AMM TASK 73-21-22-400-808-H00.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the right ASG card to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B73201, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects right EDIU to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-R to the coupler:
  - (a) Remove the right ASG card, P84A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31202 from the coupler B31202.

**777-200/300  
FAULT ISOLATION MANUAL**

- (c) Do a wiring check between these pins of connector XA15 at the P84A15 slot and connector DB31202 at the P211 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31202</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the right ASG card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31202.
- (g) Re-install the right ASG card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the right Engine Data Interface Unit (EDIU) to the coupler:
- (a) Disconnect connector DM73203 from the EDIU, M73203.
  - (b) Disconnect connector DB73201 from the coupler B73201.
  - (c) Do a wiring check between these pins of connector DM73203AF at the EDIU and connector DB73201 at the P211 panel (SSM 23-91-11):

| <b>DM73203AF</b>  | <b>DB73201</b> |
|-------------------|----------------|
| pin 6T . . . . .  | pin 2          |
| pin 6TR . . . . . | pin 1          |
| pin 4T . . . . .  | pin 5          |
| pin 4TR . . . . . | pin 4          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM73203 and DB73201.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P85A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right Engine Data Interface Unit (EDIU), M73203.

These are the tasks:

Engine Data Interface Unit (EDIU) Removal, AMM TASK 73-21-22-000-804-H00,

Engine Data Interface Unit (EDIU) Installation, AMM TASK 73-21-22-400-808-H00.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the right ASG card to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B73103, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects right EDIU to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-R to the coupler:
  - (a) Remove the right ASG card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31102 from the coupler B31102.

**777-200/300  
FAULT ISOLATION MANUAL**

- (c) Do a wiring check between these pins of connector XA15 at the P85A15 slot and connector DB31102 at the P111 panel (SSM 31-09-12):

| <b>XA15</b>  | <b>DB31102</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the right ASG card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31102.
- (g) Re-install the right ASG card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the right Engine Data Interface Unit (EDIU) to the coupler:
- (a) Disconnect connector DM73203 from the EDIU, M73203.
  - (b) Disconnect connector DB73203 from the coupler B73203.
  - (c) Do a wiring check between these pins of connector DM73203AC at the EDIU and connector DB73203 at the P211 panel (SSM 23-91-11):

| <b>DM73203AC</b> | <b>DB73203</b> |
|------------------|----------------|
| pin 5T .....     | pin 2          |
| pin 5TR .....    | pin 1          |
| pin 4T .....     | pin 5          |
| pin 4TR .....    | pin 4          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM73203 and DB73203.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the right Engine Data Interface Unit (EDIU), M73203.

These are the tasks:

Engine Data Interface Unit (EDIU) Removal, AMM TASK 73-21-22-000-804-H00,

Engine Data Interface Unit (EDIU) Installation, AMM TASK 73-21-22-400-808-H00.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the right ASG card to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B73203, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the right EDIU to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-R to the coupler:
  - (a) Remove the right ASG card, P84A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31202 from the coupler B31202.

**777-200/300**  
**FAULT ISOLATION MANUAL**

- (c) Do a wiring check between these pins of connector XA15 at the P84A15 slot and connector DB31202 at the P211 panel (SSM 31-09-12):

| <b>XA15</b>      | <b>DB31202</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the right ASG card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31202.
- (g) Re-install the right ASG card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the right Engine Data Interface Unit (EDIU) to the coupler:
- (a) Disconnect connector DM73203 from the EDIU, M73203.
  - (b) Disconnect connector DB73203 from the coupler B73203.
  - (c) Do a wiring check between these pins of connector DM73203AC at the EDIU and connector DB73203 at the P211 panel (SSM 23-91-11):

| <b>DM73203AC</b>  | <b>DB73203</b> |
|-------------------|----------------|
| pin 5T . . . . .  | pin 2          |
| pin 5TR . . . . . | pin 1          |
| pin 4T . . . . .  | pin 5          |
| pin 4TR . . . . . | pin 4          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM73203 and DB73203.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31102.
  - 3) Re-install the right ASG card, P85A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### **817. RSCF ASG-R to Systems 629 Bus-R Communication Problems - Fault Isolation**

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-18864.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the right ARINC Signal Gateway (ASG) card, P84A15.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,  
ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the right ASG card to the Systems 629 Bus-R.

  - (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring from the right ASG card to the coupler:
  - (a) Remove the right ASG card, P84A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31202 from the coupler, B31202.
  - (c) Do a wiring check between these pins of connector XA15 at the P84A15 slot and connector DB31202 at the P211 panel (SSM 31-09-22):

## 777-200/300 FAULT ISOLATION MANUAL

| XA15         | DB31202 |
|--------------|---------|
| pin 6 .....  | pin 1   |
| pin 9 .....  | pin 2   |
| pin 7 .....  | pin 4   |
| pin 10 ..... | pin 5   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31202.
  - 3) Re-install the right ASG card, P84A15. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

## 818. LSCF ASG-L to ASG Global on Systems 429 Bus Communication Problems - Fault Isolation

### A. Maintenance Messages

- (1) This task is for maintenance message: 31-18891.

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.
- These are the tasks:
- ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,  
ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Do a check for a short to ground at test connector pins 10 and 23 at connector DP8511.
- (b) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### 801. LSCF ASG-L No Input from ASCPC-L on Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17429.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left Air Supply Cabin Pressure Controller (ASCPC), M36111.

These are the tasks:

ASCPC Removal, AMM TASK 36-11-20-000-801,

ASCPC Installation, AMM TASK 36-11-20-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B36233, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the left ASCPC to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:

D633W103-ARO

Page 201  
Jan 05/2013

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31101 from the coupler B31101.
- (c) Do a wiring check between these pins of connector XA12 at the P85A12 shelf and connector DB31101 at the P111 panel (SSM 31-09-12):

| XA12             | DB31101 |
|------------------|---------|
| pin 10 . . . . . | pin 5   |
| pin 7 . . . . .  | pin 4   |
| pin 9 . . . . .  | pin 2   |
| pin 6 . . . . .  | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-connect connector DB31101.
  - 3) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (6) Do this check of the wiring from the left ASCPC to the coupler:
  - (a) Disconnect connector DM36111 from the left ASCPC, M36111.
  - (b) Disconnect connector DB36233 from the coupler B36233.
  - (c) Do a wiring check between these pins of connector DM36111 at the left ASCPC and connector DB36223 at the P111 panel (WDM 36-21-11):

| DM36111           | DB36223 |
|-------------------|---------|
| pin 2T . . . . .  | pin 5   |
| pin 2TR . . . . . | pin 4   |
| pin 1T . . . . .  | pin 2   |
| pin 1TR . . . . . | pin 1   |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM36111 and DB36223.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connectors DM36111 and DB31116.
- (g) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Backup Generator Converter (VSCF), M24008.

These are the tasks:

Backup Generator Converter Removal, AMM TASK 24-25-09-000-801,

Backup Generator Converter Installation, AMM TASK 24-25-09-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B24102, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the VSCF to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
  - (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31101 from the coupler B31101.

## 777-200/300 FAULT ISOLATION MANUAL

- (c) Do a wiring check between these pins of connector XA12 at the P85A12 shelf and connector DB31101 at the P111 panel (SSM 31-09-12):

| <b>XA12</b>  | <b>DB31101</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-connect connector DB31101.
  - 3) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (6) Do this check of the wiring from the VSCF to the coupler:
- (a) Disconnect connector DM24008 from the VSCF, M24008.
  - (b) Disconnect connector DB24102 from the coupler B24102.
  - (c) Do a wiring check between these pins of connector DM24008 at the VSCF and connector DB24102 at the P111 panel (WDM 24-25-33):

| <b>DM24008</b> | <b>DB24102</b> |
|----------------|----------------|
| pin 5 .....    | pin 5          |
| pin 4 .....    | pin 4          |
| pin 2 .....    | pin 2          |
| pin 1 .....    | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-connect connectors DM24008 and DB24102.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 803. LSCF ASG-L to ASG External Signal on Systems 429 Bus Communication Problems - Fault Isolation

#### A. Initial Evaluation

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Do this check of the wiring:
- (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Remove the Lower Cargo Smoke Detector (CSD) - Forward, M26060. To remove it, do this task: Lower Cargo Smoke Detector Removal, AMM TASK 26-16-01-000-801.
- (c) Do a wiring check between these pins of connector XA12 at the P85A12 shelf and connector DM26060A at the CSD - Forward (SSM 31-09-12):

| XA12             | DM26060A |
|------------------|----------|
| pin 22 . . . . . | pin 30   |
| pin 25 . . . . . | pin 31   |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the CSD - Forward, M26060. To install it, do this task: Lower Cargo Smoke Detector Removal, AMM TASK 26-16-01-000-801.
  - 3) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 804. LSCF ASG-L Internal Fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-13011.

#### B. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, A12, in the Left Systems Cardfile, P85.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-13012.

#### **B. Fault Isolation Procedure**

- (1) Replace the right ARINC Signal Gateway (ASG) card, A15, in the Left Systems Cardfile (LSCF), P85.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31102, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the right ASG card to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 806. RSCF ASG-L Internal Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-13013.

#### **B. Fault Isolation Procedure**

- (1) Replace the left ARINC Signal Gateway (ASG) card, A12, in the Right Systems Cardfile, P84.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 807. RSCF ASG-R Internal Fault - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-13014.

#### **B. Fault Isolation Procedure**

- (1) Replace the right ARINC Signal Gateway (ASG) card, A15, in the Right Systems Cardfile (RSCF), P84.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the ARINC 629 coupler, B31202, in the P211 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the right ASG card to the Systems 629 Bus-R.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 808. LSCF ASG-L Program Pin Wiring - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-13021.

#### **B. Fault Isolation Procedure**

- (1) Do this check of the wiring:
  - (a) Disconnect connector DP8510 from the Left Systems Cardfile (LSCF), P85.
  - (b) Do a check of the program pin wiring for the left ASG card, P85A12, at connector DP8510 (SSM 31-09-12).
  - (c) If you find a problem with the wiring, then do these steps:
    - 1) Repair the wiring.

### ————— END OF TASK —————

#### 812. LSCF ASG-L No Input from LSCF Linear/Monitor-1 on Power Supply-1 429 bus - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance message: 31-14011.

##### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

##### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left ARINC Signal Gateway (ASG) card, A12, in the Left Systems Cardfile (LSCF), P85.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Linear/Monitor power supply circuit card, A3, in the LSCF, P85.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Remove the Linear/Monitor power supply circuit card, P85A3. To remove it, do this task: Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801

## 777-200/300 FAULT ISOLATION MANUAL

### 817. RSCF Linear/Monitor-1 no output on Power Supply-1 429 bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-14016.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the power supply unit (PSU) linear/monitor-1 card, A3, in the Right Systems Cardfile (RSCF), P84.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the power supply unit (PSU) linear/monitor-2 card, A18, in the Right Systems Cardfile (RSCF), P84.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the left ASG card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Remove the right ASG card, P84A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (c) Remove the PSU Linear/Monitor card, P84A3. To remove it, do this task: Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801.
  - (d) Do a wiring check between these pins of connector XA12 at the P84A12 shelf and connector XA3 at the P84A3 shelf (SSM 31-09-21):

| XA12         | XA3     |
|--------------|---------|
| pin 53 ..... | pin 102 |
| pin 56 ..... | pin 103 |

## 777-200/300 FAULT ISOLATION MANUAL

- (e) Do a wiring check between these pins of connector XA15 at the P84A15 shelf and connector XA3 at the P84A3 shelf (SSM 31-09-21):

| XA15         | XA3     |
|--------------|---------|
| pin 53 ..... | pin 102 |
| pin 56 ..... | pin 103 |

- (f) If you find a problem with the wiring, then do these steps:
- 1) Replace the SYSTEMS CARDFILES, P84.  
These are the tasks:  
Systems Card Files Removal, AMM TASK 31-09-00-000-801,  
Systems Card Files Installation, AMM TASK 31-09-00-400-801.
  - 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 818. Systems Cardfile Linear/Monitor-1 internal fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-14017, 31-14018.

#### B. Fault Isolation Procedure

- (1) Replace the power supply unit (PSU) linear/monitor-1 card, A3, in the Left Systems Cardfile P85 or the Right Systems Cardfile P84, as applicable.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 819. Systems Cardfile Linear/Monitor-1 Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-14021, 31-14022, 31-14023, 31-14024.

#### B. Fault Isolation Procedure

- (1) Make sure the A3 power switches on the applicable Left or Right Systems Cardfile are in the ON position.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (2) Replace the Linear/Monitor power supply circuit card, A3, in the Left Systems Cardfile P85 or the Right Systems Cardfile P84, as applicable.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

### — END OF TASK —

#### 820. Systems Cardfile Power Supply Preregulator-1 not available - Fault Isolation

##### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-14031, 31-14043.

##### B. Initial Evaluation

- (1) Check the position of the battery switch(S3) on the P5 panel.

- (a) If the battery switch is in the OFF position, then no maintenance action is necessary.

**NOTE:** With the battery switch in the OFF position, the battery power input to the LSCF and RSCF power supply unit (PSU) preregulator-1 is removed. This message shows that power is absent. A few seconds after you move the battery switch to the ON position, the message will clear.

- (b) If the S3 switch is in the ON position, then continue.

##### C. Fault Isolation Procedure

- (1) Interchange the A3 and A18 Linear Monitor (Lin/Mon) cards in the Left Systems Card file P85 or the Right Systems Cardfile P84, if necessary.

Do these tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801

- (a) If the fault continues after the Left and the Right Cardfile interchange, replace the applicable Lin/Mon Card.

- (2) Replace the power supply unit (PSU) preregulator-1 card, A2, in the Left Systems Cardfile P85 or the Right Systems Cardfile P84, as applicable.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (3) Replace the A3 and A18 Linear Monitor (Lin/Mon) cards in the Left Systems Card file P85.

Do these tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (4) Replace the A3 and A18 Linear Monitor (Lin/Mon) cards in the Right Systems Cardfile P84.

Do these tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801

EFFECTIVITY  
ARO ALL

## 31-09 TASKS 819-820

D633W103-ARO

Page 217  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check for 28V DC at the circuit breaker of the power supply unit (PSU) preregulator-1 card, A2, in the Left Systems Cardfile P85 or the Right Systems Cardfile P84, as applicable.

- (a) Make sure that these circuit breakers are closed:

### Standby Power Management Panel, P310

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| J          | 1          | C31634        | LSCF PS 1   |
| J          | 2          | C31638        | RSCF PS 1   |

- (b) Do a check for 28V DC between terminal 2 for the applicable circuit breaker and structure ground. (SSM 31-09-11, 31-09-21)
- (c) If there is no 28V DC at terminal 2 for the applicable circuit breaker, then do these steps:
  - 1) Replace the applicable circuit breaker.
  - 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - 3) If the MAT shows ACTIVE for the maintenance message, then continue.
- (d) If there is 28V DC at terminal 2 for the applicable circuit breaker, then continue.
- (6) Replace the relay.
  - (a) Open these circuit breakers and install safety tags:

### Right Power Management Panel, P210

Page 221  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left ARINC Signal Gateway (ASG) card, A12, in the Left Systems Cardfile (LSCF), P85.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Linear/Monitor power supply circuit card, A18, in the LSCF, P85.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Remove the Linear/Monitor power supply circuit card, P85A18. To remove it, do this task: Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801.
  - (c) Do a wiring check between these pins of connector XA12 at the P85A12 shelf and connector XA18 at the P85A18 shelf (SSM 31-09-11):

| <b>XA12</b>      | <b>XA18</b> |
|------------------|-------------|
| pin 59 . . . . . | pin 102     |
| pin 62 . . . . . | pin 103     |

- (d) If you find a problem with the wiring, then do these steps:

- 1) Replace the SYSTEMS CARDFILES, P85.

These are the tasks:

Systems Card Files Removal, AMM TASK 31-09-00-000-801,

Systems Card Files Installation, AMM TASK 31-09-00-400-801.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 822. LSCF ASG-R No Input from LSCF Linear/Monitor-2 on Power Supply-2 429 bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-14052.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

**NOTE:** If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the right ARINC Signal Gateway (ASG) card, A15, in the Left Systems Cardfile (LSCF), P85.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Linear/Monitor power supply circuit card, A18, in the LSCF, P85.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
  - (a) Remove the right ASG card, P85A15. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Remove the Linear/Monitor power supply circuit card, P85A18. To remove it, do this task: Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801.
  - (c) Do a wiring check between these pins of connector XA15 at the P85A15 shelf and connector XA18 at the P85A18 shelf (SSM 31-09-11):

#### **XA15**

pin 59 .....

- (d) If you find a problem with the wiring, then do these steps:
- 1) Replace the SYSTEMS CARDFILES, P85.  
These are the tasks:  
Systems Card Files Removal, AMM TASK 31-09-00-000-801,  
Systems Card Files Installation, AMM TASK 31-09-00-400-801.
  - 2) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 823. RSCF ASG-L No Input from RSCF Linear/Monitor-2 on Power Supply-2 429 bus - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-14053.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

NOTE: If you use a megohmmeter to do wiring checks on an ARINC 429 bus (or if you need the exact resistance of the bus wiring), first remove all the LRUs that are connected to the bus (use the WDM to tell which LRUs are on the bus). Then re-install the LRUs when you are done.

- (1) Replace the left ARINC Signal Gateway (ASG) card, A12, in the Right Systems Cardfile (RSCF), P84.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,  
ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Linear/Monitor power supply circuit card, A18, in the RSCF, P84.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,  
Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Do this check of the wiring:
    - (a) Remove the left ASG card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
    - (b) Remove the Linear/Monitor power supply circuit card, P84A18. To remove it, do this task: Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801.

————— END OF TASK —————

### 827. Systems Cardfile Linear/Monitor-2 internal fault - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-14057, 31-14058.

#### B. Fault Isolation Procedure

- (1) Replace the power supply unit (PSU) linear/monitor-2 card, A18, in Left Systems Cardfile P85 or the Right Systems Cardfile P84, as applicable.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 828. Systems Cardfile Linear/Monitor-1 Problems - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance messages: 31-14061, 31-14062, 31-14063, 31-14064.

#### B. Fault Isolation Procedure

- (1) Make sure the A18 power switches on the applicable Left or Right Systems Cardfile are in the ON position.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (2) Replace the power supply unit (PSU) Linear/Monitor card, A18, in the Left Systems Cardfile P85 or the Right Systems Cardfile P84, as applicable.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— END OF TASK —————

### 829. Systems Cardfile Power Supply Preregulator-2 Not Available - Fault Isolation

## 777-200/300 FAULT ISOLATION MANUAL

### B. Fault Isolation Procedure

- (1) Interchange the A3 and A18 Linear Monitor (Lin/Mon) cards in the Left Systems Card file P85 or the Right Systems Cardfile P84, if necessary.

Do these tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801

- (a) If the fault continues after the Left and the Right Cardfile interchange, replace the applicable Lin/Mon Card.

- (2) Replace the Power Supply Unit (PSU) Preregulator circuit card, A19, in in Left Systems Cardfile P85 or the Right Systems Cardfile P84, as applicable.

These are the tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801,

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (3) Replace the A3 and A18 Linear Monitor (Lin/Mon) cards in the Right Systems Card file P85.

Do these tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (4) Replace the A3 and A18 Linear Monitor (Lin/Mon) cards in the Left Systems Cardfile P84.

Do these tasks:

Card File Power Supply (CFPS) Removal, AMM TASK 31-09-01-000-801

Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

- (5) Do this check for 28V DC at the circuit breaker of the power supply unit (PSU) preregulator-1 card, A2, in the Left Systems Cardfile P85 or the Right Systems Cardfile P84, as applicable.

- (a) Make sure that these circuit breakers are closed:

#### Right Power Management Panel, P210

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| L          | 14         | C31641        | RSCF PS 2   |

- (7) Do this check of the wiring for the power supply unit (PSU) preregulator-2 card, A19, in the Right Systems Cardfile P84 as applicable.

- (a) Open this circuit breaker and install safety tag:

**Right Power Management Panel, P210**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| L          | 14         | C31641        | RSCF PS 2   |

- (b) Remove the power supply unit (PSU) preregulator-2 card, A19, in the Right Systems Cardfile P84, do this task: Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.
- (c) Do a wiring check between these pins of the PSU connector, DP8418 and the terminal 2 of circuit breaker C31641: (SSM 31-09-11, 31-09-21)

| <b>DP8418</b>   | <b>C31641</b> |
|-----------------|---------------|
| pin 1 . . . . . | pin 2         |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-install the power supply unit (PSU) preregulator-2 card, A19, in the Right Systems Cardfile P84, do this task: Card File Power Supply (CFPS) Installation, AMM TASK 31-09-01-400-801.
  - 3) Close this circuit breaker:

**Right Power Management Panel, P210**

| <u>Row</u> | <u>Col</u> | <u>Number</u> | <u>Name</u> |
|------------|------------|---------------|-------------|
| L          | 14         | C31641        | RSCF PS 2   |

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

**830. LSCF ASG-L No Input from AIMS-L on Systems 629 Bus-L - Fault Isolation**

**A. Maintenance Messages**

- (1) This task is for maintenance message: 31-17413.

**B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

**C. Fault Isolation Procedure**

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

## 777-200/300 FAULT ISOLATION MANUAL

- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the IOM(M009) module in the left AIMS cabinet.
- These are the tasks:
- Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801,  
Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE:** This coupler connects the left ASG card to the Systems 629 Bus-L.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31112, in the P111 panel.
- These are the tasks:
- ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,  
ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.
- NOTE:** This coupler connects the left AIMS cabinet to the Systems 629 Bus-L.
- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
- (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31101 from the coupler B31101.
- (c) Do a wiring check between these pins of connector XA12 at the P85A12 shelf and connector DB31101 at the P111 panel (SSM 31-09-12):
- | <b>XA12</b>  | <b>DB31101</b> |
|--------------|----------------|
| pin 10 ..... | pin 5          |
| pin 7 .....  | pin 4          |
| pin 9 .....  | pin 2          |
| pin 6 .....  | pin 1          |
- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-connect connector DB31101.
  - 3) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (6) Do this check of the wiring from the AIMS-L cabinet to the coupler:
- (a) Remove the IOM(M009) module from the left AIMS cabinet. To remove it, do this task: Input/Output Module (IOM) Removal, AMM TASK 31-41-11-000-801
  - (b) Disconnect connector DB31112 from the coupler B31112.
  - (c) Do a wiring check between these pins of connector J420-B at the left AIMS cabinet and connector DB31112 at the P111 panel (WDM 31-41-25):
- | J420-B       | DB31112 |
|--------------|---------|
| pin G3 ..... | pin 5   |
| pin G4 ..... | pin 4   |
| pin G1 ..... | pin 2   |
| pin G2 ..... | pin 1   |
- (d) If you find a problem with the wiring, then do these steps:
    - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
    - 2) Re-connect connector DB31112.
    - 3) Re-install the IOM(M009) module in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
  - (f) Re-connect connector DB31112.
  - (g) Re-install the IOM(M009) module in the left AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
  - (h) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

| pin G3 . . . . . | pin 5          |
| pin G4 . . . . . | pin 4          |
| pin G1 . . . . . | pin 2          |
| pin G2 . . . . . | pin 1          |
  - (d) If you find a problem with the wiring, then do these steps:
    - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
    - 2) Re-connect connector DB31116.
    - 3) Re-install the IOM(M009) module in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
    - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (e) If you do not find a problem with the wiring, then continue.
  - (f) Re-connect connector DB31116.
  - (g) Re-install the IOM(M009) module in the right AIMS cabinet. To install it, do this task: Input/Output Module (IOM) Installation, AMM TASK 31-41-11-400-801
  - (h) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 834. RSCF ASG-L No Input from ASCPC-L on Systems 629 Bus-L - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-17430.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the left ARINC Signal Gateway (ASG) card, P84A12.  
These are the tasks:  
ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

EFFECTIVITY  
ARO ALL

## 777-200/300 FAULT ISOLATION MANUAL

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the left Air Supply Cabin Pressure Controller (ASCPC), M36111.

These are the tasks:

ASCPC Removal, AMM TASK 36-11-20-000-801,

ASCPC Installation, AMM TASK 36-11-20-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B36233, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left ASCPC to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
- (a) Remove the left ASG card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31201 from the coupler B31201.
  - (c) Do a wiring check between these pins of connector XA12 at the P84A12 shelf and connector DB31201 at the P111 panel (SSM 31-09-12):

| <b>XA12</b>      | <b>DB31201</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Repair the wiring.
  - 2) Re-connect connector DB31201.

EFFECTIVITY  
ARO ALL

D633W103-ARO

Page 241  
Sep 05/2016

## 777-200/300 FAULT ISOLATION MANUAL

- 3) Re-install the left ASG card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (6) Do this check of the wiring from the left ASCPC to the coupler:
  - (a) Disconnect connector DM36111 from the left ASCPC, M36111.
  - (b) Disconnect connector DB36233 from the coupler B36233.
  - (c) Do a wiring check between these pins of connector DM36111 at the left ASCPC and connector DB36223 at the P111 panel (WDM 36-21-11):

| <b>DM36111</b>    | <b>DB36223</b> |
|-------------------|----------------|
| pin 2T . . . . .  | pin 5          |
| pin 2TR . . . . . | pin 4          |
| pin 1T . . . . .  | pin 2          |
| pin 1TR . . . . . | pin 1          |
- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM36111 and DB36223.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connectors DM36111 and DB31116.
- (g) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.

————— **END OF TASK** —————

### 835. LSCF ASG-L No Input from RSCF ASG-L on Systems 629 Bus-L - Fault Isolation

#### **A. Maintenance Messages**

- (1) This task is for maintenance message: 31-17437.

#### **B. Initial Evaluation**

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### **C. Fault Isolation Procedure**

- (1) Replace the left ARINC Signal Gateway (ASG) card, A12, in the left systems cardfile (LSCF), P85.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.

## 777-200/300 FAULT ISOLATION MANUAL

- (2) Replace the left ARINC Signal Gateway (ASG) card, A12, in the right systems cardfile (RSCF), P84.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left ASG card in the LSCF to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left ASG card in the RSCF to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the LSCF wiring from the ASG-L to the coupler:
- (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31101 from the coupler B31101.
- (c) Do a wiring check between these pins of connector XA12 at the P85A12 shelf and connector DB31101 at the P111 panel (SSM 31-09-12):

| <b>XA12</b> |       | <b>DB31101</b> |
|-------------|-------|----------------|
| pin 10      | ..... | pin 5          |
| pin 7       | ..... | pin 4          |
| pin 9       | ..... | pin 2          |
| pin 6       | ..... | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
- 1) Repair the wiring.
  - 2) Re-connect connector DB31101.
  - 3) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

## 777-200/300 FAULT ISOLATION MANUAL

### 801. RSCF ASG-L No Input from VSCF on Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17442.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P84A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Backup Generator Converter (VSCF), M24008.

These are the tasks:

Backup Generator Converter Removal, AMM TASK 24-25-09-000-801,

Backup Generator Converter Installation, AMM TASK 24-25-09-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B24102, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the VSCF to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:

ARO ALL

## 31-10 TASK 801

D633W103-ARO

Page 201  
Jan 05/2013

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the left ASG card, P84A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31201 from the coupler B31201.
- (c) Do a wiring check between these pins of connector XA12 at the P84A12 slot and connector DB31201 at the P111 panel (SSM 31-09-12):

| <b>XA12</b>      | <b>DB31201</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31201.
  - 3) Re-install the left ASG card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31201.
- (g) Re-install the left ASG card, P84A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the VSCF to the coupler:
  - (a) Disconnect connector DM24008 from the VSCF, M24008.
  - (b) Disconnect connector DB24102 from the coupler B24102.
  - (c) Do a wiring check between these pins of connector DM24008 at the VSCF and connector DB24102 at the P111 panel (WDM 24-25-33):

| <b>DM24008</b>  | <b>DB24102</b> |
|-----------------|----------------|
| pin 5 . . . . . | pin 5          |
| pin 4 . . . . . | pin 4          |
| pin 2 . . . . . | pin 2          |
| pin 1 . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM24008 and DB24102.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, re-connect connectors DM24008 and DB24102.

## 777-200/300 FAULT ISOLATION MANUAL

### 802. LSCF ASG-L No Input from BPCU on Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17445.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P85A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Bus Power Control Unit (BPCU), M24002.

These are the tasks:

BPCU Removal, AMM TASK 24-41-05-000-801,

BPCU Installation, AMM TASK 24-41-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31101, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B24106, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the BPCU to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:

## 777-200/300 FAULT ISOLATION MANUAL

- (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
- (b) Disconnect connector DB31101 from the coupler B31101.
- (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector DB31101 at the P111 panel (SSM 31-09-12):

| <b>XA12</b>      | <b>DB31101</b> |
|------------------|----------------|
| pin 10 . . . . . | pin 5          |
| pin 7 . . . . .  | pin 4          |
| pin 9 . . . . .  | pin 2          |
| pin 6 . . . . .  | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31101.
- (g) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the BPCU to the coupler:
  - (a) Disconnect connector DM24002 from the BPCU, M24002.
  - (b) Disconnect connector DB24106 from the coupler B24106.
  - (c) Do a wiring check between these pins of connector DM24002AC at the BPCU and connector DB24106 at the P111 panel (WDM 24-28-41):

| <b>DM24002AC</b>  | <b>DB24106</b> |
|-------------------|----------------|
| pin 6T . . . . .  | pin 5          |
| pin 6TR . . . . . | pin 4          |
| pin 3T . . . . .  | pin 2          |
| pin 3TR . . . . . | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM24002 and DB24106.
  - 3) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, re-connect connectors DM24008 and DB24102.

### 803. RSCF ASG-L No Input from BPCU on Systems 629 Bus-L - Fault Isolation

#### A. Maintenance Messages

- (1) This task is for maintenance message: 31-17446.

#### B. Initial Evaluation

- (1) If the MAT shows ACTIVE for the maintenance message, then do the Fault Isolation Procedure below.
- (2) If the MAT shows NOT ACTIVE for the maintenance message, then there was an intermittent fault.

#### C. Fault Isolation Procedure

- (1) Replace the left ARINC Signal Gateway (ASG) card, P84A12.

These are the tasks:

ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801,

ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (2) Replace the Bus Power Control Unit (BPCU), M24002.

These are the tasks:

BPCU Removal, AMM TASK 24-41-05-000-801,

BPCU Installation, AMM TASK 24-41-05-400-801.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (3) Replace the ARINC 629 coupler, B31201, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the left ASG card to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (4) Replace the ARINC 629 coupler, B24106, in the P111 panel.

These are the tasks:

ARINC 629 Current-Mode Coupler Removal, AMM TASK 23-91-01-000-801,

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

NOTE: This coupler connects the BPCU to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
  - (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Replace the ARINC 629 coupler, B24106, in the P111 panel.

## 777-200/300 FAULT ISOLATION MANUAL

ARINC 629 Current-Mode Coupler Installation, AMM TASK 23-91-01-400-801.

**NOTE:** This coupler connects the left CTC to the Systems 629 Bus-L.

- (a) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (b) If the MAT shows ACTIVE for the maintenance message, then continue.
- (5) Do this check of the wiring from the ASG-L to the coupler:
  - (a) Remove the left ASG card, P85A12. To remove it, do this task: ARINC Signal Gateway (ASG) Card Removal, AMM TASK 31-09-02-000-801.
  - (b) Disconnect connector DB31101 from the coupler B31101.
  - (c) Do a wiring check between these pins of connector XA12 at the P85A12 slot and connector DB31101 at the P111 panel (SSM 31-09-12):

| <b>XA12</b> | <b>DB31101</b> |
|-------------|----------------|
| pin 10      | pin 5          |
| pin 7       | pin 4          |
| pin 9       | pin 2          |
| pin 6       | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connector DB31101.
  - 3) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
  - 4) If the MAT shows NOT ACTIVE for the maintenance message (or if the message does not show), you corrected the fault.
- (e) If you do not find a problem with the wiring, then continue.
- (f) Re-connect connector DB31101.
- (g) Re-install the left ASG card, P85A12. To install it, do this task: ARINC Signal Gateway (ASG) Card Installation, AMM TASK 31-09-02-400-802.
- (6) Do this check of the wiring from the left CTC to the coupler:
  - (a) Disconnect connector DM21631 from the left CTC, M21631.
  - (b) Disconnect connector DB21631 from the coupler B21631.
  - (c) Do a wiring check between these pins of connector DM21631AD at the left CTC and connector DB21631 at the P111 panel (WDM 21-61-11):

| <b>DM21631AD</b> | <b>DB21631</b> |
|------------------|----------------|
| pin 1T           | pin 5          |
| pin 1TR          | pin 4          |
| pin 2T           | pin 2          |
| pin 2TR          | pin 1          |

- (d) If you find a problem with the wiring, then do these steps:
  - 1) Replace the ARINC 629 wiring (SWPM 20-11-11).
  - 2) Re-connect connectors DM21631 and DB21631.
